“The California Energy Commission must not revoke the HERS Program for Field Verification and Diagnostic Testing without first safeguarding the HERS Program for future code cycles. The Commission’s attempt to revoke an entire industry without first identifying what new rules will be adopted in its place is reckless and unlawful. The proposed rules under 23-HERS-01 will put me and my company out of business and must not be adopted.”

What is the meaning of this??

I have a family, a disabled brother I take care of, a mortgage, bills, and have also invested thousands of dollars for required diagnostic equipment, required and approved by the CEC, in order to do the HERS Field testing currently required by the CEC.

The commission has now decided to end this program?... why?
