I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of Title 40 of the Code of Federal Regulations, Part 312, (40 CFR 312). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Executive Summary

1.0 EXECUTIVE SUMMARY

Stantec Consulting Services Inc. (Stantec) has completed a Phase I Environmental Site Assessment (ESA) report of the property located on approximately 9,116 acres near the census designated place known as Cantua Creek in Fresno County, California (the “Subject Property”), on behalf of IP Darden I, LLC (the “Client”). The work was performed according to Stantec’s proposal dated August 18, 2022, and the statement of work (SOW) issued by IP Darden I, LLC on September 13, 2022 in accordance with the Master Services Agreement (MSA) dated April 12, 2022. IP Darden I, LLC (the “User”) have been designated as the User of this report. The intended use of this Phase I ESA is for due diligence in support of the developing the parcels with renewable energy infrastructure.

The Phase I ESA was conducted in conformance with the requirements of ASTM International (ASTM) Designation E2247-16 Phase I Environmental Site Assessment Process for Forestland or Rural Property, and All Appropriate Inquiry (AAI) as defined by the US-EPA in Title 40 of the Code of Federal Regulations, Part 312, except as may have been modified by the scope of work, and terms and conditions, requested by the Client. Any exceptions to, or deletions from, the ASTM or AAI practice are described in Section 2.3.

The Subject Property consists of forty-two parcels comprising approximately 9,116-acres of land located along the west side of State Route-177 (SR-177) and 9.5 miles northeast of the junction at State Route-145 (SR-145) and Interstate-10 (I-10), near Cantua Creek in Fresno County, California (Figure 1). The Subject Property parcels are primarily undeveloped land that were formerly used for agricultural purposes (row crops). Limited row cropping remains on certain parcels near the central portion of the Subject Property. The Subject Property parcels are owned by Westlands Water District (WWD). Below is a list of assessor’s parcel numbers for the Subject Property that are included in this Phase I ESA:

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Executive Summary

Structures onsite are limited to remnant concrete foundations from former buildings, a former oil well (discussed further in Sections 4.3.2 and 5.5), and small slabs where water well pumps are, or were formerly, located. Unpaved roadways throughout the Subject Property generally trend east-west or north-south along the parcel boundaries. A canal is located along the north boundary of APNs 040-110-23ST, 040-110-31ST, 040-110-32ST. A separate canal is also located along the north boundary of APN 040-110-15ST. A separate tree lined canal was also observed along the east boundary of APN 050-030-29ST. Overhead electrical lines were also observed along the boundaries of certain parcels. Unused farming equipment was observed at a few locations near irrigation/water wells. Small oil aboveground storage tanks (ASTs) were observed through the Subject Property and appeared to be related to the nearby irrigation wells, sediment tanks, and mobile fertilizer tanks. Minor oil staining was observed on surface soils by the well pumps pads, but was considered *de minimis* and no further investigation is recommended.

The surrounding parcels in all directions are current or former agricultural land (row crops). Residences, agricultural storage yards, miscellaneous agricultural and irrigation equipment was also observed on these surrounding agricultural properties. The Subject Property boundary is shown on **Figure 1**. Subject Property detail is depicted on **Figure 2**.

Subject Property and Regional History

Stantec's review of historical aerial photographs found that the Subject Property has been used for agricultural purposes (row crop and grain) since at least 1940. Oil exploration (well drilling) occurred on the Subject Property sporadically between 1939 and 1982. All seven wells drilled on the Subject Property were found to be dry holes, and were subsequently "plugged" according to records obtained from the California Geologic Energy Management (CalGEM), as discussed further in Section 4.3.2.

Given the historical agricultural use on the Subject Property, Stantec performed shallow soil sampling from 0.5 to 1.0-foot bgs at forty (40) locations across the Subject Property and from a soil stockpile in the northeast corner of APN 050-030-26ST on September 21, 2022. Soil samples were analyzed for organochlorine pesticides (OCPs), and the metals arsenic and lead, which are commonly associated with historical herbicide and pesticide application. The sampling was conducted in conformance with the requirements of ASTM International (ASTM) Designation E1903-11 Standard Practice for Environmental Site Assessments: Phase II Environmental Site Assessment Process

As shown in **Table 1**, certain OCPs (4,4'-DDE and 4,4'-DDT), arsenic and lead were identified above laboratory detection limits in certain samples. Analytical results indicate no OCP or lead concentrations above commercial use screening levels or California hazardous waste levels. Arsenic was detected above human health screening levels and slightly above background levels at concentrations that ranged from 6.3 to 13 milligrams per kilogram (mg/kg). Arsenic occurs naturally at concentrations well above regulatory health risk-based screening levels.

The data from surface soils (B-1 through B-40) collected at the Subject Property were evaluated statistically for normality and evidence of contamination using the United States Environmental Protection Agency (USEPA) ProUCL statistical program. Using this program, the 95 percent upper confidence level

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Executive Summary

of the mean was calculated to be 10 mg/kg. Additionally, a Q-Q plot of the data (see **Appendix I**) suggests that the data are representative of a single population, meaning that the data are likely representative of a single source such as background native concentrations. Further discussion of the statistical analysis is provided in Section 7.0 and the Pro-UCL output data is included in **Appendix I**. Based on this evaluation, Stantec opines that the reported arsenic values appear to be the result of background native concentrations and not related to anthropogenic contamination. Therefore, no further investigation is recommended regarding the agricultural use of the Subject Property.

The following items of note were identified during this ESA:

- **Abandoned Oil Wells.** Stantec reviewed the Well Finder provided on the Geologic Energy Management Division (CalGEM) website in an effort to evaluate if there are any known oil, gas, or geothermal wells in the Subject Property vicinity. According to the Well Finder there are seven (7) oil wells at the Subject Property that are designated by CalGEM as abandoned dry holes. The operator, well name, and their corresponding American Petroleum Institute (API) numbers are identified in Section 4.3.2 and their approximate locations based on the CalGEM online mapping system are illustrated on Figure 2.

Although the onsite wells have been abandoned, the abandonment activities occurred several decades ago and are unlikely to meet the current abandonment standards set forth by CalGEM. Although unlikely, any future work required by CalGEM on the oil wells would fall on the owner of the Subject Property. Therefore, the abandoned oil wells are considered a business environmental risk (BER) due to financial risks inherent to well ownership imposed by CalGEM. For example, such risk could arise if the abandoned oil well casings interfere with future facility layout or infrastructure to be installed at the Subject Property. In these instances, CalGEM would need to be notified of any physical alterations (*i.e.* casing height adjustments) made to the wells in order for proper permitting to make these alterations. Such alterations would require IP Darden, LLC to become the operator of the well and could lead to additional work being required by CalGEM, including re-abandonment. Stantec recommends that the abandoned well casing locations be avoided in future development activities. Since the well locations mapped on the CalGEM Well Finder website can be mis-plotted by several hundred feet, the most efficient way to plan avoidance measures is to (1) locate the well using geophysical locating techniques to detect the steel casing, (2) excavate down to the well casing to physically confirm its location, and (3) have the project civil engineer survey its location and add the location to the development plan.

- **Irrigation/Water Wells:** Water wells were observed at the Subject Property during the field reconnaissance. Stantec recommends that the wells be abandoned under permit from Fresno County Department of Public Health (FCDPH) in accordance with the California Well Standards Ordinance as stated in Bulletin 74-81, unless the wells will be used by the proposed development. It is recommended that information/documentation on the location, status, and depth of the wells be obtained from WWD so that a plan can be developed with regard to use or destruction of the wells.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Executive Summary

- **Declaration of Restrictive Covenant (Non-irrigation Covenant):** A preliminary title report dated February 22, 2022 was provided to Stantec by the User. The preliminary title report identified Instrument Nos. 2003-0189565 and 2004-0256340 that are a “Declaration of Restrictive Covenant (Non-irrigation Covenant)” recorded on August 15, 2003 and November 16, 2004 for certain parcels. The covenant prohibits irrigation of the land within specified parcels and applies to the current owner and all subsequent owners. The Subject Property parcels named in the document includes, at a minimum, the following:

APN 050-030-27ST APN 050-030-26ST APN 050-030-04ST

It is noted that additional parcels were listed but the alphanumeric suffixes on the parcels did not match with the Subject Property parcel provided to Stantec. For example, the entire parcel number matched but the suffix was either “S” or “T”, rather than “ST”. Additional evaluation to confirm which parcels are included in the covenant should be conducted if it is determined that the non-irrigation covenant will adversely affect the proposed developed of the Subject Property as a solar facility. Stantec also recommends that it be clarified in writing as to whether application of water for dust control during development would be considered irrigating.

