## EXECUTIVE SUMMARY

Hydrostor, Inc. (the User) retained WSP USA Inc. (WSP) to perform a Phase I Environmental Site Assessment (ESA) of the undeveloped parcel located at Assessor's Parcel Number (APN) 431-022-13, Rosamond, Kern County, California (Zevsar Parcel, the subject property). The purpose of this Phase I ESA was to identify recognized environmental conditions (RECs) in connection with the subject property, to the extent feasible, pursuant to the processes prescribed in the American Society for Testing and Materials (ASTM) Practice E 1527-21 entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM Standard); U.S. Environmental Protection Agency (EPA) Rule entitled "Standards and Practices for All Appropriate Inquiries, Final Rule" (AAI Rule), 40 Code of Federal Regulation (CFR) Part 312; the WSP proposal dated February 15, 2023 (the Proposal); and WSP's professional judgment. WSP representatives performed the Phase I ESA in conformance with these criteria.

This summary is to be used only in conjunction with the attached Phase I ESA (the Report), dated March 15, 2023, for the Zevsar parcel located at APN 431-022-13, Rosamond, Kern County, California subject property. All definitions used in this summary have the same meanings as in the Report, and the use of this summary is subject to the limitations and conditions contained in the Report. The Report shall govern in the event of any inconsistency between this summary and the Report.

#### **PROPERTY DESCRIPTION**

The subject property is an undeveloped parcel located at APN 431-022-13, Rosamond, Kern County, California. The unimproved parcel is split by Sierra Highway and a railroad and is approximately 112.19 acres. The left portion (Parcel Portion A) of the property is approximated to be 88.5 acres in size and is accessible from Dawn Road. There is no road bridging the right portion of the property (Parcel Portion B). Parcel Portion B is accessible from 10<sup>th</sup> St W and following one of two dirt roads leading west. No property boundaries or complete fences delineate the subject property. According to the deed, the subject property is currently owned by private citizen.

#### **RECOGNIZED ENVIRONMENTAL CONDITIONS**

WSP did not identify any RECs in connection with the subject property.

#### CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

WSP did not identify any CRECs in connection with the subject property.

#### HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITION

WSP did not identify any HRECs in connection with the subject property.

#### **DE MINIMIS CONDITIONS**

WSP identified the following de minimis condition at the subject property:

- Minor illegal dumping consisting of various solid waste, was found during site reconnaissance.

#### DATA GAPS

WSP did not encounter data gaps in connection with the subject property.

# **1 INTRODUCTION**

### 1.1 SUBJECT PROPERTY DESCRIPTION

The unimproved parcel is noncontiguous and is split by the right-of-way provided to Sierra Highway and a railroad owned and operated by Union Pacific Railroad Company. The parcel is approximately 112.19 acres. The left portion of the parcel is approximated 88.5 acres in size and is accessible from Dawn Road. There is no road connecting the right portion of the parcel. The right parcel is accessible from 10<sup>th</sup> St W and following one of two dirt roads leading west. For the purposes of this ESA study, the parcel to the left of the railroad shall be identified as Parcel Portion A and the parcel to the right of the railroad shall be identified as Parcel Portion B as shown in Figure 2. No property boundaries or complete fences delineate the subject property. According to the deed, the subject property is currently owned by a private citizen.

### 1.1.1 LOCATION

The subject property is located at APN 431-022-13, Rosamond, Kern County, California. The subject property is located on the United States Geological Survey (USGS) Soledad Mountain quadrangle map as shown in Figure 1.

### 1.1.2 LEGAL DESCRIPTION

According to information available through the Kern County Interactive County Map, the subject property is located on APN 431-022-13 and is approximately 112.19 acres and does not have a registered local street address (Kern County 2023). The Kern County assessor records for the subject property are included in Appendix B. The subject property is currently owned by a private citizen. According to the January 28, 2022 deed found in EDR Report Environmental Lien (Appendix C), the subject property has a legal description of the following:

The south half of the southeast quarter and the south half of the northeast quarter of the southeast quarter and the south half of the northwest quarter of the southeast quarter of Section 33, Township 10 North, Range 12, SBB&M. Except any portion of said land lying within the lines of the right of way granted to South Pacific Railroad Company by Act of Congress approved March 3, 1871.

### 1.2 PURPOSE

Hydrostor, Inc. (the User) retained WSP USA Inc. (WSP) to perform a Phase I Environmental Site Assessment (ESA) of the undeveloped parcel located at APN 431-022-13, Rosamond, Kern County, California (Zevsar Parcel, the subject property). The purpose of the Phase I ESA is to identify recognized environmental conditions (RECs) in connection with the subject property, to the extent feasible, pursuant to the processes prescribed in the ASTM Practice E1527-21 entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM Standard); EPA Rule entitled "Standards and Practices for All Appropriate Inquiries, Final Rule" (AAI Rule), 40 CFR Part 312; the WSP proposal dated December 28, 2022 (the Proposal); and WSP's professional judgment. WSP representatives performed the Phase I ESA in conformance with these criteria.

Key definitions from ASTM Practice E1527-21, including Recognized Environmental Condition (REC), Controlled REC (CREC), Historical REC (HREC), and de minimis condition are included in Appendix A. The AAI Rule states that the ASTM Practice may be used to comply with the requirements of the AAI Rule, so, whenever reference is made in this Report to the ASTM Standard, it shall include the AAI Rule.

### 1.3 SCOPE OF WORK

The scope of services for this ESA consisted of the following tasks:

#### **RECORDS REVIEW**

- Reviewing property information from local property assessor to confirm the legal description and location of the subject property. The assessor property search detailed are included in Appendix B.
- Reviewing environmental record sources including federal and state regulatory databases to identify facilities with past or current regulatory enforcement actions within applicable distances of the subject property as defined in the ASTM Standard. The regulatory database search report is presented in Appendix C.
- Reviewing physical setting information sources to identify information about the geologic, hydrogeologic, hydrologic, and topographic conditions in the area of the subject property. The US Geological Survey (USGS) 7.5-minute topographic map of the area of the subject property is shown in Figure 1.
- Reviewing historical documents from historical record requests from public agencies to identify past land use activities at the subject property. Selected historical information obtained during performance of the Phase I ESA is included in Appendix D.
- Reviewing of publicly ascertainable information about the subject property from public databases managed by agencies.
   Selected information is included in Appendix G.

#### SITE RECONNAISSANCE

Performing a visual inspection of the subject property and surrounding properties to identify potential sources of chemical and petroleum contamination such as aboveground storage tanks (ASTs), underground storage tanks (USTs), potential sources of polychlorinated biphenyls (PCBs), chemicals, and hazardous materials. Surficial evidence of potential RECs such as distressed vegetation, stained soils, and/or stained paving was also evaluated A site reconnaissance was performed on February 21, 2023 by Ms. Elizabeth Diaz, Consultant, Environmental Scientist of WSP. Due to the property size, the entire subject property could not be walked. Site reconnaissance was conducted by driving on dirt paths and occasionally stepping out to get views. If observations were made from the dirt path that required up close assessment, short walks were conducted to reach location of interest. Photographs recorded during the Site reconnaissance are included in Appendix E.

#### **INTERVIEWS**

 Interviewing available individuals with knowledge of current or historical use, storage, or disposal of potentially hazardous materials or other environmentally related activities on or adjoining the subject property. A User Questionnaire is included in Appendix F.

#### **REPORT PREPARATION**

 Preparing a report that documents the findings, opinions, and conclusions of the Phase I ESA investigation conducted at the subject property and provides the supporting documentation and references for those findings, opinions, and conclusions (the Report). Resumes for the environmental professionals (EPs) that performed the assessment and prepared this Phase I ESA Report are included in Appendix H.

