Phase 1 Environmental Site Assessment (ESA)

Draft Phase I Environmental Site Assessment Report

Document no: PPS1020220835SDO
Revision no: 0

Berkshire Hathaway Energy Renewables, LLC
Salton Sea Geothermal Project Development

Elmore North
November 1, 2022

Executive Summary

Jacobs was commissioned by Berkshire Hathaway Energy Renewables (BHER) to conduct an environmental site assessment (ESA) of the Elmore North property (Site), located in Imperial County, California. Jacobs conducted a reconnaissance visit on September 21, 2022, following a document review. This assessment was conducted in general accordance with ASTM International (ASTM) E1527-21, Standard Practice for Environmental Site Assessments (the Practice).

Site Description

The Site is located in an unincorporated area of Imperial County, approximately 5.1 miles to the northwest of Calipatria, California. The Imperial County Assessor Parcel Number for the Site is 020-100-038, located in the Niland 7.5 Minute Quadrangle, PA 2, PM 1784 of Sec 27 T11S, R13E. The Site is owned by BHER and encompasses 40 acres of undeveloped land that is bounded by Garst Road to the east. This road is unpaved. There are no structures located on the site. The adjoining properties are characterized primarily as agricultural areas. The Elmore Geothermal Power Plant is located approximately 250 feet to the southwest of the Site and the Salton Sea is located approximately 1.1 miles to the west.

Summary of Findings

Recognized Environmental Conditions

On September 6, 2022, a release of approximately 410 gallons of brine occurred at the Elmore Geothermal Power Plant. Approximately 375 gallons was contained within the plant boundaries, but it is estimated that approximately 35 gallons impacted the farmland area to the north of the plant. The release was in the form of brine mist droplets from a vent tank. The prevailing winds at the time of the release carried the brine mist northward to adjacent farmland. Based on the brine impacting the soil to the north of the Elmore Geothermal Power Plant, this area is considered a recognized environmental condition (REC). The potential for this REC to impact the Site is considered low.

De Minimis Conditions

The following de minimis condition was identified:

- Two discarded oil containers (one quart-size and one 5-gallon container) were observed on the east side of the property along Garst Road. No staining was observed in the area of the discarded oil containers. The Site is considered a *de minimis* condition based on the potential for a small quantity of the oil to have been released from the containers.

Controlled Recognized Environmental Conditions

No controlled RECs were identified.

Historical Recognized Environmental Conditions

No historical RECs were identified.

Other Environmental Considerations

The following other environmental considerations were identified:

- Historical aerial photograph records indicate that the Site had been used for agricultural purposes from 1937 through 2016. Observations from the site reconnaissance indicate that the Site continues to be used for agricultural purposes presently. Based on the historical agricultural activities, there is a potential for the soil and groundwater to harbor residual agricultural chemicals from past fertilizer, pesticide, or herbicide application.

Data Gaps and Deviations

According to the Practice, Section 3.2.20, a data gap is a lack of or inability to obtain information required by the ASTM Standard, despite good-faith efforts to gather the data. Data gaps may result from incompleteness in any of the activities required by the ASTM Standard. A data gap is considered significant if it affects the ability to identify RECs. No data gaps were identified as part of this Phase I ESA for Elmore North.

1. Introduction

1.1 Purpose

At the request of Berkshire Hathaway Energy Renewables (BHER), Jacobs conducted an environmental site assessment (ESA) of the property located at Elmore North (the Site). This report presents the results of the ESA. The ESA consisted of a site reconnaissance, interviews, and a review of readily available documents.

The ESA was conducted in general accordance with ASTM International (ASTM) E1527-21, Standard Practice for Environmental Site Assessments (the Practice). This ESA is designed to identify, to the extent feasible, recognized environmental conditions (RECs), historic recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs). "Identification" was limited to what was readily visible during the site assessment fieldwork or what was included in the records that were obtained during the ESA. The Practice provides the following definitions:

- A REC is defined in the ASTM Standard as: (1) the presence of hazardous substances or petroleum products in, on, or at the site duet to a release to the environment; (2) likely presence of hazardous substances or petroleum products in, on, or at the site due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the site under conditions that pose a material threat of a future release to the environment.
- A CREC is defined in the ASTM Standard as a REC affecting the site that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).
- An HREC is defined in the ASTM Standard as a previous release of hazardous substances or petroleum products affecting the site that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable authority or authorities without subjecting the site to any controls (for example, activity use limitations or other property use limitations).

These terms are not intended to include *de minimis* conditions related to a release that generally does not present a threat to human health or the environment and that generally would not be subject of an enforcement action if brought to the attention of appropriate government agencies. A condition determined to be a *de minimis* condition is not a REC nor a CREC.

1.2 Scope of Services

The goal of the ESA was to identify and document RECs associated with the site. This ESA report contains a qualitative assessment of likely and actual conditions at the Site, based on readily available information and field observations.

In conducting the ESA, Jacobs used information obtained from the following:

- Information provided by owner and/or occupants (Section 3)
- Documents readily available through public access venues, including an environmental database review (Section 4)
- Site reconnaissance (Section 5)
- Interviews (Section 6)

Jacobs conducted its study in a manner consistent with the Practice and generally accepted ESA practices, and believes the information contained in this report is true and correct, within the limitations and exceptions set out in Section 1.3. All findings, opinions, and conclusions stated in this report are based on

facts and circumstances as they existed during the site visit, and, as such, they are not necessarily indicative of future conditions at the site.

1.2.1 Significant Assumptions

Significant assumptions made as part of identifying RECs based on the records review, site reconnaissance, and interviews are discussed in other sections of this report. In accordance with the Practice, information collected from these sources was assumed to be correct and has not been independently verified by Jacobs, nor does Jacobs guarantee its completeness or accuracy.

1.3 Limitations and Exceptions

Pursuant to Section 13.1.5 of the Practice and the approved scope of work, this ESA does not include an analysis of the following additional issues: 1) asbestos-containing materials; 2) radon; 3) lead-based paint; 4) lead in drinking water; 5) wetlands; 6) regulatory compliance; 7) cultural and historic resources; 8) industrial hygiene; 9) health and safety; 10) ecological resources; 11) endangered species; (12) indoor air quality and/or potential for vapor intrusion; (13) biological agents; (14) mold; (15) high-voltage power lines; (16) liabilities associated with the offsite management of solid or hazardous wastes originating from this Site; and (17) worker health and safety issues or compliance.

Additionally, and in accordance with Section 7.4 of the Practice and the approved scope of work, Jacobs did not conduct any sampling, monitoring, analysis, geotechnical investigations, or quantitative evaluation of vapor migration, but relied upon reasonably ascertainable information provided by others. Jacobs assumes responsibility only for those conditions it was specifically authorized to investigate, as described herein.

1.4 Data Gaps and Deviations

A data gap is a lack of or inability to obtain information required by the Practice, despite good-faith efforts to gather the data. Data gaps may result from incompleteness in any of the activities required by the Practice. A data gap is considered significant if it affects the ability to identify RECs. No significant data gaps were encountered.

