No Offshore Wind Turbines in any Oceans

I am a 40 yr resident of Cambria, CA. I am extremely against the Offshore Wind Turbines, in our ocean or any ocean for that matter.

Look at the East Coast (Jersey Shores) it has caused all sorts of issues since the installation of wind turbines. ie. Whale, Dolphin & Porpoise strandings and deaths. (last year alone 85 dead whales)

The fisherman on the Jersey Shores, who have been fishing those waters for 100's of years say,

It's like a dead zone, it's harming many species of fish, Krill, plankton, zooplankton and other crustaceans, as well as deforming fish eggs.

Certain populations of fish are diminishing in the areas of the wind turbines.

The high decibel surveying is devastating to the health of many ocean creatures, such as Whales, Dolphins, Porpoise and many species of marine life.

These giant wind turbines last 20-30 yrs and then end up as waste in our landfills.

They are costly to build & maintain.

I SAY NO TO OFFSHORE WIND TURBINES!!!!!!!!!!
