Irvine, CA 92612

Subject: Phase I Environmental Site Assessment
Eden Landing Business Park
3401, 3423, 3447, 3475 Investment Blvd, 26203, 26291 Production Avenue, and 26010, 26034,
26046, 26062 Eden Landing Road, Hayward, California
EBI Project No. 1121000805

Dear Ms. Pfeil:

Attached please find our *Phase I Environmental Site Assessment* (the report) for the above-mentioned asset (the Subject Property). During the survey and research, our surveyor met/spoke with agents representing the Subject Property, or agents of the owner, and reviewed the Subject Property and its history. The report was completed according to the terms and conditions authorized by you, the Client. This report has been completed in conformance with the ASTM Standard E 1527-13 and the Standard Terms and Conditions for Third Party Due Diligence Services dated February 8, 2021 between Eden Landing BP, LLC and EnviroBusiness, Inc.

This report is addressed to Eden Landing BP, LLC and their respective successors and assigns.

The purpose of this report is to acquire environmental information, observe the general condition and maintenance status of the Subject Property, to identify recognized environmental conditions in connection with the Subject Property described in this report, and to assist Eden Landing BP, LLC, in its pre-sale effort in evaluating their Property.

This Report was performed utilizing methods and procedures consistent with established commercial practices and in conformance with industry standards. The suggestions represent EBI's opinion based on written, graphic or verbal information, the property condition and data available to us at the time of the survey. Factual information regarding operations, conditions or data provided by the Client, occupants, owner or their representative has been assumed to be correct and complete.

There are no intended or unintended third party beneficiaries to this report, except as expressly stated herein.

EBI is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the report or on the closing of any business transaction.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thank you very much for the opportunity to provide environmental consulting services to Eden Landing BP, LLC. Should you have any questions or require additional information, please do not hesitate to contact the undersigned.

Respectfully submitted,

EBI CONSULTING

EXECUTIVE SUMMARY

At the request of Eden Landing BP, LLC, EBI has performed a Phase I Environmental Site Assessment (ESA) of the property located at 3401, 3423, 3447, 3475 Investment Blvd, 26203, 26291 Production Avenue, and 26010, 26034, 26046, 26062 Eden Landing Road in Hayward, California, herein referred to as the Subject Property. The main objective of this ESA was to identify *recognized environmental conditions* in connection with the Subject Property, defined in ASTM Practice E 1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment, or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM Practice E 1527-13.

The Subject Property includes two contiguous parcels cumulatively totaling approximately 11.475 acres. The Subject Property is currently improved with 10 one-story and two-story, multi-tenant warehouse/office/light-industrial buildings totaling approximately 195,044 rentable square feet. There are no basements beneath the structures. The existing improvements were reportedly constructed 1971-1973 and have been renovated throughout the years upon tenant turnover. The site is fully improved with the buildings along with paved sidewalks, parking and accessways with landscaping in small areas throughout the site and generally along the site perimeter. An overhead electrical power line is located along the southwest boundary of the Subject Property. At the time of EBI's site visit, the Subject Property was occupied by the Eden Landing Business Park with approximately 104 units that primarily include office and warehouse space with minimal light-industrial activities. There are currently no fueling or large-scale manufacturing operations conducted at the Subject Property.

Below is the Assessment Summary Table presenting our recommended actions for the Subject Property. EBI's Findings and Opinions are presented in Section 8.0, and recommendations for further action or investigation are presented in Section 9.0.

Report Section		No Further Action	REC	HREC	CREC	Other	Recommended Action	Estimated Cost

1.0 INTRODUCTION

This report documents the findings, opinions, and conclusions of a Phase I Environmental Site Assessment (ESA) of the property with a primary address of 3401, 3423, 3447, 3475 Investment Blvd, 26203, 26291 Production Avenue, and 26010, 26034, 26046, 26062 Eden Landing Road in Hayward, California.

1.1 PURPOSE

The purpose of this ESA was to identify *recognized environmental conditions* and certain environmental conditions outside the scope of ASTM Practice E 1527-13 in connection with the property at the time of the property reconnaissance.

1.2 SCOPE-OF-SERVICES

This ESA was conducted utilizing a standard of good commercial and customary practice that was consistent with the ASTM Practice E 1527-13. Any significant scope-of-work additions, deletions or deviations to ASTM Practice E 1527-13 are noted below or in the corresponding sections of this report. The scope-of-work for this assessment included an evaluation of the following:

- Physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils and hydrologic data.
- Subject Property history through a review of referenced sources such as land deeds, fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
- Current Subject Property conditions, including observations and interviews regarding the following: the presence or absence of hazardous substances or petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or biomedical waste; equipment that utilizes oils which potentially contain PCBs; and storage tanks (aboveground and underground).
- Usage of surrounding area properties and the likelihood for releases of hazardous substances and petroleum products (if known and/or suspected) to migrate onto the Subject Property.
- Information in referenced environmental agency databases and local environmental records, within specified minimum search distances.
- Past ownership through a review of available prior reports and local municipal file review.

The scope-of-work also included consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E 1527-13: asbestos-containing materials (ACM), lead-based paint (LBP), lead in drinking water and radon.

1.3 ASSUMPTIONS, LIMITATIONS AND EXCEPTIONS

This Phase I Environmental Site Assessment (the report) has been prepared for the use of Eden Landing BP, LLC, in accordance with our Standard Terms and Conditions for Third Party Due Diligence Services approved and signed by Eden Landing BP, LLC (the Agreement), and with the limitations described below, all of which are integral parts of this report. A copy of the signed Standard Terms and Conditions for Third Party Due Diligence Services is maintained at the EBI Consulting office in Burlington, Massachusetts. To the extent any provisions of this report conflict with the terms of the Agreement, the Agreement will control.

EBI has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. This report was prepared with no exceptions or deletions from ASTM Standard E 1527-13.

This Phase I Environmental Site Assessment has been prepared to assess a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response,

Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to permit Eden Landing BP, LLC to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the Subject Property consistent with good commercial or customary practice" as defined in 42 U.S.C. §9601(35)(B).

In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify *recognized environmental conditions*. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property (1) due to a release to the environment, (2) under conditions that indicate an existing release or a past release, or (3) under conditions that pose a material threat of a future release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term does not include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with the authorities having jurisdiction over the Subject Property. Findings, conclusions, and recommendations included in the report are based on our visual observations in the field, the standard environmental record sources and municipal information reasonably obtained, information provided by the Client, and/or a review of readily available and supplied documents and drawings. EBI relies completely on the information, whether written, graphic, or verbal, provided by the Subject Property contact or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct unless the information is known to be inaccurate or if it is obvious, based on other information obtained as part of the assessment, that the information is not accurate. Although there may have been some degree of overlap in the information provided by these various sources, EBI did not attempt to verify independently the accuracy or completeness of all information reviewed or received during the course of these environmental services.

The information reported, as well as EBI's findings, conclusions, and recommendations are based upon sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with authorities having jurisdiction over the Subject Property. Eden Landing BP, LLC agrees that EBI has no obligation to independently verify the accuracy or completeness of the information reviewed or received during the course of these environmental services.

EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under un-surveyed and/or inaccessible portions of the Subject Property. Unsurveyed and inaccessible portions of the Subject Property are described below. In addition, EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under the Subject Property where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

EBI Services and opinions are based on the scientific or technical tests or procedures specifically set forth in the scope of the Services described in this report. The ASTM Standard E 1527-13 does not encompass analytical testing to evaluate asbestos containing materials, radon, lead-based paint, drinking water quality, indoor air quality, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement are not guaranteed to be a representation of actual conditions on the Subject Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, EBI used

that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality at the same time and under similar circumstances. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The report speaks only as of its date, in the absence of a specific written update of the report, signed and delivered by EBI. Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to EBI so that our conclusions may be revised and modified if necessary, at additional cost.

Client and EBI agree that to the fullest extent permitted by law, EBI shall not be liable to Client for any special, indirect, consequential, punitive, exemplary, incidental or indirect damages or losses whatsoever, whether caused by EBI's negligence, errors, omissions, strict liability, breach of contract, breach of warranty or other cause or causes whatsoever.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions.

1.4 SPECIAL TERMS AND CONDITIONS

The exclusive purpose of this Phase I Environmental Site Assessment (the Report) is to observe the general physical condition and maintenance status of the property, to suggest repair or maintenance items considered customary for the property to continue in its current operation compared to properties of similar age and condition, and to assist Eden Landing BP, LLC, in its pre-sale effort in evaluating their Property. Amendments to EBI's limitations as stated herein that may occur after issuance of the Report are considered to be included in this Report. EBI's liability to a purchaser wishing to use this Report is limited to the cost of the Report. By accepting draft and final Reports, Eden Landing BP, LLC agrees to these terms and limitations.

1.5 DATA GAPS

Any data gaps identified herein, as defined by ASTM Practice E 1527-13 § 3.2.20, are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report, except for the following:

EBI did not fully access the Subject Property due to sensitive tenants during the COVID-19 Pandemic. Units accessed were selected by Property Management. EBI was provided full access to the following units: 3401-200, 3423-10, 3447-8, 3475-two second floor offices, 26010-1C, 26010-201, 26034-1, 26062-6, 26291-1 and partial access (as viewed from open doors and front windows) to units 3423-1, 3423-8, 26010-1, 26010-8 and 26203-4. EBI was informed by Ms. Rebekah Weinacker, Property Manager with CIP Real Estate, that none of the tenants generated regulated wastes or stored excessive chemicals, to their knowledge, nor were site conditions conducive to those types of activities. The results of this assessment only speak to the units accessed at the time of EBI's site visit.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 OWNERSHIP AND LOCATION

According to the City of Hayward Property Report, the Subject Property is currently owned by Eden Landing BP, LLC.

The Subject Property is located at 3401, 3423, 3447, 3475 Investment Blvd, 26203, 26291 Production Avenue, and 26010, 26034, 26046, 26062 Eden Landing Road in Hayward, Alameda County, California. The Subject Property includes two contiguous parcels cumulatively totaling approximately 11.475 acres identified as Alameda County Assessor Parcel Numbers (APNs) 461-0085-016-00 and 461-0085-052-01. and The Subject Property is located at the southwest corner of the intersection of Eden Landing Road and Production Avenue. Figure 1 - Location Map depicts the location of the Subject Property on a street map of Hayward, California. Figure 2 - Locus Map depicts the location of the Subject Property on the Hayward, California, United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle. Figure 3 - Site Plan depicts the configuration of the Subject Property and adjoining properties.

2.2 SUBJECT PROPERTY IMPROVEMENTS

The Subject Property is improved with a 10-building business park including one-story and two-story, multi-tenant warehouse/office/light-industrial buildings totaling approximately 195,025 square feet. There are no basements beneath the structures. The existing improvements were reportedly constructed 1971-1973 and have been renovated throughout the years upon tenant turnover. The site is fully improved with the buildings along with paved sidewalks, parking and accessways with landscaping in small areas throughout the site and generally along the site perimeter. An overhead electrical power line is located along the southwest boundary of the Subject Property. Land and building areas are as follows:

SUBJECT PROPERTY IMPROVEMENTS					
Address	Floors	Basement	Area (SF)	DOC	Lot Size (Acres)
26203 Production Avenue	1-2	No	28,000	1971	5.57
26010 Eden Landing Road	1	No	22,500	1971	inclusive of 26203 Production Avenue
26034 Eden Landing Road	1	No	5,525	1971	inclusive of 26203 Production Avenue
26046 Eden Landing Road	1-2	No	15,800	1971	inclusive of 26203 Production Avenue
26062 Eden Landing Road	1-2	No	24,200	1971	inclusive of 26203 Production Avenue
3475 Investment Boulevard	1-2	No	15,800	1973	5.90
3447 Investment Boulevard	1-2	No	20,800	1973	inclusive of 3475 Investment Boulevard
3423 Investment Boulevard	1-2	No	20,800	1973	inclusive of 3475 Investment Boulevard
26291 Production Avenue	1-2	No	20,800	1973	inclusive of 3475 Investment Boulevard
3401 Investment Boulevard	1-2	No	20,800	1973	inclusive of 3475 Investment Boulevard
26291 Production Avenue	1-2	No	20,800	1973	inclusive of 3475 Investment Boulevard

SF: Square Feet DOC: Date of Construction

2.3 CURRENT USE OF THE SUBJECT PROPERTY

At the time of EBI's site visit, the Subject Property was occupied by the Eden Landing Business Park with approximately 104 units and approximately six vacant units that primarily include office and warehouse space with minimal light-industrial activities. There are currently no fueling or large-scale manufacturing operations conducted at the Subject Property. EBI was provided with a copy of the most recent tenant list, which is presented in Appendix C.

2.4 MUNICIPAL SERVICES & UTILITIES

The Subject Property is serviced by the following municipal services and utilities:

MUNICIPAL SERVICES AND UTILITIES	
Utility	Provider/Source
Potable Water Supply	City of Hayward
Sewage Disposal System	City of Hayward
Electrical Service	Pacific Gas & Electric Company (PG&E)
Natural Gas Service	Pacific Gas & Electric Company (PG&E)
Oil Service	Not provided
Heating/Cooling Systems	Rooftop natural gas / electric split system HVAC units
Emergency Power	Not provided

2.5 ADJOINING PROPERTIES

Property use in the vicinity of the Subject Property is primarily characterized by light-industrial development, as summarized in the following table.

ADJOINING PROPERTIES	
Direction	Findings
Northwest	The Subject Property is bound to the northwest by Eden Landing Road following by two commercial buildings occupied primarily by restaurants at 26001-26005 Eden Landing Road. Highway 92 is to the north beyond Eden Landing Road.
Northeast	The Subject Property is bound to the northeast by Production Avenue followed by a large warehouse building partially occupied by Gillig Parts at 25972 Eden Landing Road and a light-industrial building occupied by Therm-X at 3323 Investment Boulevard.
Southeast	The Subject Property is bound to the southeast by Investment Boulevard followed by three multi-tenant, light-industrial/warehouse buildings at 3400-3486 Investment Boulevard and a single-tenant, light-industrial/warehouse building occupied by Global Quality Foods at 3524 Investment Boulevard.
Southwest	The Subject Property is bound to the southwest by a multi-building business park at 3521-3583 Investment Boulevard.

No visual evidence of adverse environmental conditions was observed during the survey of the adjoining properties other than the notable fact that the Subject Property is surrounded by light-industrial/warehouse buildings. Adjacent properties were identified on various regulatory databases and are further discussed in Section 4.1.1.

2.6 PHYSICAL SETTING

2.6.1 Topography

The Subject Property is located at an elevation of approximately 5-10 feet above mean sea level (msl). The topography of the Subject Property is relatively flat and was graded during site development to direct surface water into on-site storm drains. The Subject Property is located in a relatively flat area with immediate downslope to the south and overall regional downslope to the west (see Figure 2, which depicts the location of the Subject Property on the Hayward, California USGS 7.5 Minute Topographic Quadrangle).

2.6.2 Geology and Soils

Bedrock outcroppings were observed on and adjacent to the Subject Property and an older quarry is located adjacent to the northwest. Information concerning the geology of the Subject Property was obtained from the USGS Ground Water Atlas of the United States, California region (1995). The Subject Property is located within the Pacific Border physiographic province, which is characterized by steep rolling hills and mountains and consists of severely folded, faulted, commonly metamorphosed marine and continental sediments.

According to the soil summary data presented in the Physical Setting Source Addendum to the appended database report prepared by Environmental Data Resources, Inc., the soil type mapped at the Subject Property is Danville silty clay loam and Sycamore silt loam. These moderately well to well-drained soils exhibit slow to moderate infiltration rates and is characterized by silt-clay materials to a depth of at 59 to 72 inches below ground surface (bgs).

2.6.3 Hydrogeology and Hydrology

No surface water bodies were identified on the Subject Property or in the immediately vicinity. The nearest significant water body is the San Francisco Bay and wetlands located 0.3± mile south and 0.6± mile west of the Subject Property.

Due to the proximity of the San Francisco Bay, the direction of groundwater flow may be tidally influenced. EBI reviewed groundwater data posted to the California Water Resources Control Board's Geotracker website at <http://www.geotracker.swrcb.ca.gov/>. Data reviewed for nearby sites, as further discussed in Section 4.1.1, first depth to groundwater was reported at approximately 4 to 10 feet bgs and the direction of groundwater flow was variable including to the northwest, south, southwest and southeast. Based on this data and overall downslope, the presumed predominant direction of groundwater flow is to the southwest. Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three groundwater monitoring wells and precise measurements of hydrostatic pressure. Monitoring wells were not observed on the Subject Property.

3.0 USER PROVIDED INFORMATION

The following section summarizes information provided by Eden Landing BP, LLC, the User, with regard to this Phase I Environmental Site Assessment. Additionally, a User Questionnaire was forwarded to the designated client contact. The User Questionnaire has not been completed and returned to our offices. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. The User Questionnaire and any additional documentation referenced below is presented in Appendix C.

3.1 TITLE RECORDS

Title record information associated with the Subject Property has not been provided to EBI by the User. A detailed discussion regarding review of information obtained from other sources is presented in Section 4.2.3 of this report.

3.2 ENVIRONMENTAL LIENS AND ACTIVITY AND USE LIMITATIONS

The User has provided no information regarding environmental liens or activity and use limitations in connection with the Subject Property. A discussion regarding environmental liens is presented in Section 4.2.5 of this report. A detailed discussion regarding activity and use limitations is presented in Sections 4.1.1 and 4.1.2 of this report.

3.3 SPECIALIZED KNOWLEDGE

The User provided no specialized knowledge that is material to recognized environmental conditions in connection with the Subject Property. EBI was not provided with or made aware of previous environmental assessments or other documentation that is material to recognized environmental conditions in connection with the Subject Property, except as presented in Section 4.2.6 of this report.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

The User has provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The User has provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

The User provided contact information for the Subject Property owner, manager and/or occupants.

3.7 REASON FOR PERFORMING PHASE I ESA

The User retained EBI to complete this Phase I Environmental Site Assessment in connection with a real estate transaction.

4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORDS

A review of standard environmental databases maintained by Federal, state, and tribal offices was completed through Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM Standard E 1527-13, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded "orphan" properties within the same zip code. The database report is presented in Appendix E.

The database report identified three "orphan sites". Orphan sites are those sites that could not be accurately mapped or geocoded due to inadequate location information. One of these orphan sites includes the Subject Property (Eden Landing BPL LC- 3447 Investment Blvd) on the Haznet and HWTS databases and is discussed below. Based on review of the other data, the other two sites do not appear to be located within the approximate minimum search distance.

It should be noted that plotted locations of listed sites are not always accurate. With regard to listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, EBI uses the best available data when evaluating the location of listed sites discussed below.

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed in the sections below. Properties that are identified within the database report that are not discussed further in the sections below are not considered to be a concern to the Subject Property based on one or more of the following rationale: absence of reported releases, current regulatory status, distance, presumed hydrogeologic gradient and/or nature/extent of contamination.

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS

4.1.1 Federal, State and Tribal Agency Database Records

National Priority List (NPL)

The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act and is searched to 1.0 mile.

Delisted National Priority List (NPL)

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. The Delisted NPL database is searched to 0.5 mile.

Superfund Enterprise Management System (SEMS)

SEMS tracks federal hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of the USEPA's Superfund Program. The list was formerly known as CERCLIS and was renamed at the end of 2015. The list contains data regarding potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). SEMS also contains sites that are either proposed to or on the National Priority List (NPL), as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. SEMS is searched to 0.5 mile.

SEMS - ARCHIVE

SEMS - ARCHIVE tracks sites that have been removed from the SEMS list. This list was formerly known as the CERCLIS- NFRAP list and was renamed SEMS - Archive at the end of 2015. SEMS-ARCHIVE sites may be sites where, following an initial investigation, no contamination was found, contamination was removed without the need for the site to be placed on the NPL, or the contamination was not considered sufficient to warrant Federal Superfund action or NPL consideration. SEMS - Archive is searched to 0.5 mile.

Resource Conservation and Recovery Act (RCRA) - Corrective Action Tracking System (CORRACTS)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA and is searched to 1.0 mile.

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) Facilities

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) facilities are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA), and the database is searched to 0.5 mile.

RCRA Hazardous Waste Generators

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). A RCRA-LQG is defined as a facility that generates over 1,000 kilograms (Kg) of hazardous waste, or over 1 Kg of acutely hazardous waste per month. A RCRA-SQG is defined as a facility that generates between 100 Kg and 1,000 Kg of hazardous waste per month. A RCRA-CESQG is defined as a facility that generates less than 100 Kg of hazardous waste, or less than 1 Kg of acutely hazardous waste per month. RCRA Hazardous Waste Generator listings are searched for the Subject Property and adjacent properties only.

Federal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Federal Engineering Control / Institutional Control Registries are searched to 0.5 mile.

Emergency Response Notification System (ERNS)

ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property.

Facility Index System (FINDS)

The Facility Index System (FINDS) report is a computerized inventory of all facilities that are regulated or tracked by the USEPA. These facilities are assigned an identification number that serves as a cross-reference for other databases in the USEPA' program system. The appearance of a site in this database does not, in itself, indicate an environmental concern, but is more an indication of the types of operations occurring at the listed facility(ies). The FINDS database is searched for Subject Property listings.

Enforcement and Compliance History Information (ECHO)

ECHO provides integrated compliance and enforcement information for approximately 800,000 regulated facilities nationwide. The appearance of a site in this database does not, in itself, indicate an environmental concern, but is more an indication of the types of operations occurring at the listed facility(ies). The ECHO database is searched for Subject Property listings.

Annual Workplan Sites (AWP)

The California Department of Toxic Substance Control (DTSC) Annual Workplan Sites (AWP) identifies known hazardous substance release sites targeted for cleanup. The data source is the California Environmental Protection Agency. The AWP database is searched to 1.0 mile.

California Hazardous Waste Sites (CalSites)

The California Hazardous Waste Sites (CalSites) database contains potential or confirmed hazardous substance release sites identified by the California Department of Toxic Substance Control (DTSC). It is no longer updated by the reporting agency and has been replaced with ENVIROSTOR.

California High-Priority Confirmed Release Sites (RESPONSE)

The California High-Priority Confirmed Release Sites (RESPONSE) database contains confirmed release sites where the California Department of Toxic Substance Control (DTSC) is involved in the remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. The RESPONSE database is searched to 1.0 mile.

California Hazardous Waste Sites (ENVIROSTOR)

The California Hazardous Waste Sites (ENVIROSTOR) database contains potential or confirmed hazardous substance release sites, or sites for which there may be reasons to investigate further, identified by the California DTSC. The database includes the following site types: Federal NPL; State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. The ENVIROSTOR database is searched to 1.0 mile.

Proposition 65 Notification Records (Notify 65)

Proposition 65 Notification Records contain facility notifications regarding any release that could potentially impact drinking water and thereby expose the public to a potential health risk. The Notify 65 database includes listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency. The Notify 65 database is searched to 1.0 mile.

Toxic Pits Cleanup Act Sites (Toxic Pits)

The Toxic Pits Cleanup Act Sites (Toxic Pits) database contains sites identified by the California Water Resources Control Board that are suspected to contain hazardous substances where cleanup has not yet been completed. The Toxic Pits database is searched to 1.0 mile.

California Bond Expenditure Plan

The California Bond Expenditure Plan was developed by the California Department of Health Services as a site-specific expenditure plan for the appropriation of Hazardous Substance Cleanup Bond Act funds, and the database is searched to 1.0 mile.

Hazardous Waste and Substances Sites List (Cortese/HIST Cortese)

The Hazardous Waste and Substance Site List (also known as the Cortese List) is a planning document used by the State, local agencies, and developers to comply with California Environmental Quality Act requirements in providing information regarding the location of hazardous materials releases. Government Code Section 65962.5 requires the California Environmental Protection Agency to develop at least annually an updated Cortese List. The California Department of Toxic Substance Control (DTSC) is responsible for preparing a portion of the information that comprises the Cortese List, and other state and local government agencies are required to provide additional hazardous material release information for the Cortese List. The Cortese/HIST Cortese databases are searched to 0.5 mile.

Spill, Leaks, Investigations, and Cleanup (SLIC)

The Spills, Leaks, Investigations, and Cleanups (SLIC) database, maintained by the California Water Resources Control Board, includes unauthorized discharges from spills and leaks, other than from underground storage tanks or other regulated sites. The SLIC database is searched to 0.5 mile.

California UST Databases (AST, UST, FID, HIST UST, SWEEPS UST)

The California Environmental Protection Agency, the California Water Resources Control Board and other entities previously maintained or currently maintain various lists recording permitted aboveground and underground storage tank (AST/UST) sites in California, and these databases are searched for Subject Property and adjoining property listings.

Solid Waste Information System (SWIS)

The Solid Waste Information System (SWIS and SWF/LF) facility database contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites. For each facility, the database contains information about location, owner, operator, facility type, regulatory and operational status, authorized waste types, local enforcement agency and inspection and enforcement records. The databases are searched to 0.5 mile.

Waste Management Unit Database / Solid Waste Assessment Test (WMUDS/SWAT)

The Waste Management Unit Database (WMUDS) is used by the California Water Resources Control Board and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring

Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information. The WMUDS/SWAT databases are searched to 0.5 mile.

California Hazardous Material Incident Report System (CHMIRS)

The California Hazardous Material Incident Report System (CHMIRS) contains information regarding reported hazardous material incidents (i.e. accidental releases or spills). The data source is the California Office of Emergency Services. The CHMIRS database is searched for Subject Property listings.

Hazardous Waste Information System (HAZNET)

The California Environmental Protection Agency maintains a list of facilities that issue hazardous waste manifests. The source of the manifest records is the California Department of Toxic Substance Control (DTSC). Inclusion on the HAZNET database does not necessarily indicate the existence of an environmental concern, such as a release or spill incident. The HAZNET database is searched for Subject Property listings.

Tribal Environmental Databases

The United States Bureau of Indian Affairs (BIA) is responsible for the administration and management of 55.7 million acres of land held in trust by the United States for American Indians, Indian tribes, and Alaska Natives. There are 562 federally recognized tribal governments in the United States. The environmental database report identifies tribal administered lands of the United States that have any area equal to or greater than 640 acres.

Hazardous Waste Tracking System (HWTS)

The California Department of Toxic Substance Control (DTSC) maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility. The HWTS database is searched for Subject Property listings.

CalEPA Regulated Site Portal Data (CERS)

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials. The CERS database is searched for Subject Property listings.

CERS HAZ WASTE

The CERS HAZ WASTE database includes a list of sites in the CERS Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs. The CERS HAZ WASTE database is searched for Subject Property listings.

Dry Cleaners

EDR duplicates a list of dry cleaner related facilities that have EPA Identification Numbers issued for the generation of regulated waste. Inclusion on this list does not indicate that a release has occurred or that contamination has been identified.

Historical Auto Stations (HIST Auto) and Cleaners (HIST Cleaners)

EDR maintains a proprietary list of Historical Auto Stations and Cleaners obtained from city directories and telephone books.

Detail Summary	
Site Name:	KRYPTOS BIOTECHNOLOGIES INC
Databases:	CERS HAZ WASTE, HWTS
Address:	3423 INVESTMENT BLVD STE 6
Distance:	Subject Property
Direction:	NA
Gradient:	NA
ID No.:	10314922 CAL000436355
Comments:	Listed as a permitted hazardous waste generator. Active on HWTS 05/21/2018. Not listed as a release site.

Site Name:	AT&T CALIFORNIA - P5-3TA
Databases:	CERS
Address:	26010 EDEN LANDING RD
Distance:	Subject Property
Direction:	NA
Gradient:	NA
ID No.:	10813033
Comments:	Permitted as a chemical storage facility. No other data. Not listed as a release site.

Site Name:	CAFEPRESS.COM
Databases:	HAZNET, HWTS
Address:	26010 EDEN LANDING RD STE 5
Distance:	Subject Property
Direction:	NA
Gradient:	NA
ID No.:	CAL000255421
Comments:	Active on Hazardous Waste Tracking System (HWTS) 07/10/2002-04/03/2006. Removed hydrocarbon solvent waste as reported on manifests in 2004. Not listed as a release site.

Site Name:	UMB ANALYTICAL INC.
Databases:	HAZNET, HWTS
Address:	26010 EDEN LANDING RD.
Distance:	Subject Property
Direction:	NA
Gradient:	NA
ID No.:	CAC002853198
Comments:	Active on Hazardous Waste Tracking System (HWTS) 03/16/2016-06/16/2016. Removed asbestos waste as reported on manifests in 2016. Not listed as a release site.

Site Name:	Not provided
Databases:	CHMIRS
Address:	26203 PRODUCTION AVE
Distance:	Subject Property
Direction:	NA
Gradient:	NA
ID No.:	619
Comments:	On 10/11/1994, it was reported that vandals took gasoline from a vehicle in a parking lot. A total of 25 gallons gasoline was reported. This listing does not appear to be a release but a vandalism event and is unlikely to present a concern.

Site Name:	THIS STUFF WORKS
Databases:	EDR Hist Cleaner
Address:	3401 INVESTMENT BLVD
Distance:	Subject Property
Direction:	NA
Gradient:	NA
ID No.:	NA
Comments:	Listed on a 2013 city directory as "laundry and drycleaner agents". Not listed as a release site.

Site Name:	FAIRBANKS SCALES
Databases:	LUST, CERS, CORTESE
Address:	3494 INVESTMENT BLVD
Distance:	Adjacent
Direction:	South-southeast
Gradient:	Crossgradient
ID No.:	T0600100562
Comments:	A release of gasoline to other groundwater reported 03/21/1985. Case closed 03/03/1998. A 1996 letter requested sampling to evaluate closure of the open case. Analytical results from one assumed direct push/Geoprobe groundwater sample was provided to the Fire Dept that identified gasoline at

Comments:	0.47 parts per million (ppm). No other records were on file. Based on the crossgradient location and case closed status, this site is unlikely to present a concern.

Distance:	Adjacent
Direction:	West-southwest
Gradient:	Downgradient to crossgradient
ID No.:	CAD981389208
Comments:	Small quantity generator listed 09/01/1996 and as a large quantity generator 1986. No RCRA violations reported. Not listed as a release site.

Site Name:	EDEN PLAZA PROPS
Databases:	SEMS-ARCHIVE, ENVIROSTOR
Address:	3521-3583 INVESTMENT BLVD
Distance:	Adjacent
Direction:	West-southwest
Gradient:	Downgradient to crossgradient
ID No.:	CAD982416661
Comments:	Listed on SEMS in 1987, archived in 1989. Listed on ENVIROSTOR in 1989 and referred to the Regional Board for oversight in 2002. According to ENVIROSTOR, site screenings were conducted in 1989 and 1992. The ENVIRSTOR summary states the nine-acre site was developed for office and light industrial use as of 1987. As part of a sales transaction in 1987, volatile organic compounds were detected in soil and groundwater on this and an adjacent parcel (adjacent parcel not named). Historical research showed no known hazardous materials related activities or underground storage tanks were found to have been located on the site. Further, the Regional Board determined the contamination originated from an upgradient source although specific data was not provided. The ENVIROSTOR summary further stated no action was required. The case was referred to the RWQCB in 2002. No other data was provided by ENVIROSTOR. EBI reviewed a portion of a 1989 Preliminary Assessment of Eden Plaza Properties. According to this report, the business park was developed in 1973 for office and light-industrial use. Eden Rock Company #2 owned the property from March 1973 to March 1984 and it was assumed that the site was salt-water marsh and agricultural land prior to the 1973 development. Volatile organic compounds (VOCs) were detected during a 1987 assessment at the site that included the installation of three groundwater monitoring wells (no map provided). The investigation reported yielded the following results: Trichloroethylene [TCE] was found in groundwater from one well at 4.9 parts per billion (ppb). Soil from another well boring was found to have 220 ppb TCE at 5.5 feet below ground surface (bgs). Soil and groundwater from the third well boring showed no detectable contamination. Two additional wells were installed also in 1987 in which TCE was identified at 4 ppb in one of the two wells. VOCs in the second well were found to include Freon 50 ppb and trichlorofluorethane at 100 ppb. There was no documented unauthorized release at

Comments:	this site and no known records of hazardous waste activities. However, four 55-gallon drums were observed at the site in 1989 but were not deemed to represent a concern. The report stated that the RWQCB office contained a file concerning the site that included a 1987 report prepared by Levine-Fricke, which appears to be the source of the data referenced herein. The report further stated that other properties located within 0.5 miles of the site had identified groundwater contamination that included TCE up to 140,000 ppb but did not name the site (see Utah Fund later in this section) and appeared to be an attempt to suggest the contamination may be attributed to an off-site source. Generally, due to the developed and non-residential nature of the site and lack of evidence of an on-site release with potential off-site sources, the report concluded no further action appeared warranted.
------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Site Name:	Not provided
Databases:	NOTIFY 65
Address:	3392 INVESTMENT BLVD.
Distance:	315 feet
Direction:	East
Gradient:	Crossgradient
ID No.:	Not provided
Comments:	No data provided. The reason for inclusion on this list is not known. Also identified as a generated of regulated waste up. No RCRA violations listed. Not listed as a release site.

