Re: Errata on previous C Note filing

Dear California Energy Commission and Staff:

We would like to correct a statement made in our previous Docket filing that indicated LEU does not allow microgrids in its utility district. This was a misunderstanding on our part. LEU, pursuant to SB 1139, does allow microgrids but SB 1139 allows public utilities to evaluate, approve, and regulate them:

“8372. (a) Within 180 days of the first request from a customer or developer to establish a microgrid, the governing board of a local publicly owned electric utility shall develop and make available a standardized process for the interconnection of a customer-supported microgrid, including separate electrical rates and tariffs, as necessary. The separate rates and tariffs shall not compensate a customer for the use of diesel backup or natural gas generation, except as either of those sources is used pursuant to Section 41514.1 of the Health and Safety Code, or except for natural gas generation that is a distributed energy resource.

(b) The governing board shall ensure the microgrid rates and charges do not shift costs to, or from, a microgrid customer or nonmicrogrid customer, and shall ensure each microgrid and its components comply with the local publicly owned electric utility’s applicable regulatory requirements.”

Thanks for the opportunity to notify you of this correction.

Sincerely,

David F. Chase