- **Groundwater Monitoring Wells:** At least 16 groundwater monitoring wells were observed across the Subject Property during the field reconnaissance. According to Mr. Russ Freeman of WWD, the monitoring wells are used to evaluate groundwater levels in different aquifers. The monitoring wells should be abandoned under permit from FCDPH. It is recommended that information/documentation on the location, status, and depth of the wells be obtained from WWD so that a plan can be developed with regard to use or destruction of the wells. It is recommended that information/documentation on the location, status, and depth of the monitoring wells be obtained from WWD so that a plan can be developed with regard to destruction of the monitoring wells.

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E2247-16 of approximately 9,116-acres located in Cantua Creek, California, or the “Subject Property.” Any exceptions to, or deletions from, this practice are described Section 2.3 of this report. This assessment has revealed the following recognized environmental conditions (RECs), Controlled RECs (CRECs), and/or significant data gaps in connection with the Subject Property:

- **Past Oil Drilling Operations** – Although the seven (7) onsite abandoned oil wells never produced and were found to be “dry holes”, there remains the potential that earthen drilling mud pits/sumps were generated at the time the wells were drilled. In the 1940 aerial photograph (Section 4.4.2) there appears to be faint evidence of three rectangular depressions that are located approximately 100-200 feet west/northwest of the Leoscher “1” well in the northeast quadrant of APN 050-030-24ST. The soil in this area does not appear to be discolored but there is the potential that these features could have been mud pits related to the oil well. Historic aerial photographs do not provide any further insight regarding sumps or mud pits related to the six other onsite wells, most likely because of the short duration (1-3 months) between drilling and abandonment when no aerial photographs were taken.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Executive Summary

The potential presence of impacted soils associated with drilling mud pits/sumps is considered a REC. Stantec recommends that further investigation be performed in the area west/northwest of the Leoscher "1" well where the rectangular depressions were noted in the 1940 photograph in order to evaluate potential chemical impact to soil at this location. Since there is no visible indication of mud pits/sumps in any of the other aerial photographs, Stantec recommends that a Soil Management Plan (SMP) be prepared that provides the procedures, methodologies and reporting requirements in the event that unknown impacts to soil are encountered during demolition, grading and construction activities at the Subject Property.

The preceding summary is intended for informational purposes only. Reading of the full body of this report is recommended.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Introduction

2.0 INTRODUCTION

The objective of this Phase I ESA was to perform All Appropriate Inquiry (AAI) into the past ownership and uses of the Subject Property consistent with good commercial or customary practice as outlined by ASTM International (ASTM) in “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”, Designation E2247-16. “All Appropriate Inquiry” (AAI) is the process for evaluating a property’s environmental conditions for the purpose of qualifying for landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), following final rule of Part 312 of Title 40, Code of Federal Regulations (40 CFR Part 312). The purpose of this Phase I ESA was to identify, to the extent feasible, adverse environmental conditions including recognized environmental conditions (“RECs”) of the Subject Property.

The ASTM E2247-16 standard indicates that the goal of the Phase I ESA is to identify RECs, including historical recognized environmental conditions (“HRECs”), and controlled recognized environmental conditions (“CRECs”) that may exist at a property. The term “recognized environmental conditions” means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property:

- 1) the presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* due to a *release* to the *environment*;
- 2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* due to a *release* or likely *release* to the *environment*; or
- 3) the presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* under conditions that pose a *material threat* of a future *release* to the *environment*.

ASTM defines a “HREC” as a REC that has occurred in connection with the Subject Property but has been addressed to the satisfaction of the applicable regulatory authority and meets current unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls). A HREC is not considered a REC.

ASTM defines a “CREC” as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls).

As defined by ASTM, RECs can include hazardous substances or petroleum products present under conditions in compliance with laws if that presence represents a material threat of future release. The release of hazardous substances or petroleum products is, however, not a REC if that presence is a *de minimis* condition. *De minimis* conditions are minor releases that generally do not present a material risk to human health and would not likely be subject to enforcement action if brought to the attention of governmental agencies. ASTM also considers the potential for a business environmental risk (BER),

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Introduction

defined as a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of the Subject Property, not necessarily limited to those environmental issues required to be investigated by the ASTM standard. Consideration of BERs may involve addressing one or more ASTM non-scope considerations.

This Phase I ESA was conducted in accordance with our proposal to IP Darden I, LLC dated August 18, 2022 and Client's authorization on September 13, 2022. The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Subject Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Subject Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform an independent evaluation of the purchase or lease price of the Subject Property and its relationship to current fair market value. The conclusions presented in this Phase I ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E2247-16 notes that the availability of record information varies from source to source. The User or Environmental Professional (EP) is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

1. Information that is publicly available;
2. Information that is obtainable from its source within reasonable time and cost constraints; and
3. Information that is practicably reviewable.

Introduction

2.1 SUBJECT PROPERTY DESCRIPTION

The Subject Property consists of forty-two parcels comprising approximately 9,116-acres of land located along the west side of State Route-177 (SR-177) and 9.5 miles northeast of the junction at State Route-145 (SR-145) and Interstate-10 (I-10), near Cantua Creek in Fresno County, California (Figure 1). The Subject Property parcels are primarily undeveloped land that were formerly used for agricultural purposes (row crops). Limited row cropping remains on certain parcels near the central portion of the Subject Property. The Subject Property parcels are owned by Westlands Water District (WWD). Due to the lack of unpaved roads to all areas of the Subject Property, vehicular access was limited to the main graded dirt roads. As a result, portions of the Subject Property had to be traversed by foot. Stantec traversed transects across the Subject Property to obtain a general understanding of Subject Property conditions and also specifically visited locations where developed features or land disturbance was discernable on aerial photographs. It should be noted that not all areas were traversed due to the Subject Property size, time, and project constraints (limited roadways). The surrounding parcels in all directions are current or former agricultural land (row crops). Residences, agricultural storage yards, miscellaneous agricultural and irrigation equipment was also observed on these surrounding agricultural properties. The Subject Property boundary is shown on Figure 1. Subject Property detail is depicted on Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

2.2 SPECIAL TERMS, CONDITIONS, AND ADDITIONAL ASSUMPTIONS

There were no special terms, conditions, or additional assumptions associated with this Phase I ESA.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Introduction

2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided and given the schedule and budget constraints established by the client. No other representations, warranties, or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential and actual liabilities and conditions associated with the Subject Property.

This report provides an evaluation of selected environmental conditions associated with the Subject Property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information received from others.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report and are based solely on the scope of work described in the report, the limited data available, and the results of the work. They are not a certification of the Subject Property's environmental condition.

The client did not provide or contract Stantec to provide recorded title records or search results for environmental liens or activity and use limitations encumbering the property or in connection with the Subject Property. Stantec was unable to obtain historical records that document the property history in 5-year intervals, and this resulted in data gaps. Although this represents data gaps, these data gaps are not considered to impact the EPs ability to identify RECs unless stated as such. Based on the information obtained during the course of this ESA, history records obtained at least once per decade beginning in the 1940s, and general knowledge of development at and near the Subject Property, the absence of this information did not affect the ability of the EPs to identify RECs, HRECs, CRECs, or *de minimis* conditions.

This report has been prepared for the exclusive use of the client identified herein and any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities, or claims, howsoever arising, from third party use of this report.

Project Specific limiting conditions are provided in Section 2.2.

The conclusions are based on the conditions encountered at the Subject Property by Stantec at the time the work was conducted.

As the purpose of this report is to identify Subject Property conditions which may pose an environmental risk; the identification of non-environmental risks to structures or people on the Subject Property is beyond the scope of this assessment.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Introduction

The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the Subject Property which is the subject of this report with any Federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations, or policies of Federal, state, provincial or local governmental agencies. It is recommended that issues raised by the report should be reviewed for the client by its legal counsel.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change.

2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an EP. The credentials of the EP and other key Stantec personnel involved in conducting this Phase I ESA are provided in Appendix B.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

User-Provided Information

3.0 USER-PROVIDED INFORMATION

ASTM E2247-16 describe responsibilities of the User to complete certain tasks in connection with the performance of “All Appropriate Inquiries” into the Subject Property. The ASTM standard requires that the EP request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Subject Property. Towards that end, Stantec requested that the User provide the following documents and information:

| Description of Information | Description and/or Key Findings |
|--|--|
| User Questionnaire and/or Interview | The questionnaire was completed by Mr. Seth Israel, Vice President of Land Acquisition with Intersect Power. |
| Environmental Liens or Activity and Use Limitations (AUL) | The User responded that he knows of no environmental liens or activity use limitations for the Subject Property. |
| Previous Environmental Permits or Reports Provided by User | There are no environmental reports for the Subject Property. |
| Purpose of the Phase I ESA | Due diligence for property transaction |

Stantec forwarded the ASTM recommended User Questionnaires to Mr. Seth Israel, Vice President of Land Acquisition with Intersect Power. In the complete questionnaire, Mr. Israel reported that he did not have any knowledge regarding the environmental condition of the Subject Property, other than that it was historically used for agriculture production. He indicated that the purchase price being paid for the property reasonably reflects the fair market value and does not include any reductions in the purchase price due to any potential contamination. The completed User Questionnaires were returned to us by Mr. Israel and dated September 22, 2022 is included in Appendix C.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Records Review

4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Subject Property and surrounding area and evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Subject Property. During the review of historical records, Stantec attempted to identify uses of the Subject Property from the present to the first developed use of the Subject Property. Stantec's research included the reasonably ascertainable and useful records described in this section.

