- 3 HAZ-1 HMBP Chemical Inventory List
- 4 LAND-2 Cattle Trough Inspections
- 5 S & W-4 Annual Water Usage
- 6 TLSN-3 Right-of-Way
- 7 VIS-1 Surface Treatment
- 8 VIS-6 Landscaping Plan
- 9 WASTE-6 Waste Management Plan
- 10 WEAP Training Sign-In Sheets
- 11 Monthly Safety Inspections
- 12 Regulatory On-Site Inspections
- 13 Major Permits Approved or Submitted during report period

1.0 Introduction

This Mariposa Energy Project (MEP) Annual Compliance Report (ACR) #09 is being submitted to the California Energy Commission (CEC) as required in "Compliance-7" of the CEC Final Decision (MEP 09-AFC-3C). The ACR covers the ongoing operational, safety, environmental and compliance activities occurring on a routine basis. As approved by the CEC Compliance Project Manager (CPM), all ACR's shall be delivered by email exclusively.

2.0 Current Project Status – 2020

MEP is currently operated as a "peaking" facility operating under a Power Purchase Agreement (PPA) with Pacific Gas & Electric (PG&E). MEP is primarily marketed to offset bulk electric system (BES) instability to the electrical grid by providing 10-minute start-up capability by each of its four (4) GE LM6000 Gas Turbine units and has a station nominal 200 mw output rating. MEP has operated without major safety or environmental incidents in the 2022 calendar year, (January 01-December 31). Furthermore, MEP has operated without any major safety or environmental incidents since the Commercial Operation Date (COD) of October 01, 2012.

3.0 Specific Condition Activities - 2016

This section includes a description of the documents by specific CEC Conditions to be submitted as part of the ACR. (Note: CEC Conditions which have been verified by the CPM and submitted in prior ACR's are not in current or future ACR's.)

Exhibit 1, Summary of Major Equipment Failures during report period: There were no major equipment failures in the 2022 calendar year. A Letter of Attestation (LOA) has been added to the exhibit.

Exhibit 2, Exclusionary Fencing Report, BIO-10: 2022 quarterly inspection records have been added to the exhibit.

Exhibit 3 Hazardous Materials List, HAZ-1: 2022 Hazardous Materials List from the Alameda County of Environmental Health (ACDEH) California Environmental Reporting Systems (CERS) has been added to the exhibit.

Exhibit 4, Cattle Trough Inspections, LAND-2: 2022 quarterly inspection records have been added to the exhibit.

Exhibit 5, Annual Water Usage, S & W-4d: A copy of the MEP 2022 CEC-1304 (3-A Pg1) "Recordable Monthly and Annual Station Water Usage (gals)" and the 2022 BBID water supply meter calibration record have been added to the exhibit.

Exhibit 6, Right-of-Way, TLSN-3: Since Commercial Operation Date (COD) of October 01, 2012, MEP has provided evidence that "no fire prevention activities" have occurred at MEP. A Letter of Attestation (LOA) has been added to the exhibit.

Exhibit 7, Surface Treatment Report, VIS-1: MEP has no new status to report regarding surface treatment maintenance. The condition of the surfaces on all MEP structures and buildings for 2022 was in “good” condition. There was no scheduled major surface treatment activities in 2022. A Letter of Attestation (LOA) has been added to the exhibit.

Exhibit 8, Landscaping Plan, VIS-6: MEP maintains records of all Hazardous Waste Manifests and monitors waste output totals. Copies of the 2022 Hazardous Waste Manifests have been added to the exhibit.

Exhibit 8, Waste Management Plan, WASTE-6: MEP maintains records of all Hazardous Waste Manifests and monitors waste output totals. Copies of the 2022 Hazardous Waste Manifests have been added to the exhibit.

Exhibit 9, WEAP Training Sign-In Sheets: Copies of the 2022 Worker Environmental Awareness Program (WEAP) records have been added to the exhibit.

