# ABSTRACT

This *Renewables Portfolio Standard 2017–2020 Retail Sellers Procurement Verification Commission Final Report* presents California Energy Commission staff’s findings on the amount of eligible renewable energy procured by retail sellers of electricity under California’s Renewables Portfolio Standard Program. The report presents findings for 44 retail sellers, which include investor-owned utilities (small, large, and multijurisdictional utilities), electric service providers, and community choice aggregators.

For each compliance period, results from the application of the verification analyses are issued separately for retail sellers and local publicly owned electric utilities. For retail sellers, the *Renewables Portfolio Standard 2017–2020 Retail Sellers Procurement Verification Commission Final Report* will be adopted as a single report by the California Energy Commission at a regularly scheduled business meeting and subsequently transmitted to the California Public Utilities Commission to be used for its compliance and enforcement. For each local publicly owned electric utility, verification results will be issued in separate reports that are also adopted by the California Energy Commission at a regularly scheduled business meeting to be used for compliance and enforcement activities.

**Keywords:** Renewables Portfolio Standard, RPS, Renewable Energy Credits, RECs, certification, verification, generation, local publicly owned electric utilities, investor-owned utilities, electric service providers, multijurisdictional utilities, community choice aggregators, RPS Online System, Western Renewable Energy Generation Information System, WREGIS

# EXECUTIVE SUMMARY

Established in 2002, California's Renewables Portfolio Standard is one of the nation's most ambitious renewable energy policies. Enacted by Senate Bill 1078 (Sher, Chapter 516, Statutes of 2002) and accelerated and expanded by subsequent legislation, California's Renewables Portfolio Standard establishes increasingly progressive renewable energy procurement targets for the state's load-serving entities. Originally applicable to retail sellers, the statewide mandatory Renewables Portfolio Standard was expanded by Senate Bill X1-2 (Simitian, Chapter 1, Statutes of 2011, First Extraordinary Session) to include local publicly owned electric utilities starting in 2011. Senate Bill 100 (De León, Chapter 312, Statutes of 2018) required load-serving entities to increase their procurement of eligible renewable energy resources to 60 percent of retail sales by 2030.

Preparation of the California Energy Commission's *Renewables Portfolio Standard 2017–2020 Retail Sellers Procurement Verification Commission Final Report* is not mandated by statute, but this report is prepared to verify findings of retail sellers' procurement claims eligibility to the California Public Utilities Commission and the public, consistent with the CEC's duties under Public Utilities Code Section 399.25. After the California Energy Commission adopts the findings as presented in this *Renewables Portfolio Standard 2017–2020 Retail Sellers Procurement Verification Commission Final Report*, a final report will be transmitted to the California Public Utilities Commission.

This report applies only to retail sellers, which include investor-owned utilities (large, small, and multijurisdictional), electric service providers, and community choice aggregators reporting claims for Compliance Period 3 (2017–2020). A total of 44 retail sellers were expected to report Renewables Portfolio Standard procurement claims during this third compliance period. California Energy Commission staff verified the eligibility of these claims for each year of the compliance period. Staff assisted retail sellers who sought to identify and resolve discrepancies in the data reported. Retail sellers had the option to dispute findings and submit additional supporting documentation or correct submitted reports, as needed, or to accept staff's draft findings.

The eligible procurement claims identified in this report were from Renewables Portfolio Standard-certified facilities with sufficient generation to cover the procurement amounts claimed. California Energy Commission staff finds the procurement claim amounts listed in this report eligible for the Renewables Portfolio Standard. Staff recommends that the procurement claim amounts count toward meeting the retail sellers' Renewables Portfolio Standard obligations for Compliance Period 3 if found by the California Public Utilities Commission to be consistent with Renewables Portfolio Standard rules for retail sellers.

During public comment period for the staff draft report, staff reverified data accuracy and identified two data accuracy issues, and this revised staff draft report incorporates changes to reflect updated data and other non-substantial changes.

