

DOCKETED

Docket Number:	98-AFC-04C
Project Title:	Sunrise Cogeneration Power Project (Compliance)
TN #:	254572
Document Title:	2023 Annual Compliance Report for Sunrise Power Project
Description:	2023 Annual Compliance Report for Sunrise Power Project
Filer:	Ashley Gutierrez
Organization:	California Energy Commission
Submitter Role:	Commission Staff
Submission Date:	2/20/2024 2:11:24 PM
Docketed Date:	2/20/2024

Sunrise Power Company, LLC

February 16, 2024

Ms. Ashley Gutierrez
Compliance Project Manager
Sunrise Power Company (98-AFC-4C)
California Energy Commission
715 P Street (MS-2000)
Sacramento, CA 95814-5512

Re: **Sunrise Power Company, LLC - CEC Annual Compliance Report - 2023**

Dear Ms. Gutierrez:

Sunrise Power Company is hereby submitting the attached Annual Compliance Report in accordance with the Compliance and Closure Section of the Commission Decision. The Annual Compliance report pertains to operations in 2023. The following items are provided as attachments to the Annual Compliance Report. Items that are required by specific conditions are referenced with the condition number:

- Attachment A: Annual Operating Hours
- Attachment B: Scheduled and Unscheduled Maintenance Activities
- Attachment C: Biology Report (BIO-3)
- Attachment D: Hazardous materials in reportable quantities (HAZ-1)
- Attachment E: Groundwater use summary (SW-4)
- Attachment F: Wastewater discharge summary (SW-7)
- Attachment G: Transmission line inspection results & activities (TLSN-4)
- Attachment H: Waste Management Summary (WASTE-3)
- Attachment I: Compliance Matrix

If you have any questions, please feel free to contact David King at (661) 768-5006.

Sincerely,

David S. King
Plant Manager
Sunrise Power Company

Sunrise Power Company, LLC

Sunrise Power Company 2023 Annual Compliance Report

1. CURRENT PROJECT OPERATING STATUS

Sunrise Power Company, LLC (“Sunrise”) operates a combined-cycle project that commenced commercial operation in June 2003. Sunrise sells its power into California’s merchant power market via the electric grid system managed by the California Independent System Operator (“CAISO”). The following table shows the plant’s total 2023 hours of operation. A summary schedule is found in Attachment A.

Unit Number	Hours of Operation
Unit 1	5,897.0
Unit 2	6,258.4

The maintenance activities for 2023 are listed in Attachment B.

The table found in Attachment B is a list of maintenance activities performed on the units during 2023. All maintenance activities affecting unit availability are included.

Information contained in this report was obtained from the MicroGADS reporting system, which logs all generation related events. The events reported in MicroGADS are derived from information entered from control room logbooks.

2. REQUIRED DOCUMENTS SUBMITTED WITH THIS REPORT

Routine operations activities were conducted at the generating facility in 2023. An Annual Compliance Evaluation was performed by the Designated Biologist. In accordance with Condition BIO-3, record summaries from the Designated Biologist are provided in Attachment C.

In accordance with Condition HAZ-1, a list of hazardous materials contained at the facility in reportable quantities is provided in Attachment D.

In accordance with Condition SW-4, a groundwater use summary is provided in Attachment E.

In accordance with Condition SW-7, a wastewater discharge summary is provided in Attachment F.

In accordance with TSE-2, there have not been any changes to the design, construction, and operation of the transmission facilities.

Sunrise Power Company, LLC

In accordance with Condition TLSN-2, all reports of line-related complaints shall be summarized and included in the Annual Report to the CPM. *Sunrise Power Company did not receive any transmission line-related complaints during 2023.*

In accordance with Condition TLSN-4, inspection results and any fire prevention activities carried out along the right-of-way are provided in Attachment G.

In accordance with Condition VIS-1, any maintenance activities to change the visual appearance of the structures will be reported in the Annual Compliance Report. *Sunrise Power has not performed any maintenance activities to alter the appearance of its structures during 2023.*

In accordance with Condition WASTE-3, Sunrise shall document in the Annual Compliance Report the actual waste management methods used during the year compared to planned management methods. *Waste management methods used at Sunrise during 2023 were consistent with the waste management plan during this period. A summary of waste streams managed during 2023 is included in Attachment H.*

3. POST-CERTIFICATION CHANGES APPROVED BY THE COMMISSION

The final Authority To Construct (ATC) approval (S-1204133) for turbine upgrades was received in December 2023.

4. SUBMITTAL DEADLINES MISSED DURING 2023 OPERATIONS

No compliance submittals were missed during 2023.

5. FILINGS OR PERMITS ISSUED BY OTHER GOVERNMENTAL AGENCIES DURING 2023

The Kern County Environmental Health Department issued the annual renewal of the Hazardous Material Business License in October 2023.

6. PROJECTION OF PROJECT COMPLIANCE ACTIVITIES SCHEDULED FOR 2023

Planned significant compliance activities for 2023 operations are as follows:

- Quarterly CEM Cylinder Gas Audits and Linearity checks.
- Annual Compliance Source Test, 7-Year Startup/Shutdown Emissions Verification, and CEM Relative Accuracy Test Audit.
- Monthly fuel gas sampling and analysis.
- Quarterly Cooling Tower water sampling and analysis.
- Quarterly Injection Well wastewater sampling and analysis.
- Annual Injection Well testing.

Sunrise Power Company, LLC

- Conduct annual biological survey.
- Conduct annual transmission line survey and maintenance.

7. **LISTING OF ADDITIONS TO THE ON-SITE COMPLIANCE FILE DURING 2023**

The following additions were made to the on-site compliance file during this period:

- Quarterly CEMS Monitoring Reports
- Annual Biological Survey
- UIC Quarterly Well Monitoring
- Annual RATA and Source Test Reports
- Annual transmission line survey and maintenance report

8. **EVALUATION OF CONTINGENCY PLAN FOR UNEXPECTED FACILITY CLOSURE**

The contingency plan for unexpected temporary & permanent closure was submitted on June 26, 2001. The contingency plan is accurate and current, therefore not requiring any further changes at this time.

9. **SUNRISE POWER PROJECT COMPLIANCE MATRIX**

Please see Sunrise Power Company Compliance Matrix in Attachment I.

Sunrise Power Company, LLC

ATTACHMENT B: SCHEDULED AND UNSCHEDULED MAINTENANCE ACTIVITIES

Sunrise 2023 Maintenance Activities

Date	Description
3/1/23 to 3/31/23	Planned Unit 2 Compressor Rotor Inspection & Duct Burner Baffle Replacement
3/3/23 to 3/31/23	Planned Unit 1 Borescope & Duct Burner Baffle Replacement
3/3/23 to 3/31/23	Planned External Inspection on the Steam Turbine
5/11/23 to 5/13/23	Fuse failed on LCI starting device for Unit 1
5/11/23 to 5/13/23	Steam turbine outage and derate for failed LCI starting device
5/25/2023 to 5/28/23	Unit 1 down due to leak in Unit 2 HP isolation valve
5/25/2023 to 5/28/23	Unit 2 down due to leak in Unit 2 HP isolation valve
5/25/2023 to 5/28/23	Steam turbine down due to leak in Unit 2 HP isolation valve
8/25/23 to 9/2/23	Steam turbine derated due to reduced duct firing on Unit 1, because of tube leak
8/31/23 to 9/4/23	Unit 1 down to repair tube leak in hot reheat section
9/2/23 to 9/4/23	Unit 2 down while repairs were being made to Unit 1 tube leak
9/2/23 to 9/5/23	Steam turbine down while repairs were being made to Unit 1 tube leak
9/4/23 to 9/6/23	Unit 2 unable to start and down with turning gear motor problem
9/4/23 to 9/6/23	Steam turbine derated due to Unit 2 turning gear motor problem
11/5/23 to 11/7/23	Unit 2 down with problem in excitation system
11/5/23 to 11/7/23	Steam turbine derated due to Unit 2 excitation system issue
12/3/23 to 12/5/23	Planned borescope inspection for Unit 1
12/3/23 to 12/5/23	Steam turbine derated due to Unit 1 borescope inspection
12/5/23 to 12/18/23	During planned borescope on Unit 1 discovered damaged components in turbine section
12/5/23 to 12/18/23	Steam turbine derated due to Unit 1 damaged turbine components

Sunrise Power Company, LLC

ATTACHMENT C: BIOLOGY REPORT (BIO-3)

Memorandum

To David King
Sunrise Power Company, LLC - Sunrise Power Project

From Henson DeBruler, CEC Designated Biologist

Date 14 August 2023

Subject 2023 Biological Resources Survey Compliance Report

BACKGROUND SUMMARY

Per the guidance of the 2000 Biological Resource Mitigation Implementation and Monitoring Plan (BRMIMP) for the Sunrise Power Project, Environmental Resources Management, Inc. (ERM) assessed the biological resources in and around the Sunrise Generating Station, operated by Sunrise Power Company, LLC (Sunrise). In compliance with BRMIMP Measure BIO-3, a botanical survey, focusing on botanical species of concern, was conducted around the outside perimeter fence on 8 May 2023. In addition, in compliance with BRMIMP Measure BIO-3, a San Joaquin kit fox/wildlife fence monitoring and habitat assessment was also conducted on 8 May 2023. The results of these surveys are described herein to be included into the Sunrise Annual Report for the Sunrise Generating Station in Fellows, California (Site).

