**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Bear Peak Power appreciates the opportunity to provide public comment to the CEC in response to the recent DEBA Program Draft Guidelines.

### **Applicable Interconnection Tariffs**

Bear Peak Power comments that standalone energy storage projects participating in the DEBA program should be eligible to interconnect as either an exporting project under Rule 21 or WDAT with a deliverability status of energy-only or full deliverability.

We look forward to the implementation of a successful DEBA program.

Sincerely,

--