# CHAPTER 1:

## Renewables Portfolio Standard

---

### Background

The enactment of Senate Bill (SB) 1078 (Sher, Chapter 516, Statutes of 2002) in September 2002 created California's Renewables Portfolio Standard (RPS) program. California's RPS establishes increasingly progressive renewable energy procurement targets for the state's load-serving entities (LSEs). Originally applicable only to retail sellers, the statewide mandatory RPS was expanded by SB X1-2 (Simitian, Chapter 1, Statutes of 2011, First Extraordinary Session) to include local publicly owned electric utilities (POUs) starting in 2011. Senate Bill 100 (De León, Chapter 312, Statutes of 2018) increased the procurement targets, requiring both retail sellers and POUs to increase their procurement of eligible renewable energy resources to 60 percent of retail sales by 2030.

California's RPS is jointly administered and implemented by the California Energy Commission (CEC) and the California Public Utilities Commission (CPUC). As part of its responsibilities, Public Utilities Code Section 399.25 mandates the CEC to 1) certify eligible renewable energy resources, 2) verify the eligibility of renewable energy procured by LSEs, 3) design and implement an accounting system to track and report renewable energy procurement for all program participants, and 4) oversee compliance and enforcement of the POUs. The CPUC is responsible for overseeing the RPS compliance and enforcement programs for retail sellers.

### Report Overview

This *Renewables Portfolio Standard 2017-2020 Retail Sellers Procurement Verification Commission Final Report* provides the results of CEC's staff verification and analysis of RPS claims submitted by retail sellers for Compliance Period 3 (CP 3) of the RPS. CP 3 covered 2017 through 2020, as specified for retail sellers in Public Utilities Code Section 399.15(b)(1)(C). This report includes the total eligible, ineligible, or withdrawn procurement claims by resource type. Appendix A of this report provides LSE Summary Claims Reports in alphabetical order.

Since the CPUC is responsible for determining retail sellers' RPS compliance, the CEC does not evaluate whether retail sellers met their RPS procurement requirements in this report. Following the adoption of this report at a regularly scheduled CEC business meeting, staff will transmit the final adopted *Renewables Portfolio Standard 2017-2020 Retail Sellers Procurement Verification Commission Final Report* to the CPUC to use in determining the compliance of retail sellers.

Because of the CPUC's use of this report for compliance, the results contained in this report will be considered final by the CEC once adopted. Accordingly, retail sellers should take care to review this report closely before adoption and identify any errors or requested revisions to the report not previously identified.

As stated, this report applies to retail sellers, which includes three large investor-owned utilities (IOU), three small and multijurisdictional utilities (SMJU), 15 electric service providers (ESP), and 23 community choice aggregators (CCA) that served electricity customer loads during CP 3 (**Table 1**).

# CHAPTER 2:

## Verification Methodology

---

As part of its administrative responsibility, the CEC verifies the RPS procurement claims of both retail sellers and POUs. The methods used by the CEC to verify generation reported by RPS certified facilities and procurement claims submitted by RPS program participants are generally described in the *Renewables Portfolio Standard Eligibility Guidebook, Ninth Edition, Revised (RPS Eligibility Guidebook)* and further detailed in the *Renewables Portfolio Standard Verification and Compliance Methodology Report, Third Edition (Methodology Report)*. [Both documents](http://www.energy.ca.gov/portfolio/documents/rps_verification.html) are found at [http://www.energy.ca.gov/portfolio/documents/rps\\_verification.html](http://www.energy.ca.gov/portfolio/documents/rps_verification.html).

For this report, the terms “renewable energy credit,” and “procurement claim” all refer to a claim submitted to the CEC by a retail seller for an amount of electricity or electricity products procured from a specific RPS-certified generation facility.

As of January 1, 2014, all procurement claims must be reported using the Western Renewable Energy Generation Information System (WREGIS), except for claims that meet the requirements specified in the *RPS Eligibility Guidebook* to be reported directly to the CEC as WREGIS Adjustments.

