Oppose Project

I oppose this project. I believe it will impair public safety due to its ridgetop location. It will massively increase the aerial obstacles for wildland fire fighting in that geographic location. The 'Fountain Fire' massively impacted that geographic area and that forest has regrown replicating the same conditions as the Fountain Fire. The County turned down the project as too high risk. None of the high risk conditions for wildfire have altered. This project is a threat to public safety for all who live in eastern Shasta County. The state should not over-ride the sensible decisions made at the local level.
