Empower Small to Medium-Sized Startups in the Battery Industry for Sustainable Innovation

I strongly believe that fostering innovation and driving advancements in the future of the battery industry requires a comprehensive approach that extends its support beyond the well-established giants in the field. Small to medium-sized startup companies are the source of innovation, consistently pushing the boundaries of technology and offering fresh perspectives. It also offers local market stability.

It is crucial that this program acknowledges the contributions of small to medium-sized companies, much like large Giga-factories. By extending the same advantages and opportunities to these smaller entities.

Small to medium-sized companies often operate in a more stable supply environment, a vital aspect in the battery industry's growth and sustainability. Their ability to adapt and innovate within this stable framework is a testament to their potential as key players in shaping the future of battery technology.

Make sure the law does not present a disadvantage for small to medium-sized startup companies.