1.5 Special Terms and Conditions

This report has been prepared based on the following terms and conditions:

- Jacobs services shall be governed by the negligence standard for professional services, measured as of the time these services were performed.
- Jacobs is not responsible for claims, damages, or liabilities associated with interpretation of these findings or reuse of the analysis, associated site data, or recommendations without the express written authorization of Jacobs. Limitations of this assessment may not be altered or waived without the written consent of Jacobs.
- Jacobs staff who performed this site assessment and report are not attorneys. This is a technical report and is not a legal representation or interpretation of any environmental law, rule, regulation, or policies of local, state, or federal governmental agencies.
- Contractor does not warrant or guarantee conclusions set forth in the report which are dependent or based upon data, information, or statements supplied by Company or third parties. Any opinions or recommendations presented herein apply to site conditions existing when the services were performed. Jacobs is unable to report on or accurately predict events that may change the site conditions after the described services were performed, whether occurring naturally or caused by external forces. Additionally, Jacobs cannot provide any assurance as to the absence or presence of surface or subsurface contamination at the site. Contractor assumes no responsibility for conditions we are not authorized to investigate, or which are not in our specific scope of work.

- In preparing this ESA report, Jacobs relied, in whole or in part, on data and information provided by BHER and third parties, which information has not been independently verified by Jacobs, and which Jacobs has assumed to be accurate, complete, reliable, and current. Therefore, while Jacobs has used its best efforts in preparing this report, Jacobs does not warrant or guarantee the conclusions set forth in this report, which are dependent or based upon data, information, or statements supplied by third parties or BHER.

1.6 Reliance Disclaimer

In preparing this ESA report, Jacobs relied, in whole or in part, on data and information provided by the BHER and third parties, which information has not been independently verified by Jacobs and which Jacobs has assumed to be accurate, complete, reliable, and current. Therefore, while Jacobs has used its best efforts in preparing this report, Jacobs does not warrant or guarantee the conclusions set forth in this report, which are dependent or based upon data, information, or statements supplied by third parties or the BHER.

This report is intended for BHER's sole and exclusive use and is not for the benefit of any third party and may not be distributed to, disclosed in any form to, used by, or relied upon by, any third party without prior written consent of Contractor, which consent may be withheld in its sole discretion.

Use of this report or any information contained herein, if by any party other than BHER, shall be at the sole risk of such party and shall constitute a release and agreement by such party to defend and indemnify Jacobs and its affiliates, officers, employees and subcontractors from and against any liability for direct, indirect, incidental, consequential, or special loss or damage or other liability of any nature arising from its use of the report or reliance upon any of its content. To the maximum extent permitted by law, such release from and indemnification against liability shall apply in contract, tort (including negligence), strict liability, or any other theory of liability.

1.7 Third-party Beneficiaries

This Agreement gives no rights or benefits to anyone other than the BHER and Jacobs and has no third-party beneficiaries. All work products will be prepared for the sole and exclusive use of BHER and is not for the benefit of any third party and may not be distributed to, disclosed in any form to, used by, or relied upon by, any third party without the prior written consent of Jacobs, which consent may be withheld in its sole discretion. BHER agrees to indemnify Jacobs and Contractor's officers, employees, subcontractors, and affiliated corporations from all claims, damages, losses, and costs, including but not limited to litigation expenses and attorney's fees arising out of or related to the unauthorized disclosure, reuse, change, or alteration of such work product.

If BHER requests Jacobs' consent for a third party to depend upon an ESA report as part of the BHER's financing efforts or in connection with decisions regarding sales and acquisitions, such consent will be considered given upon the third party's execution of a Reliance Letter with suitable terms and conditions as provided by Jacobs.

2. Site Description

2.1 Location and Site Features

The Site is located in an unincorporated area of Imperial County, approximately 5.8 miles to the northwest of Calipatria, California (Figure 2-1). The Site is owned by BHER and encompasses 40 acres of undeveloped land.

2.2 Site Setting and General Vicinity Characteristics

The Site is bounded by Garst Road to the east (Figure 2-2), which is an unpaved road. There are no structures located on the Site. The adjoining properties include primarily agricultural areas. The existing Elmore Geothermal Power Plant is located approximately 250 feet to the east of the Site and the Salton Sea is located approximately 1.1 miles to the west.

2.2.1 Topography, Drainage, and Surface Water

The Site has a generally flat topography with an elevation ranging from -220 to -223 feet below mean sea level. The grade decreases gently from east to west.

2.2.2 Physiography and Geology

The Site is situated in the Imperial Valley, which is within a large geologic feature identified as the Salton Trough, a rift valley or graben that extends approximately 1,000 miles long. This graben was formed approximately 5 million years ago when the San Andreas Fault system and the East Pacific Rise split Baja California from mainland Mexico. The Gulf of California forms the southern portion of this rift valley and the northern portion is referred to as the Salton Trough. This rift valley has continued to open as a result of tectonic plate activity. The Pacific Plate is to the west while the North American Plate is to the east. Large loads of silt from the Colorado River may have begun to be deposited in the upper trough as early as 5.5 million years ago (Chambers Group, Inc. 2021).

A dam of sufficient height formed, which isolated the Imperial Valley and Coachella Valley portion of the Salton Trough from the Gulf of California during the Pliocene Epoch (2 to 4 million years ago). Although the Salton Trough is more than 200 feet below sea level, the silt dam continues to keep seawater from entering the Salton Trough. It has been suggested that during the late Pleistocene, the Colorado River occasionally began flowing into the Salton Trough as evidenced by a series of high freshwater lake stands that occurred. Between 25,000 and 45,000 years ago, these Pleistocene freshwater lake shorelines ranged in elevation up to 170 feet above sea level. The elevation of the Pleistocene lake stands is a result of the corresponding elevation of the natural silt dam that separates the Gulf from the Salton Trough. The lake stands that were deposited have been referenced as Lake Cahuilla referring to both the Pleistocene and Holocene lakes (Chambers Group, Inc. 2021).

2.2.3 Hydrogeology

The boundaries of the Imperial Valley are comprised of the Salton Sea to the north and south, the All-American Canal (AAC) on the south, East Highline Canal on the east, and Westside Main Canal on the west. Inflow of irrigation water from the Colorado River via the AAC is primary source of surface waters in the area (Chambers Group, Inc. 2021).

The Imperial Valley is located within California's Colorado River Hydrologic Region (IWF 2012). The shallow aquifers that are present beneath the Imperial Valley are impacted by the inflow of water from the Colorado River, the evaporation rate, the application of agricultural tile drains beneath farmlands, and seepage from drains and rivers. The most important source of recharge into shallow groundwater aquifers

is likely the Colorado River, providing roughly 10 percent through percolation to underlying aquifers. The AAC and the East Highline canals contribute to recharge because they are unlined; they are in some areas up to 200 feet wide; the AAC flows through many miles consisting of sandy terrain; and the general groundwater levels are lower than the canals (County n.d.; Chambers Group, Inc. 2021).