Since the CPUC is responsible for enforcing retail sellers’ RPS compliance, CEC staff completes only the verification analysis described in the *Methodology Report* at Chapter 2, Level 1 — Summary of Claims Eligibility, for procurement claims reported by retail sellers. The following actions have been completed for verification of retail sellers’ procurement claims for CP 3:

- Verification of the RPS eligibility of the renewable energy facilities from which each reporting retail seller is claiming procurement.
- Verification, to the extent possible, that the total amount of renewable electricity procurement claimed matches or does not exceed the generation from each eligible facility.
- Determination that the amount of renewable electricity procured from each multifuel facility or biomethane facility matches the eligible amount of renewable generation, as established in the *RPS Eligibility Guidebook*.
- Verification, to the extent possible, that procurement exclusively serves California’s RPS and is not double counted for another renewable energy regulatory or market program.
- Identification of eligible, ineligible, and withdrawn procurement claims for each retail seller.
- Determination of the total amount of eligible procurement for each year and the overall compliance period.

For CP 3, CEC staff additionally conducted a 36-month renewable energy credit (REC) retirement requirement analysis for retail sellers. The CEC’s 36-month REC retirement verification for retail sellers was completed under retirement rules codified in Public Utilities

Code Section 399.21(a)(7) and further defined in CPUC Decision 12-06-038.<sup>1</sup> Claims that did not meet the criteria of the retirement rules were flagged as not meeting the 36-month retirement requirement. Since the CPUC is responsible for determining retail sellers' RPS compliance, the CEC does not evaluate whether retail sellers met their RPS procurement requirements in this report.

---

<sup>1</sup> The CPUC's REC retirement rules are defined and found under [Decision 12-06-038](http://docs.cpuc.ca.gov/WORD_PDF/FINAL_DECISION/169704.pdf). Available at [http://docs.cpuc.ca.gov/WORD\\_PDF/FINAL\\_DECISION/169704.pdf](http://docs.cpuc.ca.gov/WORD_PDF/FINAL_DECISION/169704.pdf)

# CHAPTER 3:

## Verification Results

---

This chapter presents procurement verification findings for retail sellers subject to California's RPS requirements for CP 3 (2017–2020). A total of 44 retail sellers served electricity customer loads and were expected to report procurement claims for this compliance period. However, despite CEC staff's efforts to assist them, two ESPs did not comply with the reporting requirements and did not submit and attest to a complete set of CP 3 claims data. Agera Energy, LLC, filed for bankruptcy in October 2019 and did not report procurement claims for the entire compliance period. Liberty Power Holdings served load for two years in the compliance period and submitted procurement claims for only 2017 and 2018. The CP 3 verification findings for these two ESPs are incomplete, and the tables included in this report for these two ESPs reflect these gaps in their claims data.

CP 3 saw an increase in the number of CCAs reporting for the RPS Program. During CP 2, five CCAs reported procurement claims. For CP 3, 18 additional CCAs participated in the California RPS Program for a total of 23 CCAs. Four CCAs started reporting in 2017, 10 more in 2018, and lastly, four additional CCAs started reporting in 2020.

Staff verified 46,096 claims and 57,258,372 RECs for 2017; 37,206 claims and 63,404,482 RECs for 2018; 32,595 claims and 53,820,006 RECs for 2019; and 41,823 claims and 84,789,211 RECs for 2020. The tables in the following pages represent the verification findings for each retail seller grouped in the following categories. The number of entities in each category is also noted:

- Investor-Owned Utilities (3)
- Small and Multijurisdictional Utilities (3)
- Electric Service Providers (15)
- Community Choice Aggregators (23)

The summary results include amounts for each of the following:

- Total RPS claims reported (2017–2020).
- Ineligible claims, distinguished by the reason for the ineligible finding.
- Withdrawn claims.
- Claims eligible toward the RPS.

The source for all data presented in the summary tables is the RPS staff analysis of each identified retail sellers' WREGIS Reports for 2017, 2018, 2019, and 2020.