#### NON-SCOPE CONSIDERATIONS

- The scope of work for this Phase I ESA excluded non-scope considerations listed in ASTM E1527-21 (Section 13.1.5)

### 1.3.1 SIGNIFICANT ASSUMPTIONS

This Phase I ESA was conducted in accordance with ASTM E1527-21.

In preparing this report, WSP relied upon certain written and/or verbal information and representations provided by the User and others, documents provided by the subject property owner and/or operator, and a computer search of government databases by a firm whose business is to provide that service. Except as discussed, WSP has relied upon that information and did not attempt to independently verify its accuracy or completeness but did not detect any inconsistency or omission of a nature that might call into question its validity. To the extent that the conclusions in this report are based in whole or in part on such information, they are contingent on its validity and WSP assumes no responsibility for any consequence arising from any information or condition that was concealed, withheld, misrepresented, or otherwise not fully disclosed or available to WSP.

In the absence of site-specific hydrogeologic information, WSP has relied on the assumption that groundwater flow generally follows surface topography. There are limits to this interpretation and WSP has exercised professional judgment in applying this assumption to the evaluation of off-site properties with the potential to impact the subject property.

### 1.4 GENERAL LIMITATIONS

WSP performed our services in accordance with the following principles, which are an integral part of the ASTM Standard:

- The subject property is approximately 112.9 acres in size. Due to the property size, the entire subject property could not be walked. Site reconnaissance was conducted by driving on dirt paths and occasionally stepping out to get views. If observations were made from the dirt path that required up close assessment, short walks were conducted to reach location of interest.
- No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the subject property, and the ASTM Standard recognizes reasonable limits of time and cost.
- "All appropriate inquiry" does not mean an exhaustive assessment of a property. WSP performed this ESA in conformance with the ASTM Standard's principle of identifying a balance between the competing goals of limiting the costs and time demands inherent in performing an ESA and the reduction of uncertainty about unknown conditions resulting from additional information.
- Not every property warrants the same level of assessment the type of property subject to the assessment, the expertise
  and risk tolerance of the user, and the information developed in the course of the inquiry guided the appropriate level of
  assessment for this ESA.
- ESAs must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent ESAs should not be considered valid standards to judge the appropriateness of any prior assessment based on hindsight, new information, use of developing technology or analytical techniques, or other factors.

The conclusions presented in this report represent WSP's professional judgement based upon the information available and conditions existing as of the date of this report. As such, the conclusions in this report are valid only to the extent that the information provided was complete and accurate. This assessment is not intended as legal advice or as an exhaustive review of site conditions. WSP makes no representations or warranties, expressed or implied, related to the presence or absence of pollutants or that all pollutants have been identified.

### 1.5 RELIANCE

Client acknowledges and agrees that this report was prepared solely on its behalf and functions solely as a Phase I ESA. By accepting this report, Client acknowledges and agrees that it may in part rely upon sources, either written or oral, that WSP considers reliable, but which are not guaranteed or independently verified by WSP.

Where Client is required to disseminate this report, either by law or in connection with Client's business activities, to any other party to whom this report is not addressed (the "Third Party"), Client agrees to notify the Third Party of the terms of this disclaimer who in turn shall be bound by such terms. WSP is not responsible for independent conclusions, opinions, or recommendations made by others or otherwise based on the findings presented in this Report. Any Third Party wishing to rely on the information and opinions contained herein does so at its own risk.

### 1.6 TERM OF REPORT VIABILITY

In accordance with ASTM E 1527-21, this report is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). This Phase I ESA is viable for one year provided key components are updated within 180

days prior to the date of acquisition of the subject property. Note that the date of the report generally does not represent the date of the acquisition of key components and should not be used when evaluating compliance with the 180-day or one-year all appropriate inquiries requirements.

## 2 USER PROVIDED INFORMATION

The ASTM Standard defines a User as the party seeking to use Practice E1527 to complete an ESA of the subject property. The ASTM Standard describes certain tasks to be performed by or on behalf of a party seeking to qualify for a landowner liability protection (LLPs) to CERCLA. WSP requested that the User provide information that may be material to identifying RECs, and WSP provided a User Questionnaire to facilitate the transfer of this information to WSP. A copy of responses are included in Appendix F.

# 3 SITE RECONNAISSANCE

### 3.1 GENERAL SITE SETTING

The subject property is located at APN 431-022-13, Rosamond, Kern County, California and is generally situated in an undeveloped area within the Mojave Desert. The subject property is approximately 0.3 miles east of State Route 14. Rosamond City center is located approximately 3 miles south. No properties immediately adjacent appear to be developed. The Sierra Highway and railroad operated by Union Pacific Railroad Company (UPPR) are both in operation and split the property into two, noncontiguous parcels.

## 3.2 CURRENT USES OF THE SUBJECT PROPERTY

The unimproved parcel is split by Sierra Highway and UPRR Railroad and is approximately 112.19 acres (FRA 2023). The subject property is currently undeveloped and has no permanent structures or infrastructure. The property is currently zoned as *Limited Agriculture* that is characterized as Kern County Zoning Code *A-1*. (Kern County 2023). Parcel Portion A of the subject property is accessible from Dawn Road, a partially paved road. Along the western edge of Parcel Portion A, fences partially bound the property boundary, however, the fence does not appear to be well maintained with several large sections missing. Parcel Portion B of the property is accessible only from one of two dirt roads that stem from 10<sup>th</sup> St W. No structures are on Parcel Portion B, however a fence with several gaps lines the western boundary. Several unpaved access roads running through the subject property are visible from aerial photography. The site reconnaissance conducted on February 15, 2023 indicated that no operations occur on the subject property.

### 3.3 SUBJECT PROPERTY SERVICES AND IMPROVEMENTS

The subject property does not have any permanent structures or buildings. The following table summarizes improvements observed at the subject property.

SERVICE	DESCRIPTION	
Roads	The left half (Parcel Portion A) of the subject property is accessible from Dawn Road, a partially paved road. The right half of the property (Parcel Portion B) is accessible only from one of two dirt roads that stem from 10th St W.	
Potable Water Supply/Source	The subject property does not have a portable water system.	
Sewage Disposal System	The subject property does not have sewage disposal system.	
Heating/Cooling Systems The subject property does not have heating or cooling systems.		

### 3.4 INTERIOR AND EXTERIOR OBSERVATIONS

Features or conditions observed by WSP during the site reconnaissance for the subject property are summarized in the following table.

FEATURE / CONDITION	OBSERVED	NOT OBSERVED
Hazardous Substances and/or Petroleum Products Use and Management		
Storage Tanks (USTs and ASTs)		$\boxtimes$
Strong, Pungent, or Noxious Odors		$\boxtimes$
Standing Surface Water and Pools or Sumps Containing Liquids Likely to be Hazardous Substances or Petroleum Products		$\boxtimes$

FEATURE / CONDITION	OBSERVED	NOT OBSERVED
Potential PCB-Containing Items		$\boxtimes$
Interior Stains and Corrosion		$\boxtimes$
Drains, Sumps, and Clarifiers		$\boxtimes$
Pits, Ponds and Lagoons		
Stained Soil or Exterior Hardscapes		$\boxtimes$
Stressed Vegetation		$\boxtimes$
Evidence of Solid Waste Disposal		$\boxtimes$
Water/Wastewater Discharges		$\boxtimes$
Wells		
Septic Systems/Dry Wells		
Evidence of Use Illegal Dumping	$\boxtimes$	

#### **Evidence of Historical Site Use**

During site reconnaissance, WSP observed several unpaved, partially graded roads to traverse throughout the property. WSP observed a dirt road located in the northeast corner of the left half of the property that leads to two abandoned structures. The structures appear to have the foundation still intact with all structural membranes including walls and roofing removed. Photographs from site reconnaissance and abandoned structure are included in Appendix E. No structures with operations were observed. WSP inquired about this structure through the User Questionnaire (Appendix F). The User's response indicated that the subject property was never developed, and the structure may be associated with an adjacent property with auto tracks.