Site Name:	BREAKWATER BUSINESS PARK
Databases:	CPS-SLIC
Address:	BREAKWATER X CLAWITER
Distance:	500 feet
Direction:	North-northwest
Gradient:	Crossgradient
ID No.:	T10000008142
Comments:	A release of solvents to the aquifer reported in 1987. Case remains open/active. EBI reviewed a 1987 Ground Water Quality report for the Breakwater Business Park. The business park was undeveloped prior to 1976. Five groundwater monitoring wells were installed in 1987. Groundwater was encountered at 9 to 12.5 feet bgs and flowed to the southwest. Three VOCs were detected in one well, MW-2 (southwest side of the site) and included TCE, trichloroethane (TCA), 1,1-dichloroethene (DCE), 1,1-dichloroethane (DCA) at 6.1 ppb, 33 ppb, 50 ppb and 70 ppb, respectively. An on-site source was not identified. A site located approximately 1.25 miles to the southeast was stated to have found TCE at 8,442 ppb (did not identify this site). Although groundwater flow on this site was determined to be to the southwest, the report stated that other site(s) in the area had identified alternate flow directions (northwest). The detected contamination was believed attributed to an off-site source and no further action was recommended in the 1987 report. However, the case remains inactive/open with no activity reported since 1987. The City of Hayward provides domestic water service to the Subject Property, which purchases its water from the San Francisco Public Utilities Commission.

Site Name:	WACHOVIA
Databases:	CPS-SLIC
Address:	3210 INVESTMENT BOULEVARD
Distance:	800 feet
Direction:	Northeast
Gradient:	Upgradient
ID No.:	SL1835735
Comments:	A release of solvents to groundwater reported. Case closed 09/27/2011. The SLIC summary stated VOCs detected in groundwater underlying the site appeared to originate from upgradient sources. Because of this, and because the VOC concentrations in the on-site wells showed a decreasing trend, no further action for the site was recommended. In December 1996, three groundwater monitoring wells were destroyed leaving in-place on-site well MW-3 and off-site well MW-5 for the upgradient property owner of 3201 Investment Boulevard to include in their monitoring program. See discussion for 3201 Investment Boulevard for additional information.

Site Name:	CUSTOM COMMERCIAL DRY CLEANERS / LOVE PROPERTY
Databases:	CORTESE, LUST
Address:	3201 INVESTMENT BOULEVARD
Distance:	950 feet
Direction:	Northeast
Gradient:	Upgradient (crossgradient per data from wells installed on this site)
ID No.:	SL18313733
Comments:	A release of VOCs to groundwater reported 01/02/1996. Case closed 08/25/2011. Listed as a dry cleaning plant in 2001-2014 city directories. EBI reviewed a 2011 No Further Action letter. Investigations included the installation of seven groundwater monitoring wells that encountered first groundwater at 4 to 10 feet bgs and predominantly flowed to the south. A 1996 investigation identified VOCs in groundwater at 3200-3210 Investment Boulevard, an adjacent site, that included 1,1-DCE at 72 to 120 ppb at 2 feet bgs at four locations on the north and east sides of the property. No specific source was identified. Several VOCs, including 1,1-DCE, were detected in the groundwater; the highest concentration was found beneath the building. On August 9, 1996, the Regional Board issued a letter stating that the 1,1-DCE plume likely emanated from the site but active remediation would probably not be necessary given the relatively small aerial extent of the plume, the low concentrations (1,1-DCE up to 220 ppb), and the relatively few contaminants identified. On November 9, 1998, the Regional Board confirmed that no active remediation would be required as long as the plume remained stable. Four more rounds of groundwater sampling performed 1998 to 2011 identified 1,1-DCE at 36 to 94 ppb. Other VOCs were also detected but below their respective drinking water Environmental Screening Level (ESL). On June 27, 2011, a land use covenant and environmental restriction was recorded which restricted land use to industrial, commercial or office space and prohibited the drilling of water supply wells. The letter concluded the contamination did not pose a significant risk to human health and the environment and no further action was required.

Site Name:	WACHOVIA PROPERTY
Databases:	CPS-SLIC
Address:	26545-26563 Corporate Avenue
Distance:	1350 feet
Direction:	Southeast
Gradient:	Crossgradient
ID No.:	SL18272693
Comments:	A release of chlorinated solvents to groundwater was reported in 1987. Case closed 03/03/2015. According to the SLIC case summary and the 2011 Request for Closure Report, the site is part of the Eden Rock Industrial Park which is a mixed-use office-industrial development constructed in the mid-1970s. Former occupants of the site included Xerox (1977-1985), South Bay CRT (1984-1987), Budget Furniture Rentals (1987-1991), and Bakery Specialty Products (1988-1994). A release of VOCs (including PCE, TCE, cis-1,2-DCE, trans-1,2-DCE and vinyl chloride) was traced to a former dumpster storage area that Budget Furniture Rental operated. Remedial activities included removal of the source area (soil) in 1996 and groundwater extraction and treatment between March 1997 and October 1999. Groundwater concentrations in the source area and immediately downgradient showed a decreasing trend and would continue to decline through natural attenuation, ultimately reaching water quality objectives. A deed restriction limits the use of the property to commercial/industrial purposes and restricts the use of shallow groundwater. Residual concentrations do not pose unacceptable risks to human health or the environment.

Site Name:	UTAH FUND (adjacent to the above Wachovia Property)
Databases:	CPS-SLIC
Address:	26569-26575 CORPORATE AVENUE
Distance:	1480 feet
Direction:	Southeast
Gradient:	Crossgradient
ID No.:	Release reported in 1987. Case status is open/inactive as of 02/26/2020.
Comments:	Release reported in 1987. Case status is open/inactive as of 02/26/2020. Only a 1987 report is available and referenced the initial identification of 140,000 ppb TCE in groundwater at that time. This site was investigated along with the Wachovia Property and is unlikely to represent a significant concern to the Subject Property, as referenced above.

Federal, State and Tribal Agency Database Records Summary

The above-listed and remaining identified Federal, State and Tribal Agency Database listings are not considered an environmental concern to the Subject Property based on one or more of the following rationale: absence of reported releases, current regulatory status, distance, presumed hydrogeologic gradient and/or nature/extent of contamination. It is noted that there were historical releases of VOCs documented at area properties that appears to have occurred sometime prior or during the 1980s, with some remedial action occurring and groundwater contamination levels declining such that significant impact to the Subject Property appears unlikely.

4.1.2 Local Regulatory Agency Records

Local municipal offices consulted during the completion of this assessment included the following:

Hayward City Fire Department

The Hayward City Fire Department is the lead agency providing regulatory oversight for storage tanks, hazardous materials, regulated wastes, chemical spills and related items. EBI submitted a written request for these records and in response, the following records were provided:

- Neighborhood Elixiers, 3401 Investment Blvd, #10 - stored 505 gallons flammable liquids and 505 gallons toxins related to alcoholic beverages in 2012 operating as a distillery.
- Horizon Electronics, 3401 Investment Blvd, #4, did not need a hazardous materials storage permit in 1990.
- Sequoia Wholesale Thermographers, 3401 Investment Blvd, #9, stored blanket wash and naphtha solvent in containers up to 5 gallons each plus one empty 55 gallon drum, 1993.
- Instrument Pro Inc., 3423 Investment Blvd, #6, small quantity conditioning exempt waste generator in 2012, stored naphtha and related wastes in one 30-gallon container each in 2009, previously stored in a 55-gallon drum 2006-2007; vacated premises and no concerns noted by Fire Dept upon walkthrough on 04/10/2017, no other data.
- Kryptos Biotechnologies Inc., 3423 Investment Blvd, #6, stored up to 540 cubic feet compressed gases.
- Biotium, 3423 Investment Blvd, #8, the facility operated laboratories and stored compressed gases/liquids (nitrogen, argon, hydrogen, carbon dioxide) and generated liquid flammable waste and solid flammable wastes that were stored in two 55-gallon drums removed for off-site processing 2001-2009. Removed all equipment and waste and cleaned floors with bleach upon vacating and no visual concerns noted by Fire Department during final inspection in 2009.
- Bioassay Systems, 3423 Investment Blvd, #11, the facility operated laboratories 2004-2011. They removed all equipment and waste and cleaned floors and surfaces upon vacating in 2009. However, their closure was not certified by the Fire Department due to lack of sufficient documentation.
- Trace/Entech Labs, 3423 Investment Blvd, #8, the facility operated an analytical laboratory 1987-1997. Stored corrosive wastes in a 55-gallon drum. Processed soil samples. Issued a Post-Closure Report in 1997 when they vacated the building. The report stated all regulated materials/wastes and equipment were removed, floors and surfaces were wiped down and decontaminated, as needed.
- Beverage Distributors, 3423 Investment Blvd, #9, no regulated materials, 2001.
- Selig Chemical, 3423 Investment Blvd, #15. Paper said the site was only a sales office with no warehouse, 1986.
- Biolog, 3447 Investment Blvd, #3, stored various laboratory reagents with no quantities greater than 1 pound or 1000 milliliters, 1984.

- Princess Dental Laboratory, 3447 Investment Blvd, #204, classified as Hazardous Materials Range 1A, stored alcohol, oxygen and propane, 2003-2013, facility closed 2019.
- Foundation Structures, Inc., 3447 Investment Blvd, #4, hazardous materials permit not required, 1993.
- RJR Transportation Inc., 3447 Investment Blvd, #6, hazardous materials permit not required, 2000.
- Pacific Automotive Solutions Inc., 3475 Investment Blvd, #7, 2011-2018. Conducted limited auto services. A few aerosol cans, headlamp cleaner and diesel were stored on site. Formerly operated at 26291 Production Avenue, #11.
- Siemens Energy & Automation Services Co, 3475 Investment Blvd, repaired transformers and stored solvent naphtha, petroleum distillates and chlorinated solvents (TCE) in containers up to 1 gallon in size, 1987. In 1987, occupants in an office above this unit complained of feeling ill. Investigations were performed and a small use of solvents and some spray painting was observed being conducted in the ground floor unit by Siemens without adequate ventilation. Alameda County Environmental Health became involved, performed inspections and took wipe samples and could not confirm the presence of hazardous chemicals. It appeared some legal issues arose out of this situation but the records did not indicate that proof of harm from the ground floor Siemens unit to the upstairs office unit was proven.
- Professional Asbestos & Lead Services, 26034 Eden Landing Road, #2, stored asbestos waste in dumpster for off-site processing. Registered as a waste transfer facility. Wastes not generated on site, 1996-1999.
- BZE Cheers LLC, 26034 Eden Landing Road, 2014. No data.
- Ferreira Service Inc., 26046 Eden Landing Road, #5, 2003-2010. Stored waste oil in one drum in the warehouse. A 2004 letter stated the facility was exempt from regulatory oversight. Upon vacating the building in 2010, flammable liquid, corrosive, and refrigerant oil wastes were removed.
- QC Services, 26062 Eden Landing Road, #1, stored small quantities of radionuclides, apparently associated with x-ray equipment, 1984-1987. Provided a copy of their Radiation Safety Program.
- Machining & Tooling Tech, 26062 Eden Landing Road, #1, stored small quantities of radionuclides, 1998.
- Pacific Automotive Solutions Inc., 26291 Production Avenue, #11, 2009. Had one chemical storage cabinet on premise.

Hayward City Building Department

The Hayward City Building Department maintains access to more recent building permit activity through their website at <https://haywardselfservice.us/HSS/login.aspx?>. Although some permit activity is listed, no specific detail is provided and this data is not considered useful. However, the City's website produces an extended property report that provided the following information for the two Subject Property parcels:

- APN 461-0085-016-00, corresponds to a primary address of 26203 Production Avenue, owned by Eden Landing BP LLC since 2017, 5.6 acres, improved with 96,000 square feet of building space, year built 1973, county use listed as industrial light/manufacturing.
- APN 461-0085-052-01, corresponds to a primary address of 26010 Eden Landing Road, owned by Eden Landing BP LLC since 2017, 58853 acres, improved with 98,56000 square feet of building space, year built 1971, county use listed as industrial light/manufacturing.

Alameda County Environmental Health Department

The Alameda County Environmental Health Department (EHD) provides public access to sites overseen by the EHD as a leaking UST site or other cleanup site at the website <http://www.co.alameda.ca.us/aceh/lop/findsite.htm> and the Subject Property was not identified. In addition, EBI submitted a written request for records regarding storage tanks, hazardous materials, regulated wastes, chemical spills and related items on file for the Subject Property. According to a written response, no related records were identified on file.

California Environmental Reporting System

EBI accessed the California Environmental Protection Agency's public portal to the California Environmental Reporting System (CERS) regulated sites at <https://siteportal.calepa.ca.gov/nsite/map/results>. The Subject Property was identified on CERS as follows:

- AT&T California -P5-3TA, 26010 Eden Landing Road, telephone communications facility, permitted as a chemical storage facility since 07/23/2019 for the storage of up to 11 gallons of lead acid batteries
- AT&T California -P5-26W, 26203 Production Avenue, telephone communications facility, permitted as a chemical storage facility since 07/23/2019 for the storage of up to 11 gallons of lead acid batteries
- AT&T California -P5-XCP, 3475 Investment Blvd, telephone communications facility, permitted as a chemical storage facility since 07/23/2019 for the storage of up to 11 gallons of lead acid batteries
- AT&T California -P5-XCV, 3447 Investment Blvd, telephone communications facility, permitted as a chemical storage facility since 07/23/2019 for the storage of up to 11 gallons of lead acid batteries
- Kryptos Biotechnologies Inc., 3423 Investment Blvd, #6, electrical repair shop, permitted as a hazardous waste generator

No other data provided. No violations listed. As stated above, the Fire Department records indicate compressed gases are stored at the Kryptos facility. EBI did not access this unit. Compressed gases do not typically present a concern. The other four AT&T facilities are likely rooftop telecommunication units with small backup battery power and do not present an apparent concern.

Department of Toxic Substances Control (DTSC)

EBI searched the DTSC's databases of Hazardous Waste and Substances Site List Site Cleanup and EnviroStor List that includes NPL sites, State Response Sites, Voluntary Cleanup Sites, School Cleanup Sites and Corrective Action Sites at the website <http://www.dtsc.ca.gov/>. The Subject Property was not identified on DTSC's databases of Hazardous Waste and Substances Site List Site Cleanup and EnviroStor Lists.

California Water Resources Control Board

EBI accessed this agency's Geotracker system through their website at <http://www.geotracker.swrcb.ca.gov/>. This website lists regulated facilities in California including leaking USTs, other contaminated properties reported on the Spills, Leaks, Investigations and Cleanup List (SLIC), wells, land disposal sites, military sites, and permitted UST sites. The Subject Property was not identified on the Geotracker system.

4.1.3 Vapor Migration

EBI conducted a vapor migration screening survey of the Subject Property. EBI's site observations and review of the environmental database report (cited in Section 4.1) did not identify any conditions on the Subject Property or on adjoining properties that would indicate a REC relative to vapor migration at the Subject Property.

This vapor migration screening was conducted in accordance with ASTM E1527-13 and is not intended to satisfy the requirements of ASTM E2600-15. The scope of this screening was limited to visual observations and review of the environmental database report and did not include the collection and laboratory analysis of air samples to confirm or refute the presence of airborne contaminants by vapor intrusion.

4.2 HISTORICAL USE OF THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

EBI attempted to determine the history of the Subject Property dating back to 1940 or first developed use. It should be noted that data failure occurred per Section 8.3.2.3 of ASTM Standard E 1527-13. Specifically, EBI attempted to review previous reports, historical aerial photographs, city directories, fire insurance maps, and land title records, and conducted interviews. It should be noted that EBI could only identify records back to 1899 at which time it appears one rural farm house was present on a topographic map near the center of the Subject Property and was still present by 1939 as observed on an aerial photograph. Agricultural/row crops and additional rural homes were also present on the Subject Property and vicinity by 1939. Based on the rural nature of the Subject Property up to 1939, this data failure is not considered a significant data gap and is unlikely to affect the conclusions of this report.

No environmentally significant conditions were identified on the Subject Property or surrounding properties during the historical review. The Subject Property appears to have been agricultural land/row crops with rural homes present by at least 1939 and remained in that use until circa 1960 when a gold fish/aquarium supply

business (circa 1960-1973) and a truck yard/trucking business (circa 1963-1965) were present. The trucking facility was located on the north side of the Subject Property and was likely removed a few years prior to 1968 as the current 92 freeway and associated access ramps along with improvement/widening of the existing roads was completed by 1968. Due to the short time frame that the trucking facility was present and apparent significant earth movement required for development of the current freeway, roads and industrial buildings, this prior land use is unlikely to represent an environmental concern to the Subject Property. Further, potential agricultural chemical residuals, if any, are unlikely to represent a concern based on the development history and non-residential land use.

The historical use of the Subject Property and surrounding area is summarized in the following sections.

4.2.1 Aerial Photographs and Maps

Historical aerial photographs and historical fire insurance maps may be used to evaluate changes in land use and to identify visible/labeled areas of potential environmental concern. Historical topographic maps provide information related to physical land configuration such as elevation, ground slope, surface water and other features. While most buildings in densely developed urban centers are not depicted, topographic maps typically show structures equal to or larger than the size of a single-family residence in rural areas. Other notable features such as woods, pipelines, municipal boundaries, and areas of filled land are often marked on topographic maps.

A search for historical aerial photographs, historical fire insurance maps and historical topographic maps depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). The EDR Report indicated that fire insurance map coverage for the vicinity of the Subject Property was not available. A copy of the search documentation letter is presented in Appendix F. Historical images depicting the Subject Property reviewed are summarized in the following table. Copies of the images are presented in Appendix F.

AERIAL PHOTOGRAPH AND MAP SUMMARY			
Period	Subject Property Historical Uses	Surrounding Area Historical Uses	Source(s)
1899 1915	One structure, likely a farm house, was present near the center of the site.	Sparse small buildings (likely homes) and a few roads.	Topographic Maps
1939 1946	Row crops were present across the site with what appeared to be three or four rural home sites with associated small buildings and a cluster of trees.	Farmland (row crops) and rural homes with a few roads.	Topographic Maps Aerial Photographs
1947 1948	One small structure was present along the northwest side and two small structures with a driveway entering from the north were present near the center, likely rural homes. An electrical power line was present along the southwest side.	Sparse small buildings (likely homes) and a few roads.	Topographic Maps
1958 1959	Appeared to be developed with three rural residences with several small structures and animal pens along with a cluster of trees and several small vegetable plots in the center and farmland (row crops) on the northeast and southwest sides. In addition, two aboveground tanks (likely water tanks) were near the center but appeared associated with the western structures. An	Farmland (row crops) and rural homes with a few roads.	Aerial Photographs Topographic Maps

	electrical power line was present along the southwest side.		
1960	At least one residence and a gold fish supply business were present	Rural	City Directories
1963	The same features remained as in the 1958 aerial except a metal building had been added to the west side and what appeared to be a truck yard with approximately 16 semi trucks was present on the north-northwest side.	Farmland (crow crops) and rural homes with a few roads.	Aerial Photographs
1965	At least two residences and a trucking business were present	Rural	City Directories
1968	What appeared to be the two residences, metal building and two ASTs remained on the west side. The cluster of trees remained in the middle. The rest of the land appeared unused.	Highway 92 to the north and related ramps were present plus agricultural land.	Aerial Photographs Topographic Maps
1970	At least two residences and an aquarium supply business were present.	Rural	City Directories
1973-Present	The current business park and overhead electrical power line were present.	Current western adjacent business park and surrounding light-industrial/warehouse buildings were mostly present by 1974 and fully present by 2006.	Aerial Photographs Topographic Maps City Directories Municipal Records

4.2.2 Street Directories

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a particular community. The directories may also contain information pertaining to business processes conducted within a community. A search for historical street directories was conducted by Environmental Data Resources, Inc. (EDR). Historical street directories were reviewed and are summarized in the following table. Copies of the street directories are presented in Appendix F.

STREET DIRECTORY SUMMARY		
Year	Issues Noted	Occupants
1920-1959	No	No listings provided
1960	No	Not listed - 26024 Eden Landing Road Harold Fowler - 26030 Eden Landing Road Not listed - 26040 Eden Landing Road Sam Wada Shingo Hayward, Goldfish & Supplies - 26042 Eden Landing Road Vacant - 26046 Eden Landing Road
1965	Yes	CJ Perry Trucking Co - 26024 Eden Landing Road Harold Fowler - 26030 Eden Landing Road Sam Wada - 26040 Eden Landing Road Not listed - 26042 Eden Landing Road Vacant - 26046 Eden Landing Road
1970	No	Not listed - 26024 Eden Landing Road Harold Fowler - 26030 Eden Landing Road Mantiel Montez - 26040 Eden Landing Road Aquarium Supplies- 26042 Eden Landing Road Not listed - 26046 Eden Landing Road
1973-Current	No	Multiple tenants listed at the on-site buildings through the years indicating each building has been used for multiple tenant occupancy since at least 1973.

4.2.3 Recorded Land Title Records

Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A "chain of title" is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

4.2.4 Property Tax Records

The Alameda County Assessor records did not provide readily available data regarding the physical characteristics of the Subject Property or the year built. The current owner was listed as Eden Landing BP LLC and has owned the site since 2017.

4.2.5 Environmental Liens and Activity and Use Limitations

A search for Environmental Liens and Activity and Use Limitations was not included in the scope of this assessment.

4.2.6 Previous Environmental Reports

EBI previously completed an environmental report for the Subject Property. Relevant information from the previous report is discussed in the appropriate sections of this report, and a portion of the previous report is presented in Appendix G.

Phase I Environmental Site Assessment, Eden Landing, 26010 Eden Landing Road, Hayward, California, prepared by EBI Consulting, Inc. (EBI) of Burlington, Massachusetts, and dated June 5, 2017. The 2017 Report was completed in general conformance with ASTM Standard E 1527-13. The following relevant information was presented in the 2017 Report:

- At the time of the 2017 Report, the Subject Property was substantially improved and occupied similar to its current conditions. The Subject Property was occupied by 122 mixed use office/warehouse tenants with 21 vacant units. There were no manufacturing or industrial operations conducted at that time.
- Based upon review of historical resources dating back to 1899, the Subject Property was developed with a residence by 1899 with later agricultural use. Based on review of 1958, 1963, and 1966 historical aerial photographs, the western portion of the Subject Property was developed with several commercial building structures and included two aboveground storage tanks, positioned at the central portion of the Subject Property, approximately 16 ponds positioned to the southwest of the aboveground storage tank. North of this facility was an apparent residence, followed by several trucks and trailers parked as if for sale. City directory research indicated the Subject Property was occupied by CJ Perry Trucking (26024 Eden Landing) circa 1965; Goldfish and Supplies (26042) circa 1960 through 1970; and, Golden Auto Parts Wholesale circa 1965. Although a historical truck sales operation, an auto parts distributor and a goldfish supplier have been identified on the Subject Property, these operations predated construction of the existing building and associated excavation and grading of soils beneath the entire Subject Property to depths allowable for construction of the existing buildings. As such, it was considered unlikely that these historical activities represent an environmental concern to the Subject Property.
- EBI's review of regulatory databases did not identify off-site properties likely to represent an environmental concern to the Subject Property. An adjacent property of note was identified and included Eden Plaza Properties at 3521-3585 Investment Boulevard to the southwest. A 1989 Primary Assessment report by Ecology and Environment, Inc. (EEI) reported that volatile organic compounds (VOCs) were confirmed in soil and groundwater samples collected from an earlier investigation completed in 1987. EEI reported that three groundwater monitoring wells were installed. One monitoring well identified trichloroethylene (TCE) in groundwater at 4.9 ppb. In addition, TCE was reported in soils from a second well at 220 ppb. Two additional groundwater wells were constructed in July/August 1997. EEI reported TCE at 4 ppb, and groundwater from the second well was reported to have Freon 113 at 50 ppb and trichlorofluoroethane at 100 ppb. EEI indicated that investigations of nearby properties (within a 0.5 miles east, northeast) had reported groundwater concentrations of TCE

of 140,000 ppb with other halogenated VOCs detected in groundwater. The GeoTracker database provided an email by Ms. Cheryl Prowell, dated December 8, 2016, which stated the case file remained open and had been inactive since 1988. Ms. Prowell confirmed that the case is regulated by the Water Quality Control Board and has requested current information about the property to assess the risk of a release or to determine eligibility for closure. It was unknown whether the contaminant plume associated with the adjacent site had migrated beneath the Subject Property. However, the adjacent site is considered downgradient of the Subject Property. The Responsible Party associated with this release had been identified by state and Federal regulatory agencies and the RP has recently been contacted by the RWQCB. Further, no current or former owners or operators of the Subject Property have been identified as a Responsible Party associated with the adjacent facility, and EBI had identified no data or information that would suggest that current or historic operations on the Subject Property may have contributed to or exacerbated the identified contamination.

- EBI conducted a limited visual screening survey for the presence of ACM at the Subject Property. The suspect ACMs were identified to be in good condition. EBI recommended the development and implementation of an Asbestos Operations and Maintenance (O&M) Plan for the Subject Property.

Based upon the findings of the Phase I Environmental Site Assessment, the 2017 assessment did not identify any recognized environmental conditions (RECs) associated with the Subject Property. EBI presented no recommendation for further investigation.

4.2.7 Other Historical Records and Interviews

Ms. Rebekah Weinacker, Property Manager with CIP Real Estate, stated she believed the buildings were constructed in the 1970's. Ms. Weinacker was not aware of the land use prior to the current development and stated that none of the current tenant store hazardous materials or generate hazardous waste to her knowledge.

5.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Ms. Jodi Vanneman, EBI Senior Assessor, on February 19, 2021. Ms. Vanneman was accompanied by and interviewed Ms. Rebekah Weinacker, Property Manager with CIP Real Estate.

5.1 METHODOLOGY AND LIMITING CONDITIONS

The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property and improvements, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise.

At the time of the survey, the weather was overcast and approximately 50 Fahrenheit. Due to COVID-19 Pandemic access restrictions to occupied units, EBI was provided minimal access to occupied units. During the survey, representative tenant spaces, mechanical spaces, and/or equipment components were observed. EBI was provided full access to the following units: 3401-200, 3423-10, 3447-8, 3475-two second floor offices, 26010-1C, 26010-201, 26034-1, 26062-6, 26291-1 and partial access (as viewed from open doors and front windows) to units 3423-1, 3423-8, 26010-1, 26010-8 and 26203-4. EBI was informed by Ms. Rebekah Weinacker, Property Manager with CIP Real Estate, that none of the tenants generated regulated wastes or stored excessive chemicals, to their knowledge, nor were site conditions conducive to those types of activities. There were no other significant portions of the Subject Property that were inaccessible or excluded from this survey.

5.2 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

5.2.1 Hazardous Substances and Petroleum Products (Identified Uses)

Notable hazardous substances or petroleum products in connection with identified uses observed at the Subject Property are described below.

HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS			
General Type of Material	Approximate Quantity / Container / Material	Location	Storage Condition
Corrosive products for cleaning/mildew removal and Flocculant M product (skin irritant)	Approximately a dozen 3-gallon containers stored on secondary containment within warehouse	Unit 26291-1, Frog Environmental	Good: No leaks or spills
Paint and paint-related products	50+ aerosol cans and containers up to 1-gallon in size stored in metal cabinet within warehouse	Unit 3423-1, Excel Signs	Good: No leaks or spills

EBI did not identify evidence of significant leaks, spills, or the improper handling of petroleum or hazardous substances that might impact the environmental condition of the Subject Property. It should be noted that a compliance audit was beyond the scope of work for this assessment and was not performed.

5.2.2 Hazardous Substances and Petroleum Products (Unidentified Uses)

EBI did not observe evidence of hazardous substance or petroleum products containers at the Subject Property that were not in connection with identified uses.

5.2.3 Unidentified Substances Containers

EBI did not observe evidence of unidentified substances containers at the Subject Property.

5.3 WASTE GENERATION, STORAGE, AND DISPOSAL

EBI identified the following waste streams generated at the Subject Property:

WASTE GENERATION, STORAGE, AND DISPOSAL			
Classification	Type of Waste / Generation Process	Type of Storage / Location	Disposal Method / Contractor
Non-regulated Solid Waste	Municipal waste and recyclable materials (paper, cardboard, empty containers)	Several dumpsters located within paved areas behind buildings	Removed by Waste Management for off-site processing
Non-regulated Liquid Waste	Sanitary wastewater	NA - connected to the municipal sewer system	City of Hayward
Non-regulated Solid Waste	Metal waste generated from sign making	Large, open-top plastic crate (similar to small dumpster), adjacent to Unit 3423-1, Excel Signs	Removed by contractor for off-site processing
Regulated Solid or Liquid Waste	None observed	NA	NA

No evidence of improper solid waste management or the improper disposal of hazardous substances or petroleum products was observed at the time of reconnaissance.

5.4 UNDERGROUND STORAGE TANKS (USTS) & ABOVEGROUND STORAGE TANKS (ASTS)

5.4.1 Existing Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of existing USTs or ASTs located at the Subject Property.

5.4.2 Former Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of former USTs or ASTs located at the Subject Property.

5.5 OIL-CONTAINING EQUIPMENT AND POLYCHLORINATED BIPHENYLS (PCBS)

Polychlorinated biphenyls (PCBs) are a chemical component of many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to July 2, 1979. Equipment that may potentially contain PCBs includes electrical equipment such as transformers or capacitors or hydraulically operated equipment, such as elevators, compaction equipment, or manufacturing equipment. The manufacture and distribution in commerce of PCBs was banned for use in 1979 by the United States Congress, which enacted the Toxic Substance and Control Act (TSCA). In accordance with US Code of Federal Regulations Title 40 - Protection of Environment, Chapter 1 - Environmental Protection Agency, Subchapter R - Toxic Substance Control Act (TSCA), Part 761 - Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions, the owner of a transformer or other PCB-containing equipment is responsible for equipment maintenance and remediation in the event of a leak or release.

The following oil-containing equipment was identified at the Subject Property:

OIL-CONTAINING EQUIPMENT			
Classification	Type of Equipment	Year Installed / Location	Staining / Releases Identified
Transformers and Fluid-Containing Electrical Equipment	Several pad-mounted transformers, owned and operated by PG&E	Not known/exterior behind buildings	No

EBI observed several pad-mounted electrical transformers in the paved, exterior areas at the Subject Property. The transformers appeared to be in good condition, and no staining or other evidence of a release of dielectric fluid was observed in the vicinity of the transformer units. The transformer units are owned and operated by the regional electrical utility provider, PG&E. The units were not labeled to indicate PCB content. In the event of a release of dielectric fluid from one of its transformers, the utility company typically conducts regulatory response actions and cleanup. Based on the ownership and condition of the transformers, these units do not represent an apparent environmental concern to the Subject Property.

