Proceeding/Project Name: 2023 Integrated Energy Policy Report Gas Demand Forecast

(Docket No. 23-IEPR-03)

As part of the 2023 Integrated Energy Policy Report Gas Demand Forecast process, the California Energy Commission sought from San Diego Gas & Electric Company (“SDG&E”) daily gas demand by customer category for the two most recent years, 2021 and 2022 (“SDGE_2023 Forms for Submitting Gas Demand and Rate Forecasting Information, Form 1.4”). Portions of that daily gas demand data is confidential. Previously, SDG&E submitted substantially similar data to the California Energy Commission which an application for confidential designation was granted by the Executive Director pursuant to section 2505(a)(3)(A). (*See* 11/22/22 CEC letter from D. Bohan to SoCalGas and SDG&E counsel granting confidential designation for daily gas demand data, Docket No. 22-IEPR-03.)

Certification of Confidentiality by Heng Yang Pursuant to Title 20, §2505(a)(4) (Repeated Applications for Confidential Designation)

I, Heng Yang, do certify as follows:

1. I am a Forecasting Advisor within the Regulatory Affairs Department of Southern California Gas Company. I have reviewed the confidential information provided for core customers within the SDGE_2023 Forms for Submitting Gas Demand and Rate Forecasting Information, Form 1.4 and am familiar with its contents. I am also familiar with the contents of the previous request for daily gas demand data which was granted confidential designation on November 22, 2022.
2. The daily gas demand data being provided here is substantially similar to the daily gas demand data that was previously granted confidential treatment on November 22, 2022. The only differences between the data being provided here and that which was previously requested are: (1) the dates being provided; and (2) the units of measure (to comply with the CEC’s request). In addition, unlike the past request, the current request seeks data regarding “Core Wholesale and International”, “Noncore SMUD Electric Generation”, “Noncore Natural Gas Vehicles”, “California Exchange Gas” and “Offsystem Deliveries.” SDG&E does not have responsive data for those categories; and, therefore, the undersigned does not have knowledge of these specific data points.

3. The facts and circumstances for granting confidential treatment of this data are unchanged from SDG&E's previous submission reflected in the November 22, 2022 CEC letter.
4. The portions of the data for which confidential treatment is sought are marked with yellow highlighting.

I certify under penalty of perjury under the laws of the State of California that the foregoing is true, correct and complete to the best of my knowledge.

Date: May 19, 2023