#### **Evidence of Illegal Dumping**

WSP observed evidence of significant illegal dumping located on Dawn Road leading to Parcel Portion A of the subject property. Several dirt roads run through the subject property that sprawl originating from the southern half. Once one property, piles of debris and illegal dumping activity was present along the southern dirt roads that traverse through the property. Minimal dumping was observed on Parcel Portion B of the subject property. Due to the fact that no stained soils or stressed vegetation was observed near the piles of solid wastes, the illegal dumping areas are considered a *de minimis* condition for the subject property.

### 3.5 ADJOINING PROPERTIES

Based on "drive-by" review, the current uses of properties adjoining the subject property are summarized below:

Direction	Parcel No.	Use	Zoning

	Railroad	-	-

<sup>A</sup> During site reconnaissance, several signs that indicate that the land is actively being used and/or owned by the US Air Force. The property boundary is identified with a barbed-wire fence.

From visual drive-by review, WSP did not observe any RECs from the adjoining properties.

# 4 RECORDS REVIEW

### 4.1 PHYSICAL SETTING

The table below provides an overview of the physical setting for the subject property.

Feature	Description	
Topographic Gradient	The ground elevation of the subject property is approximately 2557 feet above mean sea level (EDR 2023c and EDR 2023e). The subject property is relatively flat, with gentle sloping to the south, southeast. Regional topography slopes gently downward to the southeast	
Geologic and Hydrogeologic Conditions	According to the Geologic Map of the Conterminous United States at 1:2,500,000 Scale, the subject property has a rock stratigraphic unit in the Cenozoic era, Quaternary series (EDR 2023e).	
Surface Water Runoff	WSP observed during site reconnaissance that the subject is relatively flat. It's estimated surface water runoff follows regional topography which slopes gently downward to the southeast	
Nearest Surface Water Body to the Subject property and Groundwater Flow	According to the National Hydrography Dataset a pond the closest active surface body of water is the Piute Ponds located approximately 8.5 miles southeast of the subject property (USGS 2023). Based on topographic gradient, shallow groundwater is estimated to be to the south.	
Flood Plain	The subject property is partially mapped in Zone A without base flood Special Flood Hazard Area. The special flood hazard area boundaries are limited to the Partial Parcel B. The FEMA flood map that includes the subject property is included in Appendix G (FEMA 2023).	
Wetlands	According to the National Wetland Inventory, a riverine system is located within the Partial Parcel B. The boundaries of the riverine match a dirt road (USFWS 2023).	
Soils	Regional soil is characterized with high infiltration rates, with deep well drained to excessively well drained sands and gravels (EDR 2023e)	

### 4.2 HISTORICAL USE REVIEW

The following table summarizes the historical use record sources reviewed for this Phase I ESA and includes whether the source reviewed was applicable to the subject property and/or the adjoining properties. The table also includes relevant comments and reasons for excluding a particular resource, if applicable.

	Historical Resource Summary				
Historical	Source(s) / Dates	Applicability		Comments / Reasons for Excluding	
Resource Type		Subject Property	Adjoining Property		
Aerial Photographs	EDR / 1973, 1987, 1994, 2005, 2009, 2012, 2016, 2020	$\boxtimes$	$\boxtimes$	None	
Fire Insurance Maps	EDR			Sanborn maps were not available from EDR.	

	Historical Resource Summary					
Historical	Source(s) / Dates	Applicability		Comments / Reasons for Excluding

Local Street Directories	EDR / 1992, 1995, 1996, 2000, 2005, 2010, 2014, 2017			The subject property was not listed in the city directory. Several properties within the region are located on Dawn Road however none are adjoining.		
USGS Topographic Maps	EDR / 1915, 1917, 1943, 1947, 1956, 1973, 2012, 2015, 2018	$\boxtimes$	$\boxtimes$	Urban developments are not identifiable on the 2012, 2015 and 2018 maps.		
Building Department Records	EDR			The EDR report did not find any building department records associated with the subject property.		
Interviews				A User Questionnaire was sent to the current property owner in lieu of an interview.		
Zoning/Land Use Records	Kern County	$\boxtimes$	$\boxtimes$	The Kern County Assessor and zoning land records are including in Appendix B.		

### 4.2.1 HISTORICAL USES OF THE SUBJECT PROPERTY

A history of previous uses of the subject property since its first developed use was compiled from information obtained from standard historical sources to identify past uses that could have led to RECs in connection with the subject property. Evidence of a structure on Parcel Portion A is observed in the 1915 and 1956 historical topographic map. A small structure in the northeast corner of Parcel Portion A is evident on aerial photos in 1973, 1987, 1995, 2005, 1009, 2012, 2016 and 2020. Due to aerial photo quality, it cannot be determined when the structure in the northeast corner was abandoned or dismantled. Only in the 2009 historical aerial photo, small white and/or reflective objects are observed in the southern portion of the Parcel Portion A, likely representing cars or debris onsite. No other evidence from aerial, topographic, city directory or fire insurance maps that the subject property was developed with any other structures.

### 4.2.2 HISTORICAL USE SUMMARY – ADJOINING PROPERTIES

Based on historical aerial photography, topographic maps and city directories, the following table summarizes historical uses of adjoining properties.

	Historical Use Summary – Adjoining Properties				
Direction	Parcel No.	Summary			
Parcel Portion A	A				
North	431-022-12	This property does not have any historical evidence of development. The property is still undeveloped with no permanent structures or roads.			
South	471-062-01	This property does not have any historical evidence of development. The property is still undeveloped with no permanent structures or roads.

South	471-062-25	This property does not have any historical evidence of development. The property is still undeveloped with no permanent structures or roads.	
East	431-010-08	This property does not have any historical evidence of development, with the exception of one record found in the 1956 historical topographic map including a structure adjacently west of an unimproved road. This is the only record of this structure. The property is undeveloped with no permanent structures or roads.	
West	Sierra Highway / Railroad	Sierra Highway and the railroad appear to be developed in the earliest record, the 1915 historical topographic map. No significant changes were observed	

### 4.2.3 USES OF PROPERTIES IN SURROUNDING AREA

A cursory review of historical uses of properties in the area surrounding the subject property was conducted using aerial photographs and topographic maps. Regionally the region was largely left undeveloped. Approximately 0.5 miles to the east is Edwards Air Force Base with boundaries marked by a barbed-wire fence and signs.

### 4.3 PRIOR ENVIRONMENTAL REPORTS

No prior environmental reports were provided to WSP for review.

### 4.4 REGULATORY RECORDS REVIEW

WSP contracted EDR to conduct a search of publicly available information from federal, state, and tribal environmental regulatory agency databases that include information related to regulated facilities and facilities that have reported releases of hazardous substances and/or petroleum products. The standard government environmental records searched, and minimum search distances were consistent with criteria included in ASTM E1527-21 Section 8.2.2. The EDR report also included supplemental environmental record sources that are generally related to environmental compliance and may indicate a business environmental risk, but are not necessary indicative of a REC. The supplemental record sources were reviewed and discussed to the extent the record was pertinent within the scope of this assessment.

EDR gathers the regulatory search data into a cohesive report utilizing geocoded location information that is provided by the respective database sources. Resources with inadequate information are identified as "orphan" or "unmappable sites." The listed sites are identified within the minimum search radii identified within the ASTM Standard E1527-21. The regulatory database report is included in Appendix C.

WSP generally considers the following criteria to determine if a listed database site is a potential environmental concern for the subject property: 1) the site's distance from and/or position in relation to topography and groundwater gradient from the subject property; 2) indication of a spill or release; and 3) status of associated regulatory agency environmental cases.

