## **Don't do it**

Being located very close to the Fountain Wind Project has concerned us for a number of years.

Our main concerns are environmental destruction, loss of quality of life, massive traffic jams, blasting for footings, stroboscopic effect of the blades at sunrise, and loss of fire protection if the air tankers cannot come close to our area just across the canyon that the Montgomery Creek flows down.

It's tragic that a tyrannical state government has the power to override the local government's veto power. We came to the Montgomery Creek area to live in peace and not have it destroyed by a temporary solution to power shortages. We are living off grid and won't benefit much from the evil aliens spinning their blades in our backyard.
