Denver, CO 80202

SUBJECT: Hydrostor Willow Rock Energy Storage Center - Air Quality Permit Application and Supplemental AFC Determination of Completeness

Dear Mr. Hildebrand:

Your Authority to Construct applications for your four (4) Emergency Diesel Fueled Piston Engines have been received by this office. A preliminary review of the applications revealed they are complete. It is possible, however, during processing, additional information may be required to clarify, amplify, correct, or otherwise supplement parts of your applications.

The District has also reviewed your supplemental application for certification (AFC) filed with the California Energy Commission (CEC) on March 1, 2024. A preliminary review of the air quality analysis in the AFC, revealed all applicable District Rules and requirements are properly identified and address. Furthermore, the emergency engines are proposed in accordance with applicable local, state, and federal emission standards. Therefore, based on information provided, the proposed project is expected to comply with applicable District Rules and requirements.

Processing of your ATCs/Determination of Compliance will be completed as soon as possible and you will be notified if additional support information is required. Should you have any questions, please contact Miguel Sandoval at (661) 862-5250 or via email at sandovalm@kerncounty.com.

Sincerely,

A handwritten signature in blue ink that reads "Gary Ray, Jr." in a cursive style.

Gary Ray, Jr.
Air Pollution Control Officer