The sites that have the greatest potential to have caused environmental contamination are those that have had releases or spills of hazardous substances or petroleum products located upgradient or in close proximity to the facility. The direction of localized groundwater flow at the subject property is presumed to be to the south. Therefore, the sites that are of the greatest potential concern are those that have had releases or spills of hazardous substances or petroleum products and are west (upgradient) or in close proximity to the subject site.

Regulatory database listings associated with the subject property, adjacent site(s), and surrounding properties of concern that WSP determined warrant additional discussion based on the criteria above are identified in the summary table below.

Environmental Records Review Summary for Subject Property and Adjoining Parcels						
Distance / Direction / Gradient	Facility Name / Address	Federal & State Database Listing(s)	Discussion / Finding			
0.5 miles east/ Cross gradient	Edwards Air Force Base	NPL SEMS CORRACTS RCRA-TSDF RCRA-LQG US ENG CONTROLS UST INST CONTROLS ENVIROSTOR HIST CAL-SITES DEED ROD RAATS RPR ICIS US AIRS OCKET HWC PFAS NPL PFAS ICE DOD	The Edward Air Force Base is a part of several federal databases including the National Priority List (NPL) which identifies 1,200 priority cleanup sites under the Superfund Program. The Edwards Air Force Base has been in operation since 1933 and includes 800 square miles of the western portion of the Mojave Desert and spans portions of Kern and San Bernardino County. The primary mission of the air base is to conduct research development on new aircraft. Under the 1978 Installation Restoration Program, the Air Force has identified 21 waste areas of concern all located mostly on facility grounds located several miles from the subject property. A cursory review of California State Water Resources Control Board GeoTracker online database showcases several military cleanup sites within the Edwards Air Force Base boundaries, however no cleanup sites appear to be within 1 mile of the subject property. Additionally, the Edwards Air Force Base is located in what is estimated to be cross gradient of the subject property. Therefore, the Edwards Air Force Base property is not seen as a REC in association with the subject property.			

No other additional parcels within one mile were identified in any federal or state databases. However, five orphan sites were identified within the region of the subject property however, the exact location could not be identified:

- The SEMS Archive identifies sites there were historically on the National Priority List and have been determined by the Environmental Protection Agency that no further steps will be taken due to site completion. Under EPA ID No. CAD982404873 was identified with an approximate address of ½ mile of W 10<sup>th</sup> Street Along Avenue A, Rosamond, CA. No other information was provided.
- The Department of Toxic Substances Control's (DTSC's) EnviroStor database (ENVIROSTOR) identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. The Envirostor database identified a site with the approximate location of Sweetser Road near State Highway 14 and Frontage Road. This site was an unauthorized disposal site and historically used to mine quartz and feldspar. An initial site screening of the soil indicated that arsenic, barium, copper, lead and mercury results were at slightly elevated above background levels. According to the Envirostor Database this site has a case number 15140002 (DTSC 2023b). On June 26, 1990, DTSC issued a No Further Action on the site following results indicating that the results of the analysis show no significant contamination on site. The June 1990 letter attached as Appendix G.
- The HIST National Clandestine Laboratory Sites (CDL) database includes a listing of historical clandestine drug labs that have been removed from the United States Drug Enforcement Administration (DEA) CDL database. Three sites were identified under this database and include the following:

- A site, with an unknown address, was identified as an *Abandoned Drug Lab and Abandoned Drum Lab Waste*. The date of the database enter is July 1999 with a facility of 1999-07-079. The site is described to be on Dawn Road, approximately 0.5 miles east of Highway 14. No other information was identified. The description of the location of the abandoned drug lab fits the subject property's distance from Highway 14. Additionally, two abandoned structures were observed on the subject property. However, however there was not enough information to determine if this is related to the CDL database listing.
- A site, with an approximate address of 1379 Sierra Highway was identified as an *Abandoned Drug Lab and Abandoned Drum Lab Waste*. The date of the database enter is February 1998 with a facility of 1998-02-035. No other information was identified.
- A site, with an unknown address, was identified as an *Abandoned Drug Lab and Abandoned Drum Lab Waste*. The date of the database enter is August 1996 with a facility of 1996-08-022. The location is described in the database as Mojave/Rosamond/Sierra Highway, California. No other information was identified.

# 4.5 REGULATORY AGENCY FILE AND RECORDS REVIEW

WSP submitted a Public Records Act Request to various regulatory agencies for the subject property. The following summarizes relevant information obtained:

#### KERN COUNTY PLANNING AND NATURAL RESOURES DEPARTMENT

A Public Records Act Request was submitted on February 9, 2023 to the Kern County Planning and Natural Resources Department. The Kern County Planning and Natural Resources Department responded on February 14, 2023 that there are no files, permits or land use entitlements related to the subject property Appendix D.

# 4.6 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

WSP reviewed the following online databases for additional information for the Subject Property. Relevant information obtained is summarized below.

#### GEOTRACKER ONLINE DATABASE

Geotracker is a data management system managed by the California Water Resources Control Board for sites that impact, or have the potential to impact, water quality in California. GeoTracker contains records for sites that require cleanup, such as leaking underground storage tank (LUST) Sites, Department of Defense Sites, and Cleanup Program Sites. GeoTracker also contains records for various unregulated projects as well as permitted facilities including Irrigated Lands, Oil and Gas production, operating Permitted USTs, and Land Disposal Sites. No information was found regarding the Subject Property (DTSC 2023c).

#### HAZARDOUS WASTE TRACKING SYSTEM (HWTS)

The California Department of Toxic Substances Control manages the HWTS database. HWTS is a data repository for hazardous waste manifest and ID number information dating back to 1993. No information was found regarding the Subject Property.

#### ENVIROSTOR

The California Department of Toxic Substances Control manages Envirostor, a data management system for tracking closing, permitting, enforcement and investigation efforts of hazardous waste facilities and sites. No information was found on any of these databases associated with the Subject Property (DTSC 2023a).

# 4.7 ENVIRONMENTAL LIENS/ACTIVITY AND USE LIMITATIONS

An environmental lien/activity and use limitations search is a User responsibility and was not conducted as part of this Phase I ESA per the agreed upon scope of work; however, a search of engineering and institutional controls on the use of the property, including deed restrictions, was included in the regulatory database search conducted by EDR. The results of the search indicated that no current engineering or institutional controls exist for the subject property.

# 4.8 INTERVIEWS

### SUBJECT PROPERTY OWNER

The Subject Property owner was not interviewed as a part of this assessment. A User Questionnaire was submitted to the Property Owner in lieu of an interview and is included in Appendix F.

#### SITE REPRESENTATIVE

The subject property was unoccupied the day of site reconnaissance and therefore no site representative was interviewed.

# 5 EVALUATION

# 5.1 FINDINGS AND OPINIONS

WSP did not identify evidence of RECs, HRECs, CRECs in connection with the subject property.

A *de minimis* condition identified includes evidence of illegal dumping observed on the subject property. WSP did not encounter data gaps in connection with the subject property.

# 6 CONCLUSIONS

WSP has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the subject property. Any exceptions to, or deletions from, this practice are described in Section 1.3.1 of this report. This assessment has revealed no RECs, CRECs or significant data gaps in connection with the subject property.

# 7 ENVIRONMENTAL PROFESSIONAL DECLARATION

This report was prepared by Elizabeth Diaz under the supervision of Betsy Mitton, Vice President, Earth and Environment of WSP. Betsy's resume is included in Appendix H.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

# A KEY DEFINITIONS FROM ASTM E1527-21

### KEY DEFINITIONS FROM ASTM E 1527-21, STANDARD PRACTICE FOR ENVIRONMENTAL SITE ASSESSMENTS: PHASE I ENVIRONMENTAL SITE ASSESSMENT PROCESS

<u>Recognized Environmental Condition (REC)</u> - (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

<u>Controlled Recognized Environmental Condition (CREC)</u> - a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations). The identification of a CREC does not imply that WSP has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control(s).

