CEC Workshop

ITI and TechNet Closing Comments

Gabriele Peterschmidt

Environmental Program Manager, Americas Region

Hewlett Packard Company

Closing Comments

- With what ITI and TechNet know about our customers' needs, there are significant concerns with CEC's initial regulatory proposal both from a technical and cost perspective.
- To help resolve this, ITI and TechNet request that CEC provide the analysis and data CEC used in drafting the Computer and Display Energy efficiency regulatory requirements.
- ITI and TechNet also recommend a full-day technical meeting between our industry, CEC staff, and other stakeholders. This meeting should include demos and other means for building an agreed, fact-based technical foundation for moving forward. We suggest that this meeting occur in late May.
- ITI and TechNet believe when there is shared information and common understanding, we can arrive at progressive and meaningful goals. ITI and TechNet will be providing to CEC additional recommendations for scope of these regulations, categorization, recommended limits and power management language.

THANK YOU
