I oppose extending the dangerous diablo canyon nuclear power plant. Diablo canyon is NOT safe nor cost- effective way to help California 's energy reliability.

Our state has already done better with renewable energy and its storage then diablo canyon's output.
It will take away from investing in renewable energy.

Because it's decades old with years of deferred maintenance, and operating longer than the reactors have, there is a greater risk of huge accidents with radiation contaminating a larger part of California for generations.

Diablo Canyon is surrounded by earthquake faults that can produce huge earthquakes that the site cannot withstand, causing catastrophic accidents..

Extending its life will make more deadly nuclear waste and this will last thousands of years. There is no solution to how to store it safely for thousands of years.

The cost is prohibitive- from relicensing ,deferred maintenance and continuing its operation will be passed onto ratepayers and taxpayers-that is unfair.

Each year it's producing more plutonium that could be making a large number of nuclear bombs.

The Diablo Canyon plant is unhealthy for marine life. It sucks in marine life and kills them for its cooling system and then dump hot water back into the ocean harming and killing wildlife.

Do NOT extend Diablo canyon plant's operations. PROTECT OUR SAFETY AND HEALTH FOR OUR COMMUNITIES AND PROTECT MARINE LIFE.

OPPOSE DIABLO'S EXTENSION !!! PREVENT RADIOACTIVE MELTDOWNS AND ACCIDENTS-PROTECT BOTH OUR HEALTH AND MARINE LIFE.

I urge you to vote against its extension!

thanks,
Dorri Raskin