The Imperial Region includes the following groundwater basins: portions of the Coyote Wells Valley Basin, Borrego Valley Basin, Ocotillo-Clark Valley Basin, West Salton Sea Basin, Ogilby Valley Basin, and all of the Imperial Valley Basin, East Salton Basin, and East Amos Valley Basin, comprising a total of approximately 2,800 square miles (IWF 2012). The Salton Sea is the major surface water body within the region, and drainage to the Salton Sea is via the New River and Alamo River, several direct-to-sea drains, and various washes (Chambers Group, Inc. 2021).

2.2.4 Climate

According to Weather-US.com, in Calipatria, California, located approximately 5 miles to the southeast, the average monthly high temperature ranges from 105.8 degrees Fahrenheit (°F) in July to and average low temperature of 50.4°F in December. The annual average precipitation is about 3.46 inches of rainfall and 0 inch of snowfall (Weather-US.com n.d.).

2.3 Historical and Current Use of the Site

Aerial photographs show that the property was used for agricultural purposes from 1937 to 2016. In 1976, the Site appears to no longer be used for agricultural purposes. From 1976 to present, the Site appears to be undeveloped with raised berms traversing the property from the northeast to the southwest that appear to be used for managing surface water ponding. No Sanborn maps were identified for the Site that may indicate historical uses. In 1989, the Site was purchased by BHER. The Site was formerly owned by James and Barbara Smith.

2.3.1 Adjoining Properties

The current uses of the adjoining properties are described in Table 2-1.

Table 2-1. Current Uses of Adjoining Properties

Direction	Current Use
North	Undeveloped land/agricultural use
East	Undeveloped land/agricultural use
South	Undeveloped land/agricultural use and the existing Elmore Geothermal Power Station to the south/southwest
West	Undeveloped land/agricultural use

3. Property Owner/Property User-provided Information

3.1 Title Records

By agreement with BHER, a title search was not part of Jacobs scope of work for this project.

3.2 Environmental Liens or Activity and Use Limitations

By agreement with BHER, an Environmental Lien or Activity and Use Limitation search was not part of Jacobs' scope of work for this project. However, the Environmental Data Resources, Inc. (EDR) report identified no environmental liens or activity and use limitations for the Site.

3.3 Specialized Knowledge

Jacobs was not provided with any specialized knowledge or reports regarding the Site.

3.4 Valuation Reduction for Environmental Issues

This subsection refers to actual knowledge of whether the purchase price of the Site under the Phase I ESA is significantly less than the purchase price of comparable properties. By agreement with BHER, no valuation reduction information has been provided to or acquired by Jacobs during this Phase I ESA.

3.5 Owner, Site Manager, and Occupant Information

The Site is owned by Magma Power Company, a wholly-owned subsidiary of BHER.

3.6 Reason for Performing Phase I

This Phase I ESA has been performed to provide a baseline assessment of the Site for BHER.

4. Records Review

4.1 Environmental Record Sources

Jacobs contracted with EDR to review available regulatory agency databases for properties within the various ASTM-prescribed radii of the site. The search radius was extended up to 2 miles to cover both the Elmore North Site and Black Rock Site. The specific radii are identified according to source in the complete database search, which is provided in Appendix A. Appendix A also provides a listing of databases searched to identify generators and transporters of hazardous wastes, hazardous waste treatment, storage, and disposal facilities, and sites where releases of hazardous materials were identified.

Table 4-1 lists the number of sites by regulatory database within the prescribed minimum search distance appearing in the regulatory data report.

4.1.1 Site

According to the EDR, there were no locations of environmental concern identified at the Site.

4.1.2 Surrounding Sites

Multiple properties surrounding the property were identified in the EDR database search. These surrounding sites were ruled out as potential RECs based on their distance from the property (greater than 0.2 mile), location with respect to the property (for example, lower in elevation, downgradient, or cross gradient with respect to groundwater flow direction), regulatory status (for example "case closed"), or because they are characterized as having no impacts to the soil or groundwater. The majority of the sites listed in the EDR report include properties that are required to report the usage, storage, or transportation of hazardous materials/wastes. These environmental records for these properties do not necessarily indicate a release of hazardous substances but provide an indication of the use of the property.

On September 6, 2022, a release of approximately 410 gallons of brine occurred at the Elmore Geothermal Power Plant. Approximately 375 gallons was contained within the plant boundaries, but it is estimated that approximately 35 gallons impacted the farmland area to the north of the plant. The release was in the form of brine mist droplets from a vent tank. The prevailing winds at the time of the release carried the brine mist northward to the adjacent farmland (CalEnergy Operating Corporation, 2022). Based on the brine impacting the soil to the north of the Elmore Geothermal Power Plant, this area is considered a REC.

4.2 Historical Use Information of Site and Adjacent Properties

Jacobs performed a review of historical aerial photographs and U.S. Geological Survey topographical maps, provided by EDR, to obtain historical use information for the site and adjacent properties (EDR 2022). The search results and associated documentation are provided in Appendix A.

4.2.1 Aerial Photographs

Aerial photographs provided by EDR covered the period from 1937, 1949, 1953, 1976, 1984, 1992, 1996, 2002, 2005, 2009, 2012, and 2016. From 1937 through 2016, the aerial photograph show the Site as being used for agricultural purposes. Based on the historical agricultural activities, there is a potential for the soil or groundwater to harbor residual agricultural chemicals from past fertilizer, pesticide, or herbicide application. No structures are present on the Site. The Site is bounded on the east by an unpaved road.

EDR conducted a search for current and historical topographic maps. Topographic maps depict cultural and natural surface features and elevation contours. Topographic maps were provided for the years 1945, 1947, 1956, 1976, 1995, 2012, 2015, and 2018. In the 1995 topographic map, there are buildings shown where the Elmore Geothermal Power Plant is located. In the 2012 topographic map, the Site is bounded by Garst Road on the east.

4.2.2 Sanborn Maps

No Sanborn Fire Insurance Maps were identified by EDR for the Site.

4.2.3 City Directory

EDR conducted a search for current and historical city directories for the Morton Bay Site. A city directory was provided for the year of 2017, 2014, 2010, 2005, 2000, 1995, and 1992. For these years, the city directory identified the following entities listed at the cross street of Garst Road and West Sinclair: the United States Government, U.S. Fish & Wildlife Department, Services, Cooper Cameron Corporation, Magma Operating Co., Quintero Pablo, Kevin Des Roberts, Modesta Huerta, and Red Hill Geothermal. No other city directory information was identified.

