Federal Affordable Care Act Grants

Please start the grants on Jan. 1, 2024. This will be my second winter with a broken unfixable heater. We want to do the right thing to help protect earth and this decision will have impacts for many years. Not only are many in the public going without heat and AC waiting implementation of the High Efficiency HVAC grants but contractors are on hold too. So, please, please make the roll out schedule your priority and please don't make the criteria so high we all can't afford it even with the grant. Thank You.
