Subject: El Segundo Power Redevelopment Project Compliance--Termination Notice

Dear Mr. McKinsey:

The Presiding Member has received the Termination Notice you filed on August 2, 2016 for the petition to amend that was filed April 23, 2013 (TN 70442). California Code of Regulations, Title 20, Section 1769, governing petitions to amend, does not specifically address, or provide a procedure for, termination of a petition to amend. However, section 1709.8, which governs withdrawals of Applications for Certification, does provide such a procedure, and requires a withdrawal to be executed by the project owner as provided in section 1707. The Committee has determined that following that procedure would be appropriate in this case, and therefore asks that you provide a request for withdrawal of the petition to amend (TN 70442) dated and signed by the project owner, attesting under penalty of perjury to its truth and accuracy. Upon receipt of that document, the Presiding Member will issue a written order terminating the petition to amend.

Thank you,

Raoul A. Renaud