It should be noted that construction of two new disposal wells (WW5 and WW6) occurred in February and June 2023, respectively. Details regarding the specific BRMIMP measures implemented during the installation of these wells will be described in separate reporting.

Land use in the immediate area of the Site consists of oil production and recovery. No undeveloped habitat is available within the generating station, as asphalt, concrete, and gravel cover the entire property. Habitat that can be utilized by special-status species surrounds the Site. Special-status species known to the area, as documented within the 2000 BRMIMP, include San Joaquin kit fox (*Vulpes macrotis mutica*, SJKF), blunt-nosed leopard lizard (*Gambelia sila*, BNLL), giant kangaroo rat (*Dipodomys ingens*, GKR), burrowing owl (*Athene cunicularia*, BUOW), and the San Joaquin antelope squirrel (*Ammospermophilus nelsoni*, SJAS).

The botanical and wildlife surveys consisted of walking the grounds of the Site, the area within 250 feet of the perimeter fence, and stormwater outfall structures of the Site with the intent to evaluate 100 percent of the Site. The survey area is depicted on Figure 1. During the surveys, consideration was given to areas that could potentially impact botanical and wildlife species. The following measures were identified in the BRMIMP and considered during the surveys:

1. **Sensitive Species Awareness Education Program:** As required by the BRMIMP, employee training is required for all new workers. Long-term personnel receive refresher training on an as-needed basis.

To date, Sunrise remains in compliance with the Sensitive Species Awareness Education Program, also known as the Worker Environmental Awareness Program (WEAP). Both the

training video and supporting handout materials were updated to be more comprehensive and to include changes since produced originally in 2000. These were submitted for official review by the California Energy Commission (CEC) in March 2021. These updated materials are now used to train new workers onsite.

2. **Pre-activity Surveys and Reporting:** Construction of two new disposal wells occurred in February and June of 2023, respectively. Details regarding pre-activity surveys and construction monitoring will be described in separate reporting.

3. **Measures Required During On-going Project Operation per the BRMIMP:**

...Sunrise intends to implement the same applicable procedures designed for construction during the operation phase to minimize impacts.

For example,

Sensitive Plant Surveys and Sensitive Wildlife Surveys included 100 percent coverage in the work area including 100-150-foot buffer zones and up to 1,320 feet for active nesting raptors.

During operations, the interpretation of “work area” includes the operational plant and immediate vicinity, as shown on Figure 1.

In general, the Site exhibited good housekeeping practices. All exterior waste bins were covered to prevent access to wildlife.

Holes previously observed in the perimeter fence remained patched, and many larger gaps beneath the fence and gates were blocked by stacked rocks. However, there are still areas accessible to small and medium-sized wildlife between fence panels and under gates (see Attachment 1, Photographs 3, 5, 7, and 9). Sunrise will continue maintenance in these areas by installing gravel to prevent wildlife access. In addition, Sunrise will continue to regularly monitor all perimeter fencing and make repairs, as needed.

In the 2022 Annual Site Survey, a pool of standing water was observed outside the cooling tower’s holding pond at the northwest corner of the Site. The cooling towers are within the Site’s perimeter fence; an additional fence surrounds the holding pond as a second line of defense to prevent access. No pool of standing water was observed during the 2023 Annual Site Survey, despite higher-than-normal rainfall. No wildlife sign was recorded in the vicinity.

ANNUAL MONITORING SURVEY - OUTER PERIMETER BOTANICAL AND WILDLIFE SURVEYS

While the actual Site is devoid of vegetation and habitat for species because of the heavily traveled and graveled areas, the perimeter of the Site was surveyed to determine if special-status plant or animal species occupy the area surrounding the Site.

Botanical

A survey to detect plant species of concern listed in the BRMIMP was conducted on 8 May 2023 by Ms. Erica Caddell (ERM, Staff Ecologist). The timing of the survey was scheduled when most

of the species of concern were anticipated to be in bloom, as referenced by Calflora (calflora.org) and Jepson eFlora (ucjeps.berkeley.edu/eflora), as well as previous observations of blooming periods at the Site. During the survey, observed botanical species and vegetative composition were recorded throughout the perimeter of the Site. No significant changes were observed in vegetative composition (e.g., shrubs, grasses, forbs, etc.). However, due to an unseasonably wet year, vegetation density changed, with bare ground being less widespread than in previous years of monitoring.

The survey area was partitioned into four zones (Figure 2) based on vegetation cover, disturbance, and hydrology. Vegetation type was classified using ocular estimation. The field survey revealed that the prominent vegetation communities were saltbush scrub and annual (non-native) grasses. Species encountered are bulleted below.

Zone 1 occurred in the northern-northwestern portion of the survey area, along the dried riverbed. It was the least disturbed and had the greatest species diversity compared to the other three zones. The vegetation ecology was classified as 50 percent shrubs, 25 percent grasses, and 25 percent forbs. Species encountered include the following:

- *Amsinckia intermedia*
- *Atriplex polycarpa*
- *Bromus madritensis* ssp. *rubens*
- *Centaurea melitensis*
- *Deinandra pallida*
- *Dimorphotheca sinuata*
- *Erodium cicutarium*
- *Gutierrezia californica*
- *Latuca serriola*
- *Layia glandulosa*
- *Marrubium vulgare*
- *Peritoma arborea*
- *Salsola tragus*
- *Sisymbrium irio*
- *Sonchus oleraceus*

Zone 2 occurred in the western portion of the survey area, south of the steep elevation drop-off caused by the riverbed. It was the most disturbed area of the four zones, with a high abundance of non-native grasses. The northernmost section was characterized by 85 percent grasses, 10 percent forbs, and 5 percent shrubs; the remaining southern section of Zone 2 was 40 percent shrubs, 40 percent grasses, and 20 percent forbs. Species encountered include the following:

- *Amsinckia intermedia*
- *Atriplex polycarpa*
- *Bromus madritensis* ssp. *rubens*
- *Centaurea melitensis*

- *Erodium cicutarium*
- *Isocoma acradenia*
- *Peritoma arborea*
- *Salsola tragus*
- *Sisymbrium irio*
- *Sonchus oleraceus*

Zone 3 occurred along the southern and eastern sections of the survey area. It was the second-to-most disturbed zone (following Zone 2). The vegetation in the southern section was 65 percent shrubs, 30 percent grasses, and 5 percent forbs; and in the eastern section it was 80 percent shrubs, 15 percent grasses, and 5 percent forbs. Species encountered include the following:

- *Amsinckia intermedia*
- *Atriplex polycarpa*
- *Bromus madritensis* ssp. *rubens*
- *Centaurea melitensis*
- *Erodium cicutarium*
- *Layia glandulosa*
- *Marrubium vulgare*
- *Salsola tragus*
- *Sisymbrium irio*

The slough thistle (*Cirsium crassicaule*) was mistakenly identified in the eastern half of Zone 3 during the 2020 surveys; the slough thistle was confirmed as a misidentification during the 2023 survey and is not expected to be on the Site. The slough thistle occurs in wetlands, riparian areas, and freshwater marshes, which do not occur onsite. No disturbances to vegetative cover or the ground were observed in this area.

