CALIFORNIA ENERGY COMMISSION

CALIFORNIA NATURAL RESOURCES AGENCY

EnergyPro 9.1 Compliance Software

Approval by the Executive Director

Docket # 22-BSTD-02, Approval # 23-021623

The executive director hereby approves EnergyPro 9.1 as an update to EnergyPro 9.0, which incorporates the new versions of California Building Energy Code Compliance (CBECC) and CBECC residential (CBECC-Res) compliance managers, pursuant to Sections 1.2.1 and 1.3.2 of the 2022 Alternative Calculation Method (ACM) Approval Manual.

On December 14, 2022, the California Energy Commission (CEC) approved EnergyPro Version 9.0 as an alternative calculation method for demonstrating performance compliance with the nonresidential, multifamily, and residential provisions of the 2022 California Building Energy Efficiency Standards (2022 Energy Code). When the CEC approved EnergyPro 9.0, it directed the executive director to take actions including "reviewing and approving updates to vendor software, consistent with Section 1 of the 2022 ACM Approval Manual."

On January 23, 2023, the CEC approved CBECC 2022.2.1 and CBECC-Res 2022.2.1 as the public domain software for estimating energy consumed by nonresidential, multifamily, and residential buildings under Public Resources Code section 25402.1(a), for demonstrating compliance with the performance-based provisions of the 2022 Energy Code.

On January 28, 2023, EnergySoft, LLC submitted an application to the CEC for approval of EnergyPro 9.1 as an update to its compliance software which incorporates the compliance managers of CBECC 2022.2.1 and CBECC-Res 2022.2.1. The application contained the elements required by Section 1.1 of the 2022 ACM Approval Manual, and CEC staff determined that the application was complete and able to be approved.

Information for obtaining EnergyPro 9.1 is posted on the CEC's 2022 Energy Code Compliance Software webpage at https://www.energy.ca.gov/programs-and-topics/programs/building-energy-efficiency-standards/2022-building-energy-efficiency-1.
