Subject: CSPTC Annual Report of the California State Pipe Trades Mechanical Acceptance Test Technician Certification Provider to the California Energy Commission.

California Energy Commission,

The California State Pipe Trades Council (CSPTC) was approved as an Acceptance Test Technician Certification Provider (ATTCP) for non-Residential Mechanical Acceptance Test Technicians and Employers on September 14, 2016.

We have approved Local Union Training Centers in San Francisco, Santa Rosa, Fresno, Los Angeles, Concord, San Jose, and Sacramento that are currently teaching the curriculum outlined in the latest update submitted by the California State Pipe Trades Council and approved by the California Energy Commission. As of January 31, 2023, we have approximately 205 Mechanical Acceptance Test Technicians and another 72 that are in various stages of fulfilling their requirements to become Mechanical Test Technicians. I have included spreadsheets in this report. As of January 31, 2023, we also have 57 Mechanical Acceptance Test Employers.

We continue to be proactive in seminars being conducted to bring contractors up to speed on the Title 24 CA Energy Code regarding Acceptance Test Technician Certification Providers for Non-Residential Mechanical Acceptance Test Technician Employers. Independent oversight of the certification processes and procedures are administered by the ESCO Group. For the year of January 1 to December 31, 2022, the ESCO Group has performed 2 audits. We have included their audit reports.

We believe this update certifies that the CSPTC ATTCP curriculum has met all requirements for this program as specified in our application and approved by the Energy Commission.

Respectfully Submitted,

Mike Hartley
Executive Director