Exhibit 10, Monthly Safety Inspection Sheets: Copies of the 2022 Monthly Plant Safety Inspections have been added to the exhibit.

Exhibit 11, Regulatory On-Site Inspections: There were no 2022 Regulatory On-Site Inspections to be added to the exhibit.

Exhibit 12, Major Permits approved or submitted during ACR period: There were no 2022 Major Permits approved or submitted to be added to the exhibit.

4.0 Post-Certification Changes Approved - 2022

- No post-certification changes were approved during calendar year 2022.

5.0 Submittal Deadlines Missed - 2022

- No permit submittal condition deadlines were missed during calendar year 2022.

6.0 Listing of Permits, Filings Submitted - 2022

- No Major Permits approved or submitted in 2022.

7.0 Projected Compliance Activities - 2022

- RATA/Source Test/Biennial Source Test – February/March 2022.

8.0 Additions to Onsite Compliance File - 2022

- All documentation regarding MEP regulatory, operational, safety, environmental and NERC/WECC including complaints, violations, warnings and citations are warehoused and maintained at the site. All exhibits to the ACRs are added to the onsite compliance files.

9.0 Contingency Plan – Unplanned Facility Closure - 2022

- Mariposa Energy has no updates to Conditions 12 and 13 of the May, 2011 Mariposa Energy Project (MEP) FINAL “Commission Decision” (09-AFC-3).

10.0 Complaints, Violations, Warnings, Citations - 2022

- No public complaints were noted for Mariposa during the 2020 year.
- 2 administrative “Notice of Violations” (NOV’s) were issued to Mariposa in March 2022 regarding December 10, 2021 and December 13, 2021 unit 700 hourly exceedances of “Oxides of Nitrogen” (NOx) parts per million (ppm).
 - The emissions exceedances were minimal and within the BAAQMD “excusable tolerance limit of 10%” but the events were not reported to the BAAQMD within the 96-hour reporting window and therefore became administrative NOV’s.

Exhibit 1

Summary of Major Equip Failures during report period

**Mariposa 2022
Major Equipment Failures**

January 26, 2023

Mariposa Energy, LLC (09-AFC-3C) did not have any major equipment failures that occurred during the 2022 calendar year (January 01 - December 31).

Exhibit 2

Summary of Exclusionary Fence Inspections during report period

Mariposa Energy, LLC

Plant Exclusionary Fence Inspection

Person performing the inspection:

Name: Serge Myers

Date: 5/27/22

Are there any holes under the exclusionary fencing?

Yes

☒ No

If yes, list problems and corrective action taken/write WO if cannot be repaired immediately: _____

there were a few, plugged w/ rocks and packed dirt

Is there damage to the above ground exclusionary fencing?

Yes

☒ No

If yes, list problems and corrective action taken/write WO if cannot be repaired immediately: _____

Is there trash along the fence line?

☒ Yes

No

If yes, lists problems and corrective action taken: picked up small amount of trash.

Comments: _____

Manager Signature: 

Mariposa Energy, LLC

Plant Exclusionary Fence Inspection

Person performing the inspection:

Name: RANDALL ARMENTA

Date: 8/18/22

Are there any holes under the exclusionary fencing?

Yes

No

If yes, list problems and corrective action taken/write WO if cannot be repaired immediately: _____

Is there damage to the above ground exclusionary fencing?

Yes

No

If yes, list problems and corrective action taken/write WO if cannot be repaired immediately: _____

Is there trash along the fence line?

Yes

No

If yes, lists problems and corrective action taken: PICKED UP TRASH

Comments: _____

Manager Signature: _____

Cattle Trough Inspections, LAND-2

Mariposa Energy, LLC

Cattle Trough Monthly Inspection

NOTE: This inspection includes both cattle troughs (north and south).