<u>Historical Recognized Environmental Condition (HREC)</u> - a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). An HREC is not a REC. WSP's rationale for identifying a condition as an HREC is based solely on the information stated herein.

<u>De minimis condition</u> - a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a REC or a CREC.

<u>Data Gap</u> – a lack or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the Key Site Managers, regulatory officials, etc.).

## INFORMATION FOR PROPERTY OWNER

## Overview

Pursuant to California Revenue & Taxation Code § 619 and § 621, this notice informs you of THE TAXABLE VALUE of your property. It also serves to inform you of your opportunity to request reconsideration of our findings or to file an assessment appeal. If you believe that your property is worth less than the indicated amount, you may discuss the matter with the Assessor's staff by calling (661)-868-3485. Decline-in-value review requests are taken between July 2 and November 30. For details, visit the <u>Decline-in-Value Review</u> (<u>Proposition 8) page</u>

If you and the County Assessor cannot agree on the assessed value, you may appeal the assessment to the Assessment Appeals Board. Applications are accepted between July 2 and November 30, and are processed by the Clerk of the Assessment Appeal Board, located at the County Administration Center, 5th floor, 1115 Truxtun Avenue, Bakersfield, California 93301. For more information, visit the <u>Assessment Appeals page</u>

<u>Revenue and Taxation Code § 1607</u> provides that the taxpayer need not attend the scheduled equalization hearing and testify to the property's value. If an agreement can be reached with the Assessor, the applicant or applicant's agent may sign a written stipulation setting forth the facts upon which a reduction in value is premised. The Board can either accept the stipulation or reject it and set a new hearing date.

## How and when property is assessed

<u>Article XIIIA of the California Constitution</u> provides that property shall be taxed in proportion to its value. In part:

- Property is appraised at its 1975-76 market value unless it has been sold, newly constructed, or had a change in ownership after March 1, 1975.
- Property transferred after March 1, 1975 will have a new base year market value established as of the date of the change in ownership.
- New construction will be assessed at market value and added to the base year value as of its date of completion.
- The base year value is subject to an annual rate of inflation not to exceed 2 percent increase per year.
- The taxable value of real property on the local roll shall be the lesser of: (a) factored base year value, (b) current market value, or (c) the value of the property if it was damaged or destroyed by calamity pursuant to Revenue and Taxation Code § 170

A copy of the local assessment roll is available for public inspection during regular office hours (8-5) Monday through Friday in the Assessor's Office at 1115 Truxtun Ave, 2nd floor.

## EDR BUILDING PERMIT REPORT

#### About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

#### **ASTM and EPA Requirements**

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

#### Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

## GLOSSARY

#### **General Building Department concepts**

- ICC: The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections): This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- Jurisdiction: This is the geographic area representing the properties over which a Permitting Authority has
  responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- Sub: Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- Journeymen: Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release): Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- "Pull" a permit: To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- Planning Department: The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- Zoning District: A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- PIN (TMS, GIS ID, Parcel#): Property Identification Number and Tax Map System number.
- State Card (Business license): A license card issued to a contractor to conduct business.
- Building Inspector (Inspector): The inspector is a building department employee that inspects building construction for compliance to codes.
- C.O.: Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

## GLOSSARY

#### Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

#### Sample Building Permit Data

Date: Nov 09, 2000 Permit Type: Bldg -New Permit Number: 10100000405 Status: Valuation: \$1,000,000.00 Contractor Company: OWNER-BUILDER Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

## **EXECUTIVE SUMMARY**

## DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

## **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

## EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- · search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- · access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed

data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/27/2022 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

#### Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

#### Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/24/2022 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

#### Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 HIST Cal-Sites site within approximately 1 mile of the target property.

#### Other Ascertainable Records

DOD: Consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

A review of the DOD list, as provided by EDR, and dated 06/07/2021 has revealed that there is 1 DOD site within approximately 1 mile of the target property.

Summary Details:

Conditions at proposal July 14, 1989): Edwards Air Force Base EAFB) is in Kern, Los Angeles, and San Bernardino Counties, California, occupying approximately 800 square miles in the western portion of the Mojave Desert. The base has been in operation since 1933. Its primary mission is to conduct research and development on new aircraft. EAFB is participating

in the Installation Restoration Program IRP), established in 1978. Under this program, the Department of Defense seeks to identify, investigate, and clean up contamination from ha ardous materials. Under IRP, the Air Force has identified 21 waste areas at the facility. The Main/South Base area, at the western edge of Rogers Dry Lake, is the primary area for maintenance and refueling of aircraft. On several occasions, large amounts of fuel have been spilled in the area, and poor disposal practices have released organic solvents to the ground. Also in the area are an abandoned sanitary landfill containing pesticides and heavy metals, an area where electroplating wastes were dumped, and the industrial waste pond, which contains sediments rich in heavy metals. Trichloroethylene, trans-1,2-dichloroethylene, 1,2dichloroethane, tetrachloroethylene, and methylene chloride are present in ground water underlying the Main/South Base area, according to a 1987 IRP report. EAFB s 13,800 employees obtain drinking water from wells within 3 miles of the Main/South Base area. There is no perennial surface water at EAFB. The Air Force has completed an initial assessment of the base and is now conducting a remedial investigation/feasibility study to determine the type and extent of contamination and identify alternatives for remedial action. Status August 30, 1990): The Air Force is reviewing previous studies to determine any additional data needed to fully characteri e known waste areas. EPA, the State, and the Air Force arenegotiating an Interagency Agreement under CERCLA Section 120 covering response activities at the base.

### EDWARDS AIR FORCE BASE (Continued) 1000155217 Completed Date: 01/15/2009 Comments: This Focused Feasibility Study supports a technical impracticability (TI) evaluation and designation of a containment zone (CZ) for groundwater plumes at Sites 162 and 461 at the Air Force Research Lab, Edwards AFB. Chemicals of Concern are present in fractured bedrock at levels that pose an unacceptable risk to human health and the environment, however this FS concludes that it is impracticable to remove the COCs and recommends measures to prevent exposure to contaminated soil and groundwater. 6 - Operable Unit 6, NASA Dryden Completed Area Name: Not reported Completed Sub Area Name: Completed Document Type: Record of Decision Completed Date: 10/19/2006 Comments: The OU-6 ROD addresses six sites (N1, N2, N3, N4, N7, and AOC N14). The selected remedy OU6 Soils for all six sites is No Action. The risks associated with the soils were all within the acceptable risk range. Three of the sites (N2, N3, and N7) are the origin of the OU wide commingled groundwater plume. The groundwater contaminants are chlorinated solvents (TCE, cis-1,2 DCE, TCA, etc) and aromatic hydrocarbons (BTEX). The selected remedy for the groundwater is Land Use Controls to prevent exposure, In Situ Chemical Oxidation for chlorinated hydrocarbons. Enhanced Natural Attenuation for aromatic hydrocarbons, and monitored natural attenuation (plume containment) for the dissolved plume. DTSC signed the Declaration page on 10/19/06 and forwarded signature page to Water Board who provided the final signature on 12/28/06. Completed Area Name: 4/9 - South AFRL Not reported Completed Sub Area Name: Feasibility Study Report Completed Document Type: Completed Date: 03/03/2006 Comments: On March 3, 2006, DTSC concurred with the Final Focused Feasibility Study to support a Technical Impracticability Evaluation/ Containment Zone Application for the South Air Force Research Laboaratory (AFRL) in OU 4 and OU 9. Due to the presence of pure phase trichloroethene (TCE) and tetrachloroethene (PCE) in fractured bedrock at depths exceeding 250 feet, the Focused Feasibility Study recommends requesting a technical impracticability waiver for meeting the cleanup standard of the Maximum Contaminant Level for drinking water (MCL) and applies for a Containment Zone under the State Water Code. Completed Area Name: 2 - Operable Unit 2, South Base Completed Sub Area Name: Not reported Completed Document Type: Record of Decision Completed Date: 08/04/2009 Comments: This ROD documents the cleanup action for groundwater for Sites 5, 14, 76, and 86; and the soil cleanup action for Site 29. The remedy to clean up groundwater at combined Sites 5 and 14 is the implementation of in-situ biotreatment to destroy floating free product, injection of chemical reagents to remediate dissolved chlorinated solvents, the continued operation of the Site 14 extraction/treatment system, and the implementation of Land Use Controls to limit potential human exposure. The remedy to clean up groundwater at Sites 76 and 86 is to inject chemical reagents and in-situ biological components, and implement LUCs to limit potential human exposure. The remedy to clean up soil at Site 29 is to remove

