AB 205

I am concerned about the provision in AB 205 for income based flat rate charges for California utilities. My husband and I are seniors. We spent over \$15,000 last year to put a solar system on our roof. Now I hear there is a proposal to charge us a flat rate of almost \$100 a month on top of my usage costs. That is not right! It discourages homeowner solar installation. The utility companies are asking homeowners to subsidize the California solar energy expansion. Please stop this nonsense!