Gas Turbine Technician performing the inspection:

Name: Kyle Rogers
Date: 1/4/2022

Any leaks found?:

Yes ☐ No ☒

if yes, list problems and corrective action taken/write WO if cannot be repaired immediately: _____

Do the float valves work properly?:

Yes ☒ No ☐

if no, list problems and corrective action taken/write WO if cannot be repaired immediately: _____

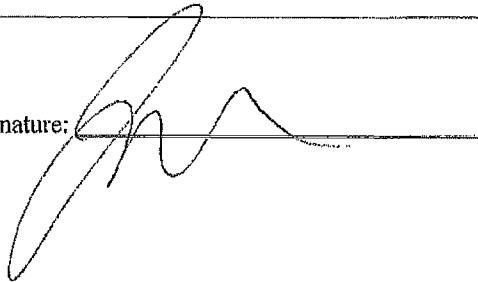

Is there debris in the troughs?:

Yes ☐ No ☒

if yes, list problems and corrective action taken: _____

- If any other problems are found, list in "comments" section below, corrective actions taken, and write WO's as required.

Comments: OK @ this time

Instrument Calibration / Verification Report

Project Name: Byron-Bethany Irrigation District Calibrations 2022

Project Number: 51385X2

Project Date: 3/1/22

Description: MEP, Flow

Instrument Type:

FIT

Manufacturer:

Siemens

Tag Ref Number:

N/A

Serial Number:

XMR:105930U241/SNR:284901U301

Transmitter Model #:

Sitrans MAG6000

Signal Output:

HART

Process Range:

0 - 2.5

Instrument Span:

0-2.5 cfs

Engineering Units:

cfs

Chem Exp Date:

N/A

Simulate transmitter outputs utilizing manufacturers diagnostic tools at the specified values below. Measure output utilizing a calibrated meter and record the results below.

Simulated Value	Expected mA Output	Actual mA Output		Display - Local / SCADA		Deviation
		As Found	As Left	As Found	As Left	
0% Span (0 cfs)	4.000	-	-	0.00	0.00	-
25% Span (0.625 cfs)	8.000	-	-	0.62	0.62	-
50% Span (1.25 cfs)	12.000	-	-	1.25	1.25	-
75% Span (1.875 cfs)	16.000	-	-	1.87	1.87	-
100% Span (2.5 cfs)	20.000	-	-	2.50	2.50	-

Comments:

**All deviations are between 'Expected mA Output' and 'Actual mA Output' (as measured with DMM in series).

This transmitter is communicating to the PLC via HART protocol. Measurements were only able to be obtained from the local OIT

Landscaping/Plant Annual Inspection

This inspection should be completed annually. Place a checkmark in the appropriate box for each item. If any response requires additional elaboration, do so in the Comments space provided, or on a separate sheet of paper. If you answer YES on any question, describe the corrective action taken at the bottom of the page.

INSPECT FOR DEAD OR DYING PLANTS AROUND RETENTION POND

WASTE PRODUCT DESCRIPTION AND CHARACTERISTICS

Waste Product Common Name: Rinsate with 19% Ammonia

Generating Waste Process: Tank cleaning of Aqua Ammonia tank

A. Hazardous Properties

U.S. EPA Hazardous Waste? ☐ Yes ☒ No

State Code(s)

135

EPA Code(s)

N/A

Waste Product:

☐ Shock ☐ Sensitive ☐ Reactive ☐ Radioactive
☐ Pyrophoric ☐ Etiological ☒ None

B. Physical Properties

Physical State: ☐ Solid ☒ Liquid ☐ Sludge ☐ Aerosol ☐ Empty Container

Any free liquids at 70°F: ☐ Yes ☒ No

Color: _____

Layers: ☐ Multi-Layered ☐ Flash Point ☐ <70°F ☐ 70-100°F ☐ 101-139°F

☐ Bi-Layered (Closed Cup Only) ☐ 140-200°F ☒ No Flash ☐ Exact _____

☐ Homogenous

Viscosity: ☒ Water ☐ Honey ☐ Motor Oil ☐ Other _____

C. Density

☒ Liquid _____ lbs/gallon

☐ Solid _____ lbs/cubic ft.