4.1 PHYSICAL SETTING

A summary of the physical setting of the Subject Property is provided in the table below with additional details in the following subsections

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Records Review

| | |
|---|---|
| Topography: | The Subject Property is generally flat, and the surface topography slopes gently to the northeast. The surface elevations ranges from approximately 187 to 260 feet above mean sea level. |
| Soil/Bedrock Data: | The Subject Property is located within the Great Valley Geomorphic Province. The stratigraphy underlying the Subject Property and the vicinity consists of recent-age alluvium consisting of fan and basin deposits (California Department of Mines and Geology [CDMG], 1958). |
| Estimated Depth to Groundwater/ Estimated Direction of Gradient: | Groundwater monitoring data for the Subject Property was not reasonably ascertainable. However, based on information provided in a 2021 Biennial Groundwater Monitoring Report for a property located 4.5 miles to the northeast, groundwater historically ranged between 110 and 130 feet below ground surface (bgs) but wells installed within this zone have recently been found to be dry. Groundwater depths in deeper screening wells indicate that groundwater water levels, as of March 2021, were measured between 170 and 189 feet bgs (Simplot, 2021). Based on the California Department of Water Resources (DWR) Lines of Equal Elevation of Water in Wells, San Joaquin Valley, (Spring 2010) the groundwater flow direction is to the north-northeast but may vary based on local groundwater pumping. |
| NOTE: Site-specific groundwater flow direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted. | |

4.1.1 Subject Property Topography and Surface Water Flow

Based on United States Geological Survey (USGS) 7.5-minute topographic maps, the Subject Property is generally flat; surface water on the Subject Property is expected to infiltrate into the ground surface or flows overland following the surface topography which slopes gently to the northeast. The surface elevations range between approximately 187 to 260 feet above mean sea level. Surface water drainage appears to occur as sheet flow across the Subject Property to canals and stormwater retention basins that were observed. No evidence of improper discharge from the Subject Property was observed during Stantec's field reconnaissance. A canal is located along the north boundary of APNs 040-110-23ST, 040-110-31ST, 040-110-32ST. A separate canal is also located along the north boundary of APN 040-110-15ST. A separate tree lined canal was also observed along the east boundary of APN 050-030-29ST.

The nearest water body is the California Aqueduct that is located approximately 2.6 miles southwest of the Subject Property.

4.1.2 Regional and Subject Property Geology

The area is located within the Great Valley Geomorphic Province, which is a large alluvial plain between the highlands of the Sierra Nevada mountain range and Coast Ranges into which sediments have been

Records Review

deposited since the Jurassic (California Geological Survey [CGS], 2002). The stratigraphy underlying the Subject Property and the vicinity consists of recent-age alluvium consisting of fan and basin deposits (CDMG, 1958).

The Site, as is most of California, is located in a seismically active area. The nearest active fault is the Nunez Fault, located approximately 23 miles south of the Site (CDMG, 1994). The Nunez Fault is part of an Alquist Priolo Special Studies Zone (CDMG, 2002b). The San Andreas Fault is located approximately 34 miles southwest of the Site (CGS, 2011). The Site is not located within an Alquist Priolo Special Studies Zone (CDMG, 2002b).

4.1.3 Regional and Subject Property Hydrogeology

The Site is located within the Westside subbasin (5-22.09) of the San Joaquin Valley Groundwater Basin (CDWR, 2013). The Westside subbasin comprises approximately 1,000 square miles underlying portions of Fresno and Kings Counties. Groundwater monitoring data for the Subject Property was not reasonably ascertainable. Depth to groundwater information for the "Helm Facility" 12688 South Colorado Avenue in Helm, California approximately 4.5 miles to the northeast was provided in a groundwater monitoring report prepared by Simplot. Based on information provided in Simplot's 2021 Biennial Groundwater Monitoring Report, groundwater historically ranged between 110 and 130 feet below ground surface (bgs) but wells installed within this zone have recently been found to be dry. Groundwater depths in deeper screening wells indicate that groundwater water levels, as of March 2021, were measured between 170 and 189 feet bgs.

Based on the California Department of Water Resources (DWR) Lines of Equal Elevation of Water in Wells, San Joaquin Valley, (Spring 2010) the groundwater flow direction is to the north-northeast but may vary based on local groundwater pumping.

4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from Environmental Data Resources Inc. (EDR), a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in Appendix D.

Stantec evaluated the information listed within the database relative to potential impact to the Subject Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Subject Property. As described in 4.1.3, the inferred shallow groundwater flow direction is likely to be in the north-northeast. Observations about the Subject Property and adjoining properties made during the Subject Property reconnaissance are provided in more detail in Section 5.

4.2.1 Listings for Subject Property

The Subject Property was not identified in the environmental database report.

| J Clausen Farms Inc 24465 W Cerini Cantua Creek, CA | SWEEPS UST, HIST UST, HAZNET, HWTS | Adjacent - between parcels 050-060-46ST and 050-070-64ST | No |
| The EDR database incorrectly lists this facility as being on the Subject Property. However, the listed facility is actually adjacent to the Subject Property between parcels 050-060-46ST and 050-070-64ST. The facility is reported as having historically had a 550-gallon unleaded gasoline UST. There are no releases associated with this facility and the Subject property is 1,500 feet from the nearest developed features where the UST would have most likely been located. As a result, this facility is considered unlikely to have environmentally impacted the Subject Property and no further assessment is recommended. | | | |

4.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Subject Property use and/or indications of RECs in connection with the Subject Property:

4.3.1 Local Health Department

| <p>Fresno County Environmental Health Division (FCEHD) 1221 Fulton Street, 3rd Floor Fresno, CA 93721 Telephone: 559-600-3271 Khambay Malavong kmalavong@fresnocountyca.gov September 23, 2022</p> | <p>Stantec contacted the FCEHD to evaluate whether there were records related to USTs, chemical storage, chemical spills/releases, or environmental cleanups for the Subject Property parcels and the vicinity. Ms. Malavong assisted Stantec with the request and asked that Stantec send an aerial photograph showing the boundaries of the Subject Property and five APNs representing distribution across the Subject Property so that she could search any available records in the area. She mentioned that it would be the most efficient was to research records since there are no addresses for the Subject Property parcels. Fresno County contacted Stantec via email on October 6, 2022 indicating that without an address, records cannot be researched.</p> |

However, Stantec searched available documentation through the State Water Resources Control Board's Geotracker website (http://geotracker.swrcb.ca.gov) for the Subject Property and surrounding areas. No environmental cases or land disposal sites were identified for the Subject Property or adjacent properties.</p> |

However, there remains the potential that earthen drilling mud sumps were generated at the time these wells were drilled. Due to the short duration between drilling and abandonment, historic aerial photographs do not provide any further insight regarding sumps or mud pits related to the onsite wells, with the exception of the potential mud pits in the 1940 aerial photograph (see Section 4.4.2). As a result, Stantec recommends that a Soil Management Plan be prepared that provides the procedures, methodologies and reporting requirements should any unknown impacts to soil be encountered during demolition, grading and construction at the Subject Property.</p> <p>Although the onsite wells have been abandoned, the abandonment activities occurred several decades ago and are unlikely to meet the current abandonment standards set forth by CalGEM. Although unlikely, any future work required by CalGEM on the oil wells would fall on the owner of the Subject Property. Therefore, the abandoned oil wells are considered a business environmental risk (BER) due to financial risks inherent to well ownership imposed by CalGEM. For example, such risk could arise if the abandoned oil well casings interfere with future facility layout or infrastructure to be installed at the Subject Property. In these instances, CalGEM would need to be notified of any physical alterations (<i>i.e.</i> casing height adjustments) made to the wells in order for proper permitting to make these alterations. Such alterations would require IP Darden, LLC to become the operator of the well and could lead to additional work being required by CalGEM, including re-abandonment. Stantec recommends that the abandoned well casing locations be avoided in future development activities. Since the well locations mapped on the CalGEM Well Finder website can be mis-plotted by several hundred</p> |

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

Land title records, deeds, environmental liens, and activity and use limitation documentation was not provided by the User. However, the Subject Property was not listed in the LIENS, LIENS 2, or DEED databases in EDR database report dated September 5, 2022.

