VSFB - Minimum Deployment Threshold

This grant has the potential to greatly accelerate Vandenberg Space Force Base's non-tactical GOV fleet electrification timeline. However, our current charger dispersal plan collocates level 2 charging sites with vehicle parking locations; our overall program is expected to exceed 40 level 2 chargers, but we would likely have zero individual sites that meet the minimum deployment threshold of 20 level 2 chargers. We request that this threshold be removed or that programmatic upgrades (such as transformers, panels, conduit, and wiring) be considered as a whole to meet the threshold. VSFB Point of Contact: Capt Taylor Davis, taylor.davis.21@us.af.mil
