Onsite Distributed Hydrogen Production and End Use Solicitation Concept

Please see comments below, thanks.

50% spend in California:

- Allow equipment purchased from a business located in California (i.e. distributor) but manufactured outside California to count towards the 50% spend in California
- Total should include any applicable subrecipients and vendors. Please clarify and give examples.

Provide preference points for low water use in hydrogen production.

Can you explain further:

Exhibit a carbon intensity of 0.45 kilograms of carbon dioxide equivalent per kilogram of hydrogen produced and demonstrate technologies that can enable a project to achieve a carbon intensity of 0.00 kilograms of carbon dioxide equivalent per kilogram of hydrogen produced with a well-to-gate assessment.

Thank you!
