The Fountain Wind Project

I would like to agree that the Fountain Wind Project or similar wind energy projects should happen. Wind energy is abundant in the north state and it should be utilized. In the next 10-15 years places like Redding and much of the valley will be uninhabitable due to climate change from burning fossil fuels. We need more renewable energy production. Shasta county could easily be 100% renewable by utilizing wind, solar, hydroelectric and geothermal power sources. I urge you to consult the tribes in the area and develop a plan to create more wind farms across the county.
