## **Yes for Fountain Wind Project**

Hi, hope this is seen and heard.

I am an IBEW member for local 340 in Redding, and the bottom line of this project is twofold: first, to provide for the city of Redding residents clean and efficient energy that brings California closer to zero carbon emissions, and second, to provide it's residents with quality employment that will bring external funding to the city and increase the quality of life of its constituents.

This project must go through for the health of our community and for the state of California. People who seek to destroy this project are selfish, unthoughtful, and nearsighted. This project will provide long term positive benefits for this and the next generations to come. Think deeply and reflect upon the future of our people, and how this project contributes to that.

Thank you for your time and consideration,  
Kevin Crosby  
Redding's Local 340, IBEW
