Description:	N/A
Filer:	Stephanie Bailey
Organization:	California Energy Commission
Submitter Role:	Commission Staff
Submission Date:	8/15/2023 9:19:01 AM
Docketed Date:	8/15/2023

2023 IEPR Forecast Inputs and Assumptions

Nicholas Fugate, Demand Analysis Branch

August 15, 2023

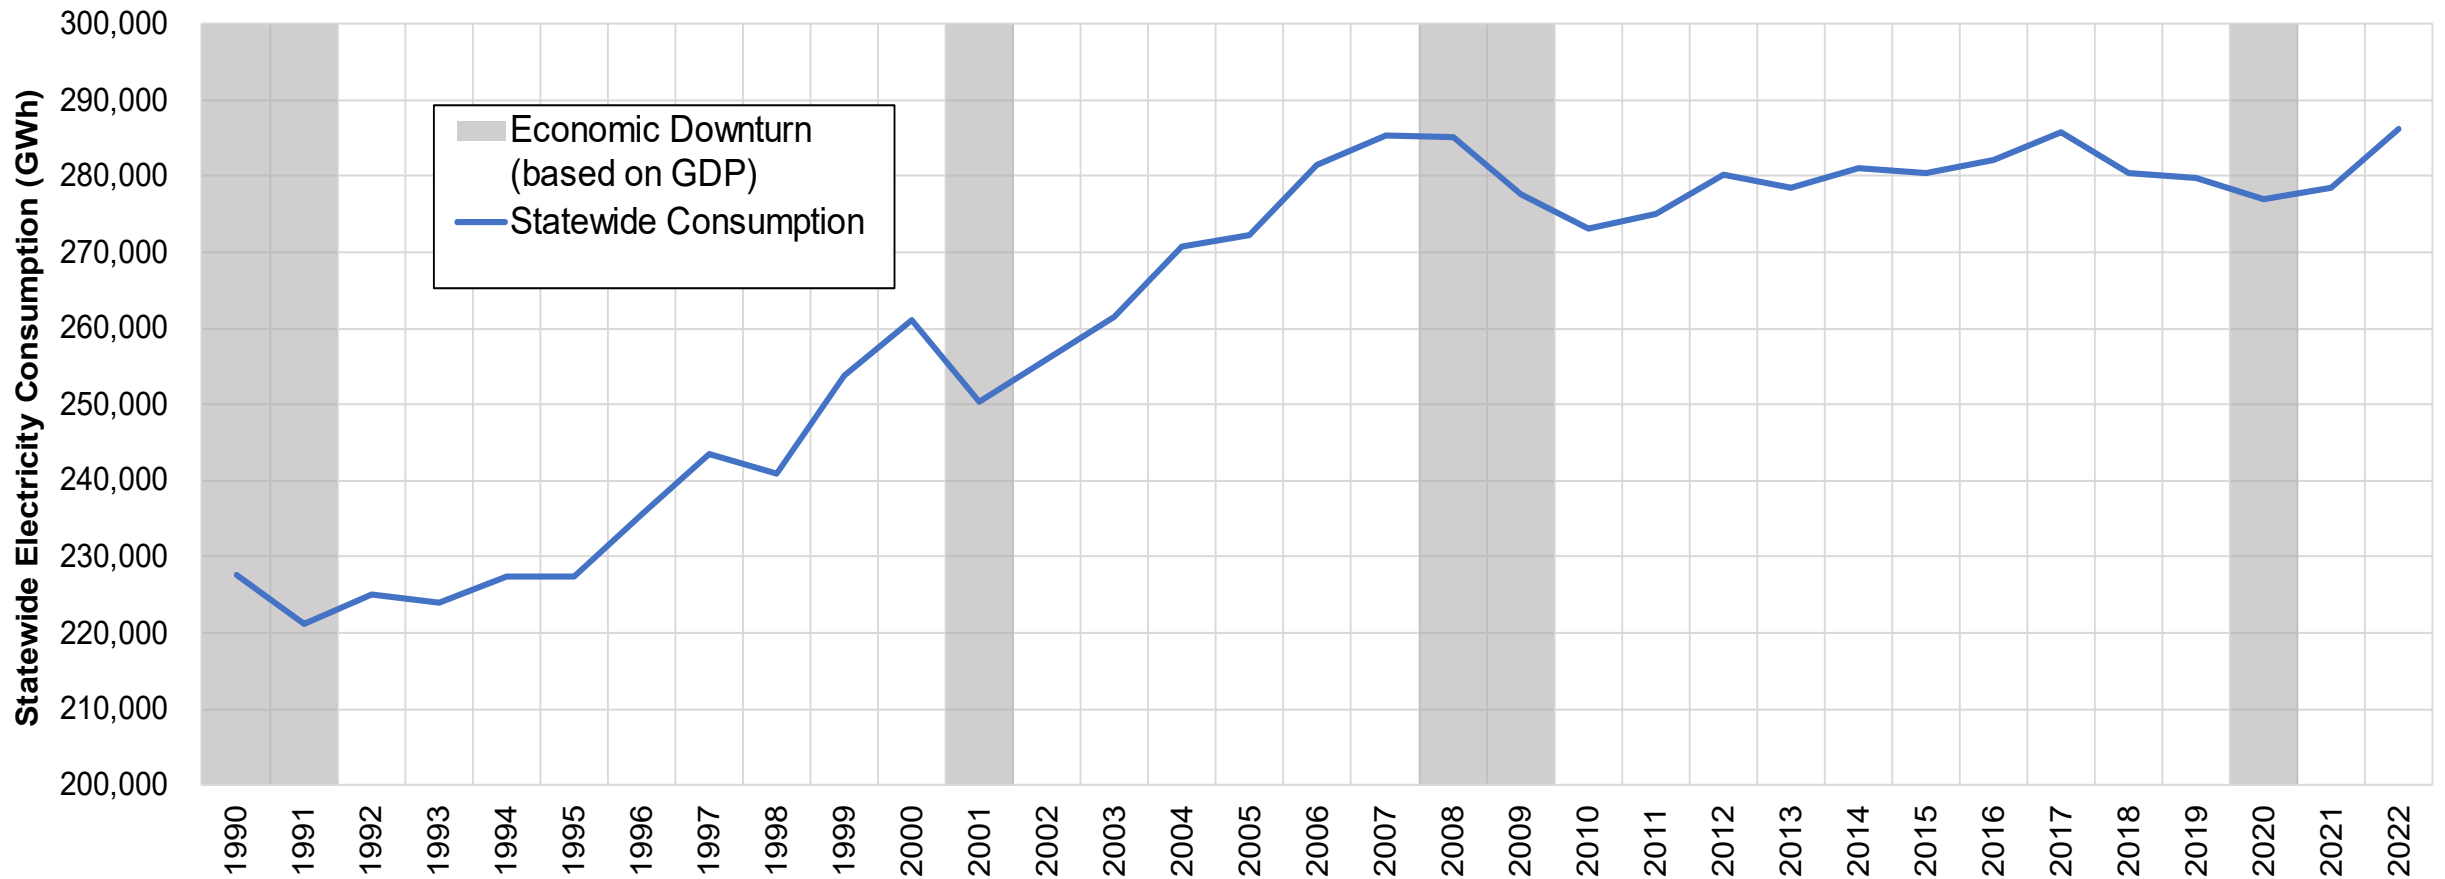

Economic and Demographic Assumptions

Historic Electricity Consumption

End use energy consumption correlates strongly with economic activity

Economic and Demographic Scenarios

Moody's scenarios for key economic drivers:

- May vintage
- Baseline (50/50)

Department of Finance:

- Population (July 2023)
- Households derived from population by CEC staff

Statewide Comparison

Long-term growth rates are similar or lower across key drivers

Average Annual % Growth

Driver	CEDU 2022 (2022-2035)	CED 2023 (2023-2040)
Gross State Product	2.5%	2.1%
Per Capita Personal Income	1.8%	1.8%
Commercial Employment	1.0%	0.5%
Population	0.5%	0.2%
Households	0.9%	0.6%

