To whom it may concern

I am very concerned about the possibility of Hers testing not being required after alterations to customers hvac systems. I have seen first hand the benefits we provide to the consumers who just spent in most cases thousands of dollars for a new system and sadly some installers are willing to taking short cuts if allowed at the cost of the customer who is not knowledgeable enough to verify they did the job well. We are a quality assurance to home owners in all cases.

Stephanie Flournoy