Additionally, a preliminary title report dated February 22, 2022 was provided to Stantec by the User. A review of the preliminary title report identified no environmental liens or activity use limitations related to contamination at the Subject Property. However, the preliminary title report identified Instrument Nos. 2003-0189565 and 2004-0256340 that are a "Declaration of Restrictive Covenant (Non-irrigation Covenant)" recorded on August 15, 2003 and November 16, 2004 for certain parcels (see Appendix C, Preliminary Title Report). The covenant prohibits irrigation of the land within specified parcels and applies to the current owner and all subsequent owners. The Subject Property parcels named in the document includes, at a minimum, the following:

- APN 050-030-27ST
- APN 050-030-26ST

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Records Review

- APN 050-030-04ST

Please note that additional parcels were listed but the alphanumeric suffixes on the parcels did not match with the Subject Property parcel provided to Stantec. For example, the entire parcel number matched but the suffix was either “S” or “T”, rather than “ST”. The non-irrigation covenant is not considered a REC. However, additional evaluation to confirm which parcels are included in the covenant should be conducted if it is determined that the non-irrigation covenant will adversely affect the proposed developed of the Subject Property as a solar facility. Stantec also recommends that it be clarified as to whether application of water for dust control during development would be considered irrigating.

Other information listed in the preliminary title reports were related to legal description of the parcels, utility or roadway easements, land conservation contracts, and mineral/oil rights.

The preliminary title reports are provided in **Appendix C**.

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by Environmental Data Resources, Inc. (EDR). The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs.

| Year | Observations, Subject Property , and Adjoining Properties |
|---|--|
| 1940 (partial – missing east portions of APNs 040-110-34ST and 040-110-20ST) | <p>The Subject Property is used for agriculture with row crops evident throughout the parcels that are included in the photograph. Several dirt roads have been graded between the parcels and three dirt roads that appear to lead to residences or other small buildings are visible on APN 050-080-01ST.</p> <p>Soil disturbance is visible at the location of the abandoned oil well, Chevron USA Leoschner “1”, located in the northeast quadrant of APN 050-030-24ST. The well is not visible but there appears to be faint evidence of three rectangular depressions approximately 100-200 feet west/northwest of the well location of record. The soil in this area does not appear to be discolored but has the potential to be former mud pits related to the oil well.</p> <p>A very small black dot is visible in the northwest portion of APN 040-110-28ST. It is unclear whether the dot is an imperfection in the photograph, a shadow, a pond, or some other feature. There are no oil wells reported in the vicinity and the one oil well documented on this parcel was not drilled until 1965.</p> <p>Surrounding properties appear to also be used for agricultural operations (row crops).</p> |
| 1955 | <p>The Subject Property use is similar to the previous photograph. However, several circular and oval shaped dark features are visible on certain parcels. Given the agricultural use and absence of oil wells in the area, these features are most likely water ponds. A water channel</p> |

| 1960 | <p>The Subject Property appears similar to the previous photograph except that the potential mud pits on APN 050-030-24ST that were noted on previous photographs are no longer visible and the area is being cultivated. Slight soil disturbance is visible in the area of the abandoned oil well on APN 040-110-20ST but no evidence of mud pits are visible.</p> <p>Surrounding properties appear similar to the previous photographs.</p> |
| 1971 | The Subject Property and surrounding properties appear similar to the previous photographs. |
| 1978 | A water retention pond is visible in the northwest corner of APN 050-030-24ST. As many as four (4) structures have been constructed in the southwest corner of APN 040-110-25ST. The use of the structures is unknown but based on the layout of the building slab and surrounding landscape the northernmost buildings may have been a residence and the additional buildings related to equipment storage of farming supplies. Surrounding properties appear similar to the previous photographs. |
| 1981 | <p>A storage or laydown yard appears to be located in the southeast corner of APN 040-070-31ST. Other cleared areas are observed throughout the Subject Property parcels that are too small to discern specific detail. However, they appear similar to storage areas and areas where irrigation or other farming equipment was being used or stored.</p> <p>Surrounding properties to the north of the Subject Property parcels owned by Spindle Top Bayou Farm Inc are also row cropped.</p> |
| 1994 (partial – missing parcels north of Clarkson Ave) | The Subject Property and surrounding properties that are shown appear similar to the previous photograph. |
| 1998 (partial – missing majority of parcels south of Clarkson Ave) | The water channel noted in the 1955 and subsequent photographed years has been filled in and is now being farmed. The remainder of the Subject Property and surrounding properties that are shown appear similar to the previous photograph. |
| 2005 | The Subject Property and surrounding properties appear similar to the previous photographed year. |
| 2009, 2012, 2016 | The Subject Property appears similar to the present day. The buildings that were noted in the southwest corner of APN 040-110-25ST on the 1978 photograph, have been demolished and only the slabs remain. From the 2009 to 2016 aerial photographs, less of the Subject Property parcels are used for agricultural and do not appear to be used for any specific purpose. |

4.4.3 City Directories

There are no address for the subject Property parcels, as a result no city directories could be obtained.

4.4.4 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Subject Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Subject Property uses.

Due to the Subject Property and surrounding areas being vacant, historical fire insurance maps are not available.

4.4.5 Historical Topographic Maps

Stantec reviewed historical topographic maps of the area to help identify past Subject Property usage and areas of potential environmental concern.

No RECs were noted during our review of the topographic maps. Copies of the historical maps are provided in Appendix E. The following table summarizes the maps reviewed and our observations.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Site Reconnaissance

5.0 SITE RECONNAISSANCE

A visit to the Subject Property and its vicinity was conducted by Mr. Michael Myers, Senior Scientist with Stantec, on September 15 and 16, 2022. Access to the Subject Property was arranged through Mr. Russ Freeman of WWD. Stantec was unaccompanied during the field reconnaissance. Figure 2 provides information about the Subject Property and adjoining sites and the location of potential areas of environmental concern. Detailed Subject Property features are provided on Figure 2. Photographs collected during the site reconnaissance are included in Appendix A.

5.1 SUBJECT PROPERTY RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Subject Property that may indicate the presence of RECs. The reconnaissance of the Subject Property was conducted entirely on foot following ASTM Practice E2247 for large tracts of undeveloped land and/or rural properties. Stantec utilized the following methodology to observe the Subject Property:

- Traverse portion of the outer Subject Property boundary
- Traverse transects across the Subject Property

Weather conditions during the visit to the Subject Property were clear and sunny. There were no weather-related Subject Property access restrictions encountered during the reconnaissance visit. Field notes taken during the Subject Property reconnaissance are included in Appendix G.

5.2 GENERAL DESCRIPTION

| | |
|---|---|
| Subject Property and Area Description: | <p>The Subject Property consists of forty-two parcels comprising approximately 9,116-acres of land located along the west side of State Route-177 (SR-177) and 9.5 miles northeast of the junction at State Route-145 (SR-145) and Interstate-10 (I-10), near Cantua Creek in Fresno County, California (Figure 1).</p> <p>The surrounding parcels in all directions are current or former agricultural land (row crops). Residences, agricultural storage yards, miscellaneous agricultural and irrigation equipment was also observed on these surrounding agricultural properties. The Subject Property boundary is shown on Figure 1. Subject Property detail is depicted on Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.</p> |
| Subject Property Operations: | <p>The Subject Property parcels are primarily undeveloped land that were formerly used for agricultural purposes (row crops). Minor row cropping remains on certain parcels near the central portion of the Subject Property. The Subject Property parcels are owned by Westlands Water District (WWD).</p> |

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Site Reconnaissance

| | |
|--|--|
| Structures, Roads, Other Improvements: | Structures onsite are limited to remnant concrete foundations for former buildings, a former oil well (discussed in Sections 4.3.2 and 5.5), and small slabs where water well pumps are, or were formerly located. Dirt roadways generally trend east-west or north-south along the parcel boundaries. A canal is located along the north boundary of APNs 040-110-23ST, 040-110-31ST, 040-110-32ST. A separate canal is also located along the north boundary of APN 040-110-15ST. A separate tree lined canal was also observed along the east boundary of APN 050-030-29ST. Overhead electrical lines were also observed along the boundaries of certain parcels. |
| Subject Property Size (acres): | Approximately 9,116-acres |
| Estimated % of Subject Property Covered by Buildings and/or Pavement: | Less than 1% |
| Observed Current Subject Property Use/Operations: | Primarily vacant land with no use with the exception of light agricultural operations (dry land crop farming) on parcels in the central portion of the Subject Property. |
| Observed Evidence of Past Subject Property Use(s): | Agriculture – row cropping and grain |
| Sewage Disposal Method (and age): | Unknown. Septic systems may be present and associated with former inhabitable structures. |
| Potable Water Source: | Onsite irrigation/water wells |
| Electric and Natural Gas Utilities: | Pacific Gas and Electric (PG&E) |

5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the Subject Property reconnaissance.

| Observations | Description/Location |

| Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14) with identified uses: | None observed |
| Drums/Totes/Intermediate Bulk Containers (≥ 5 gallons): | See section 5.7, Aboveground Storage Tanks |
| Strong, Pungent, or Noxious Odors: | None observed |
| Pools of Liquid: | None observed |
| Unidentified Substance Containers: | None observed |
| Polychlorinated biphenyl (PCB)-Containing Equipment: | Pole mounted transformers were observed at the northwest corner of APN 050-020-47ST, at the northwest corner of APN 050-030-24ST, west boundary of APN 040-110-16ST, |

| Other Observed Evidence of Hazardous Substances or Petroleum Products: | None observed. |

5.4 INTERIOR OBSERVATIONS

There are no structures at the Subject Property and therefore no interior observations could be made.

