Would like to apply & participate in the CEVI project

Hello,

We are a new business that aligns with your goals. We believe we can help with the infrastructure issue. Here is a little about us.

The JuiceNet solution creates a Next Generation, Peer-to-Peer Power sharing network. Our mission is to augment commercial charging infrastructure by creating a network of hosts, homeowners with Level 2 chargers in their home, and users, EV owners who do not have access to an at home, Level 2 charger. This network will create more available charging options for EV owners. With the solution in place, those considering an EV purchase will be more apt to make this environmentally friendly purchase.
