Toyota Mirai driver 77 months driving on hydrogen

Thank you IEPR team and Commissioners for your work on hydrogen. I've been contributing on the demand side of the hydrogen ecosystem for 77 months and counting. Toyota built me a reliable FCEV and my local infrastructure has enough redundancy to keep me driving zero emissions. Please help First Element, Iwatani, and Shell expand light duty infrastructure for average Californians like me. Bumps in the road are part of the journey.