5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the site reconnaissance of exterior areas of the Subject Property and/or identified the following information during the interview or records review portions of the assessment:

| Observations | Description |
|--|---|
| On-site Pits, Ponds, or Lagoons: | A dry ponding basin located at the northeast corner of APN 050-030-05ST. A large water ponding basin is also located at the northwest corner of APN 050-030-24ST. |
| Stained Soil or Pavement: | Minor soil staining was observed below a agricultural turbine pump and poly AST located in the southwest corner of APN 040-110-16ST. Minor surficial soil staining was also observed below turbine oil AST and water pump in the southwest corner of APN 050-070-43ST. |
| Stressed Vegetation: | None observed. |
| Waste Streams and Waste Collection Areas: | None observed. |
| Solid Waste Disposal: | Minor miscellaneous household debris (furniture, etc) was observed on APN 050-030-29ST. |
| Potential Areas of Fill Placement: | Soil stockpiles were observed in the southwest quadrant of APN 050-060-45ST and in the northeast corner of APN 050-030-26ST. The stockpile on APN 050-060-45ST appeared to have been sourced from soil onsite and did not appear to be fill. The stockpile on APN 050-060-45ST was sampled during the Limited Phase II sampling discussed in Section 7.0. |
| Wastewater: | None observed |
| Stormwater: | None observed |
| Wells: | Numerous irrigation/water wells and monitoring wells were observed on the Subject Property. According to Mr. Russ Freeman of WWD (see Interview, Section 6.0), the monitoring |

The existing irrigation wells are not used due to the non-irrigation covenant filed for the majority on the Subject Property parcels in 2003 and 2004 (Section 4.4.1). |
| Septic Systems: | Septic systems may be present and associated with former inhabitable structures, particularly with those formerly located in the southwest corner of APN 040-110-15ST. |
| Other Exterior Observations: | A thick, irregularly shaped concrete foundation with a square opening was observed in the northeast quadrant of APN 050-030-24ST (Appendix A, Photograph 46). A riser protruded from the center of the square opening and multiple steel bolts and u-shaped anchors were observed on the surface of the foundation (Appendix A, Photograph 46). Additionally, an open steel casing, roughly 10-inches in diameter was cemented into the foundation approximately 10-12 feet west of the square opening in the foundation (Appendix A, Photograph 48). The location of this structure appears to match with the location of the Chevron USA "Loescher "1" oil specified in the CalGEM records. The CalGEM records also indicates that a 4-inch steel riser was welded to extend 4 feet above the casing. This reference matches the riser observed in the field, as shown in the above referenced photographs. |

5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

| | |
|--------------------------------------|--|
| Existing USTs: | No visible evidence (fill pipes, vent pipes, dispensers, surface patches), reports, or other evidence of USTs was discovered during this Phase I ESA. |
| Former USTs: | No visible evidence (fill pipes, vent pipes, dispensers, surface patches), reports, or other evidence of the former presence of USTs was discovered during this Phase I ESA. |
| Other Underground Structures: | None observed |

Stantec conducted interviews with the following individuals:

| Russ Freeman (559) 241-6241 rfreeman@westlandswater.org September 27, 2022 | General Manager of Resources for Westlands Water District (WWD) | <ul style="list-style-type: none">• Familiar with the Subject Property since late 1990s/early 2000s• No known storage, spills, or releases of hazardous materials or petroleum hydrocarbons• Perched water occasionally at 15 to 25 feet bgs• Shallow aquifer levels depend on pumping in the region but generally vary between 120 and 150 feet bgs• Occasional attempts at dry land wheat farming - no significant crop production is ongoing• Non-irrigation covenant restricts irrigation on parcels. Irrigation does not include use of water for dust suppression during earthwork• No RECs |

6.1 FINDINGS FROM INTERVIEWS WITH SUBJECT PROPERTY OWNER

Stantec interviewed Mr. Russ Freeman of Westlands Water District (WWD) on September 27, 2022. Mr. Freeman has been familiar with the Subject Property since WWD acquired the parcels at various times between the late 1990s and early 2000s. Mr. Freeman was not aware of any storage, spills, or releases of hazardous materials or petroleum hydrocarbons at the Subject Property or surrounding properties. He also was not aware of the abandoned oil wells that are at the Subject Property and was unsure of what the concrete foundation was that is in the vicinity of the abandoned oil well on APN 050-030-24ST (Chevron U.S.A. Inc., Loescher “1”), as mapped by CalGEM (Section 4.3.2). He indicated that there are several monitoring wells throughout the Subject Property that are installed at different depths. Some of the wells are to 25 feet bgs and were installed to monitor perched water levels which is sometimes present at depths between 15 and 25 feet bgs. Mr. Freeman indicated that deeper wells are installed in two aquifers and that the shallow aquifer fluctuates between approximately 120 and 150 feet bgs based on regional pumping.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Interviews

With regard to the concrete slabs observed to the northeast of the El Dorado Avenue and Clarkson Avenue intersection (i.e. southwest corner of APN 040-110-25ST), Mr. Freeman indicated that those structures included residences for the former property owner and their workers, and a storage/shop building. He mentioned that WWD demolished the structures sometime after the parcel was acquired in the 2000s.

Mr. Freeman also reported that there is a non-irrigation covenant recorded for several of the parcels that restricts irrigation (see Section 4.4.1). He mentioned that any new owner will have to record the same covenant after purchasing any parcels where a non-irrigation covenant is not already in place. According to Mr. Freeman, irrigation does not include use of water for dust suppression during earthwork activities for construction purposes.

With regard to current uses, Mr. Freeman indicated that occasional attempts are made to dry farm wheat on certain parcels but that the majority of the parcels are not being cultivated. He mentioned that no pesticides or herbicides are being used or stored onsite.

No RECs were identified as a result of Stantec' interview with Mr. Freeman.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

limited phase ii soil sampling

7.0 LIMITED PHASE II SOIL SAMPLING

On September 19, 2022, Stantec collected soil samples from forty-one (41) locations at the Subject Property. The sampling was conducted in conformance with the requirements of ASTM International (ASTM) Designation E1903-11 Standard Practice for Environmental Site Assessments: Phase II Environmental Site Assessment Process. Sample locations B-1 through B-40 were distributed across the parcels and were collected from a depth of 0.5 to 1.0 feet below ground surface (bgs). One (1) additional soil sample (B41) was collected from a soil pile in the northeast portion of 050-030-26ST. All soil samples were collected in glass jars and delivered to Advanced Technology Laboratories (ATL) for analysis of organochlorine pesticides (OCPs) by EPA Method 8081A, and total arsenic and lead by EPA Method 6010B. The analytical results for OCPs and total lead were compared to the more conservative commercial use screening level established by Department of Toxic Substances Control (DTSC) Note 3 or United States Environmental Protection Agency (USEPA) Regional Screening Levels (RSLs). Arsenic concentrations were compared to those considered to be naturally occurring in California, typically between 0.6 and 12.0 mg/kg (DTSC, 2020).

Analysis of the samples reported detectable concentrations of the OCPs 4,4'-Dichlorodiphenyldichloroethylene (DDE) and 4,4'-Dichlorodiphenyltrichloroethane (DDT) ranging from 0.0046 to 0.120 mg/kg and 0.007 and 0.044 mg/kg, respectively. Lead ranged from 2.4 to 14 mg/kg. Therefore, no OCP or lead concentrations exceeded commercial use screening levels or California hazardous waste levels.

Arsenic was detected above human health screening levels and slightly above background levels at concentrations that ranged from 6.3 to 13 mg/kg (see Table 1). Arsenic occurs naturally at concentrations well above regulatory health risk-based screening levels. Based on the range of arsenic detected at the Subject Property, the data were evaluated statistically for normality and evidence of contamination using the USEPA ProUCL statistical program. A summary of general statistics is provided below:

No. of measurements = 40
Minimum (As) concentration = 7.2 mg/kg
Maximum (As) concentration = 13 mg/kg
Standard Deviation = 1.39 mg/kg
Mean = 9.7 mg/kg
Median = 9.8 mg/kg

An outlier test conducted using ProUCL demonstrated no discernible outliers in the data population. The data demonstrate a normal parametric Student's T distribution at the one percent significance level. This is further demonstrated by the fact that the median and mean are nearly the same value at 9.8 mg/kg and 9.7 mg/kg, respectively. The 95 percent upper confidence level of the mean was calculated to be 10 mg/kg. A Q-Q plot of the data (see **Appendix I**) suggests that the data are representative of a single population. The Q-Q plot is often used to assess for evidence of contamination when the analyte is also present in native background material. The presence of anthropogenic (man-made) contamination is

PHASE I ENVIRONMENTAL SITE ASSESSMENT

limited phase ii soil sampling

generally evidenced by a break in the slope of the Q-Q plot. If the data appear to plot on a single line (same slope) the data are likely representative of a single source such as background native concentrations. As shown on **Appendix I**, the data plot on a single line with a correlation coefficient (R) of 0.984.

