No fountain wind project

I am opposed to any type of wind energy facility being placed in Shasta County. The 48 wind turbines that are being proposed for Shasta County are NOT wanted. Shasta County has rejected this project on more than one occasion. The fountain wind project is trying to find a loophole.

If permission is granted they will have a negative impact on our community.

Such impacts include:

Endangerment to wildlife.

Impediments to aerial firefighting, which is needed in our high fire zone area.

Elevating wildfire risks.

Significant impacts to a wide range of tribal cultural resources, including the Pit River and other tribes.

Stop the fountain wind project.
