

DOCKETED

Docket Number:	23-IEPR-02
Project Title:	Electricity Resource Plans
TN #:	251084
Document Title:	ESP Demand Forecast for Direct Energy Business, LLC
Description:	ESP Demand Forecast on behalf of Direct Energy Business, LLC - Public filing
Filer:	Barbara S. Farmer
Organization:	BARBARA FARMER
Submitter Role:	Applicant
Submission Date:	7/19/2023 6:19:57 AM
Docketed Date:	7/19/2023

Electricity Demand Forecast Forms

California Energy Commission 2023 Integrated Energy Policy Report Docket Number 23-IEPR-02

The following spreadsheets are the California Energy Commission (CEC) forms for collecting data and analyses relating to electricity demand in order to prepare the *Integrated Energy Policy Report*. Public Resources Code (PRC) Section 25301 directs the CEC to conduct regular assessments of all aspects of energy demand and supply so that it may develop energy policies that conserve resources, protect the environment, ensure energy reliability, enhance the state's economy, and protect public health and safety.

To carry out these assessments, the CEC may require submission of demand forecasts, resource plans, market assessments, related outlooks, individual customer historic electric or gas service usage, or both, and individual customer historic billing data, in a format and level of granularity specified by the CEC from electric and natural gas utilities, transportation fuel and technology suppliers, and other market participants.

Who must file:

Data are required from utility distribution companies (UDCs), energy service providers (ESPs), community choice aggregators (CCAs) and all other entities that serve end-use loads, collectively referred to as load-serving entities (LSEs). However, for this specific IEPR proceeding, **the Energy Commission is not requesting forecast data from any LSE with peak demand less than 200 MW.**

Submittal:

For all filings, parties are required to use the Energy Commission's e-filing system. This requires LSEs to submit their demand data and narratives electronically by uploading files using an internet connection and a modern browser. A user's guide to the Energy Commission's e-filing system is posted at: <http://www.energy.ca.gov/e-filing/>.

After completing registration, log in and select the following proceeding: **23-IEPR-02 Electricity Forecast.**

When naming an attached file of 50 megabytes or less, please include the LSE's name in the filename. Attachments should be submitted as separate files and clearly identified.

Confidentiality:

If you are requesting confidentiality for any part of the submittal, please see *Appendix A: Confidentiality Applications* in the *Forms and Instructions for Submitting Electricity Demand Forecasts* report.

Due Dates:

All forms: **Monday, May 15, 2023**

Questions relating to the electricity demand forecast forms should be directed to Robert.Kennedy@energy.ca.gov or Le-Huy.Nguyen@energy.ca.gov
