DOCKET NO. 22-ERDD-02

NOTICE OF REMOTE WORKSHOP

RE: Climate Innovation Program Forests and
Agriculture Workshop**Notice of Climate Innovation Program
Forests and Agriculture Workshop
December 12, 2023**

9 a.m. – 4 p.m.

Remote Access Only

See Attendance Instructions.

The California Energy Commission (CEC) will host a workshop to seek expert perspectives and public input on technologies to support healthy forests and resilient agriculture, which are topics under consideration for Climate Innovation Program funding.

The public can participate in the workshop consistent with the attendance instructions below. The CEC aims to begin promptly at the start time posted. The end time is an estimate based on the proposed agenda. The workshop may end sooner or later than the posted end time.

Agenda

This workshop will include an overview of all proposed program objectives, followed by presentations, public comment, and discussions on the following topics:

1. Circular bioeconomy for agriculture and forests
2. Fire mitigation and suppression technology
3. Climate-smart agricultural tools and equipment

Staff are seeking public input on these topics in anticipation of potential funding opportunities in 2024.

A more detailed agenda will be posted prior to the workshop on the [Climate Innovation Program web page](https://www.energy.ca.gov/programs-and-topics/programs/climate-innovation-program) at <https://www.energy.ca.gov/programs-and-topics/programs/climate-innovation-program>.

Background

California's Climate Innovation Program, created by California Assembly Bill 209 (Chapter 251, Statutes of 2022) and codified in Public Resources Code Section 25625,¹ was created to "provide financial incentives to California-headquartered companies for developing and commercializing technologies that provide technological advancements that either help California meet its greenhouse gas reduction targets and achieve its climate goals on an accelerated timeline and at a lower cost, or enable the state to be more resilient to the impacts of climate change such as drought and wildfire."² These technologies can include, but are not limited to, "zero-emission transportation, lithium processing, manufacturing, recovery, regenerative agriculture, and drought and wildfire prevention."³