5.6 ADDITIONAL SITE CONDITIONS

The following is a summary of visual and/or physical observations of the Subject Property on the day of the site visit. Photographs of pertinent Subject Property features are presented in Appendix A.

ADDITIONAL SITE CONDITIONS	
Condition	Identified
Interior Drains, Trenches, or Sumps	No
Interior Stains or Corrosion	No
Unusual Odors	No
Interior Pools of Liquid	No
Stained Soil or Pavement	No
Stressed Vegetation	No
Indications of Solid Waste Disposal	No
Exterior Pits, Ponds, or Lagoons	No
Wastewater or Stormwater Discharge/Disposal	Yes
Oil-Water Separators or Clarifiers	No
Septic Systems or Cesspools	No
Wells (Drinking Water Wells, Monitoring Wells, Agricultural/Irrigation Wells, or Process Water Wells)	No
Petroleum or Natural Gas Pipelines/Easements	No

Several storm drains are located throughout the paved areas of the Subject Property. These drains discharge into the municipal storm drain system. No stains or evidence of an unauthorized discharge were identified around the storm drains observed.

6.0 INTERVIEWS

The site contact or Key Site Manager was contacted to be interviewed to obtain information regarding recognized environmental conditions in connection with the property. Additionally, a Pre-Survey Questionnaire was forwarded to the designated Subject Property contact. The Pre-Survey Questionnaire has not been completed and returned to our offices. The information requested in the Pre-Survey Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. The Pre-Survey Questionnaire and any accompanying documentation is presented in Appendix C.

INTERVIEWS			
Contact / Affiliation	Date of Communication	Years Associated with the Subject Property	Telephone No.
Amber Bonsall Property Manager CIP Real Estate	02/12/2021 02/19/2021 02/22/2021	Not stated	(510) 990-5040
Rebekah Weinacker Property Manager CIP Real Estate	02/19/2021	Not stated	(510) 990-5040
Joel Dooha-Chambers Alameda County Department of Environmental Health	02/11/2021	NA	(510) 567-6702
Rachel Quantilla Hazardous Materials Tech Hayward Fire Department	02/19/2021	NA	(510) 583-4910

Pertinent information from the interviews is presented in applicable sections of this report.

7.0 CONSIDERATIONS OUTSIDE THE SCOPE OF ASTM PRACTICE E 1527-13

The following sections address environmental issues or considerations at the Subject Property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM Practice E 1527-13 (non-scope considerations).

7.1 ASBESTOS-CONTAINING MATERIAL (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable materials are those that can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition, or other activities, at which time it may be considered friable.

EBI conducted a limited visual screening survey for the presence of ACM at the Subject Property. EBI identified friable suspect ACM in the form of textured wall surfacing materials, sheetrock/joint compound composite material, and acoustical ceiling tile and non-friable suspect ACM in the form of vinyl flooring and associated mastic and roofing materials. These materials were observed to be undamaged and in good condition at the time of assessment. Please note that this survey was limited to visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of undamaged suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, the interior of machinery or equipment, or water and sewer systems.

It should be noted that the limited visual screening survey conducted under the scope of work for this assessment does not constitute a full asbestos inspection, in which all areas of the buildings would have been thoroughly surveyed and sampled. The possibility exists for ACM to be present in areas of the buildings not accessed or sampled by EBI personnel. Based on the limited scope of this assessment, additional suspect ACM may also be present in areas of the buildings that were accessed as part of this assessment.

Due to the continued distribution of a wide variety of asbestos-containing building materials, asbestos may be present in some of the roofing, flooring, wall and ceiling materials, caulking/putties, adhesives, spackling compounds, and insulation materials, as well as other building materials that may be used at the Subject Property. Sampling many of these materials requires techniques that may be destructive to subject facilities, and in the case of roofing material, may void warranties. It is recommended that an asbestos inspection be performed in accordance with all applicable federal, state, and local regulatory requirements prior to renovation, demolition, or other activities that could cause a material disturbance. Any removal or disturbance of ACM or suspect ACM should be performed by properly trained personnel and in compliance with federal, state, and local regulations.

7.2 RADON

Radon is a naturally-occurring, colorless and odorless radioactive gas that is generated during the breakdown (radioactive decay) of Uranium that is found in soil and rock throughout the United States. The United States Surgeon General has published information that radon is a cause of lung cancer. Radon usually enters a building through openings in the foundation, and therefore the greatest health concern to residents of the lowest level of a building.

The EPA Map of Radon Zones indicates that Alameda County is located within a Zone 2 radon area. Zone 2 is defined as an area that has a moderate potential for radon gas, with a predicted average indoor radon screening level between 2.0 picoCuries per liter (pCi/L) and 4.0 pCi/L. The EPA recommended Action Level for radon is 4.0 pCi/L. Based upon the location within a Zone 2 radon area and in accordance with the scope of work for this assessment, EBI did not conduct a limited short-term radon screening at the Subject Property.

Based upon the non-residential nature of the Subject Property and in accordance with the scope of work for this assessment, EBI did not conduct a limited short-term radon screening at the Subject Property.

7.3 LEAD-BASED PAINT (LBP)

Use of lead in household paint was banned by the U.S. Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the U.S. Department of Housing and Urban Development (HUD) consider lead-based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm) or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act.

Based on the non-residential use of the existing buildings and in accordance with the scope of work of this assessment, a lead-based paint (LBP) survey was not conducted at the Subject Property.

7.4 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing systems such as lead solder, brass, bronze, and other lead containing alloys. The EPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg /L).

The City of Hayward provides domestic water service to the Subject Property. The City purchases its water from the San Francisco Public Utilities Commission. According to the City's 2019 Water Quality Report, the water meets or exceeds state and federal water quality standards including those for lead and copper. Based upon the existing municipal water service and in accordance with the scope of work for this assessment, EBI did not conduct lead-in-drinking water sampling at the Subject Property.

8.0 FINDINGS AND OPINIONS

EBI has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM Standard E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 1 of this report. This assessment has identified no evidence of recognized environmental conditions (RECs) in connection with the Subject Property.

The following *de minimis conditions* and *consideration outside the scope of ASTM Practice E 1527-13* were identified in connection with the Subject Property:

- The Subject Property has been occupied by past/present tenants engaged in the use of regulated chemicals and/or generation of regulated waste. In addition, regulatory databases were searched that listed past/present tenants as regulated chemical storage and waste generation facilities. However, the Subject Property was not identified as a release site on regulatory databases searched, and EBI's research did not indicate the presence of any former large-scale manufacturing business at the site suggesting the buildings have likely been multi-tenant buildings since constructed. The regulatory database listings and light-industrial activities do not appear to represent a recognized environmental condition to the Subject Property and this is considered to represent a *de minimis* condition to the Subject Property.
- EBI conducted a limited visual screening survey for the presence of asbestos-containing materials (ACM) at the Subject Property. EBI identified friable and non-friable suspect ACM to be undamaged and in good condition at the time of assessment. Based on the condition of suspect ACM, these materials do not currently pose a significant environmental threat to the occupants of the Subject Property. Suspect ACM do not present a problem when maintained in good condition. Asbestos is a condition outside the scope of ASTM E 1527-13 and is not considered a recognized environmental condition (REC).

9.0 RECOMMENDATIONS

Based upon the findings of this investigation, EBI offers the following:

- EBI recommends the development and implementation of a Lead-Based Paint Operations and Maintenance (O&M) Plan for the Subject Property. This O&M Plan provides the procedures and guidelines that, when used during facility cleaning, maintenance, and general operations, will minimize human exposure to lead and minimize release of lead to the environment. This O&M Plan is a long term management approach. Estimated cost: \$500.

Re: Phase I ESA AAI User Questionnaire for property known as or located at:
Eden Landing Business Park, Hayward, CA

EBI Project #:
TBD

PHASE I ESA AAI USER QUESTIONNAIRE (ASTM E 1527-13)

Dear User (Client),

Presented below is the User Questionnaire (as cited in the Appendix X3 of ASTM Standard E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process). This questionnaire is designed to address one of the requirements to satisfy the intent of the Standard, as noted in Section 1.1 of ASTM E 1527-13. Specifically, in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), **the User (the Client) of EBI's Phase I ESA report** must provide the information addressed below (if available) to EBI. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

To note, it is acceptable if you (the Client and User of this report) have no significant information regarding the questions below. The ASTM standard simply requires that we document your answers to this questionnaire. As such, the User Questionnaire can only be completed by the User (the Client). Please also note that EBI provides the site contact with a separate, **Pre-Survey Questionnaire**. This questionnaire is more detailed and documents their knowledge of the Subject Property.

Thank you,

EBI Consulting

ESA AAI USER QUESTIONNAIRE (ASTM E 1527-13)

Subject Property Name: Eden Landing Business Park EBI Project #: TBD

Address: 26010 Eden Landing Road, Hayward, California 94545

1. Are you aware of any environmental cleanup liens against the Subject Property that are filed or recorded under federal, tribal, state or local law?

☐ Yes / ☐ No / ☐ Unknown / ☐ Not Applicable

If yes, please attach a copy.

2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

☐ Yes / ☐ No / ☐ Unknown / ☐ Not Applicable

If yes, please attach a copy.

3. As the user of this ESA do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Or, do you have documentation (i.e., Phase I ESAs, Phase II subsurface investigations, Tank Removal reports, remedial reports, asbestos sampling and/or abatement reports, lead-based paint sampling and/or abatement reports, etc.) for the Subject Property that may be relevant to the Phase I ESA?

☐ Yes / ☐ No / ☐ Unknown / ☐ Not Applicable

Comments: _____

4. Does the purchase price being paid for this Subject Property reasonably reflect the fair market value of the Subject Property?

☐ Yes / ☐ No / ☐ Unknown / ☐ Not Applicable

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Subject Property?

☐ Yes / ☐ No / ☐ Unknown / ☐ Not Applicable

Comments: _____

ESA AAI USER QUESTIONNAIRE (ASTM E 1527-13)

5. Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of release or threatened releases? For example, as user,

a. Do you know the past uses of the Subject Property?

☐ Yes / ☐ No / ☐ Unknown / ☐ Not Applicable

b. Do you know the specific chemicals that are present or once were present at the Subject Property?

☐ Yes / ☐ No / ☐ Unknown / ☐ Not Applicable

c. Do you know of spills or other chemical releases that have taken place at the Subject Property?

☐ Yes / ☐ No / ☐ Unknown / ☐ Not Applicable

d. Do you know of any environmental cleanups that have taken place at the Subject Property?

☐ Yes / ☐ No / ☐ Unknown / ☐ Not Applicable

Please attach copies of previous environmental reports prepared for the Subject Property.

6. As the user of this ESA, based on your knowledge and experience related to the Subject Property are there any obvious indicators that point to the presence or likely presence of contamination at the Subject Property?

☐ Yes / ☐ No / ☐ Unknown / ☐ Not Applicable

Comments: _____

Please be sure to attach copies of documentation, as available.

Re: Property Condition Report & Environmental Site Assessment Questionnaire for property known as or located at EDEN LANDING BUSINESS PARK		
We have been requested by: CIP Real Estate	Subject: To complete an Engineering and Environmental survey of the above mentioned property.	EBI Project #: 1121000805

1. Please read these instructions and those on the following page carefully.
2. Please assemble this original questionnaire and one copy of pertinent property documents, and forward all information to the site or the site contact for the Engineer and/or Scientist to use during the site visit. This documentation will be included in our reports.
3. Please fill out this questionnaire to the best of your knowledge and email or fax it back to us within three business days.
4. The Engineer and/or Scientist will contact you directly to schedule the site visit.
5. This information is extremely time sensitive and necessary to provide your lender with accurate and timely reports.

Please fill out and sign this questionnaire to the best of your knowledge for the Engineer's/Scientist's site visit. Email to **Caitlin Rasche** at REResearchGroup@ebiconsulting.com or fax to (781) 425-3623, for our report files, and keep the original to provide to the Engineer or Scientist.

Subject Property Name: Eden Landing Business Park **EBI Project #:** 1121000805

PROPERTY CONDITION REPORT PRE-SURVEY QUESTIONNAIRE

Additional plans and documentation (see page 4) must be forwarded to the site for the Engineer during the survey. For questions not applicable please respond "N/A." Attach additional pages if necessary. This questionnaire and your responses will be included as an exhibit in the Engineer's report. Accurate and full completion is critical to a timely completion of our reports, and timely loan closing.

LOCAL JURISDICTIONAL INFORMATION

1. What is the property ID #, Lot and Block, or Township/Range ID #? _____
2. What is the legal Municipality or County that has jurisdiction over the property? Alameda County
3. What is the assessors file ID number and tax file ID number if available? 461-0085-016 & 461-85-52-1

PROPERTY INFORMATION

4. What is the size of the subject property lot or lots, in acres? 11.47456 Acres
5. How many parking spaces (and HCP parking spaces) are present at the property? _____
6. How many buildings comprise the subject property? 10 Buildings
 - a. If the property is a mall or large retail center, please confirm and list ownership of each building. _____
7. What is the gross and net rentable square footage of the building(s)? 195,044
8. What is the date of construction of the building(s)? When was the building(s) first occupied? 1971-72
9. How many tenant spaces or apartments are at the Subject Property? 120 Units
 - a. If the property is apartments, please provide a unit and type count by bedroom and square feet. _____
10. Please list, to the best of your knowledge, any deficiencies or problems with the site, parking area, amenities or utilities. _____
11. Please list, to the best of your knowledge, any structural, water infiltration, mold, roof, plumbing, HVAC, Fire Alarm or electrical deficiencies or problems. _____
12. During the last five years, have any major capital improvements been made to the site or building(s)? If so, please explain, with the approximate cost. Roof Sealing \$542,525; HVAC Replacements ongoing; Monument Signs \$90k Landscape Revamp \$70k, Common Area Revamp \$28k, Gas meter installations \$15k, Asphalt work \$40k plus

13.

Does the property have	Y or N	Does the property have	Y or N
Polybutylene piping	N	Compressed wood or composite board siding	N
Galvanized steel water lines	N	EIFS exterior finishes	N
ABS sanitary lines	N	Fire Retardant Treated plywood	N
Aluminum branch wiring	N	Cadet/Encore electric heaters installed 1982-99	N
Omega (Central or CSC) brand sprinkler heads	N	GE or Hotpoint dishwashers installed 1983-89	N

14. Please list any deficiencies noted during any Building, Fire or Health Department inspections in the last three years. N15. When were the fire alarm systems and/or sprinkler system (if any) last tested? N

16. Please list the following utility providers: Electricity: PG&E
 Water: Hayward Water Storm Drainage: Hayward Water
 Sanitary Sewer: Hayward Water Natural Gas or Oil: PG&E
 Trash Hauler: Waste Management and, Frequency of Pick-ups: 2-4 times per week

17. If you are performing or planning any repairs or replacement work to the property that will exceed an aggregate cost of \$2,000 please explain, with the approximate cost. Asphalt Repair/Restripe/Slurry \$69k, Vacant Unit Prep \$120k, Executive Suite Door Hardware replacement \$6k

18. Please list the responsible party for tenant improvements and maintenance of major systems (if applicable).

18. Please attach a brief history of the property. This information helps us properly assess, evaluate and understand your property, and will assist in the financial analysis. The information should include:

- The date of approvals and construction, the contractor who built the property
- History of major capital improvements, repairs, additions or modifications
- History of fires or violations
- A list of any ongoing maintenance issues
- Tenant history, approximate turnover rate

DOCUMENT AND INFORMATION CHECKLIST

Please provide the following information (as much as possible in electronic format) so the Engineer or Scientist can proceed with the survey of the property. Asterisk (*) items are critical to report completion. The documents will become exhibits in the Consultant's report.

A. Plans	B. Municipal Documents	C. Additional Information
<ul style="list-style-type: none"> ▪ ALTA Survey or Site Plan* ▪ Architectural Building Plans* - plans, elevations, wall section, foundation, HVAC & elec. schedules ▪ Reduced scale Site and Building Plans ▪ <u>Extremely critical for properties in Seismically active zones 3 and 4*</u> STRUCTURAL PLANS – Seismic Assessments are required for these properties. Structural drawings must be provided at the time of the site visit. If no drawings are provided, the report will be delayed and the Seismic Assessment may be overly conservative. 	<ul style="list-style-type: none"> ▪ Certificate of Occupancy* ▪ Building Permit* ▪ Façade inspection compliance* ▪ Copy of tax cards ▪ Copy of violations 	<ul style="list-style-type: none"> ▪ Capital expense report for 1 to 3 years* ▪ Tenant Rent Roll* ▪ Roof warranty ▪ History of recent improvements ▪ Schedule of Floor Area Measurements - Gross and Rentable Square Feet ▪ Previous Due Diligence or Building Component Reports, <u>including, but not limited to</u>, façade*, roof*, mechanical*, electrical, elevator, sprinkler, fire alarm or life safety equipment, or pavement. ▪ Copy of most Recent Appraisal
	B.1 NYC Projects <ul style="list-style-type: none"> ▪ Department of Building Violations* ▪ Environmental Control Board Violations* ▪ Local Law 11 Façade Reports* 	

EBI ACCESS REQUIREMENTS

At the time of the site visit the Consultant is required to gain access to all areas of the property. This includes:

- All building roofs, unless pitched asphalt shingles. This may require you to obtain and provide a ladder.

- All building perimeters
- All site amenities
- All building interiors, including as applicable, common areas, lobbies, a representative sampling of offices, retail spaces, manufacturing or assembly areas, or apartments, community rooms, exercise rooms, pool areas, storage rooms, attics and basements, garages.
- All mechanical, electric, sprinkler, HVAC, utility, service, elevator, storage and equipment rooms

ENVIRONMENTAL SITE ASSESSMENT PRE- SURVEY QUESTIONNAIRE

1. Describe the current uses of the property noting tenant names and oil/chemical usage. See attached rent roll and Phase I ESA by PSI dated 10/6/2017.

2. Describe the past uses of the property noting tenant names and oil/chemical usage. See attached Phase I ESA by PSI dated 10/6/17.

3. (Y) (N) Has a previous environmental site assessment report been prepared for the property? If yes, for what reason? Can EBI have a copy? See attached Phase I ESA by PSI dated 10/6/17.

4. (Y) (N) Has a subsurface investigation (Phase II) ever been conducted on the property, including soil sampling, groundwater sampling, or installation of groundwater monitoring wells? If yes, for what reason? What were the results? Can EBI have a copy of the report? Are there any groundwater monitoring wells currently located on the property? Not to my knowledge.

5. (Y) (N) Has contamination been identified at the Subject Property? Describe the nature of the contamination (i.e., source, media impacted, location, sampling, cleanup activities, regulatory status, etc.). Can EBI have copies of related documentation? Not to my knowledge.

6. (Y) (N) Has a spill or surficial release occurred at the Subject Property? Describe the nature of the spill/surficial release (i.e., source, location, response/cleanup actions, regulatory status, etc.). Can EBI have copies of related documentation? Not to mt my knowledge.

7. (Y) (N) Is the Subject Property listed with the USEPA and/or the state environmental regulatory agency as a contaminated site? If yes, please describe. Can EBI have copies of related documentation? See attached Phase I ESA by PSI dated 10/6/17.

8. (Y) (N) Has there ever been previous sampling for Asbestos, Lead-Based Paint, Lead in Water, or Radon? If yes, please describe. Can EBI have copies of related documentation? See attached Phase I ESA by PSI dated 10/6/17.

9. (Y) (N) Has there been any Asbestos or Lead-Based Paint abatement or Radon mitigation conducted at the Subject Property? Are there Asbestos and/or Lead-Based Paint Operations and Maintenance Plans for the Subject Property? If yes, please describe. Can EBI have copies of related documentation? See attached Phase I ESA by PSI dated 10/6/17.

10. (Y) (N) Any known environmental liens, deed restrictions, or use limitations for the Property? If yes, please describe. Can EBI have copies of related documentation? See attached Phase I ESA by PSI dated 10/6/17.

11. (Y) (N) Any permitted or regulated activities (Hazardous waste generator, air) on the Property? If yes, please describe. See attached Phase I ESA by PSI dated 10/6/17.

12. (Y) (N) Are there any transformers or other electrical equipment, which may contain PCBs? If yes, please describe. Where are they? Who owns the transformer(s)? Who services them? See attached Phase I ESA by PSI dated 10/6/17.

13. (Y) (N) Has an industrial or manufacturing operation, gas station, motor repair facility, commercial printing facility, dry cleaners, photo-developing laboratory, junk yard, landfill or waste, treatment, storage, disposal processing or recycling facility ever been located at or adjacent to the property? If yes, please describe. See attached Phase I ESA by PSI dated 10/6/17.

14. (Y) (N) Are there any discarded drums, barrels or containers, construction debris, damaged or discarded automobile or industrial batteries, or pesticides, paints or other chemicals in individual containers or drums of greater than five gallons or fifty gallons in aggregate located on the property? If yes, please describe. See attached Phase I ESA by PSI dated 10/6/17.

15. (Y) (N) Have there ever been any waste storage or treatment lagoons, pits, ponds, or surface impoundments on the property? If yes, please describe. See attached Phase I ESA by PSI dated 10/6/17.

16. (Y) (N) Does the property have floor drains not discharging to a sewer? Septic System? If yes, please describe. See attached Phase I ESA by PSI dated 10/6/17.

17. (Y) (N) Are there currently and/or have there been previously aboveground or underground storage tanks at the property? If yes, complete table. See attached Phase I ESA by PSI dated 10/6/17.

Type of Tank	Size	Content	Installation Date	Spill/Leak Detection? Y or N
Above or Underground	gal			
Above or Underground	gal			
Above or Underground	gal			
Above or Underground	gal			

18. Are you aware of any information to indicate that the Subject Property was sold for substantially below its fair market value? If so, please provide an explanation: No _____

19. Additional comments and/or pertinent information relevant to this Phase I ESA: _____

DOCUMENT AND INFORMATION CHECKLIST

Please provide the following information (as much as possible in electronic format) so the Engineer or Scientist can proceed with the survey of the property. Asterisk (*) items are critical to report completion. The documents will become exhibits in the Consultant's report.

A. Plans	B. Municipal Documents	C. Additional Information
<ul style="list-style-type: none"> ALTA Survey or Site Plan* Architectural Building Plans* - plans, elevations, wall section, foundation, HVAC & elec. schedules Reduced scale Site and Building Plans <i>Extremely critical for properties in Seismically active zones 3 and 4*</i> <i>STRUCTURAL PLANS – Seismic Assessments are required for these properties. Structural drawings must be provided at the time of the site visit. If no drawings are provided, the report will be delayed and the Seismic Assessment may be overly conservative.</i> 	<ul style="list-style-type: none"> Certificate of Occupancy* Building Permit* Facade inspection compliance* Copy of tax cards Copy of violations 	<ul style="list-style-type: none"> Capital expense report for 1 to 3 years* Tenant Rent Roll* Roof warranty History of recent improvements Schedule of Floor Area Measurements - Gross and Rentable Square Feet Previous Due Diligence or Building Component Reports, <u>including, but not limited to</u>, facade*, roof*, mechanical*, electrical, elevator, sprinkler, fire alarm or life safety equipment, or pavement. Copy of most Recent Appraisal
	B.1 NYC Projects <ul style="list-style-type: none"> Department of Building Violations* Environmental Control Board Violations* Local Law 11 Facade Reports* 	

EBI ACCESS REQUIREMENTS

At the time of the site visit the Consultant is required to gain access to all areas of the property. This includes:

- All building roofs, unless pitched asphalt shingles. This may require you to obtain and provide a ladder.
- All building perimeters
- All site amenities
- All building interiors, including as applicable, common areas, lobbies, a representative sampling of offices, retail spaces, manufacturing or assembly areas, or apartments, community rooms, exercise rooms, pool areas, storage rooms, attics and basements, garages.
- All mechanical, electric, sprinkler, HVAC, utility, service, elevator, storage and equipment rooms

Subject: Re: Eden Valley Business Park, Hayward

Thank you for contacting Alameda County Department of Environmental Health (ACDEH) Certified Unified Program Agency (CUPA) for your Public Records Act Request.

We have no ACDEH CUPA records for the address(es) you requested.

Please note that ACDEH CUPA only has files for sites within its jurisdiction and some cities within Alameda County are not part of the ACDEH CUPA jurisdiction. In those cases we advise that you contact the Fire or Planning Department of that city for any records. **Please view our Jurisdiction List in this link:**

<https://deh.acgov.org/hazmat-assets/docs/CUPA-jurisdictions.pdf>

—

In addition, ACDEH has other divisions which may have records for the requested address(es). I have listed the divisions below and who to contact to acquire records if relevant.

- Solid/Medical Waste

Contact: LaTresca Porter at latresca.porter@acgov.org

- Operations Division (retail food, recreation, and tattoo parlors)

Contact: dehwebmain@acgov.org

- Vector Control Division

Contact: Daniel Wilson at daniel.wilson@acgov.org

- Land and Water Division (Local Oversight Program (LOP) and Onsite Wastewater Treatment Systems)

The links listed below may be helpful to gather information on LOP sites. The search on the geotracker link may be conducted by address or site name. If you cannot find documents you are searching for then please contact LOP directly.

Contact: deh.loptoxic@acgov.org

<http://geotracker.waterboards.ca.gov/>

Due to the COVID-19 pandemic, all requested files are provided electronically. However, once the precautionary measures related to COVID-19 are lifted, our office may make files available by appointment for review on Thursdays and Fridays from 9:00 AM until 12:00 noon. We will keep our requestors aware of this situation as it progresses.

Please send all future requests to dehcupafilereview@acgov.org.

Please reach out to us if you have any further questions or clarifications

Thank you,
Joel Doocha-Chambers

**GROUND WATER QUALITY
RECONNAISSANCE INVESTIGATION
FOR
BREAKWATER BUSINESS PARK
HAYWARD, CALIFORNIA**

INTRODUCTION

In this report we present the results of our ground water quality reconnaissance investigation of the existing Breakwater Business Park located southwest of the intersection of Breakwater Avenue and Breakwater Court in Hayward, California. This report presents information on the chemical analyses of ground water samples from the five "permanent" monitoring wells installed at the site, a soil gas chromatography geochemical survey performed at the site, and provides discussion of the site topography, geology, environmental setting, hydrogeology and the location of reported known contamination sites in the immediate site area.

The purpose of this ground water quality assessment has been to evaluate and document the concentrations of EPA Priority Pollutant compounds existing at selected locations at the time of this study in on-site ground water from the uppermost water bearing zone. Initially, three "permanent" ground water monitoring wells were installed to facilitate water sampling at later dates, and the geologic and hydrogeologic setting of the site was briefly evaluated. Due to the findings of the initial investigation, the scope of work was increased to include the installation of two additional

Purpose

monitoring wells and additional chemical analysis of ground water from the wells. A soil gas chromatography geochemical survey was also performed during this investigation.

The approximately 7.7 acre development is currently occupied by five single-story commercial office buildings, each consisting of approximately 13,000 to 25,000 square feet of office space. Appurtenant flexible pavements and landscaped areas are located about the buildings. An undeveloped parcel bounds the site to the southwest.

Project Description

SCOPE OF WORK

The scope of work performed for this investigation included the following:

1. Review of previous hydrogeologic and ground water contamination reports for this area prepared by others, and a review of our experience in the area.
2. Coordination with the California Regional Water Quality Control Board regarding acceptable investigation and sampling techniques, and discussions with the Board concerning reported ground water contamination occurrences in the general vicinity.
3. Review of the operations of the current tenants of the buildings regarding their possible use or storage of hazardous wastes at the development and the history of spills at this site.

4. Drilling of five exploratory borings into the uppermost water-bearing stratum and obtaining representative soil samples and logging soil stratigraphy.
5. Installation of five "permanent" ground water monitoring wells constructed according to guidelines established by the Alameda County Flood Control and Water Conservation District.
6. Well development by pumping and bailing techniques, and water sampling.
7. Analysis of water samples in accordance with EPA Methods 601, 608, 624 and 625 to determine the presence of priority pollutant contaminants. In addition, the samples were analyzed for the presence of priority metals, asbestos and cyanide.
8. A soil gas chromatography geochemical survey in the vicinity of the impacted Monitoring Well MW-2 on the western property boundary under our direction by Geonomics, Inc. of Campbell, California to establish concentrations of volatile organic compounds in near-surface soil gas samples.
9. Preparation of this report.

This study was conducted under the direction and review of John V. Lowney, P.E., Principal Engineer, and Glenn A. Romig, P.E., Associate Engineer.

Lawrence Pavlak, Certified Engineering Geologist, researched the files of the Regional Water Quality Control Board, assisted in the interpretation of the

laboratory tests and preparation of this report. Staff geologist Stephen G. Torres, supervised the field investigation and assisted in the office phases of the investigation.

LIMITATIONS

Soil deposits and rock formations may vary in type, strength and many other important properties across any geological area. The study that we have made assumes that the data determined in the field and laboratory are reasonably representative of field conditions and that the subsurface conditions are reasonably susceptible to interpolation and extrapolation between borings.

We make no warranty, expressed or implied, except that our services have been performed in accordance with geotechnical engineering and hydrogeological principles generally accepted at this time and location. The results of this study are based on data obtained from the site and laboratory investigations. We have analyzed the available information using what we believe to be current applicable geotechnical engineering and hydrogeological techniques. This report was prepared for the use of O'Donnell Investment Partners in evaluating ground water quality at the time of this study. The data presented in this report can change over time and are applicable only to the time this study was performed.

SITE HISTORY

Aerial photographs of the site vicinity were reviewed during the course of this investigation. A black and white stereo pair was reviewed which was flown by Pacific Aerial Surveys on April 24, 1973. The photos were printed at a scale of 1 inch = 1,000 feet, and their identification numbers are AV-110-05-39,40. We understand that construction of the Breakwater Business Park, which currently occupies the site, was completed in 1976. The 1973 aerial photographs show the site, at that time, as undeveloped land.

Aerial Photograph Review

The San Francisco Region of the Regional Water Quality Control Board maintains records of reported fuel and toxics spills and leaks within their jurisdiction. We have reviewed those records to help determine whether any soil or ground water contamination incidents had been reported in the immediate site vicinity.

Reported Contamination Incidents

Several fuel and one solvent leak incidents have reportedly occurred within a 3.4 mile radius of the site. Their locations and distances from the site are listed as follows in Table 1.

TABLE 1. REPORTED SOIL AND GROUND WATER CONTAMINATION
INCIDENTS OBTAINED FROM THE FILES OF THE
REGIONAL WATER QUALITY CONTROL BOARD

A. INCIDENTS WHICH OCCURED UPGRADIENT RELATIVE TO PREVAILING
SHALLOW GROUND WATER FLOW.

<u>Facility</u>	<u>Approximate Distance & Direction from Site</u>	<u>Type of Incident</u>
Unknown 3494 Investment Blvd. Hayward, CA	0.25 mile to the Southeast	Petroleum leak under investigation
Arden Road Property Arden Rd. & Baumberg Ave. Hayward, CA	1.3 miles to the Southeast	Solvents in ground water
Reynolds Aluminum - S.F. Can Plant 2425 Whipple Rd. Hayward, CA	3.4 miles to the Southeast	Solvents in ground water

TABLE 1. REPORTED SOIL AND GROUND WATER CONTAMINATION
INCIDENTS OBTAINED FROM THE FILES OF THE
REGIONAL WATER QUALITY CONTROL BOARD - CONTINUED

B. INCIDENTS WHICH DO NOT OCCUR UPGRADIENT RELATIVE TO PREVAILING
SHALLOW GROUND WATER FLOW.

<u>Facility</u>	<u>Approximate Distance & Direction from Site</u>	<u>Type of Incident</u>
Rohm & Haas Calif. 25500 Whitesell St. Hayward, CA	Adjacent Property to the West-Northwest	Solvents, metals in soil and ground water, volatile organic compounds in atmosphere
Weyerhaeuser 3495 Breakwater Ct. Hayward, CA	Across the street, to the Northeast	Petroleum product in ground water
Allgood Industries 3466 Enterprise Ave. Hayward, CA	0.4 mile to the North	Petroleum product in ground water

TABLE 1 - Continued

B. INCIDENTS WHICH DO NOT OCCUR UPGRADIENT RELATIVE TO PREVAILING SHALLOW GROUND WATER FLOW - Continued

<u>Facility</u>	<u>Approximate Distance & Direction from Site</u>	<u>Type of Incident</u>
Herrick Corporation 25450 Clawiter Rd. Hayward, CA	0.4 mile to the North	Petroleum product in ground water
Precision Metals 3402 Enterprise Ave. Hayward, CA	0.4 mile to the North	Petroleum leak, under investigation
PG & E 24300 Clawiter Rd. Hayward, CA	0.8 mile to the North	Petroleum product in ground water
Shell Oil Co. 27501 Loyola Ave. Hayward, CA	1.4 miles to the East	Petroleum product in ground water
Continental White Cap, Inc. 22493 Clawiter Rd. Hayward, CA	1.5 miles to the North	Solvent leaks, under investigation

Eight of these leak incidents are known to have impacted the ground water at the sources of the leaks. With one exception, the remainder of the contamination incidents have thus far been confined to the soil. The exception concerns atmospheric contamination by Rohm and Haas which has reportedly been mitigated in accordance with the requirements of the Bay Area Air Quality Management District. Most of the contaminants listed are petroleum products, but some include various solvents and metals.

