Sacramento, CA 95814

RE: NEBB ATTCP Annual Status Report for 2022

Dear Mr. Haro,

This letter is to provide the California Energy Commission with a status update on the NEBB ATTCP program.  
**TRAINING, CERTIFICATION & REPORTING ACTIVITY:**

As of 2/27/2023, NEBB has 3 certified employers and 5 certified technicians. For this reporting period (January 2022 – December 2022):

Currently, there are 86 technician applications for certification; 17 applications are being verified, 1 is in the process of hands-on training, 68 are in the process of written exams, and 7 are under ATTCP review for payment received for certification.

Currently, there are a total of 39 employer applications for certification. 12 applications are being verified, 25 are in the process of online training, and 2 are in the written exam process.

No projects or acceptance tests have been performed under the NEBB program during this reporting period. This is not to say that no tests have been performed, but none have been done through the Document Registry at this time. Therefore there have been no quality assurance and accountability activities, including desk form reviews or onsite audits.

NEBB did not take any actions to correct problems with ATT's field performance or ATE's.

NEBB continues to meet the requirements of §10-103.2 as an ATTCP.

Please do not hesitate to contact us with any questions regarding this report.

A handwritten signature in black ink, appearing to read 'Tiffany J. Meyers', is written over a light blue horizontal line.

Tiffany J. Meyers  
NEBB Executive Vice President
