## **Proposed Lower Capacity for Funding Group 2**

Is it feasible for the minimum capacity for group two projects to be lowered to 10 MW (currently proposed to be 15 MW)? We are a grant writing firm and a number of our public agency clients that are interested in this program have projects that fit under the eligible projects, with the exception that the rated capacity for their projects are 10 MW as per the guidelines' definition of rated capacity. If this minimum requirement can be lowered to 10 MW, that would be greatly appreciated.