We have had discussions with Mr. A. Shansky of A. Shansky Development Company concerning the current tenants of the development and their possible use of hazardous

Tenant Use of
Hazardous Materials

materials in their operations. Mr. Shansky indicated that none of the current tenants use or store hazardous materials at the site. There is no known history of spills at this site.

SITE INVESTIGATION

The generally flat site is occupied by buildings previously described, asphaltic concrete pavement and landscaped areas.

Site Description

Three exploratory borings were advanced into the uppermost water-bearing sediments on April 14, 1987 and two additional exploratory borings were advanced into the uppermost water-bearing sediments on June 23, 1987 at locations shown on the Site Plan, Figure 1. All exploratory borings were located within the boundaries of the site. The borings were advanced using steam-cleaned, 8-inch diameter, hollow stem augers, and were logged by our geologist. Logs of our borings and details regarding our field investigation are included in Appendix A.

Exploratory Borings

The borings were terminated at a depth of approximately 25 feet. Ground water was first encountered at depths ranging from 10 to 12.5 feet in the borings, and stabilized at depths of 9 to 12.5 feet 48 hours after drilling. Soil samples were obtained from depths of 3.5 to 5 feet, 8.5 to 10 feet, 13.5 to 15 feet and 18.5 to 20 feet for future chemical analysis, if desired. Steam-cleaned or tri-sodium phosphate (TSP) cleaned, split spoon, and Modified California-type samplers were utilized in the borings. Water samples were obtained from each boring for chemical analysis in accordance with EPA Test Methods 601, 608, 624 and 625 for priority pollutant contaminants.

The five exploratory borings were converted to "permanent" ground water monitoring wells with the installation of PVC casing. The casing used for the wells was 2-inch I.D. threaded, flush-jointed PVC Schedule 40 casing with 10-foot sections of perforated slots installed in the lower portion of the wells. After the casing was installed, a filter pack composed of aquarium sand was placed in the annulus to a level above the slotted casing. A seal composed of bentonite pellets topped by cement was placed in the annulus above the sand pack to the surface. The wells have been completed with a locked steel vault which is fitted over the steel casing approximately 3 inches above the adjacent grade. Well construction details are noted on monitoring well completion diagrams following the exploratory boring logs. A permit for each monitoring well has been obtained from the Alameda County Flood Control and Water Conservation District.

Installation of Monitoring Wells

Each monitoring well was developed by bailing techniques prior to each sampling such that water samples would be representative of the ground water. Development was accomplished by removing a minimum of three casing volumes of ground water. Ground water samples were collected utilizing a teflon bailer which was thoroughly cleaned with tri-sodium phosphate and rinsed with distilled water.

Well Development and Sampling

Based on the findings of our subsurface exploration, the soils at the site can be roughly grouped into five relatively continuous strata as described below.

Subsurface Materials

Stratum A: Silty Clay Fill (CH)

Dark grey, very stiff to hard silty clay fill (CH) of moderate to high plasticity was encountered in Boring

MW-2 at the surface to a depth of approximately 5.5 feet. Water content values ranged from 19 to 25 percent.

Stratum B: Silty Clay (CL)

Greyish tan to tan, stiff to hard silty clay (CL) of low to moderate plasticity was encountered at the surface or is overlain by shallow fill and extends to depths of approximately 8 feet in Borings MW-1, MW-3, MW-4 and MW-5, and was encountered from approximately 5.5 to 11.5 feet in Boring MW-2. Water content values ranged from 10 to 28 percent.

Stratum C: Sandy Clay (CL)

Tan, stiff to very stiff, sandy clay of low to moderate plasticity was encountered at intervals from approximately 8 to 14.5 feet in Boring MW-1, from approximately 11.5 to 15.5 feet in Boring MW-2, and approximately 8 to 13 feet in Borings MW-3, MW-4 and MW-5. Water content values ranged from 10 to 24 percent.

Stratum D: Silty Clay (CL)

Greyish tan, very stiff silty clay (CL) of low to moderate plasticity was encountered underlying Stratum C in all of the borings and extends to the final exploration depth of 25 feet. Water content values ranged from 14 to 34 percent.

Stratum E: Silty Sand (SM)

Brown, medium dense, fine- to medium-grained silty sand (SM) was encountered in Boring MW-5 at a depth interval of 13 to 16 feet. A water content value of 33 percent was encountered.

GEOLOGIC SETTING

Bedrock and unconsolidated sediments in the eastern San Francisco Bay region are from Jurassic to Recent in age. The geologic units which are most important to this investigation are the sediments deposited in alluvial fans and flood plain deposits along the eastern bay fringe (Helley et al., 1972). These deposits are more than 500 feet thick in this area (DWR Bull. 61, 1960). The Breakwater Business Park site is underlain by a thick sequence of sand-gravel, silt and clay deposits.

Based on driller's logs, published literature, and data obtained by J.V. Lowney and Associates, the valley alluvium along the east bay fringe appears to be a very complex deposit of unconsolidated sand, gravel, silt and clay. The sand and gravel units are buried stream channel deposits which are interlayered with silt, and clay deposits of both marine and continental origins. Data interpreted by the California Department of Water Resources (1960, 1968, 1973) indicate that there are west trending buried stream channel deposits in the site vicinity which drained toward San Francisco Bay. These channels have since been buried, partly because of tectonic events and sedimentation.

The uppermost water bearing stratum ("A" aquifer) was penetrated and sampled during this investigation. Site borings were advanced to depths of 25 feet. Care was taken to prevent possible cross contamination of any lower ground water resource by not extending the borings to deeper aquifers.

HYDROGEOLOGY

The project site is located within the San Leandro Cone ground water area. The alluvial sediments which comprise the water-bearing strata in this area are generally of fairly low permeability. Specific capacities of wells in the area generally do not exceed 20 gallons per minute per foot of drawdown but a few deep wells are reportedly highly productive (California Department of Water Resources, Bulletin 188-1, 1967).

This ground water area is divided into two zones, the uppermost of which extends to a depth of 400 feet and contains two main aquifers. Both aquifers are composed of discontinuous layers of fine gravel and are generally encountered at depths of 60 and 250 feet. According to the California Department of Water Resources Bulletin 118-1 (1967), these main aquifers are separated from the adjacent Niles ground water subarea to the south by fine-grained zones.

The lower zone of the San Leandro Cone contains many aquifers and is comprised of greater than 30% sand and gravel. Most of the high yielding wells in the area draw their water from the lower zone. The alluvium in the upper zone becomes finer grained near the edges of the Cone. This tends to isolate the zone from adjacent ground water areas, resulting in little lateral movement of ground water into or out of the Cone in the upper zone.

During this investigation, water bearing sandy clay deposits were first encountered at depths ranging from approximately 8 to 15.5 feet. Stabilized water levels ranged from approximately 9 to 12.5 feet below present

site grades. Please be cautioned, however, that fluctuations in the level of the ground water may occur due to variations in rainfall and other factors not in evidence at the time measurements were made.

The average linear velocity of ground water movement below the site may be estimated using Darcy's Law with knowledge of soil permeability, porosity and the hydraulic gradient using the following equation:

Ground Water Flow

$$\bar{v} = \frac{ki}{n}$$

where: \bar{v} = average linear velocity
 i = hydraulic gradient
 k = soil permeability
 n = soil porosity

The hydraulic gradient across the site during June 1987 was estimated at 0.0025 from the ground water level readings presented on the boring logs and the direction of ground water flow found to be towards the southwest. It should be noted that the gradient and flow direction was confirmed with the data obtained from Monitoring Wells MW-4 and MW-5. Average soil permeability beneath the site was estimated from correlations from several sources based on the soil samples obtained from the borings and from our experience. The average linear velocity of ground water was estimated based on average soil permeability of 1×10^{-5} cm/sec for the discontinuous granular and clay strata, and with reasonable estimates of soil porosity and the hydraulic gradient determined during this investigation.

The average linear velocity of ground water for the site was estimated to be 0.6 inches per year for the silty clay strata. The above being based on average values of soil permeability, we expect that at many locations ground water movement will actually be much faster or slower than stated above, corresponding to natural variations in permeability expected in soil deposits of this type and variations in the hydraulic gradient. In a study such as this, with soil permeability determined from correlations based on visual classification of a limited number of soil samples, and not from data based on in situ permeability and/or pump test data, an average permeability value may only be considered approximate. Estimations of soil permeability are often in error by a factor of 10 or more as would the ground water velocity based on the estimated permeability values.

It should be noted that some apparently discontinuous granular layers were encountered in the borings. The velocity of water moving through these soils is likely greater than that given above, and perhaps as much as 50 to 100 feet/year based on the hydraulic gradient obtained during this study. However, as the granular layers appear to be discontinuous, it is likely that the ground water velocity given for the silty clay and silty clay with sand strata is more representative of ground water velocity across the site for the relatively shallow depths explored.

WATER QUALITY ANALYSIS

Ground water samples were collected from each monitoring well on April 16 and June 25, 1987, and ground water samples were collected from Monitoring Well MW-2

Laboratory Procedures

only on May 21, 1987. Laboratory testing consisted of the following analyses to detect the presence of EPA Priority Pollutant chemicals and metals, and of other chemical compounds and parameters as described below:

- a. Purge and trap gas chromatography/mass spectrometry (GC/MS) to detect 30 purgeable volatile organic compounds including organic solvents, benzene, carbon tetrachloride, TCE, and toluene (EPA Method 624).
 - b. Purge and trap gas chromatography/mass spectrometry (GC/MS) to detect 29 purgeable volatile organic compounds including organic solvents, 1,1 dichloroethane (DCA), 1,1 dichloroethene (DCE), trichloroethane (TCA) and trichloroethene (TCE) EPA Method 601.
 - c. Extraction gas chromatography/mass spectrometry to detect base/neutral organic compounds: 16 polynuclear aromatics, 12 ethers and esters, eight nitrogen-containing compounds, 11 chlorinated hydrocarbons; and 11 acid organic compounds (EPA Method 625).
 - d. A gas chromatography scan (EPA Method 608) which detects 25 organochlorine pesticide compounds including DDT, and PCBs.
-
- e. An atomic absorption scan which detects 13 priority pollutant metals.

- f. The samples were analyzed for asbestos fiber content utilizing optical scanning techniques.
- g. In addition, the water samples were tested for cyanide by distillation followed by colorimetric methods.

It should be noted that only EPA Method 601 for volatile organic compounds was performed on water samples from Monitoring Wells MW-4 and MW-5.

The laboratory analysis of the water samples was performed by Sequoia Analytical Laboratory of Redwood City, California. Selected split water samples were analyzed by Anatec Laboratories of Santa Rosa, California for increased quality control. Both laboratories are certified by California Department of Health Services (designees of U.S. Environmental Protection Agency) for all of the above analyses. Test results are discussed below, summarized in Table 2 and are presented on the analytical reports located in Appendix B.

The analyses of the ground water samples did not reveal any acid extract organics, base/neutral extract organics, pesticides, PCB compounds or asbestos in concentrations greater than the laboratory detection limits. Low concentrations of some priority metals, lead, arsenic, nickel and mercury were detected in Monitoring Wells MW-1, MW-2 and MW-3 but were below the current action levels for drinking water with the exception of mercury in Monitoring Well MW-2. The concentrations of mercury ranged from .0015 to .0041 parts per million (ppm), while the soluble threshold

Results of Chemical Analysis

limit concentration (STLC) is 0.2 ppm, and the drinking water standard is 0.002 ppm. The low concentrations of arsenic, nickel and lead were generally at concentrations below the STLC and the drinking water standard. As far as we know, the shallow ground water penetrated and sampled during the course of this investigation is not used as a source of drinking water. In our opinion, these low concentrations likely represent natural background levels or the addition of soil ammendments from previous agricultural activity.

Three volatile organic compounds which are common industrial solvents were detected in the sample collected on April 16, 1987 from Monitoring Well MW-2. 1,1,1-trichloroethane (TCA) was found at a concentration of 33 parts per billion (ppb) which is below the current action level for drinking water of 200 ppb as established by the California Department of Health Services. In addition, 1,1-dichloroethane (DCA) and 1,1-dichloroethene (DCE) were detected at concentrations of 50 and 70 ppb, respectively. The State action level established to protect beneficial uses of ground water for DCA is 20 ppb and that for DCE is 6 ppb. Both DCA and DCE were therefore found at concentrations greater than the State action levels during the initial sampling in Monitoring Well MW-2.

An additional ground water sample was collected from Monitoring Well MW-2 on May 21, 1987 to confirm the results of the first laboratory analysis. Water samples were split and sent to Sequoia Analytical Laboratory and Anatec Laboratories, Inc. for analysis by EPA Method 601 for volatile organic compounds for increased quality control. The results were similar to the previous analyses with DCA and DCE found in

concentrations in excess of State action levels.

Chloroethane was also detected by one of the laboratories at a concentration of 2.5 ppb. There are no drinking water standards established for chloroethane at the present time.

Based upon the chemical analysis of the water samples from the initial three wells, we recommended that additional wells be installed to both define the ground water flow direction and gradient at the southwestern perimeter of the site where Monitoring Well MW-2 is located, and to help determine the extent of the contaminated ground water at the site. Following installation of the additional two permanent monitoring wells, ground water samples were collected from each of the five monitoring wells on June 25, 1987 and tested for volatile organic compounds. The results of the chemical analysis for Monitoring Well MW-2 were similar to the previous analyses with DCA and DCE found in the water sample in concentrations in excess of State action levels established to protect beneficial uses of ground water. In addition, trichloroethene (TCE) was detected in the water sample from Monitoring Well MW-2 during this sampling at a concentration of 6.1 ppb which exceeds the state action level for TCE of 5 ppb. No volatile organic compounds were detected in Monitoring Wells MW-4 and MW-5. A summary of all chemical analyses is presented in Table 2 below.

(All other volatile organic compounds were below detection limits.)

A soil gas chromatography geochemical survey was performed in the vicinity of the impacted Monitoring Well MW-2 and the western property boundary, under our direction by Geonomics, Inc. of Campbell, California to establish concentrations of volatile organic compounds in near-surface soil gas samples. A copy of the gas chromatography survey performed by Geonomics, Inc. is included in Appendix B.

Soil Gas Chromatography
Survey

Two areas of low level volatile organic vapors were detected near the western property boundary. The highest vapor concentrations, 9 parts per billion (ppb), was detected near the western property boundary,

approximately 250 feet northwest of the southern property corner and decreases to non-detectable limits at a distance of approximately 200 feet from the southwest property line. The survey also revealed a vapor concentration of 2.4 ppb near the southwest property boundary approximately 550 feet northwest of the southern property corner decreasing to non-detectable limits at a distance of approximately 200 feet from the southwest property line. In our opinion, the western portion of both vapor plumes appear to be off-site and their boundaries could not be established from the scope of this study.

The volatile organic compounds were detected in soil gas samples collected at the site in highest concentration adjacent to the southwest property line. The distribution of volatile organic vapors in the soil does not appear to be governed solely by the ground water flow direction which is towards the southwest. Under atmospheric pressure, soil vapors may be transmitted through the porespace in the unsaturated zone, in the capillary fringe above the ground water table. The capillary fringe rises and declines with fluctuations in the water table and capillary water and other soil vapors and compounds may be drawn into the ground water table by gravitational movement of infiltrating surface water and other factors. In our opinion, the volatile organic compounds detected in the water sample from MW-2 appear likely to have been transmitted through the soil overlying the ground water table from the adjacent site. In our opinion, the volatile organic compound source does not appear to be from the Breakwater Business Park site; however, its origin could not be determined from this survey, as it would require off-site work.

CONCLUSIONS

The purpose of this investigation was to review site history and ground water conditions, and to evaluate and document at a reconnaissance level the concentrations of EPA Priority Pollutant chemicals existing in the ground water samples at the time of this investigation on samples tested from the uppermost aquifer. Ground water flow parameters were estimated from the data obtained from this study.

Field work for the current investigation consisted of drilling five exploratory borings, all of which were converted to "permanent" ground water monitoring wells. Water samples were analyzed for EPA Priority Pollutants, asbestos and selected common solvents.

Chemical analysis was performed on ground water samples collected at the site. Low concentrations of three priority metals were detected in water samples from Monitoring Wells MW-1, MW-2 and MW-3. These concentrations are below the current action levels for drinking water with the exception of mercury which was detected in Monitoring Well MW-2 at a concentration above the action level for drinking water. These low concentrations may represent, in our opinion, natural background levels or the addition of soil ammendments from previous agricultural activity. As far as we know, the shallow aquifer penetrated and sampled during the course of this investigation is not used as a source of drinking water. In our opinion, it is unlikely that the Regional Water Quality Control Board will require further investigation or any site

mitigations relative to the concentrations of the priority metals detected, as these levels are relatively common for this area.

In our opinion, the volatile organic compounds detected in Monitoring Well MW-2 are in significant concentrations. TCE, DCA and DCE were detected at concentrations in excess of the current action level concentrations established to protect the beneficial uses of ground water. TCA was found in Monitoring Well MW-2 at a concentration below the state action level.

According to Mr. Mark Valentini of Sequoia Analytical Laboratory, DCA and DCE most commonly are derived from the degradation of TCA and TCE. A spill of TCE into the ground water has been documented approximately 1.25 miles southeast of the site at a concentration of 8442 ppb. The prevailing ground water flow direction in the site vicinity appears to be to the southwest and west, which would indicate that the subject site is not generally downgradient of the TCE spill.

No known instances of the use, storage, or spillage of hazardous materials is known to have occurred within the site boundaries. Concentrations of DCA, DCE, TCA and TCE were detected in water samples from Monitoring Well MW-2, a downgradient well at the site relative to the prevailing shallow ground water flow direction. These contaminants were not detected in the water samples from the upgradient wells MW-1, MW-3, MW-4 and MW-5.

It should also be noted that the ground water gradient established at the time of this investigation is substantially different from that established at the nearby Rohm & Haas facility. The ground gradient at the Rohm & Haas facility is reportedly to the northwest, while the gradient established during this investigation for the Breakwater Business Park site is to the southwest. It is, therefore, possible that the direction of flow of ground water has changed slightly over time in the vicinity of the site or that a ground water divide exists between the two facilities.

A soil gas chromatography geochemical survey was performed in the vicinity of the impacted upgradient Monitoring Well MW-2 and the western property boundary under our direction by Geonomics, Inc. of Campbell, California to establish concentrations of volatile organic compounds in near-surface soil gas samples. The volatile organic vapor concentrations sampled were generally low, approaching the lower detection limit for the gas chromatograph of approximately 0.1 parts per billion (ppb). The survey results show higher vapor concentrations in the vicinity of the western property boundary indicating, in our opinion, that an off-site source for the contamination to the west of the site is highly probable. The source of the volatile organic compounds was not determined during this investigation and would require analysis of ground water samples and/or performance of a soil gas survey on the undeveloped property west of the site.

Background data on the soil and water quality of the site will provide a data baseline of current site conditions. The wells have been established as permanent monitoring wells, and may be used to obtain additional ground water samples in the future if desired.

RECOMMENDATIONS

We do not recommend further evaluation at this time. Consideration should be given to an ongoing monitoring program to monitor the ground water quality. At selected locations, this program would further document the presence of priority pollutant compounds in the ground water and provide detection of contaminants which may migrate from an upgradient source or occur in the downgradient monitoring well from on-site leaks or spills. We recommend a quarterly or semi-annual monitoring program be considered for Monitoring Well MW-2 and MW-3 to document the DCA, DCE, TCA and TCE concentrations in the near future and any variations from those obtained during this study. Since low levels of DCA, DCE, TCA and TCE were identified in the ground water at the site, we recommend that these results be reported to the Regional Water Quality Control Board.

1. Site Description:

Eden Plaza Properties is located at 3521-3583 Investment Blvd., Hayward, Ca. 94541, within Alameda County. The nine-acre site lies within USGS hydrogeologic unit number 18050004 at latitude 37/40/18.0 and longitude 122/05/00.0 (1). Eden Plaza Properties is located within Township 3S and Range 2W (See Figure 1, Site Location Map).

Eden Plaza Properties is developed for office and light-industrial use (2). The site is entirely developed or paved except where landscaping occurs. Many individual companies lease these properties (See Figure 2, Site Description Map). The Utah State Retirement Fund has owned the property since March 1984 (3).

Eden Rock Company #2 owned the property from March 1973 To March 1984. There are no known records for this site prior to 1973 on file with the Alameda County Assessors Office. It is probable that the area was undeveloped salt-water marsh and agricultural land of the San Francisco Bay Plain (4).

2. Apparent Problem:

Volatile organic compounds (VOCs) were detected in soil and groundwater samples collected from the site in early 1987 (10). Three monitoring wells were produced by Hazardous Materials Management Professionals Inc. (HHMP) in March/April 1987. Trichloroethylene was found in groundwater from one well at 4.9 ppb. Soil from another well boring was found to have 220 ppb trichloroethylene at 5.5 feet below ground surface (bgs). Soil and groundwater from the third well boring showed no detectable contamination. Two additional wells were produced by Kleinfelder and Associates under the direction of Levine-Fricke Consulting Engineers and Hydrogeologists in July/August 1987 (1). Groundwater from one well was found to have 4 ppb trichloroethylene. Groundwater from the second well was found to have 50 ppb Freon 113, and 100 ppb trichlorofluoroethane.

Investigations at nearby (less than 0.5 miles east-northeast away) sites have produced groundwater samples with concentrations of trichloroethylene as great as 140,000 ppb. Numerous other halogenated VOCs have also been detected at these sites (4, 2, 10).

There are no known records of hazardous waste activities associated with this site. The City of Hayward Fire Department and the California Department of Health Services have no records relating to this site (5, 6). The Alameda County Department of Health Services has no information indicating that the site is a waste generator (7). The Regional Water Quality Control Board does have a file relating to this site (8). The file contains a report by Levine-Fricke (2). The status of the file is pending and the file is unassigned.

Although file searches of federal, state, and local agencies revealed no indication of hazardous waste activities, FIT staff observed four uncontained drums during a drive-by of the site (9). One drum had an unsecured bung ring and the other three appeared to have the bung rings secured. The drums were located in the parking lot at the east end of Eden Plaza Properties. There was no fence to prevent access, no berm to contain spills, and no identification as to the contents nor person responsible for the deposition of the drums.

3. HRS Factors:

3.1 Observed Release:

There are no documented releases of hazardous waste from this site to groundwater, surface water, or air. There are no known records of hazardous waste activities on-site.

The soil and groundwater (to depths of 25 feet) at the site are contaminated with halogenated VOCs (2, 10). However, samples collected off-site show greater levels of contamination than samples collected on-site (2, 4, 10). Documentation of a release to groundwater would require more extensive sampling both on-site and off-site, and definite

determination of groundwater direction flow. Preliminary investigations indicate that groundwater flows in a south-southeast direction (4).

Contamination of the soil and groundwater document the presence of some unknown quantity of waste. The facility and adjacent terrain have limited slope (less than 3%) (1, 9). The limited slope indicates that documentation of a release to surface water is unlikely. Paving of the site and storm drains at the street make off-site migration to surface water unlikely.

Although the compounds detected at the site are considered volatile, paving of the site and off-site contamination at greater concentrations than those found on-site indicate that documentation of an air release is unlikely.

3.2 Direct Contact/Fire and Explosion:

There is no evidence of actual incidents of direct exposure of the general public to contaminants located at the site. There is no evidence of actual or potential fire or explosion hazard at the site. FIT staff observed four unsecured drums of unknown contents on the site (9, Photo #1, 2). If the contents of the drums include hazardous wastes, a potential for exposure, fire or explosion may exist. The site is not secured by means of a fence, guards, nor warnings signs.

3.3 Waste Type/Quantity:

There is no record of present or past hazardous materials use at this site. Four unsecured drums of unknown contents were observed on site. Trichloroethylene, Freon 113, and trichlorofluoroethane have been reported found in groundwater and soil samples collected at the site. An unknown quantity of waste is present at the site.

3.4 Groundwater:

Eden Plaza Properties lies within the Niles Subarea of the Fremont Study Area of the Fremont South Bay Groundwater Basin (11), where net precipitation is estimated to be 7.45 inches per year (12). The Niles Subarea is composed of flat-lying aquifers separated by clay aquicludes. The three uppermost aquifers are: the Newark, the Centerville, and Fremont aquifers. Deeper unlabeled aquifers exist below these labeled aquifers. Groundwater is found between 5 and 10 feet bgs (2). A preliminary study by Woodward-Clyde Consultants suggests a general groundwater flow in a south to southeast direction (4). The Alameda County Flood Control and Water Conservation District provided information used to create the table below, which describes the aquifer structure beneath the site (13).

Aquifer Label	Depth (feet bgs)	
	Top	Bottom
Newark Aquifer	20	60
Aquitard	60	180

Centerville Aquifer	180	200
Aquitard*	200	310
Fremont Aquifer	310	340
Aquitard	340	430
Deeper Aquifers	430	not specified

*Whether the interlying areas are clay aquicludes or clay aquitards is uncertain. Either description indicates interlying clay areas of low permeability.

Groundwater quality varies from aquifer to aquifer and is affected by natural and man-made processes. Shallow aquifers in the area are subject to seawater intrusion (11). The Newark aquifer was found to have a Chloride concentration of greater than 10,000 ppm. Quality of the Centerville and Fremont aquifers is better with chloride concentrations of less than 250 ppm. Nitrates in excess of 45 ppm have been reported in unspecified aquifers 3 miles southeast of the site. Groundwater and soil contamination have been found in several areas to the north and east of the site at distances of 2000 feet to 2 miles (2, 4, 10). Trichloroethylene was found at levels of 140,000 ppb at a distance of 2,000 feet from the site. The extent of vertical contamination is unknown. All known samples have been collected from borings of 25 feet or less. No reports of contamination in the Centerville, Fremont, or deeper aquifers are known.

Prior to 1962, the City of Hayward relied extensively on well fields in this area south of Highway 92 for municipal water supplies (13). The City of Hayward has since purchased water from the Hetch-Hetchy Aqueduct. Municipal water is provided to unincorporated areas by the Mohrland Water Company (13). The Mohrland Water Company has four wells located at 24927 Mohr Rd. (1.4 miles north of the Eden Plaza Properties) (15). Two wells are active. The primary service well is 900 feet deep. The back-up well is less than 200 feet deep. The depth of screening of the wells is unknown. The Mohrland Water Company currently services 102 connections, including two nursing homes. FIT estimates that the Mohrland Water Company serves a population of approximately 388 persons.

Well listings provided by the Alameda County Flood Control and Water Conservation District indicate that approximately 250 domestic wells lie within 3 miles of the site (14). Approximately 160 of these wells have depths of less than 180 feet and probably draw from the Newark aquifer. The remaining 90 wells are of depths greater than 180 feet and may draw from deeper aquifers. It is unknown whether any of the domestic wells are active or at what depth they are screened. Given the high salinity of the Newark aquifer (chloride concentration greater than 10,000 ppm), it seems unlikely that shallow wells drawing from this aquifer would be used for drinking water (11). If, however, it is assumed that all domestic wells are used for drinking water, then the estimated population served by these domestic wells is 958 persons. Well listings indicate that 125 irrigation wells lie within three miles of the site. USGS maps do not indicate agricultural use of lands within three miles of the site with the exception of one greenhouse (1). It is estimated

that there is no population associated with irrigation use of groundwater.

The City of Hayward has investigated the possibility of locating emergency water supply wells in this area as recently as October 1986 (17). These wells would be used in the event of a disruption to the Hetch-Hetchy Aqueduct supply. The future existence or use of these proposed wells was not considered in evaluating this site.

Potential for an observed release to groundwater appears to be small. Use of the Newark aquifer for drinking water seems unlikely because of poor water quality due to seawater intrusion. Contamination of lower aquifers seems unlikely because of the low permeability of the interlying structures. Potential for contamination via interconnecting aquifers exists if wells are screened at more than one aquifer. Such interconnection is unknown. Documentation of an observed release would require more extensive sampling both on-site and off-site, and definite determination of groundwater flow direction.

3.5 Surface Water:

Eden Plaza Properties was built upon San Francisco Bay tidal flats and marshlands. The facility slope is less than 3%. The terrain between the site and the surface water has a slope of less than 3% (1, 9). The one-year, 24-hour rainfall is approximately 2.5 inches (17). The nearest surface water lies about 0.5 miles south of the Eden Plaza Properties at Mt. Eden Creek. Mt. Eden Creek courses approximately 2 miles further and empties into San Francisco Bay. There are no known drinking water or irrigation intakes for surface water on Mt. Eden Creek. However, San Francisco Bay is used for commercial and recreational fisheries, and sailing.

The potential for an observed release to surface water seems small because of the limited downgradient slope, and paved site and intervening areas emptying into sewers prior to entering nearby surface waters.

3.6 Air:

There are no documented air releases from this site. Although the compounds detected at the site are considered volatile, paving of the site and off-site contamination at greater concentrations than those found on-site indicate that documentation of an air release is unlikely.

3.7 Other HRS Factors:

Eden Plaza Properties is immediately surrounded by other light industrial and office space developments (1, 9). Approximately 0.25 miles south and west of the site are undeveloped marsh and tidal lands. These wetlands serve as habitat for several federally listed endangered species, including the clapper rail, salt marsh harvest mouse, and least tern (18). The Hayward Interpretive Center is approximately 0.5 miles to the northwest (9, 18). To the north and east of the are numerous residential developments. Approximately 80,000 people live within 4

miles of the site (19). Dozens of schools and several parks are located in these areas to the north and east.

4. Draft Revised HRS Consideration:

This site was developed upon marsh and tidal wetlands. Undeveloped wetlands remain within 0.25 miles of the site and serve as habitat to several federally listed endangered species including the clapper rail, salt marsh harvest mouse, and least tern (18). San Francisco Bay supports both commercial and sport fisheries which contribute to the human food chain. Although the wetlands and bay are located very near the site, the potential for releases to these environments appears to be small because migration pathways are not conducive to contaminant transport to surface waters.

5. Other Regulatory Involvement:

The California Regional Water Quality Control Board has a file concerning this site. The file contains a consultants report prepared by Levine-Fricke (1987) (2). The site is unassigned and its status is pending. The site is not listed as a RCRA hazardous waste generator (20). The Hayward Fire Department (5), the California Department of Health Services (6), and the Alameda County Department of Health Services (7) have no records relating to this site.

6. Removal Considerations:

FIT staff observed four unsecured drums during a drive-by of the site (9). One drum had an unsecured bung ring and the other three appeared to have the bung rings secured. The drums were located in the parking lot at the east end of Eden Plaza Properties. There was no fence to prevent access, no berm to contain spills, and no identification as to the contents nor person responsible for the deposition of the drums. There are no known activities on-site that would produce hazardous wastes. It is therefore not expected that the drums located on site would contain hazardous wastes. No removal action appears warranted at this time.

