Removal of old power plants and stacks

When is the demolition scheduled to remove the old rusted and ugly power plants and stacks at Alamos Energy Center. We live direct within 500 feet of the AEC and we were told these were to be removed as soon as the new construction complete. It has now been 2 years nothing has changed other than they have added more eye-sore new structure to our skyline. Our neighborhood feels deceived by this and we are mobilizing to begin protesting all new things at the AEC very soon. We would like honest answers to when they will be demolished as they have be decommissioned for a couple of years now.