OU3 is defined as the basewide water wells and originally include 660 potential well sites determined from historical records and archival research. Initial site investigations determined that eight of the 660 wells were suspected as potential contaminant pathways to groundwater and were retained in OU3 for further evaluation. Subsequent investigations determined that none of the eight wells retained in OU3 had contributed to any groundwater contamination and, furthermore, no soil contamination was found in the vicinity of any of the wells. Completed Area Name: Sites With No Operable Unit Completed Sub Area Name: S172 Completed Document Type: **Operation and Maintenance Report** Completed Date: 06/30/2003 Comments: OM - S172 -- In January 2000, the Air Force implemented an interim removal action (IRA) consisting of soil vapor extraction (SVE) at Site 172, the outdoor waste sump at Building 8595 in Operable Uit 4, Air Force Research Laboratory. The primary objective of the IRA at Site 172 is to remove contaminant mass and reduce the further migration of volatile organic compounds (VOCs) from contaminated soil into the Site 37 groundwater plume. The SVE system operated with one well initially; two more wells were added in August 2000. Four additional extraction wells were connected to the system, which was brought on line September 12, 2002, extracting vapor from seven wells. The cumulative mass of contaminants removed during the reporting period was 472 pounds. Vapor flow rates averaged approximately 42 standard cubic feet per minute (scfm) during January to August 2002, and 84 scfm during September to December 2002 following expansion of the well field from three to seven wells. The SVE operating cost for the year 2002, excluding labor, was \$95,172.

DTSC has concluded that risks for Site 39 are below action levels and concur with a No Further Action for this site. For Site 270, the site qualifies for NFA for chemical contamination; however the Air Force never completed a subsurface investigation for MEC that may have been derived from Site 270 activities because the site is in the active PIRA bombing range. The Air Force will maintain active range health protections (restricting on-site access) and will conduce a munitions investigation should the site ever become deactivated from the range operations.

The p rimary function of Edwards is to test new and existing air- craft and integrate them into the present Air Force inventory. The lan d area occupied by the base is 470 square miles. Within this lan d area there are 3 separate Air Force Bases, complete with runway s and infrastructure; the NASA Dryden Flight Test and Space Shutt le Recovery facilities; the 50+ square mile Phillips Laboratory r ocket test facility; the Precision Impact Range Area; and the Rog ers and Rosamond Dry Lake Beds. In the past, the base was the home of the U.S. Army Helicopter Flight Test Center and the NASA Jet Propulsion Laboratory. During World War II, the base trained P-38 fighter pilots and B-24 bombe crews. After World War II, th e base became a flight test center. The 469 discovered contaminat ed sites are divided into 10 Operable Units (OU): OU-1, Main Base Flightline; OU-2, South Base; OU-3, Basewide Water Wells; OU-4,

> Phillips Laboratory; OU-5, NASA/Jet Propulsion Laboratory; OU-6, N ASA/Dryden; OU-7, Basewide Miscellaneous; OU-8, NW Main Base Flig htline; OU-9, Phillips Lab- oratory (East); and OU-10, North Base

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

# Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

#### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

# Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

# Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

# RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

#### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

#### ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

# ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

# DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

# EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

# 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

#### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

#### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

# UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

#### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

# PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

#### PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. #### AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

# HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

#### WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

### EDR HIGH RISK HISTORICAL RECORDS

### EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Target Property Map:	11994312 SOLEDAD MOUNTAIN, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

# **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

Dear Miss. Kerr:

On behalf of Kern County, the Kern County Planning and Natural Resources Department is in receipt of your February 9, 2023 Public Records Act Request for any files regarding APN: 431-022-13 at the property located North of Dawn Road and West of the Sierra Highway in Rosamond, CA. Your request specifically includes any files in respect to the property.

In response to your request, Staff notes no files, permits, or land use entitlements related to the property have been received by this Department.

This completes the Kern County Planning and Natural Resources Department's response to your Public Records Act Request. Please contact me directly at (661) 862-8615, or by emailing at <u>alyssat@kerncounty.com</u> if you have any questions or concerns as they relate to this letter.

Sincerely.

### Message

To Whom It May Concern, WSP respectfully requests the opportunity to review copies of files with respect to the property located north of Dawn Rd and west of Sierra Highway in Rosamond, Kern County, California (APN: 431-022-13). This is a 112-acre property, Zevsar Concepts, north of Rosamond and east of Highway 14. In particular, we are interested in files issued and maintained by your offices that are related to the following: • environmental permits • CUPA program registration and environmental documents • aboveground and underground storage tank registrations • groundwater wells or septic systems • air pollution incidents • solid and hazardous waste • complaints or incident reports • water sampling results • releases of hazardous materials or petroleum products • environmental violations and corrective actions • site investigation or remediation activities If there are other departments or sub-departments within your agency that may be able to provide the requested documents,

please provide the name of the agency and the individual to whom the requests may be directed, together with their address and telephone number. Certified copies are not requested. Electronic copies are preferred. Please contact me at 209-304-6357 or email me at <u>alexa.kerr@wsp.com</u> if there are any files available for review. We understand that search and reproduction fees established pursuant to 40 CFR § 2.120, may apply. Thank you in advance for your assistance.

Thank you, Kern County, CA

# USER QUESTIONNAIRE

# nsp

# Location : Zevsar; 431-022-13, Rosamond, Kern County, California

# Phase I Environmental Assessment User Questionnaire

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must provide the following information (if available) to the environmental professional conducting the Phase I Environmental Site Assessment (ESA). Failure to provide this information could result in a determination that "all appropriate inquiries" is not complete.

1 Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the property that are recorded under federal, tribal, state, or local law?

NO

2 Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312,26).

Are you aware of any AULs, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

NO

3 Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals or processes used by this type of business?

# No

4 Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). 5

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

a. Do you know the past uses of the property? See EXHIBIT "A" for additional comments

Yes, available upon request.

b. Do you know of specific chemicals that were present or once were present at the property?

No

- c. Do you know of spills or other chemical releases that have taken place at the property? NO
- d. Do you know of any environmental cleanups that have taken place at the property?  $\,\mathrm{N}\,\mathrm{o}$
- The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to 6 detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

# NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The **community map repository** should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations** (BFEs) and/or **floodways** have been determined, users are encouraged to consult the Flood Profiles and Floodway Data and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

**Coastal Base Flood Elevations** shown on this map apply only landward of 0.0' North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations table in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations table should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the **floodways** were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **flood control structures.** Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The **projection** used in the preparation of this map was Universal Transverse Mercator (UTM) zone 11. The **horizontal datum** was NAD83, GRS1980 spheroid. Differences in datum, spheroid, projection or UTM zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of this FIRM.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be compared to structure and ground elevations referenced to the same **vertical datum**. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at http://www.ngs.noaa.gov/ or contact the National Geodetic Survey at the following address:

To obtain current elevation, description, and/or location information for **bench marks** shown on this map, please contact the Information Services Branch of the National Geodetic Survey at (301) 713–3242, or visit its website at http://www.ngs.noaa.gov/.