7. Conclusions and Recommendations:

7.1 Conclusions:

Eden Plaza Properties, located at 3521-3583 Investment Blvd., Hayward, California 94541, has been the site of office space and light-industrial use since 1973. Site investigations prior to sale of the property by the Utah State Retirement Fund revealed soil and groundwater contamination (10). The presence of the halogenated VOCs in the 5-220 ppb range was confirmed in later sampling (2). Several nearby sites have groundwater contamination of halogenated VOCs in the 140,000 ppb range (2, 4, 10).

The population served by groundwater within 3 miles is less than 1500 (13, 14, 15). Poor water quality expected of the Newark aquifer indicates that this aquifer is not a probable source of drinking water.

The low permeability of structures interlying the aquifers greatly decreases the probability of lower aquifer contamination. This site is unlikely to score high enough on the HRS because of low groundwater use population and low permeability of the areas interlying the aquifers.

7.2 Recommendations:

EPA:

FIT recommends no further action under CERCLA at this site. Potential threats to groundwater used for drinking appear small. The upper aquifer has water quality problems associated with seawater intrusion (11) and lower aquifers appear to be separated from upper aquifers by interlying areas of low permeability (aquicludes or aquitards). Surface water use is limited to fishing and recreational uses of San Francisco Bay. There is no known use of surface water for drinking or irrigation. Surface waters appear protected from contamination by limited downgradient slope, and storm sewers (1, 9). Air releases appear unlikely because the site is paved. Direct contact, fire and explosion hazards are unlikely threats based upon the observable activities at this site, although the presence of four drums of unknown contents may present a potential hazard.

State or Other Agency:

Copies of this report will be sent to the California Regional Water Quality Control Board and the California Department of Health Services for their consideration.

8. Management Review/Concurrence:

Handwritten signature and date: 3/22/89

1.0 INTRODUCTION

This Request for Closure was prepared by The Source Group, Inc. (SGI) on behalf of Orton Development Inc. for the property located at 26545-63 Corporate Avenue in Hayward, California (the Site, Figure 1-1). This report was written to be consistent with the closure requirements outlined in the *Assessment Tool for Closure of Low-Threat Chlorinated Solvent Sites* (CRWQCB, 2009). This report contains a summary of historical characterization and remediation conducted to date and addresses the criteria warranted for low-threat site closure under the California Regional Water Quality Control Board (CRWQCB) guidelines, as follows:

- Pollutant sources have been identified and evaluated
- The site is adequately characterized
- Exposure pathways, receptors, and potential risks, threats, and other environmental concerns are identified and assessed
- Pollutant sources have been remediated to the extent feasible
- Unacceptable risks to human health, ecological health, and sensitive receptor have been mitigated
- Unacceptable threats to groundwater and surface water resources have been mitigated
- Groundwater plumes are decreasing
- Cleanup standards can be met in a reasonable timeframe
- Risk management measures are appropriate, documented, and do not require future Water Board oversight.

2.0 SITE BACKGROUND

2.1 Site Description and Named Dischargers

The property is located on the western edge of the Eden Rock Industrial Park in west Hayward. The Eden Rock Industrial Park is a mixed-use, office-industrial development which was constructed in the mid-1970s. A 20,000 square foot, single-story building is present at the Site.

The building is currently vacant. The Site was developed in 1977 and has been occupied by the following tenants:

1. Xerox used the building for storage from 1977 to 1985;
2. South Bay CRT (a cathode ray (television) tube manufacturer) occupied the building from 1984 – 1987;
3. Budget Furniture Rental occupied a part of the building from 1987 – 1991;
4. Baker Specialty Products occupied the remaining portion of the building from 1988 to 1994;
5. According to Order R2-2004-0047, the property was owned and occupied by Jetstream Water Cutting at the time the Order was written in 2004; and
6. Based on a drive-by site inspection by SGI in January 2011, the property appears to be vacant and for sale.

Adjacent properties include a paved parking area and Alumtreat (a metals refinishing facility) to the north, Corporate Avenue to the east, Bayside Distribution Center (a large commercial development with multiple tenants) to the west, and property owned by Utah State Retirement Fund to the south. Tenants in the Utah State Retirement Fund building include Melrose Nameplate Label Company (an industrial manufacturing metal nameplate company). South of the Utah State Retirement Fund building, Lusk Metals operates a plastics and metal milling facility and warehouse.

Additional details regarding the property and adjacent property usage is provided in prior reports, including the Proposed Final Remedial Action Plan (EMCON, 1999). A site plan showing adjacent properties is provided as Figure 2-1.

2.1.1 Named Dischargers

Former tenants, South Bay CRT and Budget Furniture Rental would be considered discharges at the Site, however were unable to be located in the 1990's when the Cleanup Requirements were being issued for the Site. The Wachovia Real Estate Fund is a commingled trust fund which includes the property and was so named as a discharger. The Wachovia Bank of North Carolina, N.A., the trustee of the Fund, is named as a discharger because it is a trustee of the Fund and

formerly had the authority to direct the management and deposition of the Site property. The Bank of New York Trust Company of California is named as a discharger because it was the title record holder in its capacity as the ancillary trust for the Bank as a trustee for the Fund.

Orton Development sold the property in 1999, however retained the environmental liability of the property related to the past Order and Cleanup Requirements. Releases related to the current Order are believed to have occurred in the mid- to late 1980s.

2.2 Site Conditions

Environmental assessment of the Site was initiated in the late 1980s, on behalf of Wachovia Fund. Chlorinated volatile organic compounds (VOCs) were found in subsurface soil and groundwater on the southwestern corner of the Site. As discussed in further detail in Section 3.1, the source of VOC impacts was believed to be a garbage dumpster storage area associated with Budget Furniture Rental, a prior tenant at the Site.

Site Cleanup Requirements were issued by CRWQCB under Order No. 95-141 (CRWQCB, 1995a). The Order required a potential conduits study and report, completion of interim and final remedial actions, development of cleanup standards, and implementation of a Self-Monitoring Program. Self-Monitoring requirements were identified in a Self Monitoring Program issued by the CRWQCB (CRWQCB, 1995b) and included sampling of 18 monitoring wells (MW-1 through MW-13 and WC-1 through SC-5). Key studies and subsequent reports issued as a result of Order No. 95-141 included:

- Potential conduits evaluation Report (Emcon, 1995);
- Interim Soil Removal Action Completion Report (Emcon, 1996);
- Interim Groundwater Removal Construction Completion Report (Emcon, 1997); and
- Risk Assessment and Feasibility Study (Emcon, 1997).

The Site is currently under the regulatory oversight of the San Francisco Bay Regional Water Quality Control Board (RWQCB). The most recent groundwater monitoring event occurred in November, 2010. Results were presented in the 2010 Semi-Annual Groundwater Monitoring Report (SGI, 2010).

2.2.1 Geology & Hydrogeology

The Site is located on the bay plain, about two miles east of San Francisco Bay at an elevation of approximately 10 feet above mean sea level. Shallow unconfined groundwater exists beneath the Site at an average depth of seven feet below ground surface (bgs). The shallow sediments underlying the Site consist of silts and clays interbedded with narrow sand lenses to a depth of about 20 feet. From about 20 to 70 feet bgs the geology is characterized by silts and clays

interposed with sand layers 2 to 10 feet thick. Local groundwater flow is consistently toward the south-southeast to south direction.

In prior reports, the geology beneath the Site is broken into three zones: the shallow water bearing (WBZ) zone (between 7 to 20 feet bgs); the intermediate WBZ (between approximately 25 to 30 feet bgs); and the deeper WBZ (between approximately 30 to 70 feet bgs). As documented in the Final Remedial Action Plan (FRAP, Emcon, 1999), the WBZs likely comprise a single hydrostratigraphic unit, rather than three discrete hydrostratigraphic units. Therefore the terms shallow, intermediate, and deeper WBZs are only used to denote depth ranges and facilitate discussion, rather than to define discrete aquifers. Geologic cross sections are provided in Appendix A.

Historic groundwater elevation data and a groundwater elevation map based on the most recent data are provided in Appendix B. A potentiometric surface map based on the most recent groundwater elevation data is provided as Figure 2-2.

3.0 CONCEPTUAL SITE MODEL

Several soil and groundwater investigations have been conducted at the Site and neighboring properties since 1987. Groundwater sampling has indicated elevated concentrations of volatile organic compounds (VOCs), including trichloroethene (TCE), and cis-1,2-dichloroethene (cis-1,2-DCE) in groundwater beneath the Site and adjacent properties. Subsurface investigations have indicated that the VOC impacts to groundwater are limited to the shallow and intermediate WBZs, from 7 to 30 ft-bgs (CRWQCB, 1999).

Historic data collected, in addition to property and nearby land use data has been used to develop the Conceptual Site Model (CSM) and identify potential exposure pathways and receptors. A summary of past site characterization, and current land and water use is provided in the following sections.

3.1 Pollution Sources and Site Characterization

A number of soil, soil gas, and groundwater investigations have been conducted at the Site since the late 1980s to characterize the distribution of VOCs in the subsurface. Past key documents summarizing characterization activities include the following:

- Soil and Groundwater Investigation, 26569-75 Corporate Avenue. Woodward-Clyde Consultants. June 15, 1987;
- Results of Soil-Gas Survey for Eden Rock Building 10, Hayward, CA. Levine-Fricke. April 15, 1988;
- Remedial Investigation for Wachovia Real Estate Fund Property at 26545-63 Corporate Avenue. David Keith Todd Consulting Engineers, Inc. January 10, 1992;
- Migration Potential Analysis, 26545-63 Corporate Avenue. Emcon. April 1995;
- Interim Soil Removal Action Completion Report, 26545-63 Corporate Avenue. Emcon. February 28, 1996;
- Interim Groundwater Removal Action Completion Report, 26545-63 Corporate Avenue. Emcon. March 1997; and
- Risk Assessment and Feasibility Study Workplan 26454-63 Corporate Avenue, Hayward, CA. Emcon. July 8, 1997.

As documented in Order No. 99-091, remedial investigations required at the Site have been completed. A summary of past site characterization results are provided in the following sections.

3.1.1 Soil Characterization

In May 1987, Woodward-Clyde Consultants performed an investigation of the Utah Fund property (immediately south and downgradient from the subject Site). Five soil borings (WC-1 through WC-5) were advanced around the perimeter of the property and results indicated elevated concentrations of VOCs in the northwest corner of the Utah Fund Property (along the southwest property boundary of the 26545-63 Corporate Avenue Site). Follow-up soil characterization occurred throughout the late 1980s and early 1990s, which confirmed the presence of a source area near the southwestern corner of the Site. Predominant constituents detected in this area consisted of TCE (detected up to 12,000 ug/kg), cis-1,2-DCE (detected up to 29,000 ug/kg), trans-1,2-DCE (detected up to 710 ug/kg), and vinyl chloride (detected up to 420 ug/kg). Soil sample locations and analytical results from samples collected outside of the source area are summarized in Figure 3-1 and Table 3-1. Soil sample locations and analytical results from samples collected from within the source/excavation area are provided in Figure 3-2 and Table 3-2.

As shown on Figure 3-2, the area with elevated VOC concentrations was located at the juncture of three properties. A 1985 aerial photograph obtained from Pacific Aerial Surveys indicated the presence of 10 to 20 drums on the southwestern area of the 26454-63 Corporate Avenue property. Additionally, on-Site storage of chlorinated hydrocarbons in 55-gallon drums was documented by photographs on December 9 and 10, 1987 (when Budget Furniture Rental was one of the tenants). The drums were stored in the garbage dumpster area near the southwestern corner. Based on this documented drum storage associated with Budget Furniture Rental, poor property management as determined by a 1992 Site Inspection by the CRWQCB, and the fact that the adjacent sites did not have documented or reported use of VOC chemicals, Board staff attributed the subsurface impacts to activities conducted by previous tenants at 26545-26563 Corporate Avenue (CRWQCB, 1995).

3.1.2 Groundwater Characterization

The first groundwater monitoring wells (MW-1 through MW-4, installed in the shallow WBZ) were installed in 1988. Elevated VOCs were detected in well MW-3 (located in the former drum storage area, Figure 3-2). TCE and cis-1,2-DCE were detected at 2,000 ug/l and 7,500 ug/l, respectively. Since that time, 32 additional wells have been installed in the vicinity of the Site and have been monitored on a periodic basis. Figure 3-1 and 3-2 includes the locations of former and current monitoring and extraction wells. Pursuant to approval from the CRWQCB, all but 9 wells have been abandoned. Groundwater monitoring wells MC-2R, MW-5, MW-6, MW-8, MW-13, MW-15, MW-16, MW-17, and MW-19 are monitored on a semi-annual to annual basis. Groundwater VOC concentrations and a TCE concentration contour map based on the most recent sampling event is provided as Table 3-4 and Figure 3-3. Groundwater concentrations collected to date from all monitoring wells are provided in Appendix D.

3.1.3 Soil Gas Characterization

A soil gas survey was conducted throughout the site and along the west side of Corporate Avenue in 1998. A copy of the report documenting results of the soil gas survey is provided in Appendix E. The highest soil gas detections were detected near the southwest corner of the property (where the excavation subsequently occurred and along a narrow band along Corporate Avenue following the storm drain. Soil gas data following the remedial efforts at the site have not been collected. Soil gas data is not discussed in any further detail in this report since it was collected over 10 years ago, prior to remedial efforts, and is not representative of current conditions.

3.2 Current Land Use

The site is located in an area zoned for industrial use. According to the City of Hayward Planning Department, there are no planned changes to the land use in this area (phone call between Mr. Geoff Taylor at SGI and Tim Koonz at City of Hayward).

3.3 Groundwater Use and Nearby Surface Water

Based on the *Water Quality Control Plan for the San Francisco Bay Basin* (Basin Plan) (RWQCB, 1995), groundwater beneath the site is part of the East Bay Plain basin, which has beneficial uses for municipal and domestic drinking water supply, industrial process and service water supply, and agricultural water supply. That said, the shallow and intermediate WBZs at the Site have elevated total dissolved solids (>1,500 ppm) and low yields (<2 gpm) rendering them poor candidates for domestic or municipal water supplies (RWQCB, 1999).

The City of Hayward purchases all of its water from the San Francisco Public Utilities Commission. About 85% of the water comes from the Hetch Hetchy watershed and the remaining 15% is from the Alameda watershed. The City of Hayward does not currently have plans to use groundwater to meet any portion of its day-to-day normal water demand. Five emergency wells are located within the City and are available for short duration emergency use only. According to Robert Gerena of the City of Hayward Utilities Department, all five emergency production wells are located greater than 1,300 feet from the 26545-63 Corporate Avenue Site

Eden Creek, located approximately 3,000 feet to the west of the Site drains into the San Francisco Bay. Approximately ¼ mile south of the Site is the Eden Landing Ecological Reserve, a wetlands restoration area comprised of approximately 5,040 acres, managed by California Fish and Game.

3.4 Potential Exposure Pathways and Receptors

Based on current and expected future land use, the site and surrounding area will remain zoned for industrial use. There are no down gradient water production wells that could be impacted from the VOC plume beneath the Site. VOC impacts beneath the site are limited to the shallow and

intermediate water-bearing zones, which are poor candidates for domestic or municipal water supplies. It can be concluded that there is little or no potential future use of the shallow or intermediate WBZs in the immediate vicinity of the Site.

The closest surface water bodies are Eden Creek (located approximately 3,000 feet to the west of the Site) and Eden Landing Ecological Reserve (located approximately 1,300 feet south of the site).

Based on the current understanding of land and water beneficial use conditions at and near the Site, the most plausible exposure scenarios for characterizing risk are based on a commercial/industrial land use scenario based on vapor intrusion into indoor air or direct contact with soil.

4.0 REMEDIATION

Past remedial efforts consist of a 1996 soil excavation near the southwest corner of the property where elevated VOC concentrations were identified and operation of a groundwater pump and treat system, operated from March 1997 to October 1999. Site cleanup activities were regulated pursuant to Final Order No. 99-091 (CRWQCB, 1999).

Details are provided as follows:

4.1 Interim Remedial Measures - Soil

Soil Remediation was documented in the Interim Soil Removal Action Completion Report (Emcon, 1996). Excavation activities occurred in February 1996 and consisted of removal and offsite disposal of approximately 2,600 tons of VOC impacted soil. Soil was excavated to the groundwater table (approximately 7 to 7.5 feet bgs); the footprint of the excavation is provided in Figure 4-1. Unsaturated soil cleanup standards were set at 1,000 ug/kg total VOCs. Soil excavation confirmation sample locations and analytical data are provided in Figure 4-1 and in the last half of Table 3-2. Historical sample locations and analytical results collected prior to the 1996 excavation are provided in Figure 3-2 and the first half of Table 3-2. The CRWQCB approved the Soil Removal Action Completion Report and concurred that no further remediation of vadose zone soils in the source area is deemed necessary in a letter dated March 7, 1996.

4.2 Interim Remedial Measures Groundwater

Groundwater interim remedial measures consisted of operation of a groundwater pump and treat system, from March 1997 to October 1999. The pump and treat system extracted groundwater from two off-site groundwater extraction wells, EX-1 and EX-2 at a total flowrate of approximately 4 gallons per minute (gpm). Locations of the former extraction wells are included on Figure 2-1. Extracted groundwater was treated with carbon prior to discharge to the sanitary sewer. The groundwater extraction system removed approximately 3.2 million gallons of groundwater and 36 pounds of VOCs during its 2 ½ years of operation.

4.3 Final Remedial Measures – Groundwater Monitoring and Institutional Controls

A final Remedial Action Plan (RAP, Emcon, 1999) was prepared in April of 1999. The RAP included a feasibility study, fate and transport modeling, a risk assessment, and proposed final remedial actions. The RAP indicated that no further action is necessary for VOC-impacted soil and that the presence of VOC-impacted groundwater in the shallow and intermediate-WBZs at the Site and vicinity did not pose a significant threat to public health or the environment. Based on the results of a feasibility study, the RAP proposed a final groundwater remedial approach consisting of

long-term groundwater monitoring and institutional controls (land-use restrictions). The CRWQCB approved the RAP in a letter dated July 12, 1999 and the pump and treat system was subsequently shutdown.

Pursuant to the approved RAP a deed restriction (environmental restriction on property) was recorded. The deed restriction limits use of the property to commercial/industrial purposes, requires implementation of appropriate health and safety plans in the event that subsurface activities are performed, and restricts the use of shallow groundwater.

In addition, a long-term groundwater monitoring plan was included in the Proposed Well Abandonment Activities Report (Shaw, 2004). The Report recommended that eight monitoring wells (MW-5, MW-6, MW-8, MW-17, MW-19, and WC-2R) be used for long-term monitoring and the additional 20 wells be abandoned. The RWQCB approved the proposed long-term monitoring plan, with the condition the well MW-13 be added to the monitoring events in a letter dated June 14, 2004. The remaining 19 wells were subsequently abandoned, as documented in a report dated March 8, 2006.

On June 16, 2004 the CRWQCB rescinded the site cleanup requirements (Order No. 99-091) in Order No. R2-2004-0047. As documented in the new Order, the following are the basis for rescission of the site cleanup requirements:

- The site has been fully characterized;
- Remediation actions at the site have reduced concentrations of contaminants in soil to acceptable levels and reduced concentrations of chemicals in groundwater to the extent practical;
- Continued long-term monitoring will be conducted;
- No water supply wells are located in the immediate vicinity of the site. Shallow groundwater is not used as a current source of drinking water. The silty and clayey nature of shallow soils and close proximity of the site to the Bay precludes significant future use of groundwater as a source of drinking water; and
- A deed restriction for the site has been signed by the Executive Officer and has been recorded. The deed restriction is sufficient to protect human health and the environment in the future.

5.0 RESIDUAL IMPACTS

As discussed in Section 4.3, the Risk Assessment conducted in 1999 as part of the RAP for the Site indicated that no further action is necessary for VOC-impacted soil and that the presence of VOC-impacted groundwater in the shallow and intermediate-WBZs at the Site and vicinity did not pose a significant threat to public health or the environment.

As part of this Request for Closure, residual impacts in soil and groundwater have been compared to California Regional Water Quality Control Board, San Francisco Bay Region Environmental Screening Levels (ESLs) (CRWQCB, 2008). As discussed in Section 3.3, groundwater beneath the Site is not currently used for drinking water and the shallow and intermediate WBZs at the Site have elevated total dissolved solids (>1,500 ppm) and low yields (<2 gpm) rendering them poor candidates for domestic or municipal water supplies. Consequently, ESLs for sites where groundwater is not a current or potential drinking water resource are applicable for the 26545-63 Corporate Avenue Site.

5.1 Soil

Residual concentrations were compared to Shallow Soil Screening Levels for Commercial Land Use where groundwater is not used as drinking water. Final soil ESLs for each constituent are based on the lowest ESL value considering direct human exposure to soil, groundwater protection from soil leaching, urban area ecotoxicity criteria, and gross contamination ceiling values (odors, etc.). Tables 3-1 and 3-2 include final ESLs for detected VOCs.

Table 3-1 summarizes soil samples analytical results from locations outside of the 1996 excavation area. Sample locations are included on Figure 3-1. TCE, cis-1,2-DCE were reported at some locations at relatively low levels; however concentrations detected were all below applicable ESLs.

Table 3-2 summarizes soil sample analytical results from locations within the 1996 excavation area. Figure 3-2 includes sample locations. Prior to the excavation, levels of TCE, cis-1,2-DCE, and vinyl chloride were detected at concentrations above applicable ESLs. Confirmation samples collected during the excavation activities, indicated that residual concentrations were below the agreed upon soil cleanup objective of 1,000 ug/kg total VOCs. In addition, with the exception of vinyl chloride near the northern edge of the excavation, all individual VOC concentrations are below ESLs; vinyl chloride was detected at 240 µg/kg and 90 µg/kg, at locations SW2-G10 and SB-G10 (compared to the ESL of 47 µg/kg).

5.2 Groundwater

Groundwater concentrations, based on the most recent sampling event (November 2010) were compared to groundwater screening levels where groundwater is not a current or potential drinking

water resource. The final groundwater ESLs for each constituent are based in the lowest ESL value considering vapor intrusion into buildings, aquatic habitat goals, and gross contamination ceiling values (odors, etc.). Table 3-3 includes the final groundwater ESL for each constituent. The only constituents which exceed the ESL levels are TCE and vinyl chloride, with TCE being the predominant constituent. A TCE isoconcentration map based on the most recent monitoring data (November 2010) is provided as Figure 3-3.

The highest concentrations of TCE and vinyl chloride (840 ug/l and 13 ug/l, respectively) were detected in well MW-6, located on the south side of the Utah State Retirement Fund Building.

5.2.1 Natural Attenuation Trend Analysis

VOC trend charts for all wells that are currently monitored are provided in Appendix E; a table summarizing historical concentration data is provided in Appendix C. The VOC trend in source area well WC-2R and in well MW-15 (located immediately downgradient of the former source area) show a decreasing trend with all VOCs currently below ESLs. Downgradient wells MW-6, MW-5, and MW-17 also exhibit decreasing trends; TCE remains above the ESL in well MW-6 however has consistently decreased since 2007.

Over the past several years, VOC concentrations are increasing in wells MW-8, MW-16, and MW-19. These wells are located on the adjacent Utah Fund Building property (the location of Melrose Nameplate) and Lusk Metals property. In past reports for the Wachovia Fund property, it has been suggested that secondary source(s) in the vicinity of these downgradient locations may be responsible for subsurface impacts. This suggestion was dismissed in the past, partially due to the adjacent sites not having any reported use of chlorinated solvents. During a recent review of EPA and HAZNET databases, Melrose Name Plate and Label company was listed as a Small Quantity Generator of hazardous waste (including PCE waste) and has historically disposed of "liquids with halogenated organic compounds >1,000 mg/l). A copy of the report is provided in Appendix F, with information pertaining to halogenated compound use at Melrose Nameplate on pages 14 through 16.

Based on the distribution of contaminants over the last several years, it appears that the increasing concentrations in wells MW-8, MW-16, and MW-19 are due to a secondary source; not the original source, associated with the southwest corner of the Wachovia Fund property. Concentrations in wells MW-19 and MW-8 include PCE, a parent product with minimal detections in the source area. PCE has never been detected in source area wells (MW-3/3R, MW-9, or MW-21). Based on the increasing trends of PCE in offsite wells (Appendix E), and the lack of PCE in the prior source area affiliated with 26545-63 Corporate Avenue, it appears that a secondary source has resulted in increased groundwater concentrations downgradient from the Site.

Figures 5-1 through 5-3 show TCE, PCE, and cis-1,2-DCE isoconcentration maps over time. The maximum concentrations of TCE and cis-1,2-DCE , the two primary constituents associated with the Site's source area, have decreased over time

6.0 RATIONALE FOR CLOSURE

Orton Development is requesting closure of the Wachovia Fund based on the following rationale:

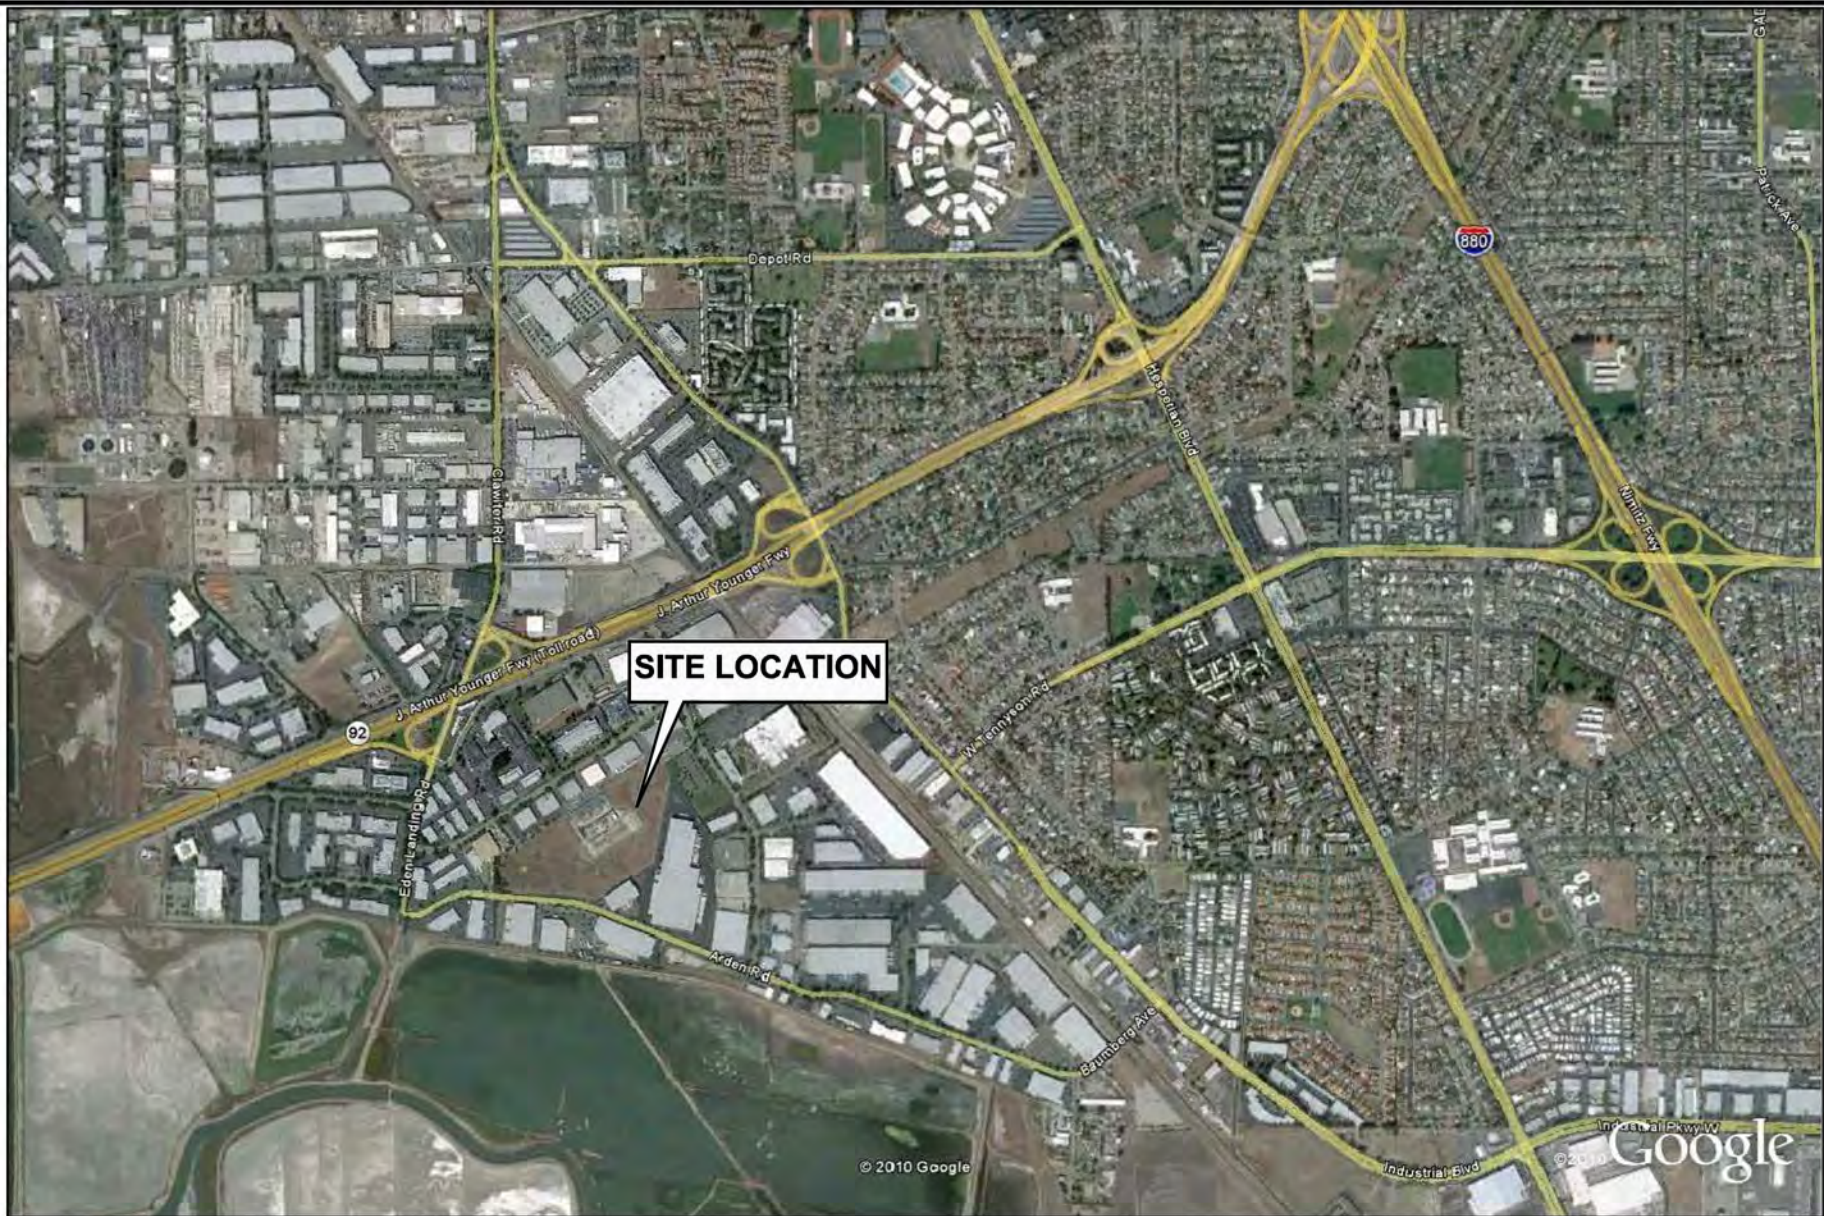

1. The source of the release has been identified and removed. Investigations revealed a source area in the vicinity of a former garbage dumpster area where drums were observed to be stored. The source was removed in 1996 and documented in a Soil Removal Action Completion Report (Emcon, 1996). In addition, a groundwater extraction and treatment system operated for 2 ½ years and removed approximately 2.3 million gallons of groundwater. The CRWQCB approved the Soil Removal Action Completion Report and concurred that no further remediation of vadose zone soils in the source area is deemed necessary in a letter dated March 7, 1996.
2. The site has been adequately characterized. Numerous subsurface investigations have occurred at the site since the late 1980s. As documented in Order No. 99-091, remedial investigations required at the Site have been completed.
3. Exposure pathways, receptors, and potential risks have been identified. There are no existing water supply wells, surface waters or other sensitive receptors threatened by the remaining contaminants in soil or groundwater. A Risk Assessment conducted in 1999 as part of the RAP for the Site indicated that no further action is necessary for VOC-impacted soil and that the presence of VOC-impacted groundwater in the shallow and intermediate-WBZs at the Site and vicinity did not pose a significant threat to public health or the environment.
4. In addition to fulfilling conditions of the Order, three (3) additional years of groundwater monitoring have been completed to verify that the remaining levels of residual COCs in the prior source area are stable and naturally attenuating. The groundwater monitoring events following the approved closure of the groundwater treatment system have verified that the impacts associated with the initial release have been remediated; groundwater concentrations in this area have not spiked or increased since the treatment system has been shutdown (Appendix E, wells WC-2R and MW-15).
5. Pursuant to conditions of the Order, all Deed Restrictions, notifications, and Public Opinion Forums were completed without incident or comment. Additional Risk Management Measures requiring CRWQCB oversight are not warranted.

