## **STOP Fountain Wind (AGAIN)!**

Dear State of California Officials,

I am a community member in rural remote Shasta County and I am writing to beg you to please refuse to approve the permit for the proposed (and already once rejected by a careful legal procedure including a large amount of participation by community members, tribes, and local authorities, engineers, first responders, etc.). We need your help to shut this down.

If you have received any contributions from the organizations that are lobbying for this project, then please do what's best for your karma and your offspring, and turn your table: Help us to STOP FOUNTAIN WIND! You know that this is about so much more than money. This is about preservation and sanity in the face of overzealous developers and profiteers.

Wind power can be a great part of the solution... BUT, that does not mean that all wind power nor all wind power potential locations are appropriate or helpful. This ill-fated and poorly-planned project in Shasta County is a good example of a proposed development that should NOT be approved nor built, for multiple reasons in multiple categories.

Thanks for your decency, your support, and your longterm view.

Warm Regards,

Seabrook Leaf

Big Bend Hot Springs Project