Statewide GSP

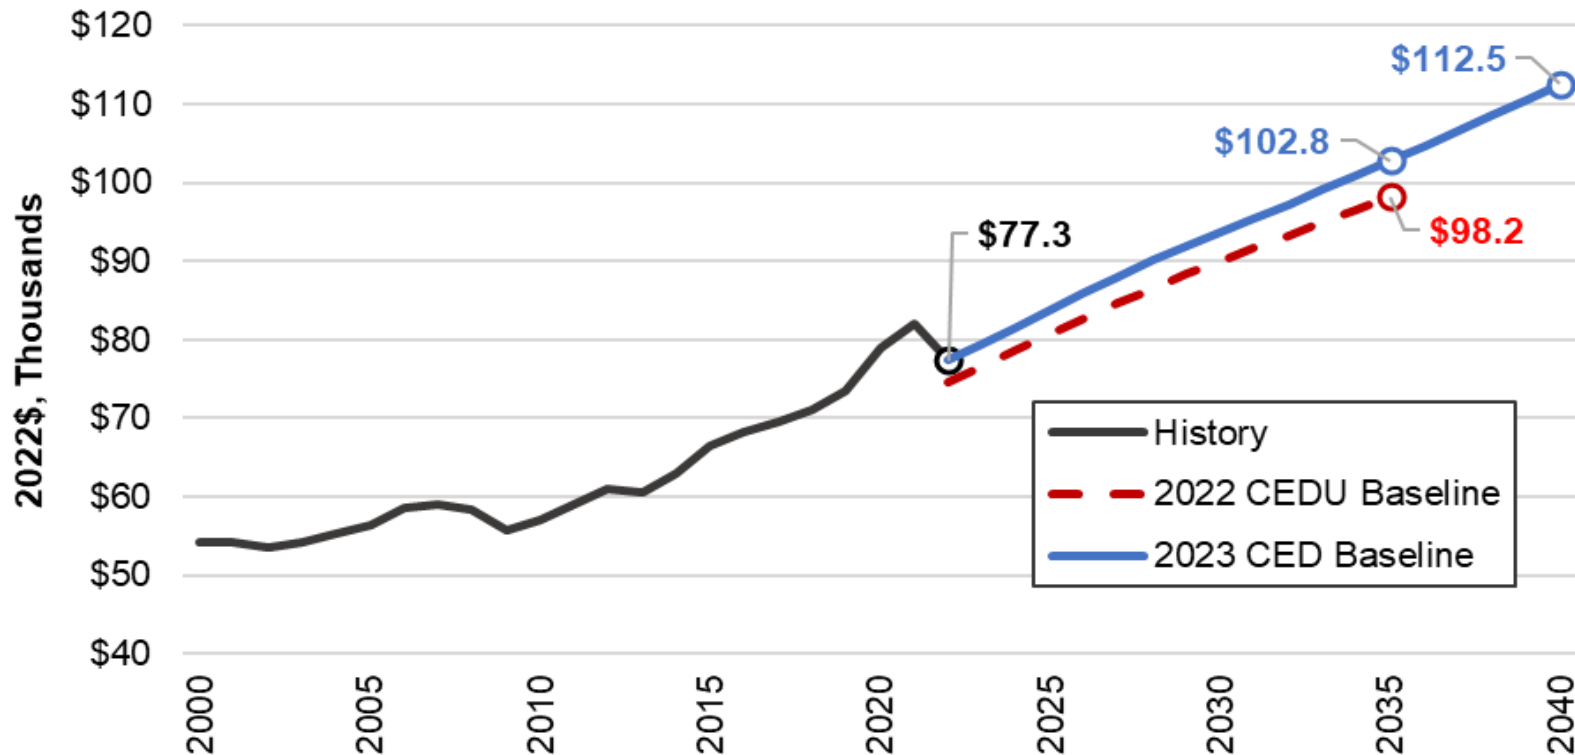

- GSP recovery occurred sooner than previously projected
- Higher in 2022 followed by continued steady growth

Statewide Per Capita Income

- Federal stimulus in 2021 led to increased income compared to previous projection
- Long-term growth is similar to CEDU 2022

Statewide Commercial Employment

- Employment increase from 2022 to 2023 adds ~327k jobs
- 2019 levels of employment were met by 2022

Statewide Population

- Base-year population is lower than IEPR 2022 projection by nearly half a million

Statewide Households

- Growth reflects revised population projections from Department of Finance

Thank You!