Any debris in waste? ☐ Yes ☒ No

Explain: _____

%Solids: ☐ By Weight ☒ By Volume

pH: ☐ <2 ☐ 2-5 ☐ 5.1-9

Generator Certification Statement

I hereby certify that as an authorized representative of the generator named above, all information submitted in this and all the attached documents is true and accurate. Analysis of the waste was conducted in accordance with the approved test methods in 40 CFR 261 on a representative sample as defined in 40 CFR 261.20. To the best of my knowledge, all known (40 CFR 261) and suspected hazardous components have been included in this documentation. All material and packaging will comply with all current regulations.

This certifies that the material listed above was accepted by Onsite Electronics Recycling and was processed in accordance with all local, state and federal regulations on the date indicated. Any data storage devices will be destroyed or sanitized in accordance with the NIST 800-88 Guidelines for Media Sanitation.

All services rendered by Onsite Electronics Recycling in the processing of material, are to be considered "Non-NAID AAA Certified" unless specifically agreed upon. If you would like to discuss our capabilities in performing "NAID AAA Certified" services in conjunction with the proper recycling/remarketing of your electronic devices, please feel free to contact your customer service representative. One of the main benefits of requesting NAID AAA Certified services, is the guarantee that all data bearing devices are to be recorded by date and serial number, as well as the provision of documentation representing this information, which is to be provided within 30 days of the material's receipt. Our standard "Non-NAID AAA Certified" services still maintain industry leading data security standards (Dept. of Defense & NIST.)

Re: Power Storage Solutions Battery Recycling Process

Dear Customer,

Thank you for entrusting PWR Storage Solutions LLC. d/b/a "Power Storage Solutions" with your spent lead acid batteries. As a national recycler of such batteries we take great pride and care of our unique ability to safely recycle spent batteries. We have accepted the following batteries for recycling:

Site Name: DGC Mariposa
Date removed from site: 5/28/22
Battery description: (32) NSB-155FT (1) 8DMHD
Total weight: 3744 lbs. 130 lbs.
Customer/Engineer: DGC Operations LLC

When your company entrusts its spent lead-acid batteries to Power Storage Solutions the following illustrates the process those batteries follow to the smelter.

First the batteries removed from your sites by Power Storage Solutions are taken to our consolidation facility for staging. These batteries are kept on wooden pallets inside of a warehouse on concrete floors and are uniquely identified as scrap batteries. As the total weight of those spent batteries nears 40,000 pounds, each pallet is wrapped with a plastic wrap and made ready for transport via commercial carriers. Once the scrap batteries have been accumulated one of our selected recycling partners is brought into this process to arrange for the pickup and delivery to one of their selected smelters. At the smelter the batteries are broken down into the basic components, lead, plastic and the acid which are processed and recycled.

Safeguarded by this system of recycling and our dedicated environmental pollution insurance you and your company are insulated from financial liability that could arise from the improper handling of spent lead-acid batteries.

We hope this information is helpful. We also very much appreciate your giving Power Storage Solutions the opportunity to serve you.

Sincerely,

Terrence Cummings

Terrence Cummings

 DGC Operations, LLC		Contractor Safety Training Acknowledgement	
MARIPOSA ENERGY PROJECT			
Rev: 2	Date: 03/04/19	Contractor Safety	2403.01-MEP-TOL

CONTRACTOR/COMPANY: BARTH ROBBINS

Type of Work: REPAIRING

I have read and understand the Mariposa Energy Project Contractor Onboarding Orientation. I agree to follow all applicable rules, policies, and procedures. Also, I acknowledge that I am required to follow all Mariposa safety requirements and to conduct all work in a safe manner at all times.