**Base map** information shown on this FIRM was derived from USDA –Farm Service Agency –Aerial Photography Field Office dated 2005 and from U.S. Geological Survey Digital Orthophoto Quadrangles produced at a scale of 1:12,000 from photography dated 1992 or later.

This map reflects more detailed and up-to-date **stream channel configurations** than those shown on the previous FIRM for this jurisdiction. The floodplains and floodways that were transferred from the previous FIRM may have been adjusted to conform to these new stream channel configurations. As a result, the Flood Profiles and Floodway Data tables *in the Flood Insurance Study report (which contains authoritative hydraulic data)* may reflect stream channel distances that differ from what is shown on this map.

**Corporate limits** shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

Please refer to the separately printed **Map Index** for an overview map of the county showing the layout of map panels; community map repository addresses; and a Listing of Communities table containing National Flood Insurance Program dates for each community as well as a listing of the panels on which each community is located.

Contact the **FEMA Map Service Center** at 1–800–358–9616 for information on available products associated with this FIRM. # LEGEND SPECIAL FLOOD HAZARD AREAS (SFHAs) SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD The 1% annual chance flood (100-year flood), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard Area is the area subject to flooding by the 1% annual chance flood. Areas of Special Flood Hazard include Zones A, AE, AH, AO, AR, A99, V and VE. The Base Flood Elevation is the water-surface elevation of the 1% annual chance flood. ZONE A No Base Flood Elevations determined. ZONE AE Base Flood Elevations determined. ZONE AH Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood Elevations determined. Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); ZONE AO average depths determined. For areas of alluvial fan flooding, velocities also determined. ZONE AR Special Flood Hazard Area formerly protected from the 1% annual chance flood by a flood control system that was subsequently decertified. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance or greater flood. ZONE A99 Area to be protected from 1% annual chance flood by a Federal flood protection system under construction; no Base Flood Elevations determined. ZONE V Coastal flood zone with velocity hazard (wave action); no Base Flood Elevations determined. Coastal flood zone with velocity hazard (wave action); Base Flood ZONE VE Elevations determined. FLOODWAY AREAS IN ZONE AE The floodway is the channel of a stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without substantial increases in flood heights. OTHER FLOOD AREAS ZONE X Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance OTHER AREAS ZONE X Areas determined to be outside the 0.2% annual chance floodplain. ### SITE TRACKING SHEET

Site Name: Sweetser Road Unauthorized Disposal Site

Site Location: Sweetser Road Near Highway 14

### Rosamond, California 93560

CalSites #: 15140002 Site Screening X PEA \_\_\_\_

<u>Site Summary</u>: Sweetser Road site is an unfenced 20 acre parcel located approximately 1.75 miles north of Rosamond. Approximately five acres were used for feldspar and quartz mining, and in more recent years as an unauthorized disposal area for household wastes. The dates that mining operations were conducted is unknown. At the time of Metcalf & Eddy's site visit for soil sampling in July, 1988, the 5 acre operations area contained a concrete slab, scrap building material, and several piles of mineral ores.

Soil samples were collected and analyzed for heavy metals and semi - volatile organic compounds. The semi-volatile organic analyses showed 440 parts per billion (ppb) Di-n-butylphthalate in one sample but not in its duplicate. Metals analyses showed concentrations of various metals above the background concentrations (arsenic @ 6.4 parts per million [ppm] above the background of 3.0 ppm, copper @ 23 ppm vs. 18 ppm, lead @ 11 ppm vs. <4 ppm, and mercury @ 0.2 ppm vs. <0.1 ppm background, respectively). With the exception of mercury (0.2 ppm vs. 0.1 ppm Rosamond Area Mean), all reported results are below the reported mean Rosamond area concentrations.

There are no sensitive facilities in the immediate area. The nearest school is 1.5 miles south in Rosamond and the nearest residence is 0.5 miles south. There are no known water wells on site and the nearest municipal water well is approximately 2.5 miles southwest of this location.

Recommendation: No Further Action

<u>Rationale/Supporting Documentation</u>: There is no evidence that operations on site used hazardous substances or that any hazardous wastes/substances have ever been brought to the site.

# **PROFESSIONAL EXPERIENCE**

### Environmental Compliance Auditing and Support

- Secondary Lead Smelter, Alloy Research and Development and Laboratory, Various States, USA: project manager and lead auditor of a secondary lead smelter and associated facilities operating under a Title V air emissions permit, a RCRA Part B permit, and individual NPDES permit to identify regulatory deficiencies that could pose a risk to the client during a future regulatory agency inspection. The audits included a comprehensive review of all applicable Federal, state, and local requirements and covered all three facility work shifts. The firm identified high-risk regulatory issues at the site and compared findings to previous audits and proposed remedies to identified issues. The client was able to target high risk items to minimize the potential for future regulatory enforcement.
- Electronics and Electronic Consumer Goods Corporation, Various States, USA: for over 16 years Betsy has conducted third party environmental compliance audits for a Fortune 100 electronics and electronic consumer goods corporation. The program includes annual regulatory compliance audits of 3 to 5 medium- to heavy manufacturing facilities to identify environmental compliance risks within the client's business. The sites are located across the U.S. with a concentration in Texas, California, Missouri, Minnesota, and Ohio. Typical facilities and operations audited include foundries, electroplaters, glass to metal seals manufacturers, valve and actuator manufacturers, spray painting, powder coating, machining and fabrication (including metal stamping). The audit findings are used to identify risk areas within the client's environmental management system and reduce the potential for regulatory violations and/or enforcement.
- Fiberglass Insulation Manufacturing-California: environmental auditor of a fiberglass manufacturing facility operating with air, waste, wastewater and stormwater permits. The program included an evaluation of environmental compliance and identification of high risk regulatory issues at the site. The audit findings are used to reduce the potential for regulatory violations and/or enforcement.
- Chemical Manufacturing Facilities California: Lead Environmental auditor for third-party regulatory compliance audits at chemical, piping and roofing manufacturer located in Northern and Southern California. The facilities specialized in manufacturing polypropylene piping, clay roofing tiles and ancillary products.
- Aviation Parts Manufacturing, California: Lead Environmental auditor for thirdparty regulatory compliance audit at a global aviation and aerospace parts manufacturer located in Southern California. The facility specializes in ball screw manufacturing and machining.
- Environmental compliance support for Various Clients, Various States: Betsy routinely assists clients in development of programs and procedures for maintaining compliance with environmental regulations. Clients include pharmaceuticals, transportation hubs, and waste management facilities. Activities include preparation of Emergency Planning and Community Right-to-Know Act Superfund Amendment Reauthorization Act Title III Sections 311, 312, and 313 (and California CERS) reporting forms including Tier IIs and Forms R for electronic equipment and construction materials manufacturers; storm water National Pollutant Discharge Elimination System permit applications and storm water

pollution prevention plans; spill prevention, control, and countermeasures (SPCC) plans; wastewater permit applications; non-Title V air permit applications; and RCRA annual and biennial hazardous waste reports; and other environmental management system plans and procedural documents. Clients were able to submit complete, technically correct submittals to regulatory agencies in areas where specific experience was lacking within the business.

 Various Ski Resorts, California: provided environmental compliance assistance to the facility including preparation of a comprehensive air emissions inventory to determine the facility's obligations under the local, state and federal air regulations. WSP also prepared several air permit applications submitted to the state air agencies.

