**CALIFORNIA ENERGY COMMISSION**715 P Street  
Sacramento, California 95814[energy.ca.gov](http://energy.ca.gov)

CEC-70 (Revised 7/22)

In the matter of:	)	Docket No. 24-IEPR-01
	)	
Preparation of the	)	
<i>2024 Integrated Energy Policy Report (IEPR)</i>	)	Scoping Order
<i>Update</i>	)	

## **Scoping Order for the *2024 Integrated Energy Policy Report Update***

The California Energy Commission (CEC) biennially develops the *Integrated Energy Policy Report (IEPR)* that broadly assesses California’s energy system and puts forward recommendations to advance California’s clean energy future for all, with an update in the intervening years. CEC Chair David Hochschild will serve as lead commissioner for the *2024 IEPR Update*, with Vice Chair Siva Gunda serving as associate member.

### **Scope**

As described below, the *2024 IEPR Update* will provide updates on the California Energy Demand Forecast. Further, it will meet the statutory obligations set forth in Senate Bill (SB) 605 (Padilla, Chapter 405, Statutes of 2023) to evaluate wave and tidal energy.

- 1. Electricity Demand Forecast Update:** The *2024 IEPR Update* will include an updated 15-year electricity demand forecast with the latest demographic and economic data. The updated forecast will include scenarios that estimate the potential impacts of the state’s decarbonization strategies and other sources of load growth, such as increases in the number of data centers in the state.
- 2. Wave and Tidal Energy:** SB 605 requires the CEC, in consultation with other state agencies pursuant to Public Resources Code, section 25996(a), to evaluate the following six areas. Further, the CEC will consult with California Native American tribes pursuant to the CEC Tribal Consultation Policy on this evaluation related to wave and tidal energy.
  1. Evaluate factors that may contribute to the increased use of wave and tidal energy in California.

2. Provide findings on latest research about the technological and economic feasibility of deploying offshore wave and tidal energy off the coast of California in state and federal waters.
3. Evaluate wave and tidal energy project potential transmission needs and permitting requirements.
4. Evaluate wave and tidal energy project economic and workforce development needs.
5. Identify near-term actions related to investments and workforce for wave and tidal projects, to maximize job creation and economic development, while considering affordable electric rates and bills.
6. Identify a monitoring strategy to gather sufficient data to evaluate impacts to marine and tidal ecosystems and inform adaptive management.

Further, SB 605 requires the CEC to submit a report to the Governor and Legislature that summarizes the *2024 IEPR Update* findings on wave and tidal resources to inform legislative and executive actions on the topic.

### **Legislative Authority**

Public Resources Code (PRC) Section 25301(a) requires the CEC to “conduct assessments and forecasts of all aspects of energy industry supply, production, transportation, delivery and distribution, demand, and prices.” These assessments and forecasts are used to develop recommendations for energy policies that conserve state resources, protect the environment, provide reliable energy, enhance the state’s economy, and protect public health and safety. The CEC includes these energy policy recommendations in its biennial IEPR that is issued in odd-numbered years, such as in the *2023 IEPR*.

Further, PRC Section 25302(c) requires the CEC to prepare an update in alternate years to report on issues raised in the biennial IEPR or identify new energy issues that have arisen during the intervening year. The *2024 IEPR Update* will fulfill that requirement.

### **Key Statutory and Executive Order Initiatives**

The *2024 IEPR Update* will broadly reflect the many key policy initiatives that shape California’s energy policies, including:

- Senate Bill 605 (Padilla, Chapter 405, Statutes of 2023), which requires the CEC to evaluate the feasibility, costs, and benefits of using wave energy and tidal energy.
- Assembly Bill 1279 (Muratsuchi, Chapter 337, Statutes of 2022), which requires steps to ensure California reaches net-zero GHG emissions by 2045.
- Senate Bill 1020 (Laird, Chapter 361, Statutes of 2022), which mandates steps to ensure renewable and zero-carbon sources make up 90 percent of the state’s electricity by 2035.