Based on this evaluation, Stantec opines that the reported arsenic values appear to be the result of background native concentrations and not related to anthropogenic contamination. No further investigation is recommended with regarding to agricultural use of the Subject Property.

Evaluation

8.0 EVALUATION

This section provides a summary overview of or Findings, Opinions, and Conclusions.

8.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data, and an inspection was evaluated to determine if RECs are present in connection with the Subject Property. Based on this information, Stantec made the following findings and developed the following opinions.

- **Former agricultural use.** Stantec's review of historical aerial photographs found that the Subject Property has been used for agricultural purposes (row crop and grain) since at least 1940. As a result, Stantec collected shallow soil samples from 0.5 to 1.0-foot bgs from forty (4) locations across the Subject Property and from a soil stockpile in the northeast corner of APN 050-030-26ST. Soil samples were analyzed for OCPs and total arsenic and lead. The sampling was conducted in conformance with the requirements of ASTM International (ASTM) Designation E1903-11 Standard Practice for Environmental Site Assessments: Phase II Environmental Site Assessment Process

As shown in **Table 1**, certain OCPs (4,4'-DDE and 4,4'-DDT), arsenic and lead were identified above laboratory detection limits in certain samples. Analytical results indicate no OCP or lead concentrations above commercial use screening levels or California hazardous waste levels. Arsenic was detected above human health screening levels and slightly above background levels at concentrations that ranged from 6.3 to 13 mg/kg. However, all concentrations were reported below their total threshold limit concentration (TTL) of 500 g/kg. Arsenic occurs naturally at concentrations well above regulatory health risk-based screening levels.

The data were evaluated statistically for normality and evidence of contamination using the USEPA ProUCL statistical program. The 95 percent upper confidence level of the mean was calculated to be 10 mg/kg. Additionally, a Q-Q plot of the data (see **Appendix I**) suggests that the data are representative of a single population, meaning that the data are likely representative of a single source such as background native concentrations. Further discussion of the statistical analysis, and is provided in Section 7.0. Based on this evaluation, Stantec opines that the reported arsenic values are most likely the result of background native concentrations and not related to anthropogenic contamination. No further investigation is recommended with regarding to agricultural use of the Subject Property.

- **Aboveground Storage Tanks (ASTs).** ASTs associated with former agricultural operations were observed on the following Subject Property parcels:

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Evaluation

- APN: 050-070-43ST (southwest corner) – 55-gallon oil AST for turbine pump, poly AST (empty)
- APN: 040-110-16ST (southwest corner) – mobile chemical/fertilizer AST (empty-no staining), turbine oil AST, empty poly fuel AST (minor surface soil stain – de minimis)

The ASTs noted above were no longer in use and the staining appeared to be limited to the surface and therefore considered de minimis. The former chemical/fertilizer AST referenced above appeared to be a mobile tank and not historically dedicated to the location it was at during the field reconnaissance. No further assessment is recommended regarding the onsite ASTs.

- **Past Oil Drilling Operations.** Stantec reviewed the Well Finder provided on the Geologic Energy Management Division (CalGEM) website in an effort to evaluate if there are any known oil, gas, or geothermal wells in the Subject Property vicinity. According to the Well Finder there are seven (7) oil wells at the Subject Property are designated by CalGEM as abandoned dry holes. The operator, well name, and their corresponding American Petroleum Institute (API) numbers are identified in Section 4.3.2 and their approximate locations based on the CalGEM online mapping system are illustrated on Figure 2. Although the abandoned oil wells never produced and were found to be “dry holes”, there remains the potential that earthen drilling mud pits/sumps were generated at the time the wells were drilled. In the 1940 aerial photograph (Section 4.4.2) there appears to be faint evidence of three rectangular depressions that are located approximately 100-200 feet west/northwest of the Leoscher “1” well in the northeast quadrant of APN 050-030-24ST. The soil in this area does not appear to be discolored but there is the potential that these features could have been mud pits related to the oil well. Historic aerial photographs do not provide any further insight regarding sumps or mud pits related to the six other onsite wells, most likely because of the short duration (1-3 months) between drilling and abandonment when no aerial photographs were taken.

The potential presence of impacted soils associated with drilling mud pits/sumps is considered a REC. Stantec recommends that further investigation be performed in the area west/northwest of the Leoscher “1” well where the rectangular depressions were noted in the 1940 photograph in order to evaluate potential chemical impact to soil at this location. Since there is no visible indication of mud pits/sumps in any of the other aerial photographs, Stantec recommends that a Soil Management Plan (SMP) be prepared that provides the procedures, methodologies and reporting requirements in the event that unknown impacts to soil are encountered during demolition, grading and construction activities at the Subject Property.

- **Abandoned Oil Wells.** As the onsite wells have been abandoned, the abandonment activities occurred several decades ago and are unlikely to meet the current abandonment standards set forth by CalGEM. Although unlikely, any future work required by CalGEM on the oil wells would fall on the owner of the Subject Property. Therefore, the abandoned oil wells are considered a business environmental risk (BER) due to financial risks inherent to well ownership imposed by CalGEM. For example, such risk could arise if the abandoned oil well casings interfere with the layout of the facility or infrastructure to be installed. In these instances CalGEM would need to be notified of any physical alterations (casing height adjustments) made to the wells in order for proper permitting to make these alterations. Such alterations would require IP Darden, LLC to become the operator of the well and could lead to additional work being required by CalGEM, including re-abandonment. Stantec recommends that the abandoned well casing locations be

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Evaluation

avoided. Since the well locations mapped on the CalGEM Well Finder website can be off by several hundred feet, the most efficient way to plan avoidance measures is to (1) locate the well using ground penetrating radar to detect the steel casing, (2) excavate down to the well casing to physically confirm its location, and (3) have the project civil engineer survey its location and add the location to the development plan.

- **Potential Septic Systems** – Septic systems may be present and associated with former inhabitable structures, particularly with those formerly located in the southwest corner of APN 040-110-15ST. The septic systems are not considered a REC given their association with former onsite residences.
- **Irrigation/Water Wells**: Water wells were observed at the Subject Property during the field reconnaissance. Stantec recommends that the wells be abandoned under permit from Fresno County Department of Public Health (FCDPH) in accordance with the California Well Standards Ordinance as stated in Bulletin 74-81, unless the wells will be used by the proposed development. It is recommended that information/documentation on the location, status, and depth of the wells be obtained from WWD so that a plan can be developed with regard to use or destruction of the wells.
- **Groundwater Monitoring Wells**: At least 16 groundwater monitoring wells were observed across the Subject Property during the field reconnaissance. According to Mr. Russ Freeman of WWD, the monitoring wells are used to evaluate groundwater levels in different aquifers. The monitoring wells should be abandoned under permit from FCDPH. It is recommended that information/documentation on the location, status, and depth of the wells be obtained from WWD so that a plan can be developed with regard to use or destruction of the wells. It is recommended that information/documentation on the location, status, and depth of the monitoring wells be obtained from WWD so that a plan can be developed with regard to destruction of the monitoring wells.

8.2 DATA GAPS

The federal AAI final rule [40 CFR 312.10(a)] and ASTM E1527-21 identify a “data gap” as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the EP or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

| Gap | Discussion |
|--|------------|
| Deletions or Exceptions from Scope of Work Referenced in Section 1.4: | None |
| Weather-Related Restrictions to Site Reconnaissance: | None |
| Facility Access Restrictions to Site Reconnaissance: | None |

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Evaluation

| Gap | Discussion |
|---|---|
| Other Site Reconnaissance Restrictions: | Due to the lack of unpaved roads to all areas of the Subject Property, vehicular access was limited to the main graded dirt roads. As a result, portions of the Subject Property had to be traversed by foot. Stantec traversed transects across the Subject Property to obtain a general understanding of Subject Property conditions and also specifically visited locations where developed features or land disturbance was discernable on aerial photographs. It should be noted that not all areas were traversed due to the Subject Property size, time, and project constraints (limited roadways). |

8.3 CONCLUSIONS

The Subject Property consists of forty-two parcels comprising approximately 9,116-acres of land located along the west side of State Route-177 (SR-177) and 9.5 miles northeast of the junction at State Route-145 (SR-145) and Interstate-10 (I-10), near Cantua Creek in Fresno County, California (Figure 1). The Subject Property parcels are primarily undeveloped land that were formerly used for agricultural purposes (row crops). Minor row cropping remains on certain parcels near the central portion of the Subject Property. The Subject Property parcels are owned by Westlands Water District (WWD).

