## **Labor force for installs**

My name is Travis McCleary, a combat Veteran and project manager for the CA Conservation Corps, a state department focused on workforce development through the conservation of CA's resources. We have an energy corps that is focused on reducing greenhouse gases and we can provide free labor for projects that meet our guidelines; some of those projects include lighting audits, lighting retrofits, solar installs, EV charger installs and more.

We are funded through the CA Air Resource Board and have received funding from CEC to develop an EV charger installation curriculum.

I would like to make everyone aware of who we are and to request that we are considered as a labor force for these projects. We meet many workforce development and disadvantaged communities requirements.

I would be willing to discuss more with anyone interested in hearing more.