# Verification Results for Investor-Owned Utilities

## Pacific Gas and Electric Company (PG&E)

**Table 2: Pacific Gas and Electric Company (PG&E) Summary of RPS Claims**

<b>Overview of RPS Claims (MWh):</b>	
Total RPS Claims Reported	<b>60,732,584</b>
<b>Ineligible Claims:</b>	
Amount ineligible because facility was not RPS-certified when RECs were created	
Amount ineligible because RECs were retired more than 36 months after the vintage	
Amount ineligible due to double claiming of RECs	
Amount ineligible because facility exceeded fossil fuel usage limit or used ineligible fuel	
Amount ineligible because generation was not reported through WREGIS	
Amount ineligible because the facility's generation report was not submitted	
Amount ineligible because claim exceeded the facility's allowable generation	
Amount ineligible because RECs were retired in a compliance period that began after the date of retirement	
Amount ineligible because RECs were retired in a compliance period preceding the vintage	
Amount ineligible because RECs were retired in a compliance period preceding the date of procurement	
<b>Withdrawn Claims</b>	
Amount withdrawn by LSE	103
<b>Claims Eligible Toward the RPS</b>	<b>60,732,481</b>

# CHAPTER 4:

## RPS Eligible Procurement Analysis

---

Advancing the use and availability of renewable energy is critical to achieving California’s ambitious climate change goals. Increasing the diversity and balance of California’s energy mix is an important goal of the RPS program.<sup>2</sup> To evaluate the success of the RPS program in supporting a diverse mix of facilities, CEC staff analyzed the retail sellers’ procurement by resource type of the facilities represented in RPS procurement claims. This analysis, presented in **Table 46** below, shows the amount of eligible renewable energy claimed by each renewable resource by each year of the compliance period. It also lists the totals reported for each renewable resource during CP 1 and CP 2.

The amounts are provided separately for the three major IOUs in the state, the small and multijurisdictional IOUs, ESPs, and CCAs. Only those resource types for which claims were submitted are shown. For the analysis of RPS-eligible procurement by resource type, generation claimed in a year other than the year generated is included with the resource type for the year claimed, not the year generated.

The RPS-eligible percentage of different resource types procured by year for retail sellers, including IOUs, SMJUs, ESPs, and CCAs, is presented in **Figure 1**. **Figure 2** shows the total RPS-eligible procurement of each resource type by retail sellers for CP 3.

As the data and figures illustrate, retail sellers used a diverse renewable resource mix to satisfy RPS requirements during CP 3. The total amount of renewable energy generated and reported continues to increase every compliance period. As in CP 2, wind was the most used resource type during CP 3 (2017–2020), followed closely by solar photovoltaic. Solar photovoltaic continues to have the highest growth rate of all renewable resources. During CP 2, solar photovoltaic comprised 26 percent of the renewable resources mix, and it increased to 34 percent in CP 3. Geothermal generation decreased over this period, from 20 percent in CP 2 to 14 percent in CP 3.