Zone 4 occurred along the northern section of the survey area, east of the fence line, running north to south. It was the second-to-least disturbed zone (following Zone 1), but still moderately disturbed. The vegetation was categorized as 75 percent shrubs, 20 percent grasses, and 5 percent forbs. Species encountered include the following:

- *Amsinckia intermedia*
- *Atriplex polycarpa*
- *Bromus madritensis* ssp. *rubens*
- *Centaurea melitensis*
- *Erodium cicutarium*
- *Latuca serriola*
- *Layia glandulosa*
- *Sisymbrium irio*

Wildlife

A survey to detect wildlife species of concern, as listed in the BRMIMP, was conducted on 8 May 2023 by Henson DeBruler (CEC Designated Biologist), including a 250-foot buffer area surrounding the Site (Figure 1).

The San Joaquin kit fox, *Vulpes macrotis mutica*, is adapted to desert-like (alkali scrub/shrub and arid grasslands) habitats in North America and known to use relatively flat, open habitat. This species preys on a variety of resources, including, but not limited to, kangaroo rats, mice, rabbits, hares, San Joaquin antelope squirrels (*Ammospermophilus nelsoni*), and ground-nesting birds. Their main competitor/predator is the coyote (*Canis latrans*), which overlaps in range and diet.

The Site is located on flat terrain with a mosaic of alkali scrub/shrub and non-native grassland habitats. Zones 1, 2, and 4 are the most likely areas suitable for the San Joaquin kit fox; however, the surrounding vegetation community is dense in these areas and not representative of ideal habitat. Inactive burrows (4-10 inches) were located within a dry riverbed that runs northwest of the station in Zone 1. Some of these burrows provide adequate shelter for kit foxes; however, these burrows are not likely used for pup rearing, as kit foxes will not usually den in areas subjected to periodic flooding. A camera trap (CT) was placed in this area to evaluate use by kit foxes. No kit foxes were observed in the CT data. The visual and CT surveys determined suitable prey for kit fox in the form of desert cottontail (*Sylvilagus audubonii*) and black-tailed jackrabbits (*Lepus californicus*); potential competition/predation from bobcats (*Lynx rufus*), are described further in the Perimeter Fence Camera Monitoring section and in Attachment 1.

Potential habitat for the San Joaquin kit fox occurs onsite in the interspaces of alkali scrub/shrub and grassland areas, although open areas are limited. As a result, there is marginal potential for the San Joaquin kit fox to be in the area, but their presence was not recorded during the CT monitoring effort.

During the 2022 Biological Resources Survey, a large inactive stick nest was observed in the support structure of one of the generators. Many of the sticks had fallen to the ground and the nest showed advanced signs of degradation. This recorded nest was not observed during the 2023 Biological Resources Survey. No active or inactive bird nests were observed during the walkthrough of the Site.

PERIMETER FENCE CAMERA MONITORING

Remote sensing cameras were placed at locations where fencing was compromised/accessible and outside the work area near potential active burrows for 8 consecutive days (8-16 May 2023) to determine possible San Joaquin kit fox and other wildlife activity. Figure 3 shows the locations of the 11 cameras.

The most active, CT07 and CT10, were both installed in the northern portion of the Site. CT07, placed inside the perimeter fencing facing a small gap at a gate, captured a Common Raven (*Corvus corax*) and a pair of Great Horned Owl (*Bubo virginianus*) fledglings hunting. Prey was not captured on camera. CT10, placed outside the perimeter fencing facing an open culvert, captured a bobcat and a desert cottontail (*Lepus californicus*). Another camera, CT03, was placed inside the perimeter fencing, again facing a gap at a gate, in the southwestern portion of the Site. CT03

captured potentially the same pair of Great Horned Owl fledglings. CT04, also in the southwestern portion of the Site, facing a gravel mound inside the perimeter fencing, captured a single Great Horned Owl fledgling. Desert cottontails were captured on CT01, CT02, CT05, and CT09. A black-tailed jackrabbit (*Lepus californicus*) was captured on CT08. A European Starling (*Sturnus vulgaris*) was also captured on CT09. See Attachment 1 for a Photo Log of representative CT photos. No potential special-status species were photographed during the monitoring period and only avian species were observed inside the perimeter fencing. Photographs not included in the Photo Log are available upon request.

A Conservation Management Plan is in development by the California Statewide Bobcat Population Monitoring Project. As of 1 January 2020, it is illegal to take a bobcat, per the following Fish and Game Code (FGC) Laws and Title 14 California Code of Regulations (CCR):

- FGC Section 4155. Bobcat Protection Act – It is unlawful to trap or hunt a bobcat, or attempt to do so, except as authorized.
- FGC Section 4181. Depredators – Any owner or tenant of land or property being damaged or destroyed or is in danger of being damaged or destroyed by certain species may apply for a permit to take the animal(s).
- CCR § 401 – Issuance of Permit to Take Animals Causing Damage. Elk, bear, bobcat, beaver, wild pig, deer, wild turkey, gray squirrels.
- CCR § 478. Bobcat – It shall be unlawful to pursue, take, or possess any bobcat without first procuring a hunting license and bobcat hunting tags. It shall be unlawful to trap any bobcat, or attempt to do so.

As with San Joaquin kit fox, owls, raptors, and other animals that eat rodents, bobcats are susceptible to poisons used for rodent control. Since Sunrise does not use poison bait, there is a low risk of impact to these animals from normal Site activities.

CONCLUSION

The above activities were conducted in accordance with the BRMIMP, and commitments made by Sunrise to uphold survey requirements and avoidance of impacts to sensitive species. The botanical and wildlife pedestrian surveys, in conjunction with camera monitoring, show that the wildlife populations outside the Site's work areas are active, while the areas where operational activities are ongoing showed minimal activity.

The fence line, where greater than 4-inches of gravel had been installed, remains effective in preventing wildlife access. No holes were observed under the fence where there was large gravel. During camera monitoring, only avian species were photographed in the Site's interior.

Sunrise will continue repairs to the perimeter fencing to deter access by wildlife. Holes repaired with heavy gauged wire or overlapping chain-link fencing are more difficult for animals to undermine. No new holes were observed where large, heavy gravel rock (greater than 4 inches) had been placed. In reference to the 20232 Wildlife Surveys, no pooling water was observed around the cooling tower.

No injured wildlife or mortalities were reported in 2023. The Designated Biologist will be notified immediately of any injured wildlife or mortalities. See Attachment 2 for a Mortality Log and sample signage. Sunrise remains compliant with the 2000 BRMIMP. Continued efforts to maintain minimization measures and improve exclusion fencing were observed. Given the active special-status and wildlife communities in the areas outside of the Site, it appears these conservation efforts are effective.

ATTACHMENT D: HAZARDOUS MATERIALS IN REPORTABLE QUANTITIES (HAZ-1)

REPORTABLE QUANTITIES OF HAZARDOUS MATERIALS

The table below provides the Reportable Quantity (RQ) of various hazardous materials mixtures, wastes, and extremely hazardous materials located at the Sunrise facility. The materials in this list contain CERCLA/SARA hazardous substances. Although the RQs are specified in pounds, the equivalent volume in gallons is indicated where appropriate.

In the event of a release or spill of any of these materials, the Plant Supervisor or Plant Manager must be contacted so that agency notifications can be made. Follow-up written reports will be handled by the EH&S Department. Please note that hazardous materials/waste may be reportable at thresholds below those specified in the table below *if they harm or have the potential to harm safety, human health, or the environment.*

SARA 313 CERCLA Hazardous Substances	Quantity on Site	RQ (Reportable Quantity) FOR EMERGENCY NOTIFICATION	Equivalent in GALLONS/CUBIC FEET FOR EMERGENCY NOTIFICATION
Nitric Oxide (NO)	7,400 Cubic Feet mixed compressed gas	10 Pounds (CERCLA RQ)	7,143 Cubic Feet
Ammonium Hydroxide	240 Gallons (558 Pounds)	1,000 Pounds	430 Gallons
Anhydrous Ammonia	9,000 Gallons (45,328 Pounds)	100 Pounds (CERCLA RQ)	18 Gallons
Sulfuric Acid (93 - 98% Sulfuric Acid)	88,975 Pounds (5872 Gallons)	1,000 Pounds (CERCLA RQ)	66 Gallons
Sulfuric Acid (40% Sulfuric Acid)	3,750 Pounds (900 Gallons)	1,000 Pounds (CERCLA RQ)	240 Gallons
Sodium Hypochlorite Solution (12.5% Sodium Hypochlorite)	6,980 Gallons (8725 Pounds)	100 Pounds (CERCLA RQ)	80 Gallons
Transformer Oil	92,940 Gallons	42 Gallons on land or any quantity in navigable waterway (SPCC Plan)	42 Gallons on land or any quantity in navigable waterway
Diesel Fuel	220 Gallons	42 Gallons on land or any quantity in navigable waterway (SPCC Plan)	42 Gallons on land or any quantity in navigable waterway
Petroleum Products (e.g. - gear oil, used oil, lubricants)	14,075 Gallons	42 Gallons on land or any quantity in navigable waterway (SPCC Plan)	42 Gallons on land or any quantity in navigable waterway

230 kV Line Inspection

Sunrise Power Plant Fellows, CA

Summary

This report describes the electrical condition of the 2- 230 kV power lines that originate at the Sunrise generating plant and terminate at La Paloma's 230 kV switchyard.