4.2.4 Oil and Gas Maps

Oil and gas maps were reviewed from the California Department of Conservation, Geologic Energy Management Division (formerly Division of Oil, Gas, and Geothermal Resources) website to determine whether oil, gas, or geothermal wells are present within a 0.25-mile radius of the Site (CalGEM 2019). The results of the review identified eight wells within 0.25 mile of the Site as follows:

Geothermal Well
API: 02591254
Lease Name: Elmore

Location: Approximately 1,600 feet south of the Site

4.2.5 National Pipeline Mapping System

Jacobs reviewed the National Pipeline Mapping System (DOT 2022) public viewer website for gas transmission pipelines and hazardous liquid trunk lines on or close to the Site. According to the information reviewed, there are no transmission pipelines or hazardous liquid trunk lines within 1 mile of the Site.

4.3 Vapor Encroachment Screening

Jacobs conducted a Tier 1 vapor encroachment screening (VES) as part of this assessment. This screening was conducted in general accordance with the ASTM E2600-15, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. The objective of the VES is to determine whether a vapor encroachment condition (VEC) exists or does not exist.

4.3.1 Site

No onsite sources of vapor encroachment (for example, UST, contaminated soil, groundwater plume) were identified during this assessment as none were found to be present.

4.3.2 Offsite

To conduct the VES of the nearby area, Jacobs conducted a detailed review a of the site-specific environmental database report with particular focus on the follow listings:

1. Offsite properties that are impacted by chlorinated volatile organic compounds (VOCs) and/or semivolatile organic compounds (SVOCs) and are located within approximately 0.5 mile of the Site.
2. Offsite properties that are impacted by petroleum hydrocarbons and are located within approximately 1/8 mile of the Site.

A review of the environmental database indicates that no chlorinated VOC/SVOC and no petroleum hydrocarbon-impacted sites are present within the previously mentioned radii of the site. Based on current available information, it is Jacobs' opinion that there is no VEC at the site from an offsite source.

4.4 Historical Assessments

No prior Phase I ESAs for this property were located or made available.

5. Site Reconnaissance

5.1 Methodology and Limiting Conditions

This report is based in part on observations made by Jacobs during a site visit conducted on September 21, 2022, to visually survey the site and identify evidence of RECs. During the site visit it was 97°F. Photographs from the site visit are presented in Appendix B.

5.2 General Site Setting

5.2.1 Description of the Site

The Site consists of land that has never been developed and has no current infrastructure or buildings. The Site is currently used for agricultural operations.

5.2.2 Storm Sewers

The Site is not connected to any sanitary or storm sewers.

5.2.3 Water Resources

There is a water canal along the east side of the Site, parallel to Garst Road.

5.2.4 Transformers and Polychlorinated Biphenyl-containing Equipment

There is no evidence of transformers or polychlorinated biphenyl (PCB)-containing equipment on the Site.

5.2.5 Underground Storage Tanks

There is no evidence of USTs present on the Site.

5.2.6 Aboveground Storage Tanks

No ASTs were observed on the Site.

5.2.7 Hazardous Material Storage and Waste Areas

There is no evidence of hazardous material storage or waste areas on the Site. Two discarded oil containers (one quart-size and one 5-gallon container) were observed on the east side of the property along Garst Road. No staining was observed in the area of the discarded oil containers. Based on the potential for a small quantity of the oil to have been released from the containers, it is considered a *de minimis* condition.

5.2.8 Nuclear Material Use

There is no information indicating current or former presence of nuclear material at the Site.

5.2.9 Stressed Vegetation

No stressed vegetation was observed during the site visit.

5.2.10 Oil and Gas Wells

There is no evidence of oil and gas present on the Site.

5.2.11 Site Access, Fencing, Security

No fence was observed on the Site. A fence is present around the existing Elmore Geothermal Power Plant, located southwest of the Site.

5.2.12 Other Environmental Considerations

No other environmental conditions were observed.

6. Interviews

6.1 Interview with Site Personnel

No in-person interviews were conducted with site personnel. On September 29, 2022, Jacobs sent a Property Owner/Property User Phase 1 questionnaire to the client. The questionnaire was returned on October 17, 2022.

The following information summarizes the responses from both the questionnaires. No environmental liens against the property have been filed or recorded under federal, Tribal, state, or local law. No activity use limitations are in place at the site, and there are no environmental permits for the property. No previous environmental studies or reports have been conducted on the property, and it is not listed under any regulatory agency as a site requiring cleanup under any environmental law. Specific chemicals, spills, chemical releases, or environmental cleanups are unknown, and the site has not been used as waste disposal site. No hazardous substances, asbestos-containing materials, or PCB-containing equipment have been used, disposed, or stored on site. There are no current, or previous, registered or unregistered storage tanks above or below ground.

6.2 Interview with State and Local Government Officials

No interviews with state and local government officials were conducted, as referenced in Section 1.4. However, a search of the online environmental databases was performed of the California State Water Resources Control Board's GeoTracker website and the California Regional Water Quality Control Board, Los Angeles Region and the Department of Toxic Substances and Control EnviroStor website to identify whether any hazardous materials sites would have the potential impact the site. No environmental sites of concern that would impact the site were identified.

7. Environmental Site Assessment Findings

The findings, opinions, and conclusions regarding known or suspected RECs, HRECs, CRECs, and *de minimis* conditions identified on the property are based on the records review, regulatory database searches, site reconnaissance, and interviews conducted during the preparation of this Phase I ESA.

7.1 Recognized Environmental Conditions

A REC is defined in the ASTM Standard as: "(1) the presence of hazardous substances or petroleum products in, on, or at the site duet to a release to the environment; (2) likely presence of hazardous substances or petroleum products in, on, or at the site; (3) the presence of hazardous substances or petroleum products in, on, or at the site under conditions that pose a material threat of a future release to the environment. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be subject to enforcement action if brought to the attention of the appropriate government agencies." According to these guidelines, one REC was identified adjacent to the Site.

On September 6, 2022, a release of approximately 410 gallons of brine occurred at the Elmore Geothermal Power Plant. Approximately 375 gallons was contained within the plant boundaries, but it is estimated that approximately 35 gallons impacted the farmland area to the north of the plant. The release was in the form of brine mist droplets from a vent tank. The prevailing winds at the time of the release carried the brine mist northward to the adjacent farmland. Based on the brine impacting the soil to the north of the Elmore Geothermal Power Plant, this area is considered a REC. The potential for this REC to impact the Site is considered low.

7.2 Controlled Recognized Environmental Conditions

A CREC is defined in the ASTM Standard as "a REC affecting the site that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)." According to this definition, no CRECs were identified at the Site.

7.3 Historical Recognized Environmental Conditions

An HREC is defined in the ASTM Standard as "a previous release of hazardous substances or petroleum products affecting the site that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable authority or authorities without subjecting the site to any controls (for example, activity use limitations or other property use limitations)." According to this definition, no HRECs were identified at the Site.

