## **Rebates & Credits**

Why are you re-inventing the wheel? Rebate programs have been effective for many decades for energy efficient appliances and more recently for alternate fuel cars. So the provisions are already written, just publish and implement them. Please refer to website "<https://www.hawaiihome.com/inflation-reduction-act-benefits-for-homeowners>" to view Hawaii's IRA Home Efficiency rebate and credit program that is CURRENTLY IN EFFECT. And your "purchase and scalp resale" ideology is silly to put it politely. Give the majority population the benefit of doubt. I am in the group of homeowners who had a contractor-installed heat pump system completed in March 2023. Please include us in the retroactive rebate and credit program. Thank you.