The line patrol inspects and notes the following:

- 1) Condition of tower, foundation and ground straps
- 2) Condition of conductors and hardware including spacers and splices.
- 3) Vegetation and other threats

The line patrol was performed during the day of October 18, 2023 from 0730 thru 1700 hours.

The inspection was performed from the ground using binoculars.

Condition of Towers, Foundations and Ground Straps

No anomalies were observed pertaining to the towers, foundations and grounds.

Condition of Conductors and Associated Hardware

No anomalies were observed pertaining to the conductors, insulators, spacers and other associated hardware including splices.

Vegetation and Other Threats

No vegetation is encroaching on the power line's right of way. All structures are clear of bird nests and other contaminants.

Conclusions

The power lines appear to be in good condition with no loose or failing hardware.

The FERC form that shows the date of the patrol and conditions noted has been included with this summary

FERC Vegetation Management Practices Reporting Template: 12 a).

Subject	765 kV	500 kV	345 kV	230 kV	Tie-line Interconnection facilities of other voltages
Range of ROW Width Maintained	N/A	150-250 feet Widths vary depending on site-related factors, such as right-of-way agreements with property owners, Department of Transportation restrictions, USDA Forest Service Special Use Permit requirements, multiple lines in a corridor, construction (single pole or steel tower, for example) and other reasons.	125-200 feet Widths vary depending on site-related factors, such as right-of-way agreements with property owners, Department of Transportation restrictions, USDA Forest Service Special Use Permit requirements, multiple lines in a corridor, construction (single pole or steel tower, for example) and other reasons.	75-150 feet Widths vary depending on site-related factors, such as right-of-way agreements with property owners, Department of Transportation restrictions, USDA Forest Service Special Use Permit requirements, multiple lines in a corridor, construction (single pole or "H" structure, for example) and other reasons.	50-125 feet Widths vary depending on site-related factors, such as right-of-way agreements with property owners, Department of Transportation restrictions, USDA Forest Service Special Use Permit requirements, voltage, multiple lines in a corridor, construction (single pole or "H" structure, for example) and other reasons.
Minimum Clearance Assumptions	N/A	Side: 15 feet Under: 15 feet	Side: 15 feet Under: 15 feet	Side: 15 feet Under: 15 feet	Side: 15 feet Under: 15 feet

Ground inspection	N/A	Twice annually	Twice annually	Annual or Twice annually	Annual
Aerial Inspection	N/A	Annual	Every 5 yrs	Annual on Certain Circuits	N/A

Vegetation Management Program Template 12 a) Descriptors.

Described below are instructions explaining the type of vegetation management program information to provide under column headings. Sample entries are listed in brackets. Do not leave any cell blank. If you have no response in a particular cell, enter "none."

Column Descriptions

Right-of-Way (ROW) Width Maintained – List the normal ROW width or range of ROW widths maintained (not necessarily the legal ROW width) for each voltage level (e.g. 150-180'). If you enter a range, explain it.

Minimum Clearance Assumptions – List the minimum clearances maintained between conductor and vegetation (e.g. 30', 35', 20-25' etc.).

Standards Utilized for Clearances – List NESC, ANSI, State Regulatory, company specific standards or other vegetation standards applicable for maintaining the transmission system. (e.g. ANSI 300, NESC Rule 218, etc.). Provide citations for publically available documents. If specific standards are not publicly available, elaborate. For internal corporate standards, attach full procedures.

Ground Inspection – Indicate use and frequency of non-aerial transmission corridor inspections. (e.g. Annual, 2 × Annual, 20% of line miles annually, none, etc.).

Aerial Inspection – Indicate use and frequency of aerial inspections performed on transmission system (e.g. Annual, 2 × Annual, none, 20% of line miles annually, none, ext.).

Vegetation Management Strategy - Indicate primary strategy used for transmission maintenance for comprehensive maintenance on ROW (e.g. All vegetation removed where easements authorize, low-growing [compatible] vegetation allowed on ROW, non-compatible vegetation cleared, mowed, side pruned, herbicide applied etc.). Indicate which standard is the basis for each practice.

Alternative Vegetative Management Strategy – Indicate strategy used where preferred vegetation management methods can not be implemented due to restrictive easements, political, legal, environmental restrictions, or other impediments. (e.g. side pruning, pruning trees under transmission line, etc.)

FERC Vegetation Management Practices Reporting Template: 12 b), c) d).

Voltage	State(s)	Facility	Inspection Frequency		Last Inspection		Inspection Findings	Corrective Action		
			Ground	Aerial	Date	Type	Summer Readiness	Action Taken	Date Completed	Finished by 6/14? (12 d.)
230	CA	Sunrise-La Paloma #1	1x Yr	n/a	10/18/2023	GROUND	No issues	NA		
230	CA	Sunrise-La Paloma #2	1x Yr	n/a	10/18/2023	GROUND	No issues	NA		

FERC Vegetation Management Practices Reporting Template: 12 b), c) and d) Descriptors.

- 1). To satisfy FERC Order 12 b), c) and d), list all designated transmission facilities on which the reporting transmission provider is responsible for maintaining vegetation.
- 2). Column A: VOLTAGE. Specify Line Voltage.
- 3). Column B: STATES(S). Indicate the state or states through which the facility line runs.
- 4). Column C: FACILITY. Indicate specific facility identifier (Alvey-Dixonville, for example).
- 5). Column D and E: INSPECTION FREQUENCY. Indicate if or how often facilities are inspected by ground or air for vegetation management purposes. If no inspections were conducted, fill in N/A.
- 6). Column F and G: LAST INSPECTION. Provide the date of last patrol in column F, and identify patrol type (e.g. aerial or ground) in G. If no inspections were conducted, fill in N/A.
- 7). Column H. INSPECTION FINDINGS. Provide a summary of conditions that require remediation to ensure vegetation clearance (e.g. "12 off right-of-way danger trees", or "35 acres of brush and trees to be cleared"). If the transmission provider uses a database populated with more specific information (GPS or span by span locations, for example), the provider may load those data points into this section. Subject conditions are those, which in the opinion of the transmission provider, must be cleared to ensure vegetation clearance. If none were found, indicate "none."
- 8). Column I, J and K: CORRECTIVE ACTION. Describe action taken in Column I, and enter the date of corrective action in Column H. If corrective action has not been completed, enter "N/A.." Indicate whether or not actionable items were completed by June 14, 2004 ("yes" or "no") to satisfy 12 d).

