Workshop****February 16, 2024**

9:00 a.m. – 12:00 p.m.

Remote Access Only**See Attendance Instructions**

The California Energy Commission (CEC) will host a staff workshop to present the inputs and assumptions for the Senate Bill (SB) 100 electricity supply system models. The public can participate in the workshop consistent with the attendance instructions below. The CEC aims to begin promptly at the start time posted and the end time is an estimate based on the proposed agenda. The workshop may end sooner or later than the posted end time.

Agenda

CEC Staff will present on the inputs and assumptions that are being developed for the SB 100 electricity supply modeling. Commissioners, if present, will have the opportunity to ask questions of staff and comment on the proposed inputs and assumptions, followed by a public comment period.

A detailed schedule will be posted prior to the workshop at [Docket No. 23-SB-100](https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=23-SB-100) at <https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=23-SB-100>.

Background

The 100 Percent Clean Energy Act of 2018 (SB 100, De León, Chapter 312, Statutes of 2018) establishes a target for renewable and zero-carbon resources to supply 100 percent of retail sales and electricity procured to serve all state agencies by 2045. SB 100 requires the CEC, California Public Utilities Commission (CPUC), and California Air Resources Board (CARB) to develop and submit a joint-agency report to the legislature by January 1, 2021, and at least every four years thereafter. The inputs and assumptions presented at the workshop will be used to analyze options

to achieving the SB 100 targets of 100 percent clean electricity by 2045. The results of the modeling effort and tradeoffs will be assessed in the 2025 SB 100 Joint Agency Report.

The requirement is codified in the [Public Utilities Code section 454.53](#), and the full text is available at

https://leginfo.legislature.ca.gov/faces/codes_displaySection.xhtml?lawCode=PUC§ionNum=454.53.

Staff presented the analytical framework for the SB 100 electricity supply modeling on October 31, 2023, information on that workshop is available at:

<https://www.energy.ca.gov/event/workshop/2023-10/senate-bill-100-analytical-framework-workshop>. This workshop will provide additional information on the inputs and assumptions.

The [2021 SB 100 Joint Agency Report](#), available at

<https://efiling.energy.ca.gov/EFiling/GetFile.aspx?tn=237167&DocumentContentId=70349>, was published March 15, 2021, and was a first step to evaluate the challenges and opportunities in implementing SB 100. It included an initial assessment of the additional energy resources and the resource building rates needed to achieve 100 percent clean electricity, along with the associated costs. The next SB 100 Joint Agency Report is due to the legislature on January 1, 2025.
