## **Please make rebates retroactive**

I am writing to ask that the Home Energy Rebates be applied retroactively to some appropriate date, such as January 1, 2024, so that homeowners can begin projects before the California implementation program is fully operational. I have a quote for installing a heat pump right now but have the project on hold until the rebates are available. It would help me, my contractor, and those like us if we can start as soon as possible.