7.4 *De Minimis* Conditions

De minimis is clarified in the ASTM Standard as "related to a release that generally does not present a threat to human health or the environment and that generally would not be subject of an enforcement action if brought to the attention of appropriate government agencies." A condition determined to be a *de minimis condition* is not a REC nor a CREC. According to these guidelines, two discarded oil containers (one quart-size and one 5-gallon container) were observed on the east side of the property along Garst Road. No staining was observed in the area of the discarded oil containers. The potential for a small quantity of the oil to have been released from the containers is considered a *de minimis* condition.

7.5 Other Environmental Considerations

The following other environmental considerations were identified:

- Historical aerial photograph records indicate that the Site had been used for agricultural purposes from 1937 through 2016. Observations from the site reconnaissance indicate that the Site continues to be used for agricultural purposes presently. Based on the historical agricultural activities, there is a potential for the soil or groundwater to harbor residual agricultural chemicals from past fertilizer, pesticide, or herbicide application.

7.6 Data Gaps and Deviations

According to Section 3.2.20 of the Practice, a data gap is a lack of or inability to obtain information required by the ASTM Standard despite good-faith efforts to gather the data. Data gaps can result from incompleteness in any of the activities required by the ASTM Standard. A data gap is considered significant only if it affects the ability to identify RECs. No significant data gaps were identified as a result of this Phase I ESA.

8. Environmental Professional Statement

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Title 40 *Code of Regulations* (CFR) Part 312, §312.10.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject site. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312, and the limitations of the client scope of work and limitations and data gaps listed in this report.

Joe Aguirre, Environmental Engineer

Dave Golles, Senior Technical Reviewer'

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List
US INST CONTROLS ---------- Institutional Controls Sites List

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE ---------- State Response Sites

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF ---------- Solid Waste Information System

Lists of state and tribal leaking storage tanks

LUST ---------- Geotracker's Leaking Underground Fuel Tank Report
INDIAN LUST ---------- Leaking Underground Storage Tanks on Indian Land
CPS-SLIC ---------- Statewide SLIC Cases

Lists of state and tribal registered storage tanks

FEMA UST ---------- Underground Storage Tank Listing
UST ---------- Active UST Facilities
INDIAN UST ---------- Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

INDIAN VCP ---------- Voluntary Cleanup Priority Listing
VCP ---------- Voluntary Cleanup Program Properties

Lists of state and tribal brownfield sites

BROWNFIELDS ---------- Considered Brownfieds Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS ---------- A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

SWRCY ---------- Recycler Database
INDIAN ODI ---------- Report on the Status of Open Dumps on Indian Lands
DEBRIS REGION 9 ---------- Torres Martinez Reservation Illegal Dump Site Locations
ODI ---------- Open Dump Inventory
IHS OPEN DUMPS ---------- Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL ---------- Delisted National Clandestine Laboratory Register
HIST Cal-Sites ---------- Historical Calsites Database
SCH ---------- School Property Evaluation Program
CDL ---------- Clandestine Drug Labs
Toxic Pits ---------- Toxic Pits Cleanup Act Sites
US CDL ---------- National Clandestine Laboratory Register
PFAS ---------- PFAS Contamination Site Location Listing
AQUEOUS FOAM ---------- Former Fire Training Facility Assessments Listing

Local Lists of Registered Storage Tanks

SWEEPS UST ---------- SWEEPS UST Listing

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LF ---- Recovered Government Archive Solid Waste Facilities List
RGA LUST ---- Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes

available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/26/2022 has revealed that there is 1 SEMS-ARCHIVE site within approximately 2 miles of the target property.

CALENERGY-SALTON SEA	***6922 CRUMMER RD***	***SW 1 - 2 (1.959 mi.)***	***J159***	***1123***

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 5 RCRA-LQG sites within approximately 2 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA-SQG site within approximately 2 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/25/2022 has revealed that there are 2 ENVIROSTOR sites within approximately 2 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 2 miles of the target property.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, has revealed that there are 4 US AIRS sites within approximately 2 miles of the target property.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 05/13/2022 has revealed that there are 25 FINDS sites within approximately 2 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2021 has revealed that there are 19 HAZNET sites within approximately 2 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 04/18/2022 has revealed that there are 26 CERS sites within approximately 2 miles of the target property.

HWTS: DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

A review of the HWTS list, as provided by EDR, and dated 04/05/2022 has revealed that there are 28 HWTS sites within approximately 2 miles of the target property.

Violation Date: 05-03-2018
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 05/29/2018. Used oil filters are not manipulated to remove oil from metal containers. The used oil filters are thrown into a used oil contaminated debris rolloff for disposal CORRECTIVE ACTION: Manipulate the used oil filters to remove oil. Once this is done, you can dispose in the rolloff, or dispose the metal filters in a separate container. If you choose not to manipulate the filters, you must dispose of them as used oil.

THERMASOURCE, INC. (Continued) **S118099820**

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	"Failure to prepare an SPCC Plan which fulfills all basic requirements that include: 1. The SPCC Plan must be prepared in accordance with good engineering practices. 2. Have full approval of management at a level of authority to commit the necessary resources to fully implement the SPCC Plan. 3. Prepare the SPCC Plan in writing. 4. Follow the sequence of the SPCC rule or include a cross-reference. 5. If the SPCC Plan calls for additional procedures, methods, or equipment not yet fully operational, discuss the items in separate paragraphs."
Violation Notes:	Returned to compliance on 05/29/2018. The SPCC plan has the following errors that need to be corrected: Appendix I is missing. This appendix is considered part of compliance for numerous sections of 40 CFR 117.7 and 112.8 Inspections, tests, and records are found in section 3.6, not 3.5 as identified on the cross reference page. Section 4.3 Conformance with State requirements, does not address the State requirements. CORRECTIVE ACTION: Make the corrections to the Plan as required. Submit a corrected SPCC plan to the DTSC Imperial CUPA.

Name:	SALTON SEA UNIT VI 04-022
Address:	7030 GENTRY ROAD
City:	CALIPATRIA
Facility ID:	West Colorado River 132239001
Facility Type:	Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.

Treat To Water:	Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.

SALTON SEA UNIT VI 04-022 (Continued) **S106447161**

Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
WATER TREATMENT PLANT
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR SYNTHETIC MINOR
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.
HAZARDOUS AIR POLLUTANT MAJOR
ELECTRIC GENERATOR

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Fax:	920-403-9002
Business type:	C
Preparer other function:	Not reported

Description of Events:

During transfer of product from cargo tank to customer storage tank, the driver noticed a wet spot under the belly of the trailer. He put a spill pad and bucket under it to complete the unload. There was less than 1/2 teaspoon of product in the bucket after the unload.

Recommendations/Actions Taken to Prevent Future Incidents:

A slight crack in the floor area of the cargo tank was noted during inspection of the trailer after it was cleaned. It has been repaired and retested. If more manufacturers would provide container compatibility
information with their products, it would help us determine the type of trailer to use and prevent possible corrosion issues to develop over time.