ATTACHMENT I: COMPLIANCE MATRIX

Status for CEC Conditional Requirements

Cond No.	Status	Verification Requirement	Planned/Actual Submittal	Due Date	Approved Date	Requirement Comment
AQ-1	ongoing	No air contaminant shall be released into the atmosphere which causes a public nuisance. The project owner shall make the site available for inspection by representatives of the District, California Air Resources Board (CARB) and the Commission.	Site available for inspection.	Ongoing	N/A	
AQ-2	Approved	The project owner shall provide copies of the design drawings of the catalyst system chosen and the continuous emission monitor design detail to the CPM and the District at least 30 days prior to commencement of construction.	At least 30 days prior to start of construction.	11/29/2001	12/10/2001	
AQ-5	ongoing	Combustion turbine generator (CTG) and electric generator lube oil vents shall be equipped with mist eliminators. Visible emissions from lube oil vents shall not exceed 5% opacity, except for three minutes in any hour. The project owner shall make the site available for inspection by representatives of the District, CARB, and the Commission.	Site available for inspection	Ongoing	N/A	
AQ-6	ongoing	The CTG shall be equipped with continuously recording fuel gas flowmeter. The information above shall be included in the quarterly reports of Condition AQ-31.	With quarterly reports.	Ongoing	Ongoing	Addressed by AQ-31.
AQ-7	ongoing	CTG exhaust after the SCR unit shall be equipped with continuously recording emissions monitor(s) dedicated to this unit for NOx, CO, and O2. Continuous emissions monitor(s) shall meet the requirements of 40 CFR part 60, Appendices B and F, and 40 CFR part 75, and District-approved protocol and shall be capable of monitoring emissions during normal operating conditions and during startups and shutdowns, provided the CEM(s) pass the relative accuracy requirement specified in condition AQ-23. If relative accuracy of CEM(s) cannot be demonstrated during startup conditions, CEM results during startup and shutdown events shall be replaced with startup emission rates obtained from source testing to determine compliance with emission limits in conditions AQ-14, -15, -16, and -17. The project owner shall make the site available for inspection by representatives of the District, CARB and the Commission.	Site available for inspection	Ongoing	Ongoing	
AQ-8	ongoing	Exhaust stack shall be equipped with permanent provisions to allow collection of stack gas samples consistent with EPA test methods. The project owner shall make the site available for inspection by representatives of the District, CARB and the Commission.	Site available for inspections	Ongoing	N/A	
AQ-9	ongoing	CTG shall be fired exclusively on natural gas, consisting primarily of methane and ethane, with a sulfur content no greater than 0.75 grains of sulfur compounds (as S) per 100 dry standard cubic feet of natural gas. Please refer to Condition AQ-30.	In quarterly reports.	Ongoing	N/A	Addressed by AQ-30.
AQ-10	ongoing	Startup is defined as the period beginning with turbine initial firing. Shutdown is defined as the period beginning with initiation of turbine shutdown sequence and ending with cessation of firing of the gas turbine engine. Startup and shutdown duration shall not exceed each 60 minutes for a hot start up, 128 minutes for a warm startup, and 230 minutes for a cold startup, and one hour for a shutdown, per occurrence. The project owner shall provide records of the emissions and operations as part of the quarterly reports of Condition AQ-31	In quarterly reports.	N/A	N/A	Addressed by AQ-31.
AQ-14	ongoing	The project owner shall provide records of the emissions as part of the quarterly reports of Condition AQ-31.	In quarterly reports.	Ongoing	N/A	Addressed by AQ-31.
AQ-15	ongoing	The project owner shall provide records of the emissions as part of the quarterly reports of Condition AQ-31.	In quarterly reports.	Ongoing	N/A	Addressed by AQ-31.
AQ-16	ongoing	The project owner shall provide records of the emissions as part of the quarterly reports of Condition AQ-31.	In quarterly reports.	Ongoing	N/A	Addressed by AQ-31.
AQ-17	ongoing	The project owner shall provide records of the emissions as part of the quarterly reports of Condition AQ-31.	In quarterly reports.	Ongoing	N/A	Addressed by AQ-31.

Status for CEC Conditional Requirements

Cond No.	Status	Verification Requirement	Planned/Actual Submittal	Due Date	Approved Date	Requirement Comment
AQ-18	Approved	Phase I - The project owner shall provide copies of all the necessary ERC certificates to the CPM.	No later than 30 days before start of construction.	11/01/2000	12/04/2000	ERC certificates surrendered to the District 12-26-00.
	Approved	Phase II - The project owner shall provide copies of all necessary ERC certificates to the CPM no later than 30 days prior to the commencement of construction.	No later than 30 days before start of construction.	12/14/2001	12/21/2001	ERC certificates surrendered to the District 12/14/01. Received letter from District on 4/3/03 stating that offset submission has satisfied requirements. Forwarded to CEC, approved on 5/22/03.
AQ-19	Approved	The Project owner shall provide copies of all the necessary ERC certificates to the CPM no later than 30 days prior to the commencement of construction.		12/06/2001	12/10/2001	Agreements to secure ERCs submitted 12/6/01, approved 12/10/01. ERC withdrawal filing fees letter submitted 4/2/03, approved 5/22/03.
AQ-20	ongoing	Source testing to demonstrate compliance with the NOx, CO, and VOC short-term emission limits (lbs/hr and ppmv @ 15% O2) shall be conducted within 60 days of initial operation of CTG and annually thereafter by District witnessed sampling of exhaust gas by qualified independent source testers. Please refer to the information requirements of Condition AQ-25.	Submittals covered under AQ-25.	-----	N/A	Refer to AQ-25. Source testing was performed in June 2017.
AQ-22	ongoing	Source testing to demonstrate compliance with PM10 short-term emission limit (lbs/hr) shall be conducted within 60 days of initial operation, and annually thereafter by District witnessed sampling of exhaust gas by qualified independent source testers. If CTG is operated during the winter (December, January, or February) then additional testing shall be conducted within 30 days of such operation. Please refer to the information requirements of Condition AQ-25.	Submittals covered under AQ-25.	-----	N/A	Refer to AQ-25. Source testing was performed in June 2017.
AQ-23	ongoing	Source testing of startup NOx, CO, VOC, and PM10 mass emission rates shall be conducted for one of the gas turbine engines (S-3746-1-0 or '-2-0) upon initial operation and at least once every seven years thereafter by District witnessed in-situ sampling of exhaust gases by a qualified independent source test firm. CEM relative accuracy shall be determined during startup source testing in accordance with district-approved protocol. Please refer to the information requirements of Condition AQ-25.	Submittals covered under AQ-25.	-----	N/A	Refer to AQ-25. Startup source testing performed in June 2016.
AQ-24	ongoing	Compliance with natural gas sulfur content limit shall be demonstrated within 60 days of operation of each gas turbine engine and periodically as required by 40 CFR 60 Subpart GG and 40 CFR 75. Please refer to the information requirements of Condition AQ-30.	In quarterly reports.	08/15/2001	N/A	Addressed by AQ-30.
AQ-25	ongoing	The project owner shall notify the CPM and the District 30 days prior to any compliance source test.	30 days prior to any source test.	-----	-----	Notifications have been submitted on time.
	ongoing	The Project owner shall provide a source test plan to the CPM and District for the CPM and District approval 15 days prior to testing.	15 days prior to testing.	-----	-----	Source Test Plans have been submitted on time.
	ongoing	The results and field data collected by the source tests shall be submitted to the CPM and the District within 60 days of testing.	Within 60 days of testing.	-----	-----	Source Test Report and all results have been submitted on time.
AQ-26	ongoing	The source test plans for the initial and seven-year source test shall include a method for measuring the CO/VOC surrogate relationship that will be used to demonstrate compliance with VOC lbs/hr, lbs/day, and lbs/twelve month rolling average emission limits. The Project owner shall provide a source test plan to the CPM and District for CPM and District approval 15 days prior to testing. Initial source testing shall occur no later than 90 days following the first day of combined cycle operation.	15 days prior to testing.	-----	-----	To be incorporated into emissions test plan under AQ-25. See AQ-25 for submittal dates.