Orton Development is prepared to properly destroy all Site related monitoring wells, upon approval of this Request for Closure by the CRWQCB.

Professional Qualifications

SUMMARY OF EXPERIENCE

With over 25 years' experience, Ms. Vanneman's expertise is knowledge and application of environmental regulations pertaining to both the environment and occupational health and safety.

Facilities audited for environmental health and safety compliance by Ms. Vanneman include foundries, cabling operations, extrusion/molding operations, aerospace, commercial printing, food preparation/packaging, metal plating/etching, automotive, painting, woodworking, semiconductor, plating, pharmaceutical, healthcare, biomedical, concrete mixing/molding, and other various commercial and industrial facilities. Ms. Vanneman has also conducted numerous facility dismantling/decontamination projects.

Ms. Vanneman has performed and/or managed 1000s of Phase I, II and III Environmental Site Assessment/Remediation projects including several types of properties including industrial, commercial, residential and agricultural. These projects range from single-property transaction to multi-site portfolios. Environmental issues addressed include but are not limited to radon, asbestos, lead, wetlands, third-party contamination, vapor intrusion, dry cleaners and existing on-site contaminants.

EDUCATION

B.A. Biology, Hastings College, Hastings, NE
Environmental Masters Course Work, West Coast University

PROFESSIONAL REGISTRATIONS/CERTIFICATIONS

Former California Registered Environmental Assessor (Program defunct as of 2012)
Former Cal/OSHA Asbestos Consultant
40-hour radiation safety in radiography
Lead Risk Assessment Courses
Cal/EPA-sponsored Risk Assessment Courses
Certified AHERA Building Inspector

SUMMARY OF EXPERIENCE

Ms. Trembczynski, is a Program Manager with over 20 years of experience specializing in environmental site assessments. Ms. Trembczynski has successfully completed hundreds of project assignments, pertaining to property transaction due diligence site assessments including: Transaction Screens; Phase I Environmental Site Assessments; and peer report reviews. In addition, Ms. Trembczynski has extensive experience in subsurface, soil gas, and groundwater investigations and remediation; hazardous and solid waste management, and asbestos and lead-based paint surveys. She has experience as a project manager and/or project geologist on numerous environmental site assessments including real estate transfer and/or refinancing and/or re-use and repurpose assessments.

At EBI, Ms. Trembczynski currently performs technical reviews of Phase I Environmental Site Assessment reports and peer reports, and provides project coordination and portfolio management. Ms. Trembczynski has worked with corporate environmental officers, lending institutions, legal counsels, investment companies, petroleum related clients, and real estate brokers to develop strategies for managing environmental due diligence investigation for property acquisition and financing.

RELEVANT PROJECT EXPERIENCE

Ms. Trembczynski has over 20 years of experience conducting environmental assessments for commercial, industrial, and multi-family residential properties located nationwide. Ms. Trembczynski has extensive experience conducting environmental assessments for real estate and telecommunications sites located throughout the Midwest Region. These assessments were performed to evaluate the current and historic site conditions, potential off-site liabilities, environmental control systems, and site remediation costs in order to advise prospective buyers, operators and owners of potential and existing environmental concern.

Ms. Trembczynski has served as a project manager responsible for preparation of proposal and cost estimates, managing budgets, coordinating and supervising field activities including the installation and oversight of soil borings, soil vapor points, and groundwater monitoring wells; coordinating and supervising the removal of underground storage tanks; reviewing and reporting analytical findings; regulatory tracking and compliance, third party access agreements, and preparing and reviewing regulatory submittals that include workplans, remedial action plans, and site closure reports. Ms. Trembczynski also provided technical and procedural guidance for risk-based corrective action closures.

Ms. Trembczynski has completed numerous Phase II and Phase III subsurface investigation and remediation projects with extensive field and project management experience associated with the following: Site Characterization and Closure Plans, Due Diligence Assessments, Indiana LUST Corrective Action Evaluations, Illinois RBCA Evaluations and Calculations, Illinois Voluntary Site Remediation Program, Environmental Site Assessments, UST Investigation and Remedial Action, Design and Implementation, Groundwater Monitoring and Sampling, and Field Construction Supervision. Ms. Trembczynski has also negotiated with and obtained closure from various regulatory agencies in the Midwest Region.

EDUCATION

M.S. Geology, The University of Akron, Akron, Ohio, 2000
B.S. Geology, Eastern Illinois University, Charleston, Illinois, 1998

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

EXECUTIVE SUMMARY

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/28/2020 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 12 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQQ: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQQ list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/26/2020 has revealed that there are 16 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 SWEEPS UST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.25 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE

Waste Code:	D022
Waste Description:	CHLOROFORM

Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

RB Case Number: 01S0390
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Other Solvent or Non-Petroleum Hydrocarbon
Site History: Volatile organic compounds (VOCs) detected in groundwater underlying the site appear to originate from upgradient sources. Because of this , and because the VOC concentrations in the on-site wells show a decreasing trend, no further action for the site was recommended by the Water Board in its letter dated August 9, 1996. On December 30, 1996, monitoring wells MW-1, MW-2, and MW-4 were destroyed, leaving in-place on-site well MW-3 and off-site well MW-5 for the upgradient property owner of 3201 Investment Boulevard, Hayward to include in their monitoring program.

Violation Description: 15, Section(s) 66265.52
Failure to include all of the following in the Contingency Plan:
description of actions personnel will take in response to a release or
emergency, arrangements with local authorities, list of emergency
coordinators including name, addresses & phone numbers, list of
emergency equipment and their physical description, location and
capabilities,- evacuation plan, and OES phone number. (If the owner or
operator has already prepared a Spill Prevention, Control, and
Countermeasures (SPCC) Plan or some other emergency or contingency
plan, the owner or operator need only amend that plan to incorporate
hazardous waste management provisions.)

Violation Notes: Returned to compliance on 06/11/2019. Facility is to update
contingency plan to indicate spill/release notification agencies and
phone numbers. Facility given 30 day extension per CUPA.

Violation Division: Hayward City Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 439888
Site Name: C3 Nano, Inc.
Violation Date: 05-03-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22,
Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and
portable tanks with the following requirements: "Hazardous Waste",
name and address of the generator, physical and chemical
characteristics of the Hazardous Waste, and starting accumulation
date.

Violation Notes: Returned to compliance on 06/11/2019. Facility had a number of
unlabeled drums. Facility is to correctly label all hazardous waste
containers with a hazardous waste label that is correctly filled out.
Facility given 30 day extension per CUPA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:	F006
Waste Description:	WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code:	K150
Waste Description:	ORGANIC RESIDUES EXCLUDING SPENT CARBON ADSORBENT, FROM THE SPENT CHLORINE GAS AND HYDROCHLORIC ACID RECOVERY PROCESSES ASSOCIATED WITH THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS.

Waste Code:	P119
Waste Description:	AMMONIUM VANADATE (OR) VANADIC ACID, AMMONIUM SALT

Waste Code:	U096
Waste Description:	ALPHA,ALPHA-DIMETHYLBENZYLHYDROPEROXIDE (R) (OR) HYDROPEROXIDE, 1-METHYL-1-PHENYLETHYL- (R)

Waste Code:	U103
Waste Description:	DIMETHYL SULFATE (OR) SULFURIC ACID, DIMETHYL ESTER

Waste Code:	U140

Local Agency:	Not reported
RB Case Number:	01S0440
File Location:	Regional Board
Potential Media Affected:	Not reported
Potential Contaminants of Concern:	Not reported
Site History:	Sample data indicate that shallow groundwater beneath the property is impacted with the solvent 1,1 dichloroethylene (DCE). The maximum concentraton of DCE was 120 ug/L whcih exceeds the drinking water standard of 6.0 ug/L. Low levels of DCE were also detected in shallow soil samples collected from the site (maximum 120 ug/kg).

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F006
Waste Description:	WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.
Waste Code:	K150
Waste Description:	ORGANIC RESIDUES EXCLUDING SPENT CARBON ADSORBENT, FROM THE SPENT CHLORINE GAS AND HYDROCHLORIC ACID RECOVERY PROCESSES ASSOCIATED WITH

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

S106234905

File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: * Metals/Heavy Metals - Chromium 6
Site History: The Site is located approximately 1\% miles east of the San Francisco Bay shoreline and \% mile east of marshlands and salt evaporation ponds. The Site and surrounding land use is commercial/industrial, and is anticipated to remain so in the future. A large building located near the center of the Site is used by a construction company for storage, maintenance, and office space. Two abandoned sumps (dip tanks) used by a former Site tenant for chrome plating operations are located within the northwestern portion of the building. The dip tanks were filled with soil and paved over with cement by the current Site owner. The remainder of the Site was paved by the current Site owner and is used as an outdoor storage yard for construction equipment. The western portion of the property and a narrow easement along the northern border of the Site is leased by a third party for storage of mobile containers and trailers.

Detailed On-site Waste Treatment Methods and Efficiency:

Cas number:	000107131
Document control number:	1318217362197
Chemical name:	ACRYLONITRILE
Classification:	TRI
Unit of measure:	Pounds
Stream 1 - waste stream code:	Gaseous (gases, vapors, airborne particulates)
Stream 1 - trtmt method - sequence 1:	Incineration--thermal destruction other than use as a fuel
Stream 1 - trtmt method - sequence 2:	Not reported
Stream 1 - trtmt method - sequence 3:	Not reported
Stream 1 - trtmt method - sequence 4:	Not reported
Stream 1 - trtmt method - sequence 5:	Not reported
Stream 1 - trtmt method - sequence 6:	Not reported
Stream 1 - trtmt method - sequence 7:	Not reported
Stream 1 - trtmt method - sequence 8:	Not reported
Stream 1 - based on operating data:	NO
Stream 2 - waste stream code:	Wastewater (aqueous waste)
Stream 2 - trtmt method - sequence 1:	Other chemical precipitation with or without pre-treatment
Stream 2 - trtmt method - sequence 2:	Settling or clarification
Stream 2 - trtmt method - sequence 3:	Not reported
Stream 2 - trtmt method - sequence 4:	Not reported
Stream 2 - trtmt method - sequence 5:	Not reported
Stream 2 - trtmt method - sequence 6:	Not reported
Stream 2 - trtmt method - sequence 7:	Not reported
Stream 2 - trtmt method - sequence 8:	Not reported

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS AIR POLLUTANT MAJOR
HAZARDOUS WASTE BIENNIAL REPORTER
STATE MASTER

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

Case Worker: UUU
Local Agency: Not reported
RB Case Number: 01S0247
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: * Chlorinated Solvents - TCE
Site History:

The site is part of the Eden Rock Industrial Park which is a mixed-use office-industrial development constructed in the mid-1970s. Former occupants of the site include Xerox (1977-1985), South Bay CRT (1984-1987), Budget Furniture Rentals (1987-1991), and Bakery Speciality Products (1988-1994). Release of VOCs (including PCE, TCE, cis-1,2-DCE, tras-1,2-DCE and vinyl chloride) was traced to the former dumpster storage area that Budget Furniture Rental operated. Remedial activities included removal of source area soil in 1996 and groundwater extraction and treatment between March 1997 and October 1999. Groundwater concentrations in the source area and immediately downgradient show a decreasing trend and will continue to decline through natural attenuation, ultimately reaching water quality objectives of MCLs. A deed restriction limits the use of the property to commercial/industrial purposes and restricts the use of shallow groundwater. Residual concentrations do not pose unacceptable to risks to human health or the environment.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D005
Waste Description: BARIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D018
Waste Description: BENZENE

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

WDS:

Name:	GILLIG CORPORATION
Address:	25800 clawiter rd.
City:	HAYWARD
Facility ID:	San Francisco Bay 01I003064
Facility Type:	Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	2
Facility Telephone:	Not reported
Facility Contact:	Not reported
Agency Name:	GILLIG CORPORATION
Agency Address:	28500 Clawiter Road
Agency City,St,Zip:	Hayward 94545
Agency Contact:	Not reported

Primary Waste:	Not reported
Waste Type2:	Not reported
Waste2:	Not reported
Primary Waste Type:	Not reported
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Lead Agency Case Number: RO0003246
Latitude: 37.631840310202
Longitude: -122.124550203705
Case Type: Cleanup Program Site
Case Worker: DY
Local Agency: ALAMEDA COUNTY LOP
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Dichloroethene (DCE), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride, Total Petroleum Hydrocarbons (TPH)
Site History: The site is located in a commercial/light industrial area of Hayward and consists of two parcels currently developed as an office/warehouse which produces organic hummus and other similar types of dips and spreads. A railroad spur is located on APN 439-100-5-1 in the southern portion of the property. The warehouse is located on APN 439-100-5-2 with asphalt and concrete parking areas with modest landscaping located to the north and east, respectively. Historical records indicate the property remained structurally undeveloped until the late 1970s. Subsequent to site development, operations at the site included a trade school, printing company, and golf club manufacturing. Building improvements including the installation of new piping and utilities was completed by the current property owner after the site was purchased from the golf

manufacturing company in 2008. Two Phase I environmental site assessments (ESAs) were prepared for the site during May 2008 and September 2016, respectively. Based on discussions with ACDEH, the 2008 Phase I was performed prior to the property transaction between Orlimar Golf Company (Orlimar), a gold club manufacturing company and the current owner. Results of the first 2008 ESA indicated Orlimar was documented under the resource conservation and recovery act (RCRA) hazardous waste generator database. However, conclusions presented in the ESA indicated that recognized environmental concerns (REC) were not identified for soil and groundwater and additional subsurface investigations were not warranted. Results of the second 2016 ESA indicated Orlimar occupied the site from the early 1980s through the late 1990s and conducted operations which included the use and storage of hazardous materials (.i.e. petroleum, lacquer thinner, and halogenated solvents), the operation of a degreaser, and the generation of hazardous waste. Additionally, inspection records from between the 1980s and 1990s indicated hazardous materials were stored inside and outside of the site without secondary containment. Two subsurface investigations have been conducted at the site without regulatory oversight during Q4 2016 and Q1 2017, respectively. The first 2016 investigation included the collection of soil, grab groundwater, and soil vapor samples. Soil results indicated low concentrations of Total Petroleum Hydrocarbons as diesel (TPH-d) and TPH as motor oil (TPH-mo), up to 1.7 milligrams per kilogram [mg/kg] TPH-d and 30 mg/kg TPH-mo. Grab groundwater samples indicated TPH-d was reported up to 150 micrograms per liter (ug/l) and TPH-mo up to 3,100 ug/l. Silica Gel Cleanup (SGC) does not appear to have been conducted on the extractable hydrocarbon analysis. A concentration of 64 ug/l of Trichloroethene (TCE) was also detected in grab groundwater sample located in proximity to the former hazardous materials storage compound location. TCE was also detected in one soil vapor sample at a very low concentration of 3.1 micrograms per cubic meter (ug/m3) near the southern edge of the parcel, a substantial distance from TCE reported in groundwater. The second subsurface investigation included the collection of soil, groundwater, and soil vapor samples. One groundwater monitoring well was installed at the reported location of the former hazardous material compound. Results indicated indoor air samples were all below applicable Environmental Screening Levels (ESLs) for commercial indoor air Direct Exposure Human Health Risk Levels as promulgated by the San Francisco Bay Regional Water Quality Control Board (RWQCB), but were above the residential Direct Exposure Human Health Risk Levels ESLs. Soil samples collected during the installation of the monitoring well detected up to 1,336 mg/kg TPH-mo at a depth of two feet below grade surface (bgs). Groundwater concentrations up to 44.9 ug/l TCE and 11.4 ug/l of cis-1,2-Dichloroethene (cis 1,2 DCE) were detected. Both concentrations are below applicable commercial Groundwater Vapor Intrusion Human Health Risk Levels ESLs; however, only one monitoring event has occurred. Subsequent investigation activities have been requested by ACDEH to evaluate subsurface soil gas conditions under the building footprint and evaluate human health risk from vapor intrusion to indoor air.

Description:	RP stated during terminal operations, the driver of a fork-lift punctured one of two 350 lb. drums containing an unknown amount of solid depleted uranium. No material was released from either drum and no emergency exists at the facility. The drums were relocated and isolated. Routine operations have continued at the facility. Staff members are coordinating removal of the drums for disposal through a contractor.

Description: Per the caller there was a skid of 50lb paper bags and three bags had been torn at a previous terminal during loading causing the spill

FINDS:

Registry ID: 110055855819

Click Here:

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

ELECTRO-FORMING CO. - HAYWARD (Continued)

S104574011

Completed Date: 01/30/2020
Comments: A Covenant to Restrict Use of the Property (Land Use Covenant LUC) was made between the owner of property and DTSC on April 9, 2014. Section 3.05 of LUC indicates that the owner and all subsequent owners are responsible for costs incurred with administration of the LUC. DTSC SM does not anticipate in the near future any activity to be conducted at the Site beyond administration of the LUC. If activities are necessary, DTSC will establish an agreement with owner that addresses the new activities, including the appropriate and necessary cost recovery requirements.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 01/16/2020
Comments: On February 14, 2018, DTSC issued a comment letter on the 2017 Land Use Covenant (LUC) Annual Inspection Report (Report). The comment letter noted that photographs included in the Report showed apparent deterioration of pavement (Cap) on the eastern side of the Property. The Cap was restored in circa April 2019 to meet LUC requirements. The Cap was reconditioned with placement of 6-inch thick steel-reinforced concrete. Additionally, all uncovered soil in the external area of the Property was covered with the placement of 6-inch thick steel-reinforced concrete. Based on the 2020 LUC inspection, the Cap meets the provisions of the LUC and is currently effective by protecting public health and the environment. If minor cracking worse over time, DTSC recommends that sealants such as epoxy resins, asphaltic material, thermoplastics, silicone, etc. may be placed over cracking as corrective measure to retain Cap and swales effectiveness and level of protection.

Completed Area Name: PROJECT WIDE

ELECTRO-FORMING CO. - HAYWARD (Continued)

S104574011

Completed Document Type: Supplemental Site Investigation Workplan
Completed Date: 11/02/2012
Comments: Workplan describe activities for groundwater sampling at up sixteen locations, chemical analysis of samples and reporting. The objective of the sampling is to provide data regarding current groundwater conditions. Groundwater samples are proposed throughout the property at locations associated with past plating activities, detected soil impact, and to provide adequate coverage of the property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 03/10/2014
Comments: Report provides results of soil vapor and groundwater investigation conducted at the Site. The report concludes that a Land Use Covenant should be place on the property because contamination remains above unrestricted beneficial use.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Work Notice
Completed Date: 11/26/2012
Comments: Work notice for upcoming groundwater and soil gas investigation finalized and distributed to the surrounding community.

ug/m3 predicts an indoor air concentration of 6.6 ug/m3, which is within the risk management range for commercial/industrial incremental excess risk and falls below the TCE accelerated response action level for a commercial/industrial scenario of 8 ug/m3. Indoor air samples have not been collected to provide an empirical line of evidence for protectiveness from the vapor intrusion (VI) pathway. Variation in soil vapor concentrations, degradation of subsurface volatile organic compounds, and wear and tear of the building slab may increase inhalation risk and hazard for site receptors. These factors should be monitored regularly to re-evaluate potential VI risk and hazard.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Document Type: Letter - Demand
Completed Date: 01/24/2012
Comments: Demand letter #1 re-mailed to Williams.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Workplan
Completed Date: 11/13/2008
Comments: DTSC approved the Workplan. The supplemental site characterization activities under the Workplan include drilling of five soil borings to 20 feet below ground surface and collection of grab groundwater samples and analysis for metals.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 11/17/2009
Comments: VOCs and nickel were found in groundwater at concentrations that exceed maximum contaminant levels. Because these contaminants will remain at the site, DTSC will require a land use covenant to restrict the use of groundwater so that it can not be used as a drinking water source.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Lead Agency Case Number: 01S0534
Latitude: 37.641754
Longitude: -122.121824
Case Type: Cleanup Program Site
Case Worker: NF
Local Agency: Not reported
RB Case Number: 01S0534
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: * Solvents
Site History:

From 1963 to 1997, White Cap (formerly Continental White Cap) manufactured container closures at 24493 Clawiter Road. The manufactured products consisted of metal caps, typically for glass food and beverage containers. Hazardous materials were managed and released during this period, including paint thinners. The site is currently operated by Con-X-Tech to fabricate structural steel. Areas of soil impact were primarily associated with releases of paint thinners from six underground tanks and a dry sump. Shallow groundwater was impacted in the areas of soil contamination, extending a short distance in the direction of groundwater flow (southwest). Chemicals of concern include xylenes and ethylbenzene. In 1990 and 1991, White Cap removed all six underground tanks and the dry sump from the site and overexcavated contaminated soil. Since 1991, White Cap has operated soil vapor and groundwater extraction and treatment systems. Since 2000, the White Cap has conducted insitu (in-place) bioremediation treatment at various portions of the site. White Cap continues to operate soil vapor and groundwater extraction and treatment systems, along with insitu bioremediation systems, at the release areas on the northern portion of the site. White Cap continues to conduct periodic monitoring at the site. It is expected that these activities will continue until drinking water standards are reestablished in onsite groundwater and Water Board concurrence

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: N/A
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 01/14/2021
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: N/A
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 01/14/2021
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/28/2020

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

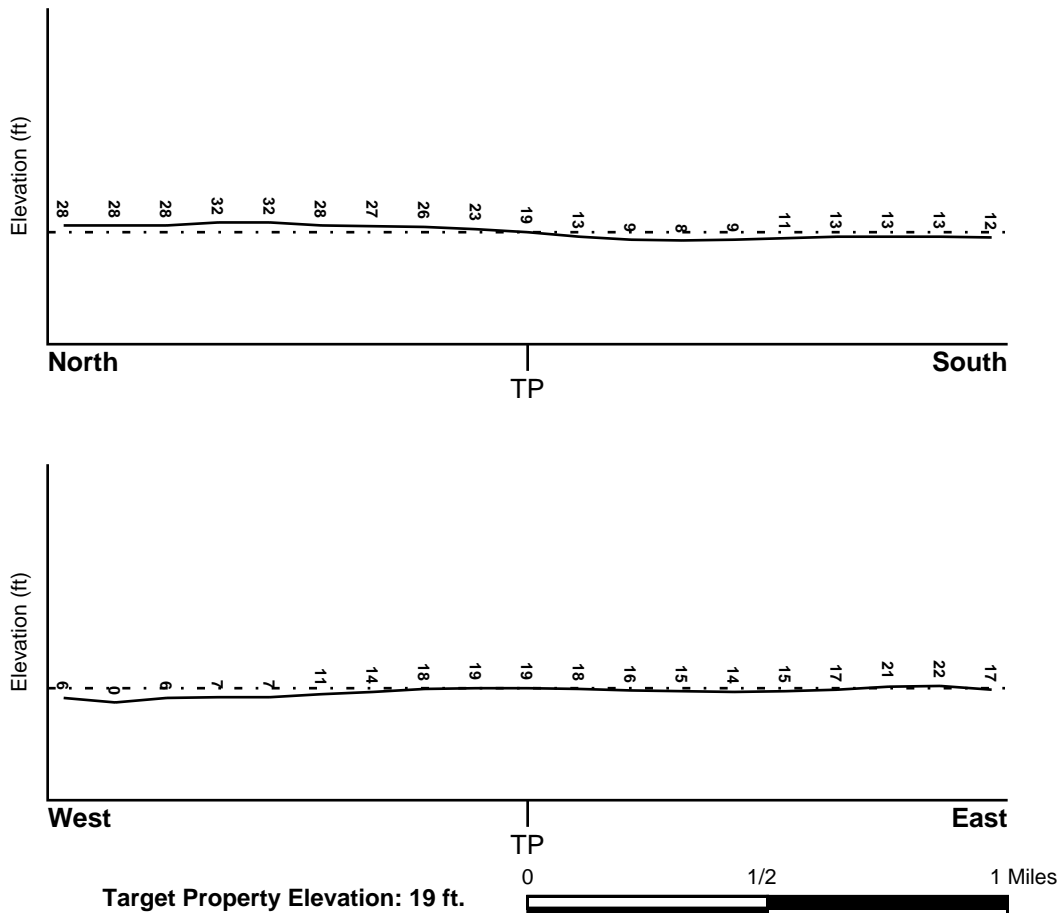

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
HAYWARD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Danville

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	20 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
2	20 inches	53 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
3	53 inches	79 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Sycamore

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	18 inches	59 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

Soil Map ID: 3

Soil Component Name: Willows

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 9 Min: 8.5
2	18 inches	72 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 9 Min: 8.5

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United States Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

The use of this material is subject to the terms of a license agreement. You will be held liable for any unauthorized copying or disclosure of this material.

This Report contains certain products owned by or licensed by Tele Atlas North America, Inc. ("TANA") and licensed to EDR pursuant to an agreement between EDR and TANA (the "TANA Agreement"). Such products include the Dynamap®/2000 (commencing with the most current version, nationwide coverage, ArcInfo™format, tiled by county, with semi-annual Updates) and are referred to in this Report as the "Licensed Products".

The use of the Licensed Products with a non-TANA map may result in increased variance between the location displayed on the map and ground truth location.

The recipient of the Report (hereinafter referred to as an "End User") shall use such Report solely for its internal purposes and not for resale.

U.S. GOVERNMENT RIGHTS. If End User is an agency, department, or other entity of the United States Government, or funded in whole or in part by the United States Government, then use, duplication, reproduction, release, modification, disclosure or transfer of this commercial product and accompanying documentation, is restricted in accordance with the LIMITED or RESTRICTED rights as described in DFARS 252.227-7014(a)(1) (JUN 1995) (DOD commercial computer software definition), DFARS 227.7202-1 (DOD policy on commercial computer software), FAR 52.227-19 (JUN 1987) (commercial computer software clause for civilian agencies), DFARS 252.227-7015 (NOV 1995) (DOD technical data – commercial items clause); FAR 52.227-14 Alternates I, II, and III (JUN 1987) (civilian agency technical data and noncommercial computer software clause); and/or FAR 12.211 and FAR 12.212 (commercial item acquisitions), as applicable. In case of conflict between any of the FAR and DFARS provisions listed herein, the construction that provides greater limitations on the Government's rights shall control. Contractor/manufacture is Tele Atlas North America, Inc., 11 Lafayette Street, Lebanon, NH 03766-1445. Phone: 603.643. 0330. The Licensed Products are © 1984-2008 by Tele Atlas North America, Inc. ALL RIGHTS RESERVED. For purpose of any public disclosure provision under any federal, state or local law, it is agreed that the Licensed Products are a trade secret and a proprietary commercial product and not subject to disclosure.

If End User is an agency, department, or other entity of any State government, the United States Government or any other public entity or funded in whole or in part by the United States Government, such End User agrees to protect the Licensed Products from public disclosure and to consider the Licensed Products exempt from any statute, law, regulation, or code, including any Sunshine Act, Public Records Act, Freedom of Information Act, or equivalent, which permits public access and/or reproduction or use of the Licensed Products. In the event that such exemption is challenged under any such laws, any and all right to retain any copies or to use of the Licensed Products shall be terminated and considered immediately null and void. Any copies of the Licensed Products held by End User shall immediately be destroyed. If any court of competent jurisdiction considers this clause void and unenforceable, in whole or in part, for any reason, then all Licensed Products previously delivered to End User will be destroyed.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EBI Consulting were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

San Juan Capistrano, CA 92675

**Subject: Phase I Environmental Site Assessment
Eden Landing
26010 Eden Landing Road, Hayward, California
EBI Project No. 1317000240**

Dear Mr. Lee:

Attached please find our *Phase I Environmental Site Assessment* (the report) for the above-mentioned asset (the Subject Property). During the survey and research, our surveyor met with agents representing the Subject Property, or agents of the owner, and reviewed the Subject Property and its history. The report was completed according to the terms and conditions authorized by you. This report has been completed in general conformance with the ASTM Standard E 1527-13.

The purpose of this report is to assist *Birtcher Anderson Properties, Inc.* in its underwriting of a proposed mortgage loan on the Subject Property described herein.

The purpose of this report is to acquire environmental information, observe the general condition and maintenance status of the Subject Property, to suggest remediation and/or maintenance practices considered customary for the Subject Property to continue in its current operation, compared to properties of similar age and condition, and to identify recognized environmental conditions in connection with the Subject Property described in this report.

This report was performed utilizing methods and procedures consistent with established commercial practices and in conformance with industry standards. The suggestions represent EBI's opinion based on written, graphic or verbal information, the property condition and data available to us at the time of the survey. Factual information regarding operations, conditions or data provided by the Client, occupants, owner or their representative has been assumed to be correct and complete.

There are no intended or unintended third party beneficiaries to this report, except as expressly stated herein.

EBI is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the report or on the closing of any business transaction.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Thank you very much for the opportunity to provide environmental consulting services to *Birtcher Anderson Properties, Inc.* Should you have any questions or require additional information, please do not hesitate to contact the undersigned.

Respectfully submitted,
EBI CONSULTING

EXECUTIVE SUMMARY

At the request of Birtcher Anderson Properties, Inc., EBI has performed a Phase I Environmental Site Assessment (ESA) of the property located at 26010 Eden Landing Road in Hayward, California, herein referred to as the Subject Property. The main objective of this ESA was to identify *recognized environmental conditions* in connection with the Subject Property, defined in ASTM Practice E 1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment, or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions. This ESA also includes a preliminary evaluation of certain potential environmental conditions that are outside the scope of ASTM Practice E 1527-13.

The Subject Property includes two contiguous irregular-shaped parcels, cumulatively totaling approximately 11.107 acres. The Subject Property is currently improved with ten one-and two-story, multi-tenant, mixed use office and light industrial/warehouse buildings, (identified as Buildings #1 through #10), located within Eden Landing. The Subject Property has a net rentable area of approximately 194,912± square feet. The existing improvements were constructed in 1971 and 1973. There are no basements present beneath the existing structures.

At the time of assessment, the Subject Property was occupied by 122 mixed use office/warehouse tenants. Twenty-one vacant tenant spaces were identified at the time of assessment. There are currently no manufacturing or industrial operations conducted at the Subject Property.

Below is the Assessment Summary Table presenting our recommended actions for the Subject Property. EBI's Findings and Opinions are presented in Section 8.0, and recommendations for further action or investigation are presented in Section 9.0.