Shipper Details:

Shipper ID:	431194
Shipper name:	Nalco Company
Address:	Route 65

7029 GENTRY RD. (Continued) **2008430716**

Not reported
Shipment origin country: US

Details of material being shipped:
Material ID: 437265
Material name: ENVIRONMENTALLY HAZARDOUS SUBSTANCES, LIQUID, N.O.S.
UN ID: UN3082
Hazard class code: 90
Trade name: Sodium phosphate,tri
Packing group: III
Amount reported released: 0.500000 Teaspoon(s)
Amount released: 0 Teaspoon(s)
Material listed as hazardous waste: False
EPA manifest number of haz. waste: Not reported
Material listed as toxic inhalant: False
Hazard zone of toxic inhalant: Not reported
Material shipped under exemption/ approval/ Competent Authority Cert.
False
Exemption/approval/CAC number: Not reported
Undeclared Hazmat shipment: False
Package ID: 437708
Hazmat shipment destination: 7029 Gentry Rd,
CALIPATRIA, CA 92233
Package type: C
Package other description: Not reported
Packaging markings: DOT 407
Package code: 433
Radioactive packaging indicator: Not reported
Radioactive cert. indicator: Not reported
Radioactive cert. No: Not reported
Rad. nuclide(s) present: Not reported
Transport index: Not reported

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date:	12-03-2019
Citation:	22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description:	Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes:	Returned to compliance on 02/20/2020. Hoch: Two 55-gallon drums that previously held coolant/antifreeze not dated when emptied. These are by the emergency generators. There are numerous 110-gallon and 240-gallon containers that are not dated when emptied. These are by the cooling tower. CORRECTIVE ACTION: Date all empty containers on with the date they became empty. Properly dispose of these containers in accordance with generator requirements.

Citation:	22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 02/20/2020. Hoch: Absorbent inside the secondary containment where the used oil container is kept. There is a five-gallon bucket under the diesel fuel fill pipe that has diesel fuel inside it. There is a five-gallon used oil bucket inside the secondary containment for the TG-101 Oil console that has oil on the lid. The secondary containment this bucket is in also contains used oil. The secondary containment for the five motors to the left of the console has oily water and sludge in it. Two of the motors are leaking. Vulcan Maintenance Area: There is oily water in the trough under the four 55-gallon drums of oil and hydraulic fluid. There is oily water and oily absorbent in the secondary containment also. There is absorbent left on the floor in the maintenance shop. There were no workers around. The secondary containment for the oil filter crushing machine has oily water in it. The five-gallon bucket under the filter

DEL RANCH POWER PLANT 91-051 (Continued) **S102266891**

Solid Waste Assessment Test Program:	Not reported
Threat to Water Quality:	Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.

Name: DEL RANCH GEO HLDG BSN 03-078
Address: 7001 GENTRY RD
City: CALIPATRIA
Facility ID: West Colorado River 132040015
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: Not reported
Subregion: 7
Facility Telephone: 7603484039
Facility Contact: RAY KELLNER
Agency Name: DEL RANCH LP
Agency Address: 7030 GENTRY ROAD
Agency City,St,Zip: CALIPATRIA 92233
Agency Contact: JEFF LAMOURE
Agency Telephone: 7603484032
Agency Type: Private
SIC Code: 1781
SIC Code 2: 4911
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste: DRILLS
Waste Type2: D
Waste2: Drilling Muds
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste: Drilling Brine Waters (Includes oil field and geothermal, aquifer reclamation extraction)
Secondary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Design Flow: 1
Baseline Flow: 0

DEL RANCH GEO HLDG BSN 03-078 (Continued) **S107030193**

Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.
Complexity:	Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR SYNTHETIC MINOR
WATER TREATMENT PLANT
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

CALENERGY VULCAN POWER PLANT (Continued) **1016064063**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR SYNTHETIC MINOR
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
ELECTRIC GENERATOR
HAZARDOUS WASTE BIENNIAL REPORTER
NON-TRANSIENT NON-COMMUNITY WATER SYSTEM

WDS:

Name:	JJ ELMORE GEOTH. PLANT 03-076
Address:	786 WEST SINCLAIR RD
City:	CALIPATRIA
Facility ID:	West Colorado River 132040018
Facility Type:	Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	Not reported
Subregion:	7
Facility Telephone:	7603484039
Facility Contact:	RAY KELLNER
Agency Name:	JJ ELMORE LIMITED PARTNERSHIP
Agency Address:	7030 GENTRY ROAD
Agency City,St,Zip:	CALIPATRIA 92233
Agency Contact:	JEFF LAMOURE
Agency Telephone:	7603484032
Agency Type:	Private
SIC Code:	1781

JJ ELMORE GEOTH. PLANT 03-076 (Continued) **S106571453**

SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	DRIBRI
Waste Type2:	Not reported
Waste2:	Drilling Brine Waters (Includes oil field and geothermal, aquifer reclamation extraction)
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	2
Baseline Flow:	2
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.
Complexity:	Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Description:	Possibly released from a hole in the liner of the containment. The electrolyte is part of the zinc mineral recovery process that goes into electro-winning cells (like a bath); it has a pH less than 2 with less than 1% of trace metals in it. Their plant processes zinc from geothermal brine.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

WDS:

Name:	SALTON SEA III 03-128
Address:	6922 KRUMMER RD
City:	CALIPATRIA
Facility ID:	West Colorado River 132236001
Facility Type:	Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	Not reported
Subregion:	7
Facility Telephone:	7603484039
Facility Contact:	RAY KELLNER
Agency Name:	SALTON SEA POWER GENERATIONLP
Agency Address:	7030 GENTRY ROAD

UNOCAL-RESIDUE PROC 89-005 (Continued) **S102266888**

Agency City,St,Zip:	CALIPATRIA 92233
Agency Contact:	JEFF LAMOURE
Agency Telephone:	7603484032
Agency Type:	Private
SIC Code:	4911
SIC Code 2:	1781
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	DRIBRI
Waste Type2:	D
Waste2:	Drilling Brine Waters (Includes oil field and geothermal, aquifer reclamation extraction)
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Drilling Muds
Secondary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.
Complexity:	Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Fatals:	Not reported
Comments:	Not reported
Description:	Caller states: The release started as a small leak and then the leak worsened causing the Hydrochloric Acid to release into secondary containment. A resulting vapor cloud exceeded the reportable quantity of hydrogen chloride. The liquid has been recovered and placed into a tanker truck.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
WATER TREATMENT PLANT
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS AIR POLLUTANT MAJOR
US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.
ELECTRIC GENERATOR
HAZARDOUS WASTE BIENNIAL REPORTER
NON-TRANSIENT NON-COMMUNITY WATER SYSTEM

Disposal Method:	H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons:	65.47124
Year:	2021
Gepaid:	CAD983663600
TSD EPA ID:	CAD980675276
CA Waste Code:	181 - Other inorganic solid waste
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	2924.04
Year:	2021
Gepaid:	CAD983663600
TSD EPA ID:	AZR000002428
CA Waste Code:	181 - Other inorganic solid waste
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	6389.04