I also acknowledge my participation in the Worker Environmental Awareness Training (WEAP). I agree to comply with all Mariposa environmental requirements at all times.

ADDITIONAL COMMENTS/NOTE

** Plant cleanliness overall looked pretty good. I rolled up a few hoses and stored them correctly, removed and stored unused tools from workbench and back of cart**

Still no tire chocks on the demin trailer, I know we were supposed to have ordered a bunch. Ill send Kitty an email and check on the order

ADDITIONAL COMMENTS/NOTE

- Oil leaks that were found are site aux transformers that are currently being repaired and W.O is written
 - U900 turbine leaks oil in the turbine compartment from the bottom of the engine and is getting a borescope during the outage coming up, oil level in turbine is being checked frequently and oil is being cleaned up frequently, W.O is written
 - U600, 800, 900 Have leaking NOx water gear boxes that are being checked, filled and cleaned up frequently. W.O is written
 - Chiller MOD 3 700T Has a Leaking Oil Line that was Isolated Months Ago And Is In The Process OF Being Repaired

- Eye Protection I Found That There Are no Safety Glasses in the PPE Cabinet, We Will Need to Order More ASAP

- Plant Lighting Is an Ongoing Process, the lighting in the warehouse is poor half of the main lights are out, I believe we have the parts to replace/ repair they are just hard to access will need a small lift to change ballast out

INSTRUCTIONS

PERMIT VIOLATIONS - (REG 2, RULE 1, SECTION 301 AND/OR 302)

Within 30 days, a permit application must be submitted to the District's Permit Division. The permit application must reference the Violation Notice Number Shown on the front of this notice. If either the Violation Notice Number is not referenced or no permit application is received, then this matter will be referred to the District's Legal Department for legal action. Your response does not preclude further legal action.

If there are any questions regarding the submission of a Permit Application, call the Permit Services Division at (415) 749-4990.

ALL OTHER VIOLATIONS

Within 10 days, return a copy of this notice with a written description of the corrective action you have taken to prevent continued or recurrent violation. Immediate corrective action must be taken to stop the violation. This violation is subject to substantial penalty. Your response does not preclude further legal action.

A variance should be sought if it is necessary to continue to operate in violation of District Regulations. For information on eligibility for, or filing of, a variance, call (415) 749-5073.

Attn: Title V Reports

Subject: Mariposa Energy, LLC, Facility Number B9730 - 30-Day Deviation Report for failure to report indicated excess at Source #2 within 96 hours of the occurrence and late submittal of 10/30 day deviation letters.

To Whom It May Concern:

This letter is to inform you of Mariposa Energy, LLC's deviation from its Title V Operating Permit, issued in 2015.

On Monday, March 21, 2022, Mariposa Energy, LLC received Notice of Violation (NOV) #A59377 for failure to report indicated excess at Source #2 within 96 hours of the occurrence and for late submittal of the 10/30 day deviation letters.

The excess emissions occurred on 12/10/2021 during the 19:00 hour (NOV #A59377) for a duration of 7 minutes with the highest one-hour NO_x concentration at 2.6 parts per million (ppm) corrected to 15% O₂, which is 4% above the permit limit of 2.5 ppm corrected to 15% O₂ [Permit Condition #24955.17(b)]. BAAQMD Regulation 1, Section 522.6 allows for continuous emission monitors to have an accuracy limit of 20%. The excess emissions that occurred on 12/10/2021 are within the allowable accuracy per BAAQMD Regulation 1, Section 522.6.

The following are the immediate corrective actions taken by Mariposa Energy, LLC to prevent continued or recurrent violation:

- Train operating personnel to recognize and correctly respond to related air permit emissions conditions.
- Conduct end of operating day CEMS minute data reviews to confirm air permit emissions limits have not been exceeded.
- Report all deviations of excess emissions within the BAAQMD 96-hour timeline requirement.