---

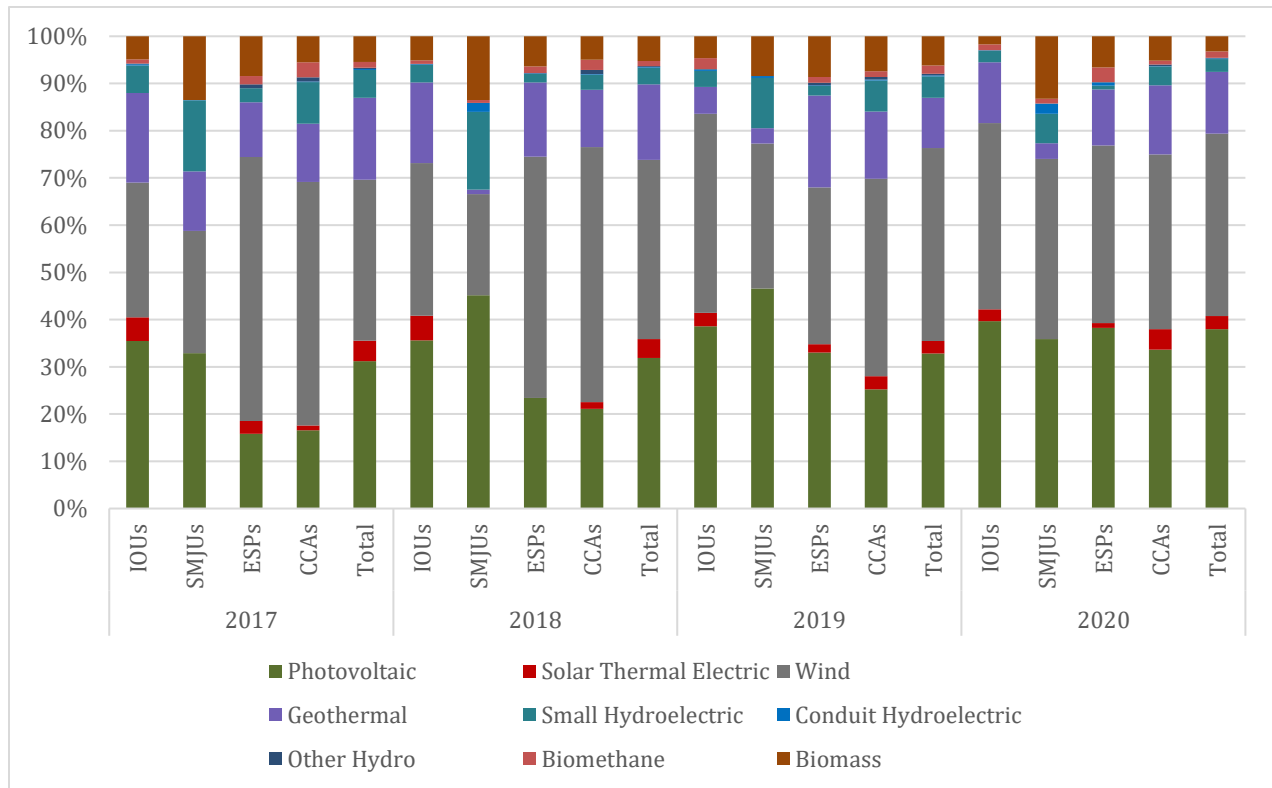

<sup>2</sup> Public Utilities Code Section 399.11.

# Glossary

---

- CCA — Community choice aggregator — As defined in Public Utilities Code Section 331.1, a *community choice aggregator* refers to any of the following entities, if that entity is not within the jurisdiction of a local publicly owned electric utility that provided electrical service as of January 1, 2003: any city, county, or city and county whose governing board elects to combine the loads of its residents, businesses, and municipal facilities in a communitywide electricity buyers' program or any group of cities, counties, or cities and counties whose governing boards have elected to combine the loads of their programs, through the formation of a joint powers agency established under Chapter 5 (commencing with Section 6500) of Division 7 of Title 1 of the Government Code.
- CEC — California Energy Commission — State Energy Resources Conservation and Development Commission. Also referred to as the Energy Commission.
- CP — Compliance period — as defined in Public Utilities Code Section 399.15 (b), this is the period in which each retail seller shall procure a minimum quantity of eligible renewable energy resources under the RPS.
- CPUC — California Public Utilities Commission — an agency that regulates services and utilities in California, including electric power, telecommunications, natural gas, and water utilities.
- ESP — Electric service provider – as defined in Public Utilities Code Section 218.3, refers to an entity that offers electrical service to customers within the service territory of an electrical corporation but does not include an entity that offers electrical service solely to service customer load consistent with Public Utilities Code Section 218 (b) and does not include an electrical corporation or a public agency that offers electrical service to residential and small commercial customers within its jurisdiction or within the service territory of a local publicly owned electric utility. An ESP includes the unregulated affiliates and subsidiaries of an electrical corporation.
- IOU — Investor-owned utility — an electrical corporation as defined by Public Utilities Code Section 218. For this RPS verification report, this definition includes Pacific Gas and Electric Company, Southern California Edison Company, and San Diego Gas & Electric Company.
- LSE — Load-serving entity — an entity that provides electric service to end users and includes retail sellers, local publicly owned electric utilities, and other entities serving retail sales of electricity in California.