SALTON SEA POWER L P AND BRINE L P (Continued) **S113019283**

Year:	2021
Gepaid:	CAD983663600
TSD EPA ID:	CAD980675276
CA Waste Code:	352 - Other organic solids
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	183.12

Year:	2021
Gepaid:	CAD983663600
TSD EPA ID:	CAT000646117
CA Waste Code:	792 - Liquids with pH <= 2 with metals
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.70893

Year:	2020
Gepaid:	CAD983663600
TSD EPA ID:	CAT000646117
CA Waste Code:	491 - Unspecified sludge waste
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	393.12

Year:	2020
Gepaid:	CAD983663600
TSD EPA ID:	CAD980675276
CA Waste Code:	181 - Other inorganic solid waste
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	1955.52

Year:	2020
Gepaid:	CAD983663600
TSD EPA ID:	AZR000002428
CA Waste Code:	181 - Other inorganic solid waste
Disposal Method:	-
Tons:	15.12

Year:	2020
Gepaid:	CAD983663600
TSD EPA ID:	CAT000646117
CA Waste Code:	135 - Unspecified aqueous solution
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.189

Year:	2020
Gepaid:	CAD983663600
TSD EPA ID:	CAD980675276
CA Waste Code:	352 - Other organic solids
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	90.72

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date:	05-30-2018
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to properly close tanks when making a claim of "permanently closed."
Violation Notes:	Returned to compliance on 06/25/2018. One 2000 gallon diesel fuel tank in Unit 5 was marked as empty. According to site personnel, this tank was closed n 2003. However, there is no date on the tank and the valves and connections have not been disconnected and secured closed. CORRECTIVE ACTION: Properly permanently close the tank. Inspect the inside of the tank to determine whether all liquids, solids, and sludges have been removed, disconnect all valves and connections and properly closed. Ensure all piping is empty of product and secure these also.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/26/2022
Date Data Arrived at EDR: 08/02/2022
Date Made Active in Reports: 08/22/2022

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/26/2022

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health

West Map:	12016572 OBSIDIAN BUTTE, CA
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

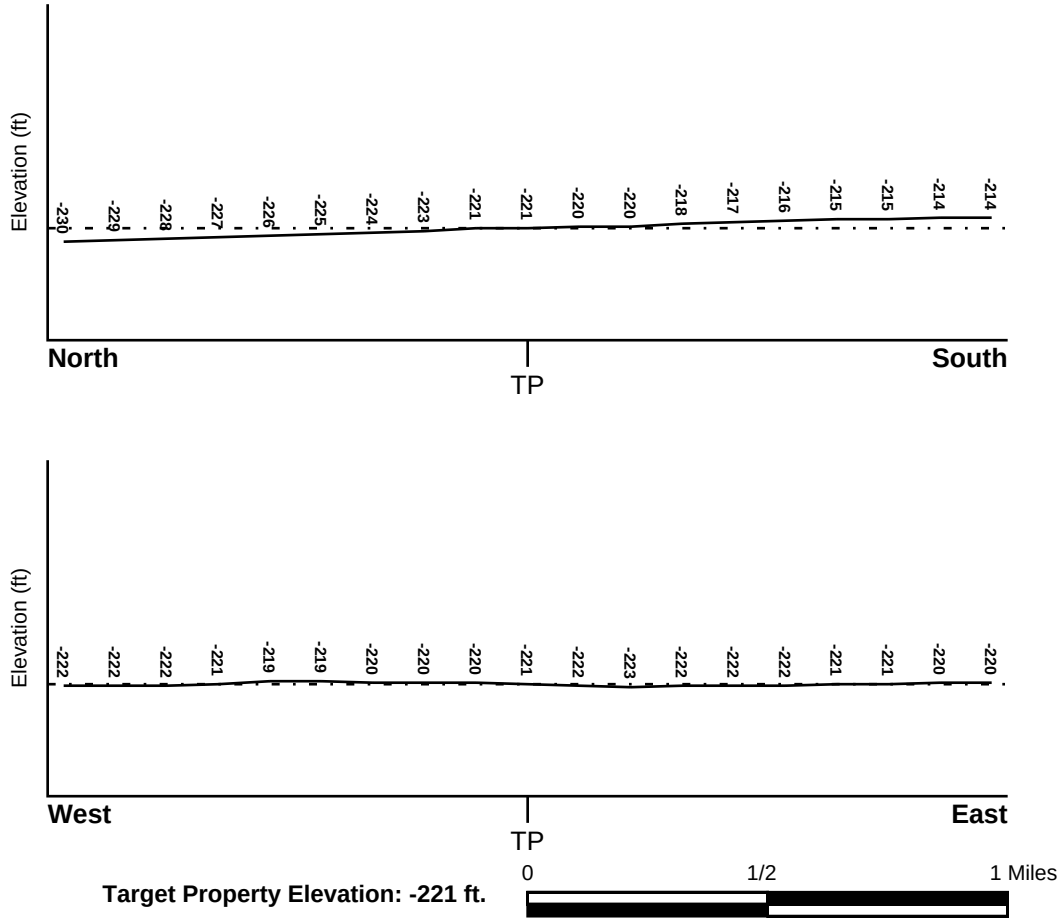

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06025C0725C	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06025C0700C	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NILAND	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Imperial

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 122 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	11 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EDR Inquiry # 7124338.16

Client Name:

Jacobs
2600 Michelson Drive, Suite 500
Irvine, CA 92612
Contact: Dave Golles

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Jacobs were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Jacobs were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