CUL-11	Approved	The project owner shall concurrently provide the designated BLM representative(s) with copies of all information submitted to the CPM in response to Energy Commission conditions of certification. The project owner shall provide the CPM with current copies of BLM permit conditions and requirements; the criteria and requirements for the designation of a cultural resource specialist; the contents of its Archaeological Resource Treatment Plan; and any other requirements pertinent to the protection of cultural resources potentially affected by the Sunrise project. In each Monthly Compliance Report, the project owner shall provide the CPM with a summary outlining the measures it has taken to ensure that it has met both BLM and Energy Commission requirements.	In each Monthly Compliance Report.	10/24/2001	11/14/2001	Designated BLM representative(s) including the CDFG and USFWS are provided copies of the MCR.
CUL-12	Conditional	The project owner shall maintain in its compliance files, copies of signed contracts or agreements with the museum(s), university(ies), or other appropriate research specialists which will ensure the necessary recovery, preparation for analysis, and analysis of cultural resource materials collected during data recovery and mitigation for the project. The project owner shall maintain these files for the life of the project and the files shall be kept available for periodic audit by the CPM. Information as to the specific location of sensitive cultural resource site shall be kept confidential and accessible only to qualified cultural resource specialists.	No submittal required. Audit only by CPM.	Conditional	-----	
CUL-13	Conditional	The project owner shall ensure that the designated cultural resources specialist prepares the proposed scope of work within ninety (90) days following completion of the data recovery and site mitigation work. Within seven (7) days after completion of the proposed scope of work, the project owner shall submit it to the CPM for review and written approval.	Within ninety (90) days following completion of the data recovery and site mitigation work.	Conditional	-----	
CUL-14	Submitted	The project owner shall ensure that the designated cultural resources specialists completes the Cultural Resources Report within ninety (90) days following completion of the analysis of the recovered cultural materials. Within seven (7) days after completion of the report, the project owner shall submit the Cultural Resources Report to the CPM for review and written approval.	Ninety (90) days following completion of the analysis.	05/03/2005	-----	Draft submitted 5/3/05. CEC comments received 6/7/05.
CUL-15	Conditional	Within thirty (30) days after receiving approval of the Cultural Resources Report, the project owner shall provide to the CPM documentation that the report has been sent to the public repository receiving the recovered data and materials for curation, the SHPO, and the appropriate archaeological information center(s).	Within thirty (30) days after receiving approval of the Cultural Resources Report.	Conditional	-----	
	Conditional	For the life of the project the project owner shall maintain in its compliance files copies of all documentation related to the filing of the CPM-approved Cultural Resources Report with the public repository receiving the recovered data and materials for curation, the SHPO, and the appropriate archaeological information center(s).	No submittal required.	Conditional	-----	
CUL-16	Conditional	The project owner shall ensure that all recovered cultural resource materials are delivered for curation within thirty (30) days after providing the CPM-approved Cultural Resource Report to the public repository receiving the recovered data and materials, to the SHPO, and to the appropriate archaeological information center(s).	Within 30 days after providing report.	Conditional	-----	
	Conditional	For the life of the project the project owner shall maintain in its project history or compliance files, copies of signed contracts or agreements with the public repository to which the project owner has delivered for curation all cultural resource materials collected during data recovery and mitigation for the project.	No submittal required.	Conditional	-----	
CUL-17	Conditional	The project owner shall include information about the activities related to this condition in the summary of the designated cultural resource specialist's daily log submitted to the CPM.	With CR log summaries.	Conditional	-----

GEO-1	Approved	At least 30 days (or a lesser number of days mutually agreed to by the project owner and the Kern County Chief Building Official ((CBO)) prior to the start of construction, the project owner shall submit to the CPM the name(s) and license number(s) of the certified engineering geologist(s) assigned to the project. The submittal should include a statement that CPM approval is needed. The CPM will approve or disapprove of the engineering geologist(s) and will notify the project owner of its findings within 15 days of receipt of the submittal.	At least 30 days prior to the start of construction.	11/26/2001	11/27/2001	
	Conditional	If the engineering geologist(s) is subsequently replaced, the project owner shall submit for approval the name(s) and license number(s) of the newly assigned Individual(s) to the CPM. The CPM will approve or disapprove of the engineering geologist(s) and will notify the project owner of the findings within 15 days of receipt of the notice of personnel change.	If engineering geologist is replaced.	Conditional	-----	
GEO-2	Approved	(1) Within 15 days after submittal of the application(s) for grading permit(s) to the CBO, the project owner shall submit a signed statement to the CPM stating that the Engineering Geology Report has been submitted to the CBO as a supplement to the plans and specifications.	Within 15 days after submittal of application for grading permit.	10/29/2001	07/02/2001	Submitted 6/14/01. Resubmitted Phase I report on 10/29/01. No new report required for Phase II.
	Approved	(2) Within 90 days following completion of the final grading, the project owner shall submit copies of the Final Engineering Geology Report required by the 1998 CBC, Appendix Chapter 33, Section 3318 - Completion of Work, to the CPM and the CBO.	Within 90 days following completion of final grading.	06/14/2001	07/02/2001	Submitted Phase I report on 6/14/01. Report is unchanged for Phase II.
GEO-3	Approved	At least sixty (30) days prior to the start of construction, the project owner shall submit to the CPM a copy of DOGGR's letter commenting on the linear facility development plan. Within fifteen days (15) days of the receipt of the development plan and the DOGGR comment letter on the plan, the CPM will either approve or comment and deny the plan, and transmit the approval or denial letter to the project owner.	At least sixty (30) days prior to the start of construction.	11/06/2001	11/09/2001	Submitted to DOGGR on 10/22/01. DOGGR comment letter submitted to CEC on 11/6/01.
PAL-1	Approved	Ninety (90) days prior to the start of construction, or a lesser period of time mutually agreed to by the project owner and the CPM, the project owner shall submit the name and resume and the availability for its designated paleontological resources specialist, to the CPM for review and approval. The CPM shall provide written approval or disapproval of the proposed paleontological resources specialist.	90 days prior to start of construction.	10/04/2001	10/12/2001	
	Conditional	At least ten (10) days prior to the termination or release of a designated paleontological resources specialist, the project owner shall obtain CPM approval of the replacement specialist by submitting to the CPM the name and resume of the proposed new designated paleontological resources specialist. Should emergency replacement of the designated specialist become necessary, the project owner shall immediately notify the CPM to discuss the qualifications of its proposed replacement specialist.	At least 10 days prior to termination.	-----	-----	
PAL-2	Approved	Sixty (30) days prior to the start of construction on the project, or a lesser period of time mutually agreed to by the project owner and CPM, the project owner shall provide the CPM with a copy of the Monitoring and Mitigation Plan prepared by the designated paleontological resources specialist for review and approval. If the plan is not approved, the project owner, the designated Paleontological resources specialist, and the CPM shall meet to discuss comments and negotiate necessary changes.	Sixty (30) days prior to the start of construction on the project, or lesser time as mutually agreed	11/29/2001	12/06/2001	

Status for CEC Conditional Requirements

Cond No.	Status	Verification Requirement	Planned/Actual Submittal	Due Date	Approved Date	Requirement Comment
PAL-3	Approved	Thirty (30) days prior to the start of project construction, or a lesser period of time mutually agreed to by the project owner and the CPM, the project owner shall submit to the CPM for review, comment, and written approval, the proposed employee training program and the set of reporting procedures the workers are to follow if paleontological resources are encountered during project construction. If the employee training program and set of procedures are not approved, the project owner, the designated paleontological resources specialist, and the CPM shall meet to discuss comments and negotiate necessary changes, before the beginning of construction.	Thirty (30) days prior to the start of project construction, or lesser period as mutually agreed	10/04/2001	10/12/2001	
	Complete	Documentation for training of additional new employees shall be provided in subsequent Monthly Compliance Reports, as appropriate.	In Monthly Compliance Report.	N/A	N/A	MCR's are no longer being submitted since construction has been completed.
PAL-4	Complete	The project owner shall include in the Monthly Compliance Reports a summary of paleontological activities conducted by the designated paleontological resources specialist.	In Monthly Compliance Reports.	Monthly	N/A	MCR's are no longer being submitted since construction has been completed.
PAL-5	ongoing	The project owner shall maintain in its compliance files copies of signed contracts or agreements with the designated paleontological resources specialist and other qualified research specialists who will ensure the necessary data and fossil recovery, mapping, preparation for analysis, analysis, identification and inventory, and preparation for and delivery of all significant paleontological resource materials collected during data recovery and mitigation for the project. The project owner shall maintain these files for a period of three years after completion and approval of the CPM-approved Paleontological Resources Report and shall keep these files available for periodic audit by the CPM.	No Submittal Required.	Ongoing	-----	
PAL-6	Complete	The project owner shall submit a copy of the Paleontological Resources Report to the CPM for review and approval under a cover letter stating that it is a confidential document. The report is to be prepared by the designated paleontological resources specialist within 90 days following completion of the analysis of the recovered fossil materials.	90 days following completion of the analysis.	06/07/2005	-----	
PAL-7	Not Started	The project owner shall include a description of closure activities described above in the facility closure plan.	With Facility Closure Plan.	-----	-----	
HAZ-1	ongoing	The project owner shall provide to the CPM, in the Annual Compliance Report, a list of hazardous materials contained at the facility in reportable quantities.	With Annual Compliance Report.	Annually	-----	
HAZ-2	Approved	At least sixty (60) days prior to delivery of anhydrous ammonia to the facility, the project owner shall provide the final plans listed above to the CPM for approval.	60 days prior to ammonia delivery.	02/21/2003	06/23/2003	Submitted 2/21/03.
LAND USE-1	Approved	At least 60 days prior to the start of any ground disturbance related to construction for Sunrise II, the project owner shall submit a copy of the letter of comment from the Kern County Planning Director to the CPM for review and approval. The project owner shall submit any required revisions within 30 days of notification by the CPM.	At least 60 days prior to any ground disturbance.	11/28/2001	11/29/2001	