- MWh — Megawatt-hour —a unit of energy equivalent to 1 megawatt of electricity supplied for 1 hour.
- PG&E — Pacific Gas and Electric Company — a California IOU that operates in the northern two-thirds of California. PG&E has reported renewable energy procurement to the RPS program since 2001.
- POU — Local publicly owned electric utility — as defined by Public Utilities Code Section 224.3, a municipality or municipal corporation operating as a "public utility" furnishing electric service as provided in Section 10001 of the Public Utilities Code, a municipal utility district furnishing electric service formed under to Division 6 (commencing with Section 11501 of the Public Utilities Code), a public utility district furnishing electric services formed under the Public Utility District Act set forth in Division 7 (commencing with Section 15501 of the Public Utilities Code), an irrigation district furnishing electric services formed under the Irrigation District Law set forth in Division 11 (commencing with Section 20500) of the Water Code, or a joint powers authority that includes one or more of these agencies and that owns generation or transmission facilities, or furnishes electric services over its owners' or its members' electric distribution system.
- REC — Renewable Energy Credit/Certificate — defined in Public Utilities Code Section 399.12 (h), to mean a certificate of proof, issued through the accounting system established by the CEC under Section 399.25, that one unit of electricity was generated and delivered by an eligible renewable energy resource.
- RPS — Renewables Portfolio Standard — California's Renewables Portfolio Standard as established in Public Utilities Code Section 399.11, et seq. and defined in Public Utilities Code Section 399.12 (i), to mean the specified percentage of electricity generated by eligible renewable energy resources that a retail seller or local publicly owned electric utility is required to procure under Public Utilities Code section 399.11 et seq.
- SB — Senate Bill — legislation that originates in the California State Senate.
- SCE — Southern California Edison Company — a California IOU that is the primary electricity supply company for much of Southern California. SCE has reported renewable energy procurement to the RPS program since 2001.
- SDG&E — San Diego Gas & Electric Company — a California IOU that provides natural gas and electricity to San Diego County and southern Orange County. SDG&E has reported renewable energy procurement to the RPS program since 2001.
- SMJU — Small and multijurisdictional utilities refer collectively to small electrical corporations that meet the requirements of Public Utilities Code Section 399.18 and MJUs that meet the requirements of Public Utilities Code

Section 399.17. This definition includes Golden State Water Company dba Bear Valley Electric Service, Liberty Utilities LLC (CalPeco Electric), and PacifiCorp.

- WECC — Western Electricity Coordinating Council means the electricity coordinating council as defined in Public Utilities Code Section 399.12 (k). WECC is part of the North American Electric Reliability Corporation and the regional entity responsible for coordinating and promoting bulk electric system reliability and security in the Western Interconnection serving all or part of the 14 states and portions of Mexico (northern Baja California) and Canada (British Columbia and Alberta).
- WREGIS — Western Renewable Energy Generation Information System is an independent renewable energy tracking system implemented for the region covered by the WECC and operated by WECC employees.

# **APPENDIX A:**

## **Retail Sellers' Summary Claims Reports**

---

Appendix A provides the Retail Sellers' Summary Claims Reports (SCR), based on the retail sellers' 2017-2020 RPS procurement claims reported through WREGIS reports. The SCRs are listed in alphabetical order, and the findings are provided in the same template for all entities. Each SCR contains the following information:

1. Reporting Year – The year for which the generation claimed was retired for the RPS.
2. CEC RPS ID – RPS Certification identification number assigned to the generating facility during the RPS certification process.
3. Facility Name - The facility name provided to the CEC by the applicant when applying for certification.
4. Resource Type - The primary renewable resource type provided by the applicant when applying for RPS certification.
5. Vintage Year - The year that the generation claimed was generated.
6. Claim Submitted (MWh) - The amount of procurement reflected in a claim retired through WREGIS and reported to the CEC in a WREGIS Report.
7. Amount Ineligible or Withdrawn (MWh) - Total ineligible or withdrawn amounts from each claim determined during verification.

**Table A-1: 3 Phases Renewables, Inc 2017-2020 RPS Summary Claims Report**

Reporting Year	CEC RPS ID	Facility Name	Resource Type	Vintage Year	Claims Submitted (MWh)	Amount Ineligible/ Withdrawn (MWh)