ASSESSMENT SUMMARY TABLE EDEN LANDING 26010 EDEN LANDING ROAD, HAYWARD, CALIFORNIA

I.0 INTRODUCTION

This report documents the findings, opinions, and conclusions of a Phase I Environmental Site Assessment (ESA) of the property located at 26010 Eden Landing Road in Hayward, California.

I.1 PURPOSE

The purpose of this ESA was to identify *recognized environmental conditions* and certain environmental conditions outside the scope of ASTM Practice E 1527-13 in connection with the property at the time of the property reconnaissance.

I.2 SCOPE-OF-SERVICES

This ESA was conducted utilizing a standard of good commercial and customary practice that was consistent with the ASTM Practice E 1527-13. Any significant scope-of-work additions, deletions or deviations to ASTM Practice E 1527-13 are noted below or in the corresponding sections of this report. The scope-of-work for this assessment included an evaluation of the following:

- Physical characteristics of the Subject Property through a review of referenced sources for topographic, geologic, soils and hydrologic data.
- Subject Property history through a review of referenced sources such as land deeds, fire insurance maps, city directories, aerial photographs, prior reports, and interviews.
- Current Subject Property conditions, including observations and interviews regarding the following: the presence or absence of hazardous substances or petroleum products; generation, treatment, storage, or disposal of hazardous, regulated, or biomedical waste; equipment that utilizes oils which potentially contain PCBs; and storage tanks (aboveground and underground).
- Usage of surrounding area properties and the likelihood for releases of hazardous substances and petroleum products (if known and/or suspected) to migrate onto the Subject Property.
- Information in referenced environmental agency databases and local environmental records, within specified minimum search distances.
- Past ownership through a review of available prior reports and local municipal file review.

The scope-of-work also included consideration of the following potential environmental conditions that are outside the scope of ASTM Practice E 1527-13: asbestos-containing materials (ACM), lead-based paint (LBP), lead in drinking water, and radon.

I.3 ASSUMPTIONS, LIMITATIONS AND EXCEPTIONS

This Phase I Environmental Site Assessment (the report) has been prepared for the use of Birtcher Anderson Properties, Inc., in accordance with our Standard Conditions for Engagement and Authorization Letter and Agreement for Environmental Services approved and signed by Birtcher Anderson Properties, Inc. (the Agreement), and with the limitations described below, all of which are integral parts of this report. A copy of the signed Standard Conditions For Engagement and Authorization Letter and Agreement for Environmental Services is maintained at the EBI Consulting office in Burlington, Massachusetts. To the extent any provisions of this report conflict with the terms of the Agreement, the Agreement will control.

EBI has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This report was prepared with no exceptions or deletions from ASTM Standard E 1527-13.

This Phase I Environmental Site Assessment has been prepared to assess a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to permit Birtcher Anderson Properties, Inc. to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practices that constitute “all appropriate inquiry into the previous ownership and uses of the Subject Property consistent with good commercial or customary practice” as defined in 42 U.S.C. § 9601(35)(B).

In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify *recognized environmental conditions*. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property (1) due to a release to the environment, (2) under conditions that indicate an existing release or a past release, or (3) under conditions that pose a material threat of a future release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term does not include *de minimis conditions* that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record sources and interviews with the authorities having jurisdiction over the Subject Property. Findings, conclusions, and recommendations included in the report are based on our visual observations in the field, the standard environmental record sources and municipal information reasonably obtained, information provided by the Client, and/or a review of readily available and supplied documents and drawings. EBI relies completely on the information, whether written, graphic, or verbal, provided by the Subject Property contact or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct unless the information is known to be inaccurate or if it is obvious, based on other information obtained as part of the assessment, that the information is not accurate. Although there may have been some degree of overlap in the information provided by these various sources, EBI did not attempt to verify independently the accuracy or completeness of all information reviewed or received during the course of these environmental services.

The information reported, as well as EBI's findings, conclusions, and recommendations are based upon sources deemed reasonably ascertainable, as defined in ASTM Standard E 1527-13; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property and a review of standard federal, state, and tribal environmental record sources. Municipal information was obtained through review of reasonably ascertainable standard government record

sources and interviews with authorities having jurisdiction over the Subject Property. Birtcher Anderson Properties, Inc. agrees that EBI has no obligation to independently verify the accuracy or completeness of the information reviewed or received during the course of these environmental services.

EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under un-surveyed and/or inaccessible portions of the Subject Property. Unsurveyed and inaccessible portions of the Subject Property are described below. In addition, EBI renders no opinion as to the presence of hazardous substances or petroleum products in, on or under the Subject Property where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

EBI Services and opinions are based on the scientific or technical tests or procedures specifically set forth in the scope of the Services described in this report. The ASTM Standard E 1527-13 does not encompass analytical testing to evaluate asbestos containing materials, radon, lead-based paint, drinking water quality, indoor air quality, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement are not guaranteed to be a representation of actual conditions on the Subject Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, EBI used that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality at the same time and under similar circumstances. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The report speaks only as of its date, in the absence of a specific written update of the report, signed and delivered by EBI. Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to EBI so that our conclusions may be revised and modified if necessary, at additional cost.

Client and EBI agree that to the fullest extent permitted by law, EBI shall not be liable to Client for any special, indirect, consequential, punitive, exemplary, incidental or indirect damages or losses whatsoever, whether caused by EBI's negligence, errors, omissions, strict liability, breach of contract, breach of warranty or other cause or causes whatsoever.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions.

I.4 SPECIAL TERMS AND CONDITIONS

This Phase I Environmental Site Assessment (the report) has been prepared to identify *recognized environmental conditions* in connection with the Subject Property, as further discussed below. EBI's liability to a purchaser wishing to use this report is limited to the cost of the report. Amendments to EBI's limitations as stated herein that may occur after issuance of the report are considered to be included in this report. Payment for the report is made by, and EBI's contract and report extends to Birtcher Anderson Properties, Inc. only, in accordance with our Standard Conditions For Engagement and, Authorization Letter and Agreement for Environmental Services.

I.5 DATA GAPS

Any data gaps identified herein, as defined by ASTM Practice E 1527-13 § 3.2.20, are not considered to have significantly affected the ability to identify recognized environmental conditions in connection with the Subject Property and do not alter the conclusions of this report.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 OWNERSHIP AND LOCATION

According to the Alameda County Assessor's Office, the Subject Property is currently owned by IC BP III Holdings XXVII, LLC.

The Subject Property is located at 26010 Eden Landing Road in Hayward, Alameda County, California. The Subject Property includes two contiguous irregular-shaped parcels, identified by the Alameda Assessor's Office as Assessor Parcel Numbers: 461-0085-016-00 and 461-0085-017-00, cumulatively totaling approximately 11.107 acres. The Subject Property is located in the southwest quadrant of the intersection of Eden Landing Road and Production Avenue. Figure 1 - Location Map depicts the location of the Subject Property on a street map of Hayward, California. Figure 2 - Locus Map depicts the location of the Subject Property on the Hayward, California United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle. Figure 3 - Site Plan depicts the configuration of the Subject Property and adjoining properties.

2.2 SUBJECT PROPERTY IMPROVEMENTS

The Subject Property is currently improved with ten one-and two-story, multi-tenant, mixed use office/warehouse buildings, (identified as Buildings #1 through #10), located within Eden Landing. The Subject Property has a net rentable area of approximately 194,912± square feet. The existing improvements were constructed in 1971 and 1973. There are no basements present beneath the existing structures.

The existing buildings are located on the perimeter and central portions of the property. Areas of the Subject Property surrounding the existing building include the following: asphalt-paved surface parking, located along the front, side and rear of the buildings; concrete walkways, located throughout the Subject Property; and, landscaping surrounding the buildings and property perimeters. A central landscaped break/picnic area is provided for facility tenants. Land and building areas are as follows:

SUBJECT PROPERTY IMPROVEMENTS					
Address	Floors	Basement	Area (SF)	DOC	Lot Size (Acres)
Building #1 3475 Investment Boulevard	1 and 2	No	13,901	1973	5.671 Inclusive
Building #2 3447 Investment Boulevard	1 and 2	No	21,174	1973	
Building #3 3423 Investment Boulevard	1 and 2	No	20,841	1973	
Building #4 3401 Investment Boulevard	1 and 2	No	20,385	1973	
Building #5 26291 Production Avenue	1 and 2	No	19,242	1973	
Building #6 26203 Production Avenue	1 and 2	No	28,188	1971	5.436 Inclusive
Building #7 26010 Eden Landing Road	1	No	24,210	1971	
Building #8 26034 Eden Landing Road	1	No	5,200	1971	
Building #9 26046 Eden Landing Road	1 and 2	No	16,285	1971	

SUBJECT PROPERTY IMPROVEMENTS					
Address	Floors	Basement	Area (SF)	DOC	Lot Size (Acres)
Building #10 26062 Eden Landing Road	1 and 2	No	25,486	1971	

SF: Net Rentable

DOC: Date of Construction

2.3 CURRENT USE OF THE SUBJECT PROPERTY

At the time of assessment, the Subject Property was occupied by 122 mixed use office/warehouse tenants. Twenty-one vacant tenant spaces were identified at the time of assessment. There are currently no manufacturing or industrial operations conducted at the Subject Property. EBI was provided with a copy of the most recent tenant list, which is presented in Appendix C.

Please refer to Section 5.2 for further discussion regarding hazardous substances and petroleum products at the Subject Property.

2.4 MUNICIPAL SERVICES & UTILITIES

The Subject Property is serviced by the following municipal services and utilities:

MUNICIPAL SERVICES AND UTILITIES	
Utility	Provider/Source
Potable Water Supply	City of Hayward
Sewage Disposal System	City of Hayward
Electrical Service	Pacific Gas & Electric
Natural Gas Service	Pacific Gas & Electric
Oil Service	Not provided
Heating/Cooling Systems	Rooftop-mounted electric and natural gas HVAC units
Emergency Power	Not provided

2.5 ADJOINING PROPERTIES

Property use in the vicinity of the Subject Property is primarily characterized by retail / commercial, mixed use office / warehouse, and industrial development.

ADJOINING PROPERTIES	
North	The Subject Property is bound to the north by Eden Landing Road, beyond are retail strip centers (26001-26037 Eden Landing Road) and State Route 92.
South	The Subject Property is bound to the south by Investment Boulevard, beyond are commercial warehouse and industrial buildings (3412, 3480, 3486, and 3524 Investment Boulevard).
East	The Subject Property is bound to the east by Production Avenue, beyond is Gillig Parts / Caterpillar Inc. (25972 Eden Landing Road) and a commercial warehouse and industrial building (3325 Investment Boulevard).
West	The Subject Property is bound to the west by commercial warehouse and industrial buildings (26102 Eden Landing Road and 3521 Investment Boulevard), beyond are commercial warehouse and industrial buildings (26120 Eden Landing Road and 3541 Investment Boulevard).

No visual evidence of adverse environmental conditions was observed during the survey of the adjoining properties, with the exception of the adjacent south Fairbanks Scales at 3494 Investment Boulevard, which is listed on the LUST and HIST CORTESE databases; the adjacent south Linotype Co. at 3521 Investment Boulevard is listed on the RCRA-SQG database; and, the adjacent southwest Eden Plaza Properties at 3521-3585 Investment Boulevard, which is listed on the SEMS-ARCHIVE, ENVIROSTOR, HIST CORTESE, and SLIC databases. These facilities are discussed further in Section 4.1.

3.0 USER PROVIDED INFORMATION

The following section summarizes information provided by Birtcher Anderson Properties, Inc. with regard to this Phase I Environmental Site Assessment. Additionally, a User Questionnaire was forwarded to the designated Client contact. The User Questionnaire has been completed and returned to our offices. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. Relevant documentation referenced below is presented in Appendix C.

3.1 TITLE RECORDS

Title record information associated with the Subject Property has not been provided to EBI by Birtcher Anderson Properties, Inc.. A detailed discussion regarding review of information obtained from other sources is presented in Section 4.3.5 of this report.

3.2 ENVIRONMENTAL LIENS AND ACTIVITY AND USE LIMITATIONS

Birtcher Anderson Properties, Inc. has provided no information regarding environmental liens or activity and use limitations in connection with the Subject Property. A discussion regarding environmental liens is presented in Section 4.3.7 of this report. A detailed discussion regarding activity and use limitations is presented in Sections 4.1.1 and 4.1.2 of this report.

3.3 SPECIALIZED KNOWLEDGE

Birtcher Anderson Properties, Inc. provided no specialized knowledge that is material to recognized environmental conditions in connection with the Subject Property. EBI was not provided with or made aware of previous environmental assessments or other documentation that is material to recognized environmental conditions in connection with the Subject Property, except as presented in Section 4.3.8 of this report.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Birtcher Anderson Properties, Inc. has provided no commonly known or reasonably ascertainable information within the local community about the Subject Property that is material to recognized environmental conditions in connection with the Subject Property.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Birtcher Anderson Properties, Inc. has provided no information regarding valuation reduction for environmental issues in connection with the Subject Property.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

Birtcher Anderson Properties, Inc. provided contact information for the Subject Property owner, manager and/or occupants.

3.7 REASON FOR PERFORMING PHASE I ESA

Birtcher Anderson Properties, Inc. retained EBI to complete this Phase I Environmental Site Assessment in connection with a real estate transaction.

4.0 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORDS

A review of standard environmental databases maintained by Federal, state, and tribal offices was completed through Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. The databases were searched for properties with reported environmental conditions located within approximate minimum search distances as specified by ASTM Standard E 1527-13, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded “orphan” properties within the same zip code. The database report is presented in Appendix E.

The database report identified six “orphan sites”. Orphan sites are those sites that could not be accurately mapped or geocoded due to inadequate location information. EBI attempted to locate these sites via vehicular reconnaissance and interviews with personnel familiar with the area. Based on this research, EBI did not identify listed orphan sites within the approximate minimum search distances that may be considered likely to have impacted conditions at the Subject Property.

It should be noted that plotted locations of listed sites are not always accurate. With regard to listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, EBI uses the best available data when evaluating the location of listed sites discussed below.

The following table provides a summary of the findings of the environmental database report. Specific properties identified within the database report are further discussed below.

SUMMARY OF FEDERAL, STATE, AND TRIBAL AGENCY DATABASE FINDINGS			
Regulatory Database	Approximate Minimum Search Distance	Subject Property Listed	Off-site Listings Within Search Distance
Federal NPL Sites	1.0 mile	No	0
Federal Delisted NPL Sites	0.5 mile	No	0
Federal CERCLIS Sites	0.5 mile	No	0
Federal CERCLIS NFRAP Sites	0.5 mile	No	3
Federal RCRA CORRACTS Sites	1.0 mile	No	0
Federal RCRA non-CORRACTS TSD Sites	0.5 mile	No	0
Federal RCRA Generators Sites	Property & Adjoining	No	1

EDR HIST Cleaner	Property	Yes	NA

4.1.1 Federal Agency Database Records

National Priority List (NPL)

The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the NPL.

Delisted National Priority List (NPL)

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the Delisted NPL database.

Superfund Enterprise Management System (SEMS)

SEMS tracks federal hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of the USEPA's Superfund Program. The list was formerly known as CERCLIS and was renamed at the end of 2015. The list contains data regarding potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). SEMS also contains sites that are either proposed to or on the National Priority List (NPL), as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Subject Property was not identified on the SEMS database. However, three sites located within 0.5 mile of the Subject Property were identified on the SEMS database. Information regarding the listed sites is presented in the following table:

SEMS			
Site	Distance / Direction / Gradient*	EPA ID No.	Regulatory Status
EDEN PLAZA PROPS 3521-3583 INVESTMENT BLVD. HAYWARD, CA	Adjacent / Southwest / Downgradient	CAD982416661	Discovery: 12/01/87 Proposed: NA NPL Status: Not on the NPL SEMS Site Status: Not reported Preliminary Assessment: 04/27/89 Contaminants: TCI, Freon Media Impacted: Soil, GW
26569-75 CORPORATE AVE. PROPERTY 26569 CORPORATE AVE HAYWARD, CA	0.35 miles / East-southeast / Crossgradient	CAD982399735	Discovery: 03/01/88 Proposed: NA NPL Status: Not on the NPL SEMS Site Status: Not reported Preliminary Assessment: 11/16/88 Contaminants: Not reported Media Impacted: Not reported
CORPORATE PLACE 3146, 3167 & 3191 EDEN ROCK PROPS. HAYWARD, CA	0.44 miles / East / Crossgradient	CAD982416687	Discovery: 12/01/87 Proposed: NA NPL Status: Not on the NPL SEMS Site Status: Not reported Preliminary Assessment: 03/15/89 Contaminants: Not reported Media Impacted: Not reported

* Presumed hydrogeologic gradient based upon regional topography

The Eden Plaza Properties at 3521-3585 Investment Boulevard site is located adjacent to the southwest of the Subject Property. The facility is identified on the SEMS-ARCHIVE, ENVIROSTOR, HIST CORTESE and SLIC databases. According to the EDR database search, the facility is reported to have a discovery on December 1, 1987 with a preliminary assessment on April 27, 1989. According to review of the GeoTracker database (<http://geotracker.waterboards.ca.gov>), a Primary Assessment by Ecology and Environment, Inc. (EEI), dated March 17, 1989, reported that volatile organic compounds (VOCs) were confirmed in soil and groundwater samples collected from an earlier investigation completed in 1987. EEI reported that three monitoring wells were installed and groundwater was measured at eight to ten feet below ground surface (bgs). The groundwater gradient was to the south. One monitoring well identified trichloroethylene in groundwater at a concentration of 4.9 parts per billion (ppb). In addition, trichloroethylene was reported in soils from a second well at a concentration of 220 ppb. Two additional groundwater wells were constructed in July/August 1997. EEI reported concentrations in one well of trichloroethylene of 4 ppb, and groundwater from the second well was reported to have concentrations of Freon 113 at 50 ppb and trichlorofluoroethane of 100 ppb. EEI indicated that investigations of nearby properties (within a 0.5 miles east, northeast) have reported groundwater concentrations of trichloroethylene of 140,000 ppb with other halogenated VOCs detected in groundwater. The GeoTracker database provided an email by Ms. Cheryl Prowell, dated December 8, 2016, which stated the case file remains open and has been inactive since 1988. Ms. Prowell confirmed that the case is regulated by the Water Quality Control Board and has requested current information about the property to assess the risk of a release or to determine eligibility for closure. It is unknown whether the contaminant plume associated with the adjacent site has migrated beneath the Subject Property. However, adjacent site is considered downgradient of the Subject Property. The Responsible Party associated with this release has been identified by state and Federal regulatory agencies and the RP has recently been contacted by the RWQCB. Further, no current or former owners or operators of the Subject Property have been identified as a Responsible Party associated with the adjacent facility, and

EBI has identified no data or information that would suggest that current or historic operations on the Subject Property may have contributed to or exacerbated the identified contamination.

Based upon the current regulatory status, distance and/or presumed hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified SEMS facilities represent an environmental concern to the Subject Property.

SEMS – ARCHIVE

SEMS-ARCHIVE tracks sites that have been removed from the SEMS list. This list was formerly known as the CERCLIS- NFRAP list and was renamed SEMS-Archive at the end of 2015. SEMS-ARCHIVE sites may be sites where, following an initial investigation, no contamination was found, contamination was removed without the need for the site to be placed on the NPL, or the contamination was not considered sufficient to warrant Federal Superfund action or NPL consideration. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the SEMS-ARCHIVE database.

Resource Conservation and Recovery Act (RCRA) – Corrective Action Tracking System (CORRACTS)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information regarding sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA. The RCRA-CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the RCRA CORRACTS database.

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) Facilities

RCRA non-CORRACTS Treatment, Storage and/or Disposal (TSD) facilities are required to register hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the RCRA non-CORRACTS TSD database.

RCRA Hazardous Waste Generators

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). A RCRA-LQG is defined as a facility that generates over 1,000 kilograms (Kg) of hazardous waste, or over 1 Kg of acutely hazardous waste per month. A RCRA-SQG is defined as a facility that generates between 100 Kg and 1,000 Kg of hazardous waste per month. A RCRA-CESQG is defined as a facility that generates less than 100 Kg of hazardous waste, or less than 1 Kg of acutely hazardous waste per month. The Subject Property was not identified on the RCRA Generator database. However, one adjoining property was identified on the RCRA Generator database. Information regarding the listed site is presented in the following table:

RCRA GENERATORS			
Site	Distance / Direction / Gradient*	EPA ID No.	Regulatory Status
LINOTYPE CO. 3521 INVESTMENT BLVD., SUITE 1 HAYWARD, CA	Adjacent / West-southwest / Crossgradient	CAD981389208	No violations found

* Presumed hydrogeologic gradient based upon regional topography

Based upon the absence of reported violations, and conditions observed during EBI's reconnaissance, it is considered unlikely that conditions associated with the identified RCRA Generator facility represent an environmental concern to the Subject Property.

Federal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on Federal Engineering Control or Institutional Control Registries.

Emergency Response Notification System (ERNS)

ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the EPA, the U.S. Coast Guard, the National Response Center, and the U.S. Department of Transportation. A review of this database was conducted in order to determine whether any spills or incidents involving releases of hazardous substances or petroleum products have occurred at the Subject Property. The Subject Property was not identified on the ERNS database.

4.1.2 State and Tribal Agency Database Records

Annual Workplan Sites (AWP)

The California Department of Toxic Substance Control (DTSC) Annual Workplan Sites (AWP) identifies known hazardous substance release sites targeted for cleanup. The data source is the California Environmental Protection Agency. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the AWP database.

California High-Priority Confirmed Release Sites (RESPONSE)

The California High-Priority Confirmed Release Sites (RESPONSE) database contains confirmed release sites where the California Department of Toxic Substance Control (DTSC) is involved in the remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the RESPONSE database.

California Hazardous Waste Sites (ENVIROSTOR)

The California Hazardous Waste Sites (ENVIROSTOR) database contains potential or confirmed hazardous substance release sites, or sites for which there may be reasons to investigate further, identified by the California DTSC. The database includes the following site types: Federal NPL; State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. The Subject Property was not identified on the ENVIROSTOR database. However, 15 sites located within 0.5 mile of the Subject Property was identified on the ENVIROSTOR database. Of the listed sites, 14 sites are located greater than 0.125 mile from the Subject Property. Based upon the distance and/or hydrogeologic separation from the Subject Property, these 14 sites are considered unlikely to represent an existing release, past release, or material threat of release of hazardous substances or petroleum

products on the Subject Property. Information regarding the one ENVIROSTOR site located within 0.125 mile of the Subject Property is presented in the following table:

ENVIROSTOR			
Site	Distance / Direction / Gradient	ID No.	Regulatory Status
EDEN PLAZA PROPERTIES 3521 INVESTMENT BLVD. # 3583 HAYWARD, CA 94545	Adjacent / West-southwest / Crossgradient	1730059	Notification Date: 12/01/87 Contaminants: TCE, Freon Media Impacted: Soil, GW Status: Open - Inactive Date of Closure: NA

* Presumed hydrogeologic gradient based upon regional topography

The Eden Plaza Properties at 3521-3585 Investment Boulevard is located adjacent west, southwest of the Subject Property. The facility is identified on the SEMS-ARCHIVE, and HIST CORTESE and SLIC databases. The Eden Plaza Properties site is discussed further above.

Cal-Sites/HIST Cal-Sites

Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control (DTSC). This database is no longer updated by the state agency. It has been replaced by ENVIROSTOR. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the Cal-Sites/HIST Cal-Sites databases.

Proposition 65 Notification Records (Notify 65)

Proposition 65 Notification Records contain facility notifications regarding any release that could potentially impact drinking water and thereby expose the public to a potential health risk. The Notify 65 database includes listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency. The Subject Property was not identified on the Notify 65 database. However, three sites located within 1.0 mile of the Subject Property were identified on the Notify 65 database. Information regarding the listed sites is presented in the following table:

NOTIFY 65			
Site	Distance / Direction / Gradient	ID No.	Regulatory Status
3392 INVESTMENT BLVD. HAYWARD, CA	0.06 miles / East / Crossgradient	1000851452	Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Not reported Date of Closure: Not reported
HERNING UNDERGROUND SUPPLY 3135 DIABLO AVE. HAYWARD, CA	0.62 miles / North-northwest / Upgradient	1000851452	Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Not reported Date of Closure: Not reported

NOTIFY 65			
Site	Distance / Direction / Gradient	ID No.	Regulatory Status
HERNING UNDERGROUND SUPPLY 3135 DIABLO AVE. HAYWARD, CA (Duplicate Listing)	0.62 miles / North-northwest / Upgradient	1000851452	Notification Date: Not reported Contaminants: Not reported Media Impacted: Not reported Status: Not reported Date of Closure: Not reported

* Presumed hydrogeologic gradient based upon regional topography

Based upon the distance and/or expected hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the identified Notify 65 sites represent an environmental concern to the Subject Property.

Toxic Pits Cleanup Act Sites (Toxic Pits)

The Toxic Pits Cleanup Act Sites (Toxic Pits) database contains sites identified by the California Water Resources Control Board that are suspected to contain hazardous substances where cleanup has not yet been completed. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the Toxic Pits database.

California Bond Expenditure Plan

The California Bond Expenditure Plan was developed by the California Department of Health Services as a site-specific expenditure plan for the appropriation of Hazardous Substance Cleanup Bond Act funds. Neither the Subject Property nor any sites located within 1.0 mile of the Subject Property were identified on the California Bond Expenditure Plan database.

Hazardous Waste and Substances Sites List (Cortese/HIST Cortese)

The Hazardous Waste and Substance Site List (also known as the Cortese/HIST Cortese databases) is a planning document used by the State, local agencies, and developers to comply with California Environmental Quality Act requirements in providing information regarding the location of hazardous materials releases. Government Code Section 65962.5 requires the California Environmental Protection Agency to develop at least annually an updated Cortese List. The California DTSC is responsible for preparing a portion of the information that comprises the Cortese List, and other state and local government agencies are required to provide additional hazardous material release information for the Cortese/HIST Cortese databases. The Subject Property was not identified on the Cortese/HIST Cortese databases. However, 18 sites located within 0.5 mile of the Subject Property were identified on the Cortese/HIST Cortese databases. Of the listed sites, 15 sites are located greater than 0.125 mile from the Subject Property. Based upon the distance and/or hydrogeologic separation from the Subject Property, these 15 sites are considered unlikely to represent an existing release, past release, or material threat of release of hazardous substances or petroleum products on the Subject Property. Information regarding the three Cortese/HIST Cortese sites located within 0.125 mile of the Subject Property is presented in the following table:

CORTESE/HIST CORTESE			
Site	Distance / Direction / Gradient	ID No.	Regulatory Status
FAIRBANKS SCALES 3494 INVESTMENT BLVD. HAYWARD, CA	Adjacent / South / Downgradient	01-0609	Notification Date: 03/21/1985 Contaminants: Gasoline Media Impacted: GW Status: Completed - Case Closed Date of Closure: 03/03/1998
EDEN PLAZA PROPS 3521-3583 INVESTMENT BLVD. HAYWARD, CA	Adjacent / Southwest / Downgradient	01730059	Notification Date: 12/01/87 Contaminants: TCE, Freon Media Impacted: Soil, GW Status: Open - Inactive Date of Closure: NA
UNOCAL / TOSCO - #6074 3500 BREAKWATER AVE. HAYWARD, CA	0.12 miles / North-northwest / Upgradient	01-1591	Notification Date: 4/29/1988 Contaminants: Not reported Media Impacted: Not reported Status: Case Closed Date of Closure: 08/21/01

* Presumed hydrogeologic gradient based upon regional topography

The Eden Plaza Properties at 3521-3585 Investment Boulevard is located adjacent west-southwest of the Subject Property. The facility is identified on the SEMS-ARCHIVE, ENVIROSTOR, and SLIC databases, and is discussed further above.

Based upon the current regulatory status, and/or expected hydrogeologic gradient relative to the Subject Property, it is considered unlikely that conditions associated with the two remaining identified Cortese/HIST Cortese facilities represent an environmental concern to the Subject Property.

Spill, Leaks, Investigations, and Cleanup (SLIC)

The Spills, Leaks, Investigations, and Cleanups (SLIC) database, maintained by the California Water Resources Control Board, includes unauthorized discharges from spills and leaks, other than from underground storage tanks or other regulated sites. The Subject Property was not identified on the SLIC database. However, eight sites located within 0.5 mile of the Subject Property were identified on the SLIC database. Of the listed sites, seven sites are located greater than 0.125 mile from the Subject Property. Based upon the distance and/or hydrogeologic separation from the Subject Property, these seven sites are considered unlikely to represent an existing release, past release, or material threat of release of hazardous substances or petroleum products on the Subject Property. Information regarding the one SLIC site located within 0.125 mile of the Subject Property is presented in the following table:

SLIC			
Site	Distance / Direction / Gradient	ID No.	Regulatory Status
EDEN PLAZA PROPS 3521-3583 INVESTMENT BLVD. HAYWARD, CA	Adjacent / Southwest / Downgradient	01NBT0093	Notification Date: 12/01/87 Contaminants: TCE, Freon Media Impacted: Soil, GW Status: Open - Inactive Date of Closure: NA

* Presumed hydrogeologic gradient based upon regional topography

The Eden Plaza Properties at 3521-3585 Investment Boulevard is located adjacent west-southwest of the Subject Property. The facility is identified on the SEMS-ARCHIVE, ENVIROSTOR, and Cortese / HIST Cortese databases, and is discussed further above.

Voluntary Cleanup Program (VCP) Properties

The Voluntary Cleanup Program (VCP) Properties database identifies low threat level properties with either confirmed or unconfirmed releases, for which the project proponents have requested that Department of Toxic Substances Control (DTSC) oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the VCP database.

Leaking Underground and Aboveground Storage Tank Sites (LUST/LAST)

The Regional Water Quality Control Board (RWQCB) maintains a database of reported Leaking Storage Tank (LUST/LAST) sites. The Subject Property was not identified on the LUST/LAST databases. However, 22 sites located within 0.5 mile of the Subject Property were identified on the LUST/LAST databases. Of the listed sites, 19 sites are located greater than 0.125 mile from the Subject Property. Based upon the distance and/or hydrogeologic separation from the Subject Property, these 19 sites are considered unlikely to represent an existing release, past release, or material threat of release of hazardous substances or petroleum products on the Subject Property. The remaining three LUST/LAST sites located within 0.25 mile of the Subject Property have been granted No Further Action status by the Santa Ana RWQCB and based upon the current regulatory status, these sites are considered unlikely to represent an environmental concern to the Subject Property.

California UST Databases (AST, UST, FID UST, HIST UST, SWEEPS UST)

The California Environmental Protection Agency, the California Water Resources Control Board and other entities previously maintained or currently maintain various lists recording permitted aboveground and underground storage tank (AST/UST) sites in California. Neither the Subject Property nor any adjoining properties were identified on the AST/UST databases.

Solid Waste Information System (SWIS and SWF/LF)

The Solid Waste Information System (SWIS and SWF/LF) facility database contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites. For each facility, the database contains information about location, owner, operator, facility type, regulatory and operational status, authorized waste types, local enforcement agency and inspection and enforcement records. The Subject Property was not identified on the SWIS and SWF/LF databases. However, one site located within 0.5 mile of the Subject Property was identified on the SWIS and SWF/LF databases. Information regarding the listed site is presented in the following table:

SWIS and SWF/LF			
Site	Distance / Direction / Gradient	ID No.	Facility Status
BARBOSA REBAR 3458 ENTERPRISE HAYWARD, CA	0.50 miles / Northwest / Upgradient	01-AA-0318	Facility Type: Transfer Station Facility Status: Active No Reported Violations

* Presumed hydrogeologic gradient based upon regional topography

Based upon the absence of reported violations, and distance relative to the Subject Property, it is considered unlikely that conditions associated with the identified site represent an environmental concern to the Subject Property.