Status for CEC Conditional Requirements

Cond No.	Status	Verification Requirement	Planned/Actual Submittal	Due Date	Approved Date	Requirement Comment
LAND USE-2	Approved	Within 90 days following the commencement of construction, the project owner shall submit evidence that \$30,000 has been placed in trust in accordance with the above Condition. The project owner shall include in routine compliance reports a description of the date, amount and purpose of any disbursements from the trust when made available by the trustee.	90 days after commencement of construction	03/13/2001	03/19/2001	Submitted evidence of Trust Contribution with No. 3 MCR
LAND USE-3	In Progress	Within 30 days following the restoration of the 14.3 acres of land disturbed for construction of the Sunrise II water line route, the project owner shall submit a copy of the letter from the property owner to the CPM.	30 days after waterline construction completion.	Later	Later	Sunrise submitted a proposal to the CEC in 2007 to allow natural revegetation to occur based on the recommendation of the Sunrise contracted Biologist.
NOISE-1	Approved	The project owner shall transmit to the Compliance Project Manager (CPM) in the first monthly construction report following the start of rough grading, a statement signed by the project manager attesting that the above notification has been performed, describing the method of that notification, and including a sample letter, poster or other notice, as appropriate. This statement shall also attest that the telephone number has been established and posted at the site, and also provide the telephone number.	First Monthly Construction Report.	11/26/2001	12/06/2001	Notices posted on 11/28/01. Notification logs maintained on site. Statement in 1/15/02 MCR.
NOISE-2	Conditional	Within 30 days of receiving a noise complaint, the project owner shall file a copy of the Noise Complaint Resolution Form, or similar instrument approved by the CPM, with Kern County and with the CPM documenting the resolution of the complaint. If mitigation is required to resolve a complaint, and the complaint is not resolved within a 30-day period, the project owner shall submit an updated Noise Complaint Resolution Form when the mitigation is finally implemented.	Within 30 days of receiving a noise complaint.	Conditional	-----	
NOISE-3	Approved	Prior to the start of the Sunrise project construction, the project owner shall submit to the CPM for review a noise control program. The noise control program shall be used to reduce employee exposure to high noise levels during construction and also to comply with applicable OSHA standards. At least 30 days prior to the start of rough grading, the project owner shall submit to the CPM the above referenced program. The project owner shall make the program available to OSHA upon request.	At least 30 days prior to the start of rough grading.	11/09/2001	11/19/2001	Submitted to CEC on 11/7/01.
NOISE-4	Approved	Within 30 days after first achieving an output of 80 percent or greater of rated output, the project owner shall conduct the above described noise survey. Within 30 days after completing the survey, the project owner shall submit a summary report of the survey to Kern County and the CPM. Included in the report will be a description of any additional mitigation measures necessary to achieve compliance with the above listed noise limits, and a schedule, subject to CPM approval, for implementing these measures. Within 30 days of completion of installation of these measures, the project owner shall submit to the CPM a summary report of a new noise survey, performed as described above and showing compliance with this condition.	Within 30 days after completing noise survey.	06/12/2003	07/25/2003	Survey performed on 5/22-23/03, report submitted 6/12/03, approved 7/25/03

Status for CEC Conditional Requirements

Cond No.	Status	Verification Requirement	Planned/Actual Submittal	Due Date	Approved Date	Requirement Comment
NOISE-5	Approved	The project owner shall conduct an occupational noise survey to identify the noise hazardous areas in the facility. The survey shall be conducted within thirty (30) days after the facility is operating at an output of 80% of rated capacity or greater, and shall be conducted by a qualified person in accordance with the provisions of Title 8, California Code of Regulations sections 5095-5100 (Article 105) and Title 29, Code of Federal Regulations, Part 1910. The survey results shall be used to determine the magnitude of employee noise exposure. The project owner shall prepare a report of the survey results and, if necessary, identify proposed mitigation measures that will be employed to comply with the applicable state and federal regulations. Within 30 days after completing the survey, the project owner shall submit the noise survey report to the CPM. The project owner shall make the report available to OSHA upon request.	Within 30 days after completing the survey.	07/10/2003	08/04/2003	Survey conducted 5/22-23/03, report submitted 7/10/03.
NOISE-6	Complete	The project owner shall transmit to the CPM in the first Monthly Construction Report a statement certifying that the above restrictions will be observed throughout the construction of the project. With respect to potentially noisy construction during restricted hours, the project owner shall also maintain notification logs and concern-resolution logs, and provide both in the Monthly Compliance Report.	First Monthly Construction Report.	-----	-----	Statement in 1/15/02 MCR.
SOCIO-1	Complete	The project owner shall provide proof of payment of the statutory development fee in the next Monthly Compliance Report following the payment.	In Monthly Compliance Report following payment.	05/14/2001	Pending	According to Robert Sawyer, (Principal Building Inspector, Kern County Engineering & Survey Services Dept.) Sunrise is located in a District that does not collect statutory school impact development fees. Therefore, Sunrise had to obtain building permits.
SOCIO-2	Complete	Not later than 45 days after certification, the project owner shall provide the CPM with a copy of an agreement with the KCFD and other power plant projects discussed in the testimony for funding of items a) through c) above.	Not later than 45 days after certification.	06/14/2001	Pending	Final agreement executed on 5/15/01. Submitted in monthly report on 6/14/01.
SW-1	Approved	Sixty days prior to the site mobilization, the project owner will submit to the Energy Commission Compliance Project Manager (CPM) a copy of the Storm Water Pollution Prevention Plan (SWPPP).	2 weeks prior to start of construction.	11/15/2001	01/03/2003	Subtd 11/15/01. SW-2	Approved	The final erosion control and revegetation plan shall be submitted to the Energy Commission CPM for approval 60 days prior to the initiation of any earth moving activities associated with any new linear facilities or site expansion.	60 days prior to start of earth moving activities.	11/07/2001	02/28/2002	Submitted on 11/7/01 w/ supplements on 12/6/01, 12/13/01. Received partial approval 12/14/01. Waterline portion not yet approved. Waterline submittal 1/23/02. Road submittal 1/31/02, 2/19/02, approved 2/28/02
SW-3	Submitted	The final UIC permit and/or an emergency/temporary authorization issued by the U.S. EPA Region IX for the injection wells, a copy of the ROWD accepted by the CVRWQCB, and a copy of the waiver issued by the CVRWQCB shall be provided to the Energy Commission CPM 60 days prior to the start of construction of the disposal wells and/or receiving any wastewater for injection.	60 days prior to start of wastewater line construction.	-----	-----	Application submitted. Supplement submitted 12/13/01. Final UIC permit issued 8/6/02 (cc'd to CEC, and mentioned in 8/02 MCR).
	ongoing	Copies of permit changes and monitoring or other reports required by the U.S. EPA shall be provided on a continuing basis to the CPM within 30 days of their submittal to the U.S. EPA.	30 days after submittal to EPA.	-----	-----	Modification request sent to EPA 10/17/02. Permission to drill first 2 wells 11/8/02; inject 1/17/03; drill 3&4 3/21/03; increase injection pressure 4/11/03; inject in wells 3&4 4/17/03; exceed inj rate limit 5/29/03. etc. All docs submitted in MCRs
SW-4	ongoing	The project owner will submit a groundwater use summary to the CPM in the Annual Compliance Reports for the life of the project. The annual summary shall include the monthly range, monthly average, and total groundwater use by the project in both gallons-per-minute and acre-feet. Following the first year of operation, the annual summary will also include the yearly range and yearly average groundwater use by the project.	In annual compliance report.	Annually	07/11/2003	Water mitigation plan 7/17/02 and 4/15/03, approved 7/11/03. Dismissal of Berrenda Mesa lawsuit 5/28/03
SW-5	Approved	The project owner shall submit a draft Groundwater Monitoring Plan to the CPM that implements a procedure that uses the "trigger" or critical level of groundwater where significant impacts begin to occur for review and approval no later than 180 days prior to the start of commercial operation. A final plan must be approved by the CPM prior to the start of commercial operation.	180 days prior to commercial operation.	12/31/2002	06/06/2003	Submitted on 12/31/02. Revised 5/15/03. WKWD letter 4/1/03.
SW-6	Conditional	The project owner shall submit a draft Alternative Cooling Plan by the last day of the end of the second full year of operation for review and final notification based on the critical level trigger, the project owner shall implement the "Alternative Cooling Plan" if it includes an alternative source of cooling water, or in two years if an alternative cooling technology is placed in operation, or cease operation until such a time as the Alternative Cooling Plan is in effect.	730 days after commercial operation.	-----	-----	