# Environmental Due Diligence

- Commercial and Industrial Properties, Los Angeles, California: project manager and lead environmental professional for 22 phase I environmental assessments as part of a U.S. EPA Brownfields grant to the California High-Speed Rail Authority (CHSRA), the Los Angeles County Metropolitan Transportation Authority (Metro), and the Los Angeles-San Diego-San Luis Obispo (LOSSAN) Rail Corridor Agency. The due diligence activities included desktop review of relevant environmental information, review of existing Phase I and Phase II reports, review of publicly available databases, physical inspection of the targeted study area and preparation of ASTM E1527-13 Phase I environmental site assessment reports. The project will progress through the Brownfields program through 2022.
- Custom Building Materials Manufacturing Properties, Multiple States, USA: project manager and lead environmental professional for 15 phase I environmental assessments as part of a portfolio acquisition. The due diligence activities included desktop review of relevant environmental information, review of existing Phase I and Phase II reports, review of publicly available databases, physical inspection of the targeted properties and preparation of ASTM E1527-13 Phase I environmental site assessment reports. The portfolio was successfully acquired in 2021.
- Vineyards and Wineries, California: managed and conducted environmental due diligence projects assessing the land contamination and environmental compliance liability associated with more than 15 wineries and vineyards in California. The due diligence activities included desktop review of relevant environmental information provided by the target company, review of existing Phase I and Phase II reports, review of publicly available databases, physical inspection of targeted areas of the assets, collection of soil samples for analysis of potential contaminants, preparation of a ASTM E1527-13 Phase I environmental site assessment report. The client used WSP's conclusions to quantify the level of environmental risk associated with the transaction.
- Solar Farms, California: conducted ASTM Phase I Environmental Site assessments
  of solar farms consisting of over 300 and 900 acres of undeveloped land scheduled
  for construction and installation of solar farms, and also fully developed solar
  farms. WSP's review included desktop reviews of information provided by the
  target company, review of publicly available information from federal and state
  databases, site inspections of pre-and post-solar cell installation, and interviews
  with company personnel with environmental, health and safety responsibilities.
  WSP prepared ASTM E1527-13 Phase I environmental site assessment reports and a
  cost estimate detailing material issues associated with the business unit.

Vice President Earth & Environment

- US Postal Service, San Francisco, Fresno and Los Angeles, California: conducted ASTM Phase I Environmental Site assessments of US Postal Service mail sorting and distribution centers. WSP's review included desktop reviews of information provided by the US Postal Service, review of publicly available information from federal and state databases, site inspections, an abbreviated National Environmental Protection Act (NEPA) checklist, and interviews with company personnel with environmental, health and safety responsibilities. WSP prepared ASTM E1527-13 Phase I environmental site assessment reports and a recommendations for additional investigations, if warranted.
- Paper Mill and Paper Product Manufacturer, California: conducted a Phase I environmental site assessment with environmental, health and safety compliance evaluations at a paper mill and paper product manufacturing and warehouse facility located in California which was being considered for purchase by our client. The project involved detailed site inspections, a review of environmental compliance and land contamination liability, a review of historical environmental issues at each site, and preparation of a ASTM E1527-13 Phase I environmental site assessment report.
- Vacant Properties/Development Sites: Multiple States, USA: conducted ASTM Phase I Environmental Site assessments of vacant properties scheduled to be developed with commercial or residential structures. Sites have included fallow land, previous and current farm fields. The due diligence activities included desktop review of relevant environmental information provided by the target company, review of existing Phase I and Phase II reports (where applicable), review of publicly available databases, physical inspection of targeted areas of the assets, collection of soil samples for analysis of potential contaminants, and preparation of a ASTM E1527-13 Phase I environmental site assessment report.
- Multi-Media Production Studios and Satellite Communication Stations, California: conducted ASTM Phase I Environmental Site assessments and environmental, health and safety compliance reviews of a multi-media studio and production facilities and satellite communications stations in evaluating environmental liability associated with a potential business and asset purchase. The scope of work involved a review of previous environmental investigation and remediation reports, exiting Phase I reports, review of publicly available information from federal and state databases, site inspections and collection of air samples. WSP prepared a ASTM E1527-13 Phase I environmental site assessment report for each location to assist in their decision-making process.
- Silicon Chip Manufacturer, California: conducted ASTM Phase I Environmental Site assessments and environmental, health and safety compliance review of a chip manufacturing and research and development facility ahead of closure of the facility. The project involved a detailed site inspection, a review of environmental compliance and land contamination liability, a review of historical environmental issues at the site, and preparation of a ASTM E1527-13 Phase I environmental site assessment report.
- Valve and Control Manufacturer, Multiple States, USA: conducted ASTM Phase I Environmental Site assessments and environmental, health and safety compliance reviews of two valve and control manufacturing facilities located in Texas and Nevada in evaluating environmental liability associated with a potential business and asset purchase. The project involved detailed site inspections, a review of environmental compliance and land contamination liability, a review of historical

Vice President Earth & Environment

environmental issues at each site, and preparation of a ASTM E1527-13 Phase I environmental site assessment report. The deliverables allowed our client to identify liabilities associated with the potential purchase of the target company.

- Analytical Instrument and Tooling Machine Assembly and Manufacturer, California: conducted Phase I environmental site assessments with environmental, health and safety compliance evaluations at analytical instrument and tooling machine assembly and manufacturing facilities located in California being considered for purchase by our client. The projects involved detailed site inspections, a review of historical environmental issues at each site, and preparation of a ASTM E1527-13 Phase I environmental site assessment report. The deliverables allowed our client to identify liabilities associated with the potential purchase of the business unit.
- Liquid Soap and Detergent Manufacturer, Various States, USA: conducted Phase I environmental site assessments with environmental, health and safety compliance evaluations of liquid soap and detergent manufacturing facilities in California and Oregon being considered for purchase by our client. The project involved detailed site inspections, a review of historical environmental issues at each site, and preparation of a ASTM E1527-13 Phase I environmental site assessment report.
- Automobile Windshield Replacement Company, Various States, USA: directed and conducted Phase I environmental site assessments with environmental, health and safety compliance evaluations assessing environmental contamination and compliance liabilities of a windshield replacement chain (over 220 distinct locations) being considered for purchase by our client. The project involved detailed site inspections, a review of environmental compliance and land contamination liability, a review of potential historical environmental issues, preparation of a summary spreadsheet, and preparation of ASTM E1527-13 Phase I environmental site assessment reports. The deliverables allowed our client to identify liabilities associated with the potential purchase of the business unit.

# Initial Site Assessments

 Interstate 5 and 405 Improvement Areas, Southern California, USA: prepared Initial Site Assessment reports submitted under the California Department of Transportation (Caltrans) requirements. These reports were also used to contributed to the Hazardous Waste/Materials section of Preliminary Environmental Analysis Reports and Project Study Reports.

# Environmental Management Systems

— Consumer Electronics and Data Management, Various States, USA: prepared several site-specific environmental compliance manuals, procedures, and legal registers for clients in the manufacturing, electronics, data management and financial sectors. These manuals and legal registers provide clients with simple, easy to understand descriptions of regulatory requirements specific to their business operations and geographic locations.

# Preliminary Endangerment Assessment

Elementary School, San Jose, CA: prepared a preliminary site endangerment assessment (PEA) of an elementary school property as required by the State of California Environmental Protection Agency Department of Toxic Substances Control. The PEA includes background research, workplan preparation and

# Vice President Earth & Environment

implementation, public participation in the form of a community profile and public meeting, data evaluation, and report preparation

# Training

 Appliance Recycling Facility, California: provided an onsite training program for the safe receiving, handling, storage, and disposal of hazardous materials and hazardous wastes. The training was specific to onsite activities required by the EPA and California regulations.
