To whom it may concern,

The California Energy Commission must not revoke the HERS Program for Field Verification and Diagnostic Testing without first safeguarding the HERS Program for future code cycles. The Commission's attempt to revoke an entire industry without first identifying what new rules will be adopted in its place is reckless and unlawful. The proposed rules under 23-HERS-01 will put me and my company out of business and must not be adopted.

According to the HERS Rulemaking Presentation that I am attending today, the CEC is stating that the proposed changes will not eliminate the Field Verification and Diagnostic Testing from future energy code cycles. Please understand that numerous HERS rating companies throughout the state will be affected if the HERS program undergoes substantial changes and will prove costly to the lives and well being of many individuals.

Regards,
Justus George