Structures onsite are limited to remnant concrete foundations for former buildings, a former oil well (discussed further in Sections 4.3.2 and 5.5), and small slabs where water well pumps are, or were formerly located. Dirt roadways generally trend east-west or north-south along the parcel boundaries. A canal is located along the north boundary of APNs 040-110-23ST, 040-110-31ST, 040-110-32ST. A separate canal is also located along the north boundary of APN 040-110-15ST. A separate tree lined canal was also observed along the east boundary of APN 050-030-29ST. Overhead electrical lines were also observed along the boundaries of certain parcels. Unused farming equipment was observed at a few locations near irrigation/water wells and included small oil ASTs related to the irrigation wells, sediment tanks, and mobile fertilizer tanks. Minor oil staining was observed on surface soils by the well pumps pads but was considered de minimis and no further investigation is recommended.

The surrounding parcels in all directions are current or former agricultural land (row crops). Residences, agricultural storage yards, miscellaneous agricultural and irrigation equipment was also observed on these surrounding agricultural properties. The Subject Property boundary is shown on **Figure 1**. Subject Property detail is depicted on **Figure 2**.

Subject Property and Regional History

Stantec's review of historical aerial photographs found that the Subject Property has been used for agricultural purposes (row crop and grain) since at least 1940. Oil exploration (well drilling) occurred on the Subject Property sporadically between 1939 and 1982. All seven wells drilled on the Subject Property were found to be dry holes, and were subsequently "plugged" according to records obtained from the California Geologic Energy Management (CalGEM), as discussed further in Section 4.3.2.

Given the historical agricultural use on the Subject Property, Stantec performed shallow soil sampling from 0.5 to 1.0-foot bgs at forty (40) locations across the Subject Property and from a soil stockpile in the northeast corner of APN 050-030-26ST on September 21, 2022. Soil samples were analyzed for organochlorine pesticides (OCPs), and the metals arsenic and lead, which are commonly associated with historical herbicide and pesticide application. The sampling was conducted in conformance with the requirements of ASTM International (ASTM) Designation E1903-11 Standard Practice for Environmental Site Assessments: Phase II Environmental Site Assessment Process

As shown in **Table 1**, certain OCPs (4,4'-DDE and 4,4'-DDT), arsenic and lead were identified above laboratory detection limits in certain samples. Analytical results indicate no OCP or lead concentrations above commercial use screening levels or California hazardous waste levels. Arsenic was detected

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Evaluation

above human health screening levels and slightly above background levels at concentrations that ranged from 6.3 to 13 milligrams per kilogram (mg/kg). Arsenic occurs naturally at concentrations well above regulatory health risk-based screening levels.

The data from surface soils (B-1 through B-40) collected at the Subject Property were evaluated statistically for normality and evidence of contamination using the United States Environmental Protection Agency (USEPA) ProUCL statistical program. Using this program, the 95 percent upper confidence level of the mean was calculated to be 10 mg/kg. Additionally, a Q-Q plot of the data (see **Appendix I**) suggests that the data are representative of a single population, meaning that the data are likely representative of a single source such as background native concentrations. Further discussion of the statistical analysis is provided in Section 7.0 and the Pro-UCL output data is included in **Appendix I**. Based on this evaluation, Stantec opines that the reported arsenic values appear to be the result of background native concentrations and not related to anthropogenic contamination. Therefore, no further investigation is recommended regarding the agricultural use of the Subject Property.

The following items of note were identified during this ESA:

- **Abandoned Oil Wells.** Stantec reviewed the Well Finder provided on the Geologic Energy Management Division (CalGEM) website in an effort to evaluate if there are any known oil, gas, or geothermal wells in the Subject Property vicinity. According to the Well Finder there are seven (7) oil wells at the Subject Property that are designated by CalGEM as abandoned dry holes. The operator, well name, and their corresponding American Petroleum Institute (API) numbers are identified in Section 4.3.2 and their approximate locations based on the CalGEM online mapping system are illustrated on Figure 2.

Although the onsite wells have been abandoned, the abandonment activities occurred several decades ago and are unlikely to meet the current abandonment standards set forth by CalGEM. Although unlikely, any future work required by CalGEM on the oil wells would fall on the owner of the Subject Property. Therefore, the abandoned oil wells are considered a business environmental risk (BER) due to financial risks inherent to well ownership imposed by CalGEM. For example, such risk could arise if the abandoned oil well casings interfere with future facility layout or infrastructure to be installed at the Subject Property. In these instances, CalGEM would need to be notified of any physical alterations (*i.e.* casing height adjustments) made to the wells in order for proper permitting to make these alterations. Such alterations would require IP Darden, LLC to become the operator of the well and could lead to additional work being required by CalGEM, including re-abandonment. Stantec recommends that the abandoned well casing locations be avoided in future development activities. Since the well locations mapped on the CalGEM Well Finder website can be mis-plotted by several hundred feet, the most efficient way to plan avoidance measures is to (1) locate the well using geophysical locating techniques to detect the steel casing, (2) excavate down to the well casing to physically confirm its location, and (3) have the project civil engineer survey its location and add the location to the development plan.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Evaluation

- **Irrigation/Water Wells:** Water wells were observed at the Subject Property during the field reconnaissance. Stantec recommends that the wells be abandoned under permit from Fresno County Department of Public Health (FCDPH) in accordance with the California Well Standards Ordinance as stated in Bulletin 74-81, unless the wells will be used by the proposed development. It is recommended that information/documentation on the location, status, and depth of the wells be obtained from WWD so that a plan can be developed with regard to use or destruction of the wells.
- **Declaration of Restrictive Covenant (Non-irrigation Covenant):** A preliminary title report dated February 22, 2022 was provided to Stantec by the User. The preliminary title report identified Instrument Nos. 2003-0189565 and 2004-0256340 that are a “Declaration of Restrictive Covenant (Non-irrigation Covenant)” recorded on August 15, 2003 and November 16, 2004 for certain parcels. The covenant prohibits irrigation of the land within specified parcels and applies to the current owner and all subsequent owners. The Subject Property parcels named in the document includes, at a minimum, the following:

APN 050-030-27ST APN 050-030-26ST APN 050-030-04ST

It is noted that additional parcels were listed but the alphanumeric suffixes on the parcels did not match with the Subject Property parcel provided to Stantec. For example, the entire parcel number matched but the suffix was either “S” or “T”, rather than “ST”. Additional evaluation to confirm which parcels are included in the covenant should be conducted if it is determined that the non-irrigation covenant will adversely affect the proposed developed of the Subject Property as a solar facility. Stantec also recommends that it be clarified in writing as to whether application of water for dust control during development would be considered irrigating.

- **Groundwater Monitoring Wells:** At least 16 groundwater monitoring wells were observed across the Subject Property during the field reconnaissance. According to Mr. Russ Freeman of WWD, the monitoring wells are used to evaluate groundwater levels in different aquifers. The monitoring wells should be abandoned under permit from FCDPH. It is recommended that information/documentation on the location, status, and depth of the wells be obtained from WWD so that a plan can be developed with regard to use or destruction of the wells. It is recommended that information/documentation on the location, status, and depth of the monitoring wells be obtained from WWD so that a plan can be developed with regard to destruction of the monitoring wells.

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E2247-16 of approximately 9,116-acres located in Cantua Creek, California, or the “Subject Property.” Any exceptions to, or deletions from, this practice are described Section 2.3 of this report. This assessment has revealed the following recognized environmental conditions (RECs), Controlled RECs (CRECs), and/or significant data gaps in connection with the Subject Property:

- **Past Oil Drilling Operations** – Although the seven (7) onsite abandoned oil wells never produced and were found to be “dry holes”, there remains the potential that earthen drilling mud

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Evaluation

pits/sumps were generated at the time the wells were drilled. In the 1940 aerial photograph (Section 4.4.2) there appears to be faint evidence of three rectangular depressions that are located approximately 100-200 feet west/northwest of the Leoscher "1" well in the northeast quadrant of APN 050-030-24ST. The soil in this area does not appear to be discolored but there is the potential that these features could have been mud pits related to the oil well. Historic aerial photographs do not provide any further insight regarding sumps or mud pits related to the six other onsite wells, most likely because of the short duration (1-3 months) between drilling and abandonment when no aerial photographs were taken.

The potential presence of impacted soils associated with drilling mud pits/sumps is considered a REC. Stantec recommends that further investigation be performed in the area west/northwest of the Leoscher "1" well where the rectangular depressions were noted in the 1940 photograph in order to evaluate potential chemical impact to soil at this location. Since there is no visible indication of mud pits/sumps in any of the other aerial photographs, Stantec recommends that a Soil Management Plan (SMP) be prepared that provides the procedures, methodologies and reporting requirements in the event that unknown impacts to soil are encountered during demolition, grading and construction activities at the Subject Property.