- Senate Bill 887 (Becker, Chapter 358, Statutes of 2022), which requires the California Public Utilities Commission and CEC to provide guidance and inputs to support the development of transmission capacity needed to deliver renewable or zero-carbon resources by 2035, in coordination with the California Independent System Operator.
- Senate Bill 100 (De León, Chapter 312, Statutes of 2018), which accelerated the state’s renewables goal to 60 percent by 2030 and put into law the state’s commitment to a 100 percent renewable and zero-carbon electricity system by 2045.
- Senate Bill 32 (Pavley, Chapter 249, Statutes of 2016), which amended the Global Warming Solutions Act of 2006. It called for a statewide reduction of GHG emissions of 40 percent below 1990 levels by 2030.
- Senate Bill 350 (De León, Chapter 547, Statutes of 2015), which increased renewable procurement targets, required a doubling of energy efficiency savings by 2030, and directed the CEC to identify barriers to accessing the benefits of clean energy, including barriers low-income customers face in accessing energy efficiency, weatherization, and photovoltaics.

## 2024 IEPR Update Schedule

The lead commissioner directs CEC staff to use the following general schedule. As public workshop and event topics and dates are finalized, the CEC will post notices on its website and notify stakeholders at least 10 days in advance of each workshop date. The [schedule](https://www.energy.ca.gov/data-reports/reports/integrated-energy-policy-report/2024-integrated-energy-policy-report-update) will be posted and regularly updated at <https://www.energy.ca.gov/data-reports/reports/integrated-energy-policy-report/2024-integrated-energy-policy-report-update>.

<b>Task/Event</b>	<b>Date</b>
Final 2024 IEPR Update Scoping Order released	April 2024
Adopt order instituting informational proceeding for 2024 IEPR Update	May 2024
Public workshops on specific topics	May 2024–December 2024
Release draft <i>2024 IEPR Update</i>	October 2024
Release proposed <i>2024 IEPR Update</i>	January 2025
Adopt 2024 IEPR Forecast	January 2025
Adopt <i>2024 IEPR Update</i>	February 2025

Tribal engagement and consultation will also be conducted pursuant to CEC’s Tribal Consultation Policy.

## Participation in the Integrated Energy Policy Report Proceeding

Policy recommendations contained in the *2024 IEPR Update* will be based on the record developed during the proceeding, including data and technical analyses by staff and

stakeholders. Analysis and information developed in other proceedings at the CEC and by other agencies will be incorporated as appropriate. Participants should use Docket Number 24-IEPR-01 and associated dockets when submitting information for the lead commissioner's consideration as follows:

- 24-IEPR-01 - General/Scope
- 24-IEPR-02 - Electricity Resource Plans
- 24-IEPR-03 - Electricity Demand Forecast
- 24-IEPR-04 - Wave and Tidal Energy

The lead commissioner encourages the participation of all interested and affected participants because public input is essential to ensuring a complete and thorough record. As in previous proceedings, the lead commissioner recognizes that close consultation and coordination with federal, state, local, and other agencies and California Native American tribal governments is critical to identifying and addressing energy infrastructure and related environmental challenges. The lead commissioner directs staff to continue working with these agencies and governments to ensure their participation in this proceeding.

## **Contacts**

**Public Advisor.** The CEC's Public Advisor assists the public with participation in CEC proceedings. To request assistance, interpreting services, or reasonable modifications and accommodations, call (916) 957-7910 or email [publicadvisor@energy.ca.gov](mailto:publicadvisor@energy.ca.gov) as soon as possible but at least five days in advance of the workshop. The CEC will work diligently to meet all requests based on availability.

**Tribal Liaison.** The CEC's Tribal Liaison is available to assist all California Native American tribes, call (916) 839-0386 or email [sierra.graves@energy.ca.gov](mailto:sierra.graves@energy.ca.gov)

**Media Inquiries.** Email [mediaoffice@energy.ca.gov](mailto:mediaoffice@energy.ca.gov) or call (916) 654-4989.

**Technical Subject Inquiries.** Email Heather Raitt at [heather.raitt@energy.ca.gov](mailto:heather.raitt@energy.ca.gov) or call (916) 628-2355.

**General Inquiries.** Email Raquel Kravitz at [raquel.kravitz@energy.ca.gov](mailto:raquel.kravitz@energy.ca.gov) or call (916) 907-4284.

## **Availability of Documents**

When new information is posted, an email will be sent to those on the integrated energy policy report subscription. Those interested in receiving these notices can [subscribe](https://www.energy.ca.gov/data-reports/reports/integrated-energy-policy-report/2024-integrated-energy-policy-report-update) at <https://www.energy.ca.gov/data-reports/reports/integrated-energy-policy-report/2024-integrated-energy-policy-report-update>, or manage existing [subscriptions](#) or sign up for others at <https://www.energy.ca.gov/subscriptions>.
