Yes on the Fountain Wind Project

Dear Commission,

I would like to add my voice of support for the Fountain Wind Project. Locating a wind driven power plants is limited to those areas with robust wind energy resources. The proposed area in Shasta County for the Fountain Wind Project is such a location. In fact its location is close by an existing wind power plant, Hatchet Ridge. All energy generating projects create environmental impacts. Weighing the impacts from a plant like Fountain Wind yields far less environmental impacts than those from a project of any other source, especially fossil fuel. Furthermore, California needs renewable energy projects like Fountain Wind in order to meets its greenhouse gas emission reduction goals. I encourage the Commission to use its state mandate and approve the Fountain Wind Project.
