Docket Number: 20-RENEW-01

AB 841 5th Edition Changes

Looks like there were some changes in the 5th edition that was recently released. Are these changes (see below) going to be retroactive to all AB841 projects or just new applications?

- Changed carbon dioxide monitor requirements to allow the installation of wireless monitors.
- Expanded time extension request provision to apply to both A&M and U&R Grants.
- Extended the amount of additional project term time provided with a time extension request from six months to 18 months.
- Clarified that the final project reporting deadline may be updated by a notice updating information. (ebu)
