Potential Hydrogen Generation Technology

Dear California leaders

As long time California resident i am excited to see the state's Hydrogen initiatives. In this context request an opportunity to discuss our "Direct Hydrogen generation" technology using sunlight and water at an attractive / low cost. We have a demo plant in Europe at this time.

the cost of production is less than 30% of the SMR method and also the 2 step Sunlight process used by others.

Please advise of a time/date to discuss and follow-up.
on hearing from you will share addl. details
thanks for taking time to review
regards
Thanks