Waste Management Unit Database / Solid Waste Assessment Test (WMUDS/SWAT)

The Waste Management Unit Database (WMUDS) is used by the California Water Resources Control Board (SWRCB) and the Regional Water Quality Control Boards (RWQCBs) for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on the WMUDS/SWAT database.

California Hazardous Material Incident Report System (CHMIRS)

The California Hazardous Material Incident Report System (CHMIRS) contains information regarding reported hazardous material incidents (i.e. accidental releases or spills). The data source is the California Office of Emergency Services. The Subject Property was not identified on the CHMIRS database.

Hazardous Waste Information System (HAZNET)

The California Environmental Protection Agency maintains a list of facilities that issue hazardous waste manifests. The source of the manifest records is the California Department of Toxic Substance Control (DTSC). Inclusion on the HAZNET database does not necessarily indicate the existence of an environmental concern, such as a release or spill incident. The Subject Property was identified on the HAZNET database. Based upon the information presented in the database report, a former tenant of the Subject Property (Cafeprss.com) generated hydrocarbon solvents ((benzene, hexane, Stoddard, etc.) and disposed of the waste stream by off-site recycling. The suite is currently occupied by Crest Food Manufacturing, Inc., a plumbing storage and distribution company. According to the database report, there are no reported violations associated with this former facility. Based upon the absence of reported violations and conditions observed during EBI's reconnaissance, it is considered unlikely that conditions associated with the identified HAZNET facility represent an environmental concern to the Subject Property.

State and Tribal Engineering Control / Institutional Control Registries

The completion of site cleanup activities may include the implementation of engineering controls or institutional controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on state or tribal Engineering Control or Institutional Control Registries.

State and Tribal Brownfield Sites

Neither the Subject Property nor any sites located within 0.5 mile of the Subject Property were identified on state or tribal Brownfield Sites databases.

Tribal Environmental Databases

The United States Bureau of Indian Affairs (BIA) is responsible for the administration and management of 55.7 million acres of land held in trust by the United States for American Indians, Indian tribes, and Alaska Natives. There are 562 federally recognized tribal governments in the United States. The environmental database report identifies tribal administered lands of the United States that have any area equal to or greater than 640 acres. No tribal administered lands were identified within 1.0 mile of the Subject Property.

EDR Historic Auto Station

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. Inclusion on the EDR Historic Auto Station database does not necessarily indicate the existence of an environmental concern, such as a release or spill incident. Based upon the information presented in the database report, three former tenants of the Subject Property; Invitek, Inc. at 3447 Investment Boulevard; National Construction Rentals at 26291 Production Avenue; and Golden Auto Parts Wholesale, Inc. occupied the Subject Property. According to the database report, there are no additional database listings and there are no reported violations associated with these former facilities. Based upon the site conditions observed during EBI's reconnaissance, and the absence of gasoline stations at the Subject Property, it is considered unlikely that conditions associated with the identified EDR Historic Auto Station facilities represent an environmental concern to the Subject Property.

EDR Historic Cleaner

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. Inclusion on the EDR Historic Cleaner database does not necessarily indicate the existence of an environmental concern, such as a release or spill incident. The Subject Property was identified on the EDR Historic Cleaner database. Based upon the information presented in the database report, a former tenant of the Subject Property (This Stuff Works at 3401 Investment Boulevard) occupied the Subject Property. According to the database report, there are no additional database listings and there are no reported violations associated with this former facility. Based upon the site conditions observed during EBI's reconnaissance, and the absence of other database listings indicating this was a dry cleaner, it is considered unlikely that conditions associated with the identified facility represent an environmental concern to the Subject Property.

4.1.3 Local Regulatory Agency Records

Local municipal offices consulted during the completion of this assessment included the following:

City of Hayward City Clerk's Office

EBI has submitted a written request to the City of Hayward City – Clerk's Office for information regarding the generation, transportation, storage, treatment, disposal, and/or spills or releases of hazardous substances or petroleum products at the Subject Property, in accordance with the Freedom of Information Act (FOIA). As of the date of this report, EBI has not received a response to this inquiry. Upon receipt of the agency response, if the provided information has a material effect on the findings of this report, EBI will forward this information as an addendum to this report. If no response is received, or no material information is identified, our report will not be modified.

City of Hayward Development Services Department

EBI has submitted a written request to the City of Hayward Development Department, Building Division for information regarding the generation, transportation, storage, treatment, disposal, and/or spills or releases of hazardous substances or petroleum products at the Subject Property, in accordance with the Freedom of Information Act (FOIA). As of the date of this report, EBI has not received a response to this inquiry. Upon receipt of the agency response, if the provided information has a material effect on the findings of this report, EBI will forward this information as an addendum to this report. If no response is received, or no material information is identified, our report will not be modified.

City of Hayward Fire Department

EBI has submitted a written request to the City of Hayward Development Services Department, Fire Prevention Division for information regarding the generation, transportation, storage, treatment, disposal, and/or spills or releases of hazardous substances or petroleum products at the Subject Property, in accordance with the Freedom of Information Act (FOIA). As of the date of this report, EBI has not received a response to this inquiry. Upon receipt of the agency response, if the provided information has a material effect on the findings of this report, EBI will forward this information as an addendum to this report. If no response is received, or no material information is identified, our report will not be modified.

4.1.4 Vapor Migration

EBI conducted a vapor migration screening survey of the Subject Property. EBI's site observations and review of the environmental database report (cited in Section 4.1) did not identify any conditions on the Subject Property or on adjoining properties that would indicate a REC relative to vapor migration at the Subject Property.

This vapor migration screening was conducted in accordance with ASTM E1527-13 and is not intended to satisfy the requirements of ASTM E2600-15. The scope of this screening was limited to visual observations and review of the environmental database report and did not include the collection and laboratory analysis of air samples to confirm or refute the presence of airborne contaminants by vapor intrusion.

4.2 PHYSICAL SETTING

4.2.1 Topography

The Subject Property is located at an elevation of approximately 18 feet above mean sea level (msl). The topography of the Subject Property is relatively flat and slopes gently to the south. The Subject Property is located in a relatively flat area, and the general slope of the surrounding region is to the south (see Figure 2 - Locus Map, which depicts the location of the Subject Property on the Hayward, California USGS 7.5 Minute Topographic Quadrangle).

4.2.2 Geology and Soils

No bedrock outcroppings were observed at the Subject Property. Information concerning the geology of the Subject Property was obtained from the USGS Ground Water Atlas of the United States, California region (1995). The Subject Property is located within the Pacific Border physiographic province, which is characterized by steep rolling hills and mountains and consists of severely folded, faulted, commonly metamorphosed marine and continental sediments.

According to the Environmental Data Resources, Inc. (EDR) GeoCheck Physical Setting Source Summary, the dominant soil composition in the vicinity of the Subject Property is classified as Danville a silty clay loam having slow infiltration rates and a high potential for corrosion.

4.2.3 Hydrogeology and Hydrology

No natural surface water bodies were identified on or adjacent to the Subject Property. The nearest downgradient surface water body is San Francisco Bay, located 1,300 feet south of the Subject Property. Local groundwater gradient is expected to follow surface topography; therefore, groundwater flow near the Subject Property is expected to flow to the south. Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three groundwater monitoring wells and precise measurements of hydrostatic pressure. Monitoring wells were not observed on the Subject Property.

4.3 HISTORICAL USE OF THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

EBI attempted to determine the history of the Subject Property dating back to 1940 or first developed use. The following table summarizes the historical use of the Subject Property and surrounding area.

HISTORICAL USE SUMMARY			
Period	Historical Uses		Source(s)
	Subject Property	Surrounding Area	
At least 1899-1959	Primarily undeveloped; single-family residential development at eastern portion of property.	Primarily undeveloped; limited single-family residential development.	Topographic Maps
1960-1970	Agricultural and farm residence and support structures at eastern portion of property. Likely tropical fish business, truck sales, auto parts supply at northwest corner.	Agricultural use; limited commercial development.	Aerial Photographs Topographic Maps
1971 to Present	Existing Eden Landing with ten light industrial/warehouse buildings.	Commercial / retail and light industrial development.	Aerial Photographs Topographic Maps

No environmentally significant conditions were identified on the Subject Property or surrounding properties during the historical review, except for the following:

Based on review of 1958, 1963, and 1966 historical aerial photographs, the western portion of the Subject Property was developed with several commercial building structures and included two aboveground storage tanks, positioned at the central portion of the Subject Property, approximately 16 ponds positioned to the southwest of the aboveground storage tank. North of this facility is an apparent residence, followed by several trucks and trailers parked as if for sale. City directory research indicates the Subject Property was occupied by CJ Perry Trucking (26024 Eden Landing) circa 1965; goldfish and supplies (26042) circa 1960 through 1970; and, Golden Auto Parts Wholesale circa 1965. Although a historical truck sales operation, an auto parts distributor and a goldfish supplier have been identified on the Subject Property, these operations predated construction of the existing building and associated excavation and grading of soils beneath the entire Subject Property to depths allowable for construction of the existing buildings. As such, it is considered unlikely that these historical activities represent a current environmental concern to the Subject Property.

4.3.1 Aerial Photographs

Historical aerial photographs may be used to evaluate changes in land use and to identify visible areas of potential environmental concern. A search for historical aerial photographs depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). It should be noted that the scale of the available aerial photographs precludes the distinct identification of structures and/or land uses on or in the vicinity of the Subject Property. Aerial photographs depicting the Subject Property were reviewed and are summarized in the following table. Copies of the aerial photographs are presented in Appendix F.

AERIAL PHOTOGRAPH SUMMARY		
Year	Issues Noted	Observations
1939 and 1946	No	Subject Property: The Subject Property appears to consist of agricultural land, with a farm residence and support structures positioned at the eastern portion of the Subject Property, and several commercial structures located at the northwestern portion of the property. A north to south trending road or irrigation canal bisects the Subject Property with a small wooded area positioned at the central portion of the Subject Property.
		Surrounding Area: Surrounding properties to the northeast, east, south, and southwest are primarily agricultural land. A roadway, trending southwest to northeast, is visible adjacent northwest of the Subject Property, beyond is agricultural land.
1958, 1963, and 1966	Yes	Subject Property: Conditions on the eastern portion of the Subject Property appear to be similar to those depicted on the 1946 photograph. The western portion of the property is developed with several additional commercial buildings. Two large aboveground storage tanks are positioned at the central portion of the Subject Property with approximately 16 ponds positioned to the southwest of the storage tanks. The ponds generally occupy the southwestern portion of the Subject Property. Several trucks and trailers are depicted at the northern portion of the Subject Property.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1946 photograph, with the exception of the realignment of Eden Landing Road and State Route 92 adjacent north of the Subject Property.
1974 and 1982	No	Subject Property: Conditions on the Subject Property are depicted as they exist at the present day. The Eden Landing complex, including the ten commercial structures, asphalt pavement and landscaped areas are depicted on the Subject Property.
		Surrounding Area: Commercial development is depicted adjacent southwest and south east of the Subject Property. A roadway, trending northwest to southeast is depicted along the northeastern property boundary, beyond is a large commercial building and vacant lot. A roadway, trending southwest to northeast, is depicted along the southeastern portion of the Subject Property, beyond are several commercial buildings.
1993, 1988, 2005, and 2006	No	Subject Property: Conditions on the Subject Property appear to be similar to those depicted on the 1982 photograph.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 1982 photograph, with the exception of the realignment of Eden Landing Road and State Route 92 adjacent north of the Subject Property, and the addition of a large commercial structure east, northeast of the Subject Property
2009, 2010, and 2012	No	Subject Property: Conditions on the Subject Property appear to be similar to those depicted on the 2006 photograph.
		Surrounding Area: Conditions on the surrounding properties appear to be similar to those depicted on the 2006 photograph, with the addition of two retail strip buildings depicted northwest of the Subject Property.

4.3.2 Fire Insurance Maps

A search for historical fire insurance maps depicting the Subject Property and vicinity was conducted by EDR Sanborn Maps, Inc. The EDR Report indicated that coverage for the vicinity of the Subject Property was not available. A copy of the search documentation letter is presented in Appendix F.

4.3.3 Topographic Maps

Historical topographic maps provide information related to physical land configuration such as elevation, ground slope, surface water and other features. While most buildings in densely developed urban centers are not depicted, topographic maps typically show structures equal to or larger than the size of

a single-family residence in rural areas. Other notable features such as woods, pipelines, municipal boundaries, and areas of filled land are often marked on topographic maps.

A search for historical topographic maps depicting the Subject Property and vicinity was conducted by Environmental Data Resources, Inc. (EDR). Historical topographic maps depicting the Subject Property were reviewed and are summarized in the following table. Copies of the topographic maps are presented in Appendix F.

TOPOGRAPHIC MAP SUMMARY		
Year	Issues Noted	Observations
1899 and 1915	No	Subject Property: No structures or other notable features are depicted on the Subject Property, with the exception of two small structures, depicted on the central portion of the Subject Property.
		Surrounding Properties: Undeveloped land is depicted northeast, southeast and southwest of the Subject Property. A roadway, trending southwest to northeast, is visible adjacent northwest of the Subject Property, beyond is undeveloped land.
1947 and 1948	No	Subject Property: One structure is depicted in the northwestern portion and two structures are depicted at the western portion of the Subject Property. A north trending road appears at the eastern corner of the Subject Property and a power line is located along the southwestern side of the Subject Property.
		Surrounding Properties: Undeveloped land and the continuation of a north trending road are located northeast of the Subject Property. Undeveloped land is depicted southeast and southwest of the Subject Property. Eden Landing Road is shown along the northwestern side of the Subject Property.
1959	No	Subject Property: Conditions on the Subject Property appear to be similar to those depicted on the 1948 map, with the addition of three additional structures depicted at the northwestern side of the Subject Property.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted on the 1948 map.
1968	No	Subject Property: Conditions on the Subject Properties appear to be similar to those depicted on the 1959 map, with the addition of a larger commercial structure and three additional structures depicted at the northwestern portion of the Subject Property.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted on the 1959 map,
1973	No	Subject Property: Conditions on the Subject Property are depicted as they exist at the present day. The Eden Landing complex, including the ten commercial structures.
		Surrounding Properties: A large commercial building and vacant lot are depicted adjacent northeast of the Subject Property. Several commercial structures are depicted adjacent southeast of the Subject Property. Undeveloped land is depicted adjacent southwest of the Subject Property.
1980	No	Subject Property: Conditions on the Subject Property appear to be similar to those depicted on the 1973 map.
		Surrounding Properties: Conditions on the surrounding properties appear to be similar to those depicted on the 1973 map, with the exception of several commercial structures depicted adjacent south, southwest and beyond to the north of the Subject Property.
1996 and 2012	No	Subject Property: The Subject Property is shaded to represent urban development; no distinct structures or other notable features are depicted.
		Surrounding Properties: The surrounding properties are shaded to represent urban development; no distinct structures or other notable features are depicted.

4.3.4 Street Directories

Street directories are commercial publications containing names and addresses, and in many cases, occupations of the occupants of a particular community. The directories may also contain information pertaining to business processes conducted within a community. A search for historical street directories was conducted by Environmental Data Resources, Inc. (EDR). Historical street directories were reviewed and are summarized in the following table. Copies of the street directories are presented in Appendix F.

STREET DIRECTORY SUMMARY		
Year	Issues Noted	Occupants
1920 thru 1959	No	Subject Property is not listed in research source.
1960	No	26030 Eden Landing Rd. – Fowler, Harold 26042 Eden Landing Rd. –Wada, Shingo, Sam Hayward, Goldfish & Supplies
1965	No	26024 Eden Landing Rd. – Perry, C J Trucking Co. 26030 Eden Landing Rd. – Fowler, Harold 26040 Eden Landing Rd. – Wada, Sam 26046 Eden Landing Rd. – Vacant 26062 Eden Landing Rd. – Golden Auto Parts Wholesale
1970	No	26030 Eden Landing Rd. – Fowler, Harold 26040 Eden Landing Rd. – Montez, Mantiel 26042 Eden Landing Rd. – Aquarium Supplies
1973 - 2014	No	Numerous office, retail, service industry, and light industrial tenants. No environmental concerns are noted.

4.3.5 Recorded Land Title Records

Land title records provide information on previous ownership of a property. Typically, deeds signifying transfer of a land parcel are recorded in county files and can be researched to determine the identity of past owners. A “chain of title” is a continuous record of ownership for a specific parcel. A 50-year chain of title search was not included in the scope of work for this assessment.

4.3.6 Property Tax Records

The property card for the Subject Property was obtained online from the City of Alameda Assessor’s Office website. The property card identifies the current owner as IC BP III Holdings XXVII, LLC. Assessor’s Office records indicate that the existing buildings were constructed in 1971 and 1973.

4.3.7 Environmental Liens and Activity and Use Limitations

A search for Environmental Liens and Activity and Use Limitations was not included in the scope of this assessment.

4.3.8 Previous Environmental Reports

EBI was not provided with or made aware of previous environmental assessments or other documentation regarding environmental investigations performed for the Subject Property. EBI did not identify previous environmental reports for the Subject Property at local agencies or other sources contacted during this assessment.

4.3.9 Other Historical Records and Interviews

Ms. Lia DiNunzio, Subject Property Leasing and Property Manager with Berkley Partners, was interviewed to obtain information regarding the history of the Subject Property. According to Ms. DiNunzio, who has been familiar with the Subject Property for approximately 18 months, the existing building were constructed in the early 1970s. Ms. DiNunzio stated that she there were no basements beneath the existing structures and there are no manufacturing occupants, underground or aboveground storage tanks at the Subject Property.

5.0 SUBJECT PROPERTY RECONNAISSANCE

The Subject Property reconnaissance was conducted by Mr. Brad Summers, EBI Field Assessor, on May 26, 2017. Mr. Summers was accompanied by and interviewed Ms. Lia DiNunzio, Subject Property Leasing and Property Manager with Berkley Partners.

5.1 METHODOLOGY AND LIMITING CONDITIONS

The Subject Property reconnaissance consisted of visual and/or physical observations of the Subject Property and improvements, adjoining properties as viewed from the Subject Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise.

At the time of the survey, the weather was cloudy and approximately 65° Fahrenheit. During the survey, representative tenant spaces, mechanical spaces, and/or equipment components were observed. There were no significant portions of the Subject Property that were inaccessible or excluded from this survey.

5.2 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

5.2.1 Hazardous Substances and Petroleum Products (Identified Uses)

Notable hazardous substances or petroleum products in connection with identified uses observed at the Subject Property are described below.

HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS			
General Type of Material	Approximate Quantity / Container / Material	Location	Storage Condition
Cleaning Compounds and Janitorial Supplies	Various sized containers, ranging from aerosol cans to five-gallon pails	Maintenance Shed, Tenant Warehouses	Good: No leaks or spills

EBI did not identify evidence of significant leaks, spills, or the improper handling of petroleum or hazardous substances that might impact the environmental condition of the Subject Property.

5.2.2 Hazardous Substances and Petroleum Products (Unidentified Uses)

EBI did not observe evidence of hazardous substance or petroleum products containers at the Subject Property that were not in connection with identified uses.

5.2.3 Unidentified Substances Containers

EBI did not observe evidence of unidentified substances containers at the Subject Property.

5.3 WASTE GENERATION, STORAGE, AND DISPOSAL

EBI identified the following waste streams generated at the Subject Property:

WASTE GENERATION, STORAGE, AND DISPOSAL

Classification	Type of Waste / Generation Process	Type of Storage / Location	Disposal Method / Contractor
Non-regulated Solid Waste	Municipal Solid Waste / Routine Site Operations	Solid Waste Dumpsters (Central portion of Subject Property)	Waste Management Inc.
	Paper Recyclables / Routine Site Operations	Solid Waste Dumpsters (Central portion of Subject Property)	Waste Management Inc.
Non-regulated Liquid Waste	Sanitary Sewage / Routine Site Operations	NA (Municipal Sanitary Sewer)	City of Hayward
	Waste Cooking Grease / The Vegetarian - Catering	Floor-mounted Grease Trap (Service Kitchen)	Private recycler
Regulated Solid or Liquid Waste	None identified	NA	NA
Biomedical Waste	None identified	NA	NA

No evidence of improper solid waste management or the improper disposal of hazardous substances or petroleum products was observed at the time of reconnaissance.

5.4 UNDERGROUND STORAGE TANKS (USTs) & ABOVEGROUND STORAGE TANKS (ASTs)

5.4.1 Existing Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of existing USTs or ASTs located at the Subject Property.

5.4.2 Former Storage Tanks

Based upon site reconnaissance, interviews, and a review of state and local records, EBI identified no evidence of former USTs or ASTs located at the Subject Property.

5.5 OIL-CONTAINING EQUIPMENT AND POLYCHLORINATED BIPHENYLS (PCBs)

Polychlorinated biphenyls (PCBs) are a chemical component of many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to July 2, 1979. Equipment that may potentially contain PCBs includes electrical equipment such as transformers or capacitors or hydraulically operated equipment, such as elevators, compaction equipment, or manufacturing equipment. The manufacture and distribution in commerce of PCBs was banned for use in 1979 by the United States Congress, which enacted the Toxic Substance and Control Act (TSCA). In accordance with *US Code of Federal Regulations Title 40 - Protection of Environment, Chapter I - Environmental Protection Agency, Subchapter R - Toxic Substance Control Act (TSCA), Part 761 - Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions*, the owner of a transformer or other PCB-containing equipment is responsible for equipment maintenance and remediation in the event of a leak or release.

The following oil-containing equipment was identified at the Subject Property:

OIL-CONTAINING EQUIPMENT			
Classification	Type of Equipment	Year Installed / Location	Staining / Releases Identified
Transformers and	Pad-mounted Electrical	UNK Post-1979 /	No

OIL-CONTAINING EQUIPMENT			
Classification	Type of Equipment	Year Installed / Location	Staining / Releases Identified
Fluid-Containing Electrical Equipment	Transformer [Pacific Gas & Electric]	Adjacent to buildings	
Hydraulic Equipment	None identified	NA	NA
Other Oil-containing Equipment	None identified	NA	NA

5.6 ADDITIONAL SITE CONDITIONS

The following is a summary of visual and/or physical observations of the Subject Property on the day of the site visit. Photographs of pertinent Subject Property features are presented in Appendix A.

ADDITIONAL SITE CONDITIONS	
Condition	Identified
Interior Drains, Trenches, or Sumps	Yes
Interior Stains or Corrosion	No
Unusual Odors	No
Interior Pools of Liquid	No
Stained Soil or Pavement	No
Stressed Vegetation	No
Indications of Solid Waste Disposal	No
Exterior Pits, Ponds, or Lagoons	No
Wastewater or Stormwater Discharge/Disposal	Yes
Oil-Water Separators or Clarifiers	No
Septic Systems or Cesspools	No
Wells (Drinking Water Wells, Monitoring Wells, Agricultural/Irrigation Wells, or Process Water Wells)	No
Petroleum or Natural Gas Pipelines/Easements	No

Floor drains were observed in the common area public rooms and floor sinks were observed in janitor closets. The floor drains reportedly discharge to the municipal sewer system. No staining or other evidence of a release of hazardous substances or petroleum products was observed in the vicinity of the floor drains.

The ground surface outside the building is relatively flat, with a gentle slope to the south. Stormwater runoff from the asphalt-paved parking areas discharges to catch basins or to the adjacent road frontages. The catch basins are associated with the municipal stormwater sewerage system, operated by the City of Hayward. No staining or other evidence of a release of hazardous substances or petroleum products was observed in the vicinity of the stormwater drainage features.

6.0 INTERVIEWS

The site contact or Key Site Manager was contacted to be interviewed to obtain information regarding recognized environmental conditions in connection with the property. Additionally, a Pre-Survey Questionnaire was forwarded to the designated Subject Property contact. The Pre-Survey Questionnaire has not been completed and returned to our offices. It should be noted that the Subject Property contact was told by their corporate personnel not to complete the Pre-Survey Questionnaire. The information requested in the Pre-Survey Questionnaire is intended to assist in gathering information that may be material to identifying recognized environmental conditions in connection with the Subject Property. Any accompanying documentation is presented in Appendix C.

KEY SITE MANAGER INTERVIEW			
Contact / Affiliation	Date of Communication	Years Associated with Subject Property	Telephone No.
Ms. Lia DiNunzio Leasing and Property Manager Berkley Partners	05/26/2017	1.5	(972) 345-6250

The following additional persons were interviewed to obtain information regarding recognized environmental conditions in connection with the property.

ADDITIONAL INTERVIEWS			
Contact / Affiliation	Date of Communication	Years Associated with Subject Property	Telephone No.
Yolanda L. Cruz Deputy City Clerk City of Hayward	06/02/2017	NA	(510) 583-4405

Pertinent information from the interviews is presented in applicable sections of this report.

7.0 CONSIDERATIONS OUTSIDE THE SCOPE OF ASTM PRACTICE E 1527-13

The following sections address environmental issues or considerations at the Subject Property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM Practice E 1527-13 (non-scope considerations).

7.1 ASBESTOS-CONTAINING MATERIAL (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable materials are those that can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition, or other activities, at which time it may be considered friable.

EBI conducted a limited visual screening survey for the presence of ACM at the Subject Property. EBI identified friable suspect ACM in the form of textured ceiling and wall surfacing materials, sheetrock/joint compound composite material, 2'x4' white perforated acoustical ceiling tile, and non-friable suspect ACM in the form of vinyl floor tile and associated mastic, sheet vinyl flooring and associated mastic, cementitious insulating material on HVAC ductwork, various construction mastics and caulking, and roofing materials. These materials were observed to be undamaged and in good condition at the time of assessment. Please note that this survey was limited to visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of undamaged suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, and the interior of machinery or equipment, or water and sewer systems.

It should be noted that the limited visual screening survey conducted under the scope of work for this assessment does not constitute a full asbestos inspection, in which all areas of the buildings would have been thoroughly surveyed and sampled. The possibility exists for ACM to be present in areas of the buildings not accessed or sampled by EBI personnel. Based on the limited scope of this assessment, additional suspect ACM may also present in areas of the buildings that were accessed as part of this assessment.

Due to the continued distribution of a wide variety of asbestos-containing building materials, asbestos may be present in some of the roofing, flooring, wall and ceiling materials, caulking/putties, adhesives, spackling compounds, and insulation materials, as well as other building materials that may be used at the Subject Property. Sampling many of these materials requires techniques that may be destructive to subject facilities, and in the case of roofing material, may void warranties. It is recommended that an asbestos inspection be performed in accordance with all applicable federal, state, and local regulatory requirements prior to renovation, demolition, or other activities that could cause a material disturbance. Any removal or disturbance of ACM or suspect ACM should be performed by properly trained personnel and in compliance with federal, state, and local regulations.

7.2 RADON

Radon is a naturally-occurring, colorless and odorless radioactive gas that is generated primarily in granitic rocks. The United States Surgeon General has published information that radon is a cause of lung cancer. Radon usually enters a building through openings in the foundation, and therefore is a potential health concern to residents of the lowest level of a building with inadequate ventilation.

The EPA Map of Radon Zones indicates that Alameda County is located within a Zone 2 radon area. Zone 2 is defined as an area that has a moderate potential for radon gas, with a predicted average indoor radon screening level between 2.0 picoCuries per liter (pCi/L) and 4.0 pCi/L. The EPA recommended Action Level for radon is 4.0 pCi/L.

Based upon the non-residential nature of the Subject Property and in accordance with the scope of work for this assessment, EBI did not conduct a limited short-term radon screening at the Subject Property.

7.3 LEAD-BASED PAINT (LBP)

Use of lead in household paint was banned by the U.S. Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the U.S. Department of Housing and Urban Development (HUD) consider lead-based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm²) or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act.

Based on the non-residential use of the existing buildings and in accordance with the scope of work of this assessment, a lead-based paint (LBP) screening was not conducted at the Subject Property.

7.4 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing systems such as lead solder, brass, bronze, and other lead containing alloys. The EPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg/L).

Municipal water service is provided to the Subject Property by the City of Hayward. The City of Hayward purchases all of its water from the San Francisco Public Utilities Commission (SFPUC). SFPUC is the sole supplier of water to Hayward. The Hetch Hetchy watershed, an area located in Yosemite National Park, provides the majority of water delivered by SFPUC to Hayward. SFPUC provides a small amount of water from the Alameda watershed, which is located in the East Bay and stored in the Calaveras and San Antonio Reservoirs. Based upon review of the 2015 Water Quality Report, the municipal water supply meets all current criteria established by the Safe Drinking Water Act (SDWA) and local municipal drinking water standards, including those for lead. Based upon the existing municipal water service and in accordance with the scope of work for this assessment, EBI did not conduct lead-in-drinking water sampling at the Subject Property.

8.0 FINDINGS AND OPINIONS

EBI has performed this Phase I Environmental Site Assessment of the Subject Property in conformance with the scope and limitations of ASTM Standard E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report. This assessment has identified no evidence of *recognized environmental conditions (RECs)* in connection with the Subject Property. However, the following *considerations outside the scope of ASTM Practice E 1527-13* were identified in connection with the Subject Property.

- EBI conducted a limited visual screening survey for the presence of ACM at the Subject Property. EBI identified friable suspect ACM in the form of textured ceiling and wall surfacing materials, sheetrock/joint compound composite material, 2'x4' white perforated acoustical ceiling tile, and non-friable suspect ACM in the form of vinyl floor tile and associated mastic, sheet vinyl flooring and associated mastic, cementitious insulating material on HVAC ductwork, various construction mastics and caulking, and roofing materials. These materials were observed to be undamaged and in good condition at the time of assessment. Please note that this survey was limited to visual observations of accessible areas and that the scope of work for this assessment did not include the collection and laboratory analysis of bulk samples of undamaged suspect ACM. Additional suspect ACM may be present in inaccessible areas, including, but not limited to, roofs, pipe chases behind solid walls and ceilings, concealed floor coverings, and the interior of machinery or equipment, or water and sewer systems. Based on the condition of suspect ACM, these materials do not currently pose a significant environmental threat to the occupants of the Subject Property. Suspect ACM do not present a problem when maintained in good condition. However, additional sampling, removal, and disposal arrangements may be necessary should building construction or renovation activities be conducted. Asbestos is a *condition outside the scope of ASTM E 1527-13* and is not considered a recognized environmental condition (REC).

9.0 RECOMMENDATIONS

Based upon the findings of this investigation, EBI offers the following recommendations:

- EBI recommends the development and implementation of an Asbestos Operations and Maintenance (O&M) Plan for the Subject Property. This O&M Plan provides the procedures and guidelines that, when used during facility cleaning, maintenance, and general operations, will minimize human exposure to asbestos fibers and minimize release of asbestos fibers to the environment. This O&M Plan is a long term management approach. Estimated cost: \$500. EBI additionally recommends that a comprehensive asbestos inspection be conducted prior to significant renovation or demolition of the buildings.

Terminology

TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E 1527-13. The Standard Practice should be referenced for further detail related definitions or additional explanation regarding the meaning of terms.

Recognized environmental condition (REC): The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

De minimis conditions: Conditions that generally do not present threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions or controlled recognized conditions.

Historical recognized environmental condition(s) (HREC): A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time of the Phase I ESA, the condition shall be included in the conclusions section of the report as a recognized environmental condition,

Controlled recognized environmental condition(s) (CREC): A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report. NOTE: A condition identified as a controlled recognized environmental condition does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Material threat: A physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank that contains a hazardous substance and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

Material impact to public health or environment: A substantial risk of harm to public health or the environment resulting from the presence or likely presence of an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. An example might include a release of a hazardous substance in concentrations exceeding applicable governmental agency standards under conditions that could reasonably and foreseeably result in substantial exposure to humans or

substantial damage to natural resources. The risk of that exposure or damage would represent a material impact to public health or environment.

General risk of enforcement action: The likelihood that an environmental condition would be subject to enforcement action if brought to the attention of appropriate governmental agencies. If the circumstances suggest an enforcement action would be more likely than not, then the condition is considered a general risk of enforcement action.

Data failure: A failure to achieve the historical research objectives, even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

Data gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).
