To Whom It May Concern:

I would like to submit the following comment on the draft solicitation for 23-ERDD-01 Advancing Clean, Dispatchable Generation Concept:

In the solicitation, the Project Elements section on page 6 states that “Group 1 focuses on prime movers that can use one hundred percent renewable fuel...” This wording implies that internal combustion engines are the only technology that will be considered for this solicitation. There are, however, electro-chemical technologies, such as fuel cells, that can provide dispatchable power with an eligible fuel and are aligned with the spirit of this solicitation. We would like to request that electro-chemical technologies be included as eligible technologies in this solicitation.

Regards,

**Bryan Lee**