Status for CEC Conditional Requirements

Cond No.	Status	Verification Requirement	Planned/Actual Submittal	Due Date	Approved Date	Requirement Comment
SW-7	ongoing	The project owner shall submit a wastewater discharge summary to the CPM in the Annual Compliance Reports for the life of the project. The annual summary shall include the monthly volume of pre-conservation and post-conservation wastewater discharged by the project in both gallons-per-minute and acre-feet per year. Following the first year of operation, the annual summary will also include the yearly range and yearly average wastewater discharged by the conservation submittals ongoing project. The project owner will provide proof that the selected water conservation measure is installed and operating, or implemented if offsite, as required within one year following the start of commercial operation.	In annual compliance report.	Annually	03/08/2005	Submitted project plan 2/25/03, supplemented 5/28/03, approved 1/15/04. Conservation documentation deemed complete 3/8/05. Post-conservation documentation not required after 2004 annual report. Pre-conservation submittals ongoing in annual reports.
TRANS-1	Complete	In the Monthly Compliance Reports, the project owner shall submit copies of any oversize and overweight transportation permits received during that reporting period. In addition, the project owner shall retain copies of these permits and supporting documentation in its compliance file	In the Monthly Compliance Reports.	Monthly	-----	Copies of permits included with MCR. MCR's are no longer being submitted since construction has been completed.
TRANS-2	Complete	In Monthly Compliance Reports, the project owner shall submit copies of any encroachment permits received during the reporting period. In addition, the project owner shall retain copies of these permits and supporting documentation in its compliance file for at least six months after the start of commercial operation.	In the Monthly Compliance Reports.	N/A	N/A	Copies of permits included with MCR. MCR's are no longer being submitted since construction has been completed.
TRANS-3	Approved	Thirty (30) days prior to start of construction, or a lesser period of time as mutually agreed to by the project owner and the CPM, the project owner shall provide to the CPM for review and approval, a copy of its construction traffic control plan and implementation program.	30 days prior to start of construction.	11/09/2001	11/21/2001	submitted 11/9/01, appvd 11/21/01. Modified 10/15/02 (pending)
TRANS-4	Approved	Thirty (30) days prior to wire stringing, or a lesser period of time as mutually agreed to by the project owner and the CPM, the project owner shall provide to the CPM for review and approval, a copy of its safety plan and implementation program.	30 days prior to wire stringing.	04/03/2001	04/19/2001	Approved from Phase I.
TRANS-5	Complete	Within 30 days of the completion of project construction, the project owner shall meet with the CPM and Kern County and determine if any roadway repairs are necessary. The project owner shall provide a copy of a letter from Kern County acknowledging satisfactory completion of the roadway repairs, if necessary in the first Annual Compliance Report following start of operation of the Sunrise project.	Within 30 days of construction completion.	-----	-----	Submitted letter of negligible impact with pre- and post-construction photos to county and CPM on 11/15/04.
TRANS-6	Approved	The Traffic Control Plan (TCP) shall be submitted to CalTrans for review at least 30 days prior to start of project construction. The project owner shall provide a copy of a letter from CalTrans acknowledging acceptance of the Traffic Control Plan in a Monthly Compliance Report within 30 days of receipt of the letter.	At least 30 days prior to construction start.	01/15/2002	11/01/2002	Submitted to Caltrans on 11/28/01. Caltrans approval included in 1/15/02 MCR. Submitted Caltrans letter (no flagman) on 10/15/02. Approved by CEC on 11/1/02.
TRANS-7	Approved	The fair share amount shall be paid to CalTrans at least 30 days prior to start of commercial operation. The project owner shall provide a copy of a letter from CalTrans acknowledging receipt of the fair share amount in a Monthly Compliance Report within 30 days of receipt of the letter.	30 days prior to start of commercial operation.	06/13/2001	08/07/2001	Fair share amount paid on 7/20/01.

TLSN-1	Approved	Thirty days before start of transmission line construction, or a shorter time period as mutually agreed to by the project owner and the Project Compliance Manager (CPM), the project owner shall submit to the Commission's CPM a letter signed by a California registered engineer affirming that the transmission line will be constructed according the requirements of GO-95, and Title 8, Section 2700 et seq. of the California Code of Regulations.	Thirty days before start of transmission line construction	02/06/2003	03/19/2003	Submitted 2/6/03.
TLSN-2	ongoing	All reports of line-related complaints shall be summarized and included in the Annual Compliance Report to the CPM.	with Annual Compliance Report.	Annually	-----	
TLSN-3	Complete	The project owner shall file copies of the pre-and post-energization measurements with the CPM within 60 days after measurements are completed.	60 days after measurements are completed.	01/13/2004	Pending	Submitted 1/13/04
TLSN-4	ongoing	The project owner shall provide a summary of inspection results and any fire prevention activities carried out along the right-of-way, in a report to be filed at completion of construction and yearly after that, for a period of five years.	Completion of construction and yearly after that.	Annually	-----	
TLSN-5	Approved	The project owner shall submit the proposed letter to the CPM for review and approval 30 days prior to mailing to the property owners and shall maintain a record of correspondence (notification and response) related to this requirement, in a compliance file at the plant site. The project owner shall notify the CPM in the first Monthly Compliance Report that letters have been mailed and that copies are on file.	30 days prior to mailing to the property owners & with first Monthly Compliance Report.	01/25/2001	01/26/2001	
TLSN-6	Approved	The project owner shall ensure the grounding of any ungrounded permanent metallic objects identified during transmission line construction within the right-of-way, regardless of ownership. Such objects shall include fences, gates, and other large permanent chargeable objects. These objects shall be grounded according to procedures specified in the National Electrical Safety Code. At least 10 days before the line is energized, the project owner shall transmit to the CPM a letter confirming compliance with this condition.	At least 10 days before the line is energized.	02/06/2003	03/19/2003	Submitted 2/6/03.
TSE-1	Approved	At least 60 days prior to start of construction of transmission facilities, the project owner shall submit for approval to the CPM, electrical one-line diagrams signed and sealed by the registered professional electrical engineer in responsible charge, a route map, and an engineering description of equipment and the configurations covered by requirements 1a through 1h above. The Detailed Facilities Study and executed interconnection agreement shall concurrently be provided. Substitution of equipment and substation configurations shall be identified and justified by the project owner for CPM approval.	At least 60 days prior to start of construction.	9/2/2003	09/02/2003	Submitted diagrams, maps, and descriptions on 2/6/03. (appvd 3/28/03) DFS and interconnection agreement 5/8/03. Executed agreement submitted 8/13/03.
TSE-2	Conditional	At least 60 days prior to construction of transmission facilities, the project owner shall inform the CPM of any impending changes which may not conform to requirements of TSE-1 and request approval to implement such changes.	At least 60 days prior to construction.		-----	
TSE-3	Approved	Within 60 days after synchronization of the project, the project owner shall transmit to the CPM an engineering description(s), and one-line drawings of the "as-built" facilities, signed and sealed by the registered electrical engineer in charge. A statement attesting to conformance with CPUC GO-95, CPUC Rule No. 21, the PG&E Interconnection Handbook, and these conditions shall be concurrently provided.	Within 60 days after synchronization.	11/12/2003	11/12/2003	Submitted 10/15/03.
