I oppose re-commissioning of Diablo Canyon Nuclear Power Plant

Do not re-commission and re-certify DCNPP. Those lands it sits on should be returned to Northern Chumash Tribe and permission granted to Cal Poly, SLO County Land Conservancy and REACH to begin the proposed usage they envision for the land. The old nuclear power plant would require too much money to bring it up to any approved operational level and still it would be phased out after 3-5 years. That money would be better spent on renewal safe and non-nuclear power sources. See the article entitled, "Community partners propose conservation plan for Diablo Canyon" on page 6 of the New Times newspaper Volume 37, No. 31, dated February 16-February 23, 2023 for the full description of the proposed usage by partners in SLO county.
