## **In favor**

I am in favor of this project for many reasons I will only touch on a couple of them, with the current climate change and the demand for more energy in the state I feel this is a great opportunity to produce energy in the area with no global impact to our land and the environment. The second it creates good paying jobs for those who live in the area. The opportunity to work near where they live and the chance for young workers to get trained and learn a skill of a construction craft.