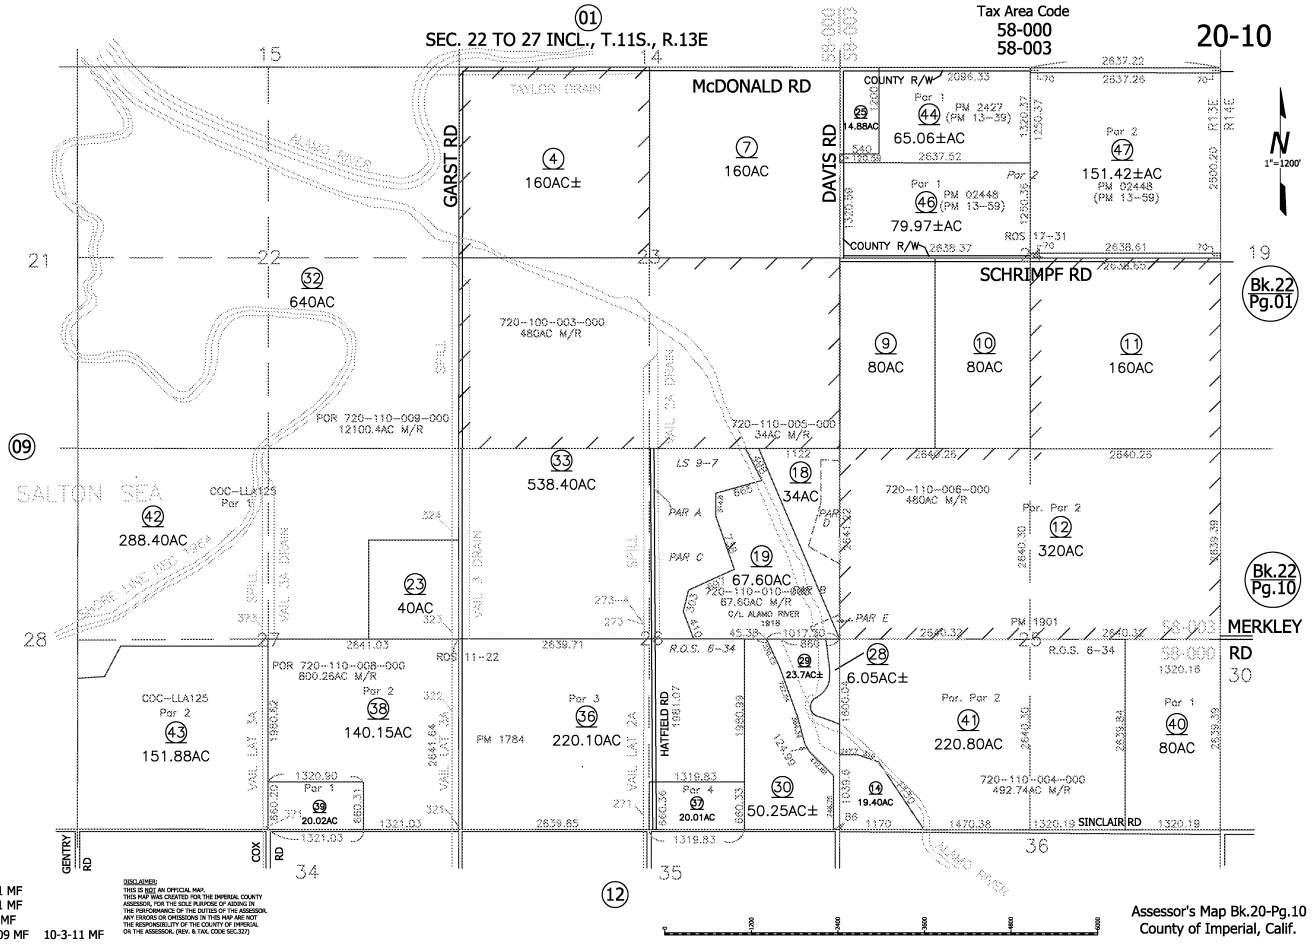

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

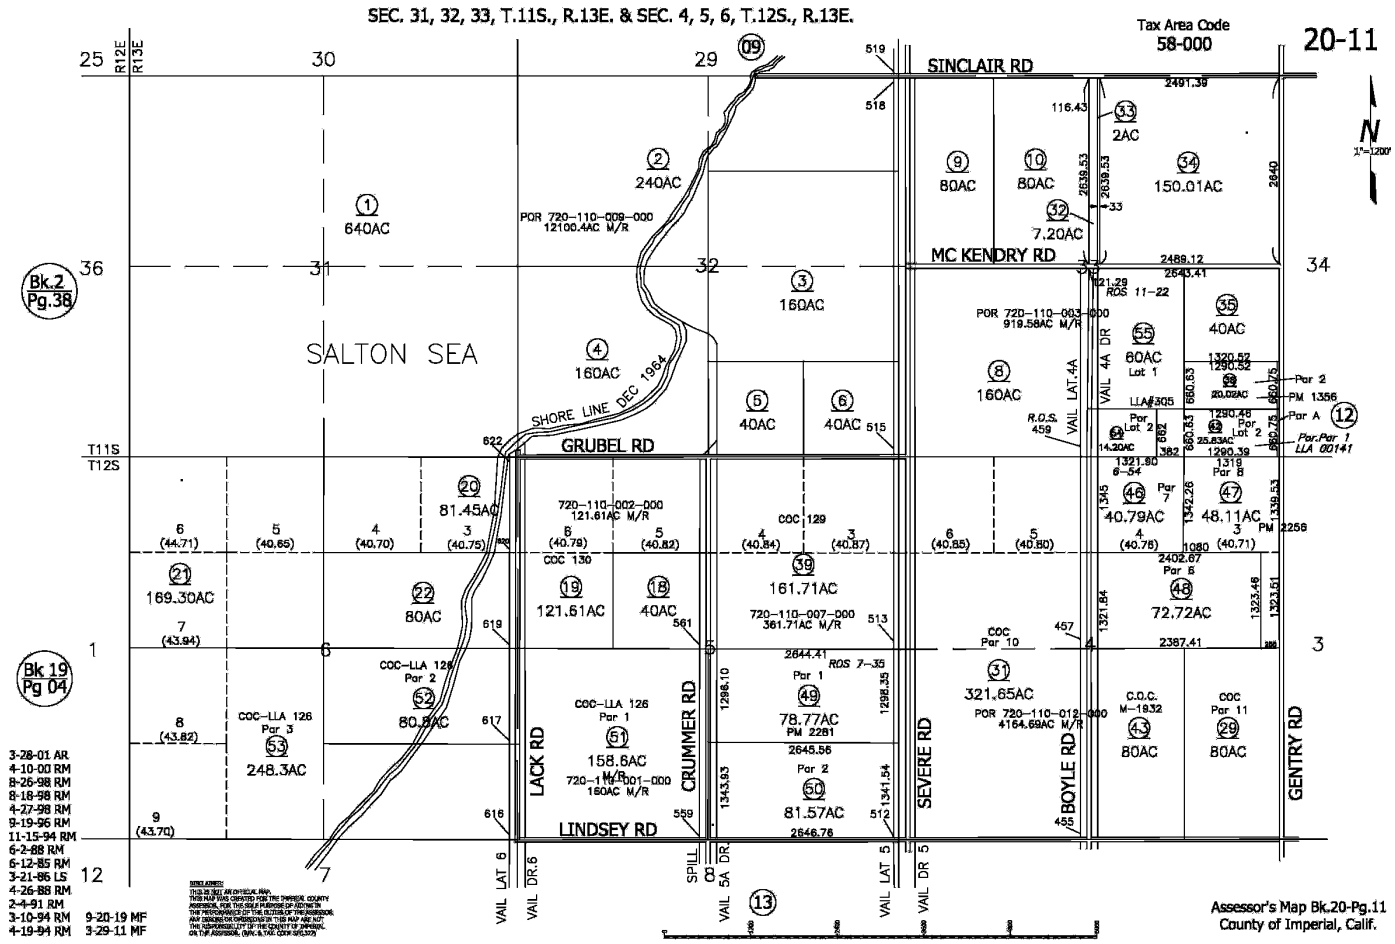

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.