9.0 NON-SCOPE CONSIDERATIONS

The following ASTM E1527-21 Non-Scope Considerations were performed as part of this Phase I ESA:

9.1 LEAD-BASED PAINT

Concern for lead-based paint (LBP) is primarily related to residential structures. The EPA's Final Rule on Disclosure of Lead-Based Paint in Housing (40 CFR Part 745) defines LBP as paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram per square centimeter or 0.5 percent by weight.

The risk of lead toxicity in LBP varies based upon the condition of the paint and the year of its application. The U.S. Department of Housing and Urban Development (HUD) has identified the following risk factors:

- The age of the dwelling as follows: maximum risk is from paint applied before 1950.
- There is severe risk from paint applied before 1960.
- There is moderate risk from deteriorated paint applied before 1970.
- There is slight risk from the paint that is intact but applied before 1977.
- The condition of the painted surfaces.
- The presence of children and certain types of households in the building.
- Previously reported cases of lead poisoning in the building or area.

There are no painted structures at the Subject Property.

9.2 ASBESTOS

Asbestos can be found in many applications, including sprayed-on or blanket-type insulation, pipe wraps, mastics, floor and ceiling tiles, wallboard, mortar, roofing materials, and a variety of other materials commonly used in construction. The greatest asbestos-related human health risks are associated with friable asbestos, which is ACM that can be reduced to powder by hand pressure. Friable asbestos can become airborne and inhaled, which has been associated with specific types of respiratory disease. The manufacturing and use of asbestos in most building products was curtailed during the late 1970s.

Demolition or partial demolition of any structure, or disposal of construction debris, requires compliance with the National Emission Standards for Hazardous Air Pollutants (NESHAP) in accordance with the South Coast Air Quality Management District (SCAQMD) Rule 1403 (Asbestos Demolition and Removal). Therefore, Stantec recommends that a pre-demolition survey be performed for any building structures or debris piles containing suspect ACM. Additionally, irrigation line at the Subject Property may consist of transite pipe. Any suspect transite pipe encountered at the Subject Property should be left in place and sampled to evaluate for the presence of asbestos.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

9.3 RADON

Radon is a colorless, tasteless radioactive gas with an EPA-specified action level of 4.0 PicoCuries per liter of air (pCi/L) for residential properties. Radon gas has a very short half-life of 3.8 days. The health risk potential of radon is primarily associated with its rate of accumulation within confined areas near or in the ground, such as basements, where vapors can readily transfer to indoor air from the ground through foundation cracks or other pathways. Large, adequately ventilated rooms generally present limited risk for radon exposure. The radon concentrations in buildings and homes depend on many factors, including soil types, temperature, barometric pressure, and building construction (EPA, 1993).

Stantec reviewed regional data published by the EPA (<http://www.epa.gov/radon/zonemap.html>) on average indoor radon concentrations in the vicinity of the Subject Property.

| Zip Code 93627 | Riverside County |
|---|--|
| EPA Radon Zones (w/Average Measured Indoor Radon concentrations) | |
| 100% below 4 pCi/L | Zone 2 – moderate (>=2 pCi/L and <=4 pCi/L); average first floor concentration 0.117 pCi/L |
| Normally-occupied sub grade areas (i.e. basement apartments, offices, stores, etc.). | |
| No subgrade areas are present or proposed at the Subject Property. | |

The property is located in Zone 2 and is considered to have only a moderate potential for radon. Stantec concludes that radon is unlikely to represent an environmental concern to the Subject Property and recommends no further investigation regarding this issue.

9.4 FLOOD ZONES

Stantec searched the FEMA flood plain map service at www.msc.fema.gov and eight (8) of the parcels in the north portion of the Subject Property are mapped as being within a 100-year flood zone. These parcels include:

- 040-070-32ST
- 040-070-31ST
- 040-110-27ST
- 040-110-29ST
- 040-110-32ST
- 040-110-23ST
- 040-110-34ST
- 040-110-20ST

In addition, APN a 100-year flood zone is mapped along the southern boundary of APN 050-060-45ST.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Appendix B Stantec Resumes

Appendix B STANTEC RESUMES

Dion has extensive knowledge of underground storage tank investigations, Phase I and II environmental site assessment, groundwater monitoring and reporting, soil, soil vapor, and groundwater quality assessments, and testing for asbestos and lead based paint. His project experience is extensive and wide ranging and includes many types of soil, soil vapor, and groundwater assessment and monitoring for planned, existing, and former sites. Dion also has experience in testing fill soils placed on grading sites.

He has experience on redevelopment of former oil field sites that include submittal of construction site review plans, oil well mitigation (venting and casing alterations), abandonment of oil wells, and remedial investigations and remediation involving soil contamination.

Dion also has experience working with 1166 AQMD air monitoring on projects ranging from limited access dry cleaner excavations, solvent excavations, and petroleum excavations related to underground storage tank releases. Included in this type of monitoring is the assessment of a safe work environment for the contractors involved with this type of work.

He has considerable knowledge in asbestos and lead based paint sampling as a building inspector and lead sampling technician. Asbestos and lead based paint surveys have ranged from large office buildings to sampling highway bridges.

PROJECT EXPERIENCE

Asbestos, Lead Based Paint, and Hazardous Material Management
Haller Wash Bridge No. 54-0891R&L, San Bernardino County, California (Asbestos and Lead-Based Paint Sampling Assistant)

Dion conducted asbestos and lead based paint survey on highway bridge. He assisted with planning field operations, measuring bridge dimensions, and collecting samples. Tasks included sample collection, bridge measurements, and documentation.

Project Management Oversight
Magnolia Plaza, Fountain Valley, California

Dion is providing project management of soil, soil vapor, and quarterly groundwater sampling related to a solvent release at a former dry cleaning facility. Tasks include preparation of work plans for approval by the Regional Water Quality Control Board and oversight of field sampling, including lithologic logging, for soil and soil vapor investigations performed within a multi-tenant strip center. Additional tasks include preparation of investigative reports and quarterly groundwater monitoring reports. The site remains an open case and preparation of a work plan to use electrical resistive heating ("ERH") will be prepared in the coming weeks.

Dion Monge

Project Scientist

Former Superb Dry Cleaners, Anaheim, California

Dion performed field oversight, direction, and confirmation soil sampling of a limited access excavation within a former dry cleaner unit. Post excavation field activities included application of a barrier type floor sealant along with post excavation indoor air sampling. Remedial work led to regulatory closure being granted from the local agency.

Site Assessment

I-15/I-215 Interchange Improvements, San Bernardino County, California (Sampling Technician)

Dion helped conduct site investigations and surveys for potentially hazardous materials. His efforts supported Caltrans' plans to improve and widen the existing freeway lanes, entrance and exit ramps, and vehicle and railroad bridges along a 6-mile stretch of the I-15 and I-215 freeways in the Devore area of San Bernardino County. Dion's efforts included Environmental Evaluation of Recognized Environmental Concerns identified in ISAs

Highway 138 Environmental Investigations, San Bernardino County, California (Field Assessment and Reporting)

Dion helped complete hazardous material site investigations on five bridges along State Highway 138 along a 20-mile segment through portions of Los Angeles and San Bernardino Counties, California. The investigation was conducted in accordance with Caltrans protocols and was compliant with EPA's all appropriate inquiries guidance and ASTM Standard Practice E1527. He performed site reconnaissance, conducted regulatory and agency field reviews, and reviewed environmental databases and historical fire insurance, telephone directories, aerial photographs, topographic maps, and other environmental records for properties within one half mile of the proposed 20-mile segment of Highway 138. Dion compiled an report summarizing findings and identifying recognized environmental conditions.

Proposed Friends Christian High School, Yorba

Linda, California

Dion prepared preliminary site assessment (PSA) report for future private school site to identify recognized environmental conditions ("RECs") related to past property usage as an oil field with 21 oil wells abandoned prior to 1990. Completion of the PSA led to his management of the project through site closure. Field investigations and reporting by Dion included Phase II investigations, methane survey, oil well leak testing and venting, backfill and compaction (including soils testing), DOGGR Construction Site Review, and excavation and onsite management of more than 5,000 cubic yards of petroleum impacted soils.

SR-58 Widening, San Bernardino County, California

Dion performed Initial Site Assessment (ISA) for Caltran at Kramer Junction for the proposed widening of State Route 58. The ISA was performed in accordance with guidelines promulgated by the American Society for Testing and Materials (ASTM) and included historical research and coordination of permit/file reviews with local building/planning departments and environmental agencies. Dion's role included the field visit, observation documentation, agency reviews, and reporting.

Soil Sampling

Caltrans I-15, Task Order 28, Hesperia, California

Dion conducted a soil investigation for metals analysis alongside I-15 for disposal recommendations during construction of mortar-lined channels at several locations. He assisted with planning field operations and collected soil samples. Tasks included sample collection, preservation, and documentation.

Joshua is a staff geologist with a master's degree in geological sciences. He has extensive field experience in geophysical exploration techniques and Phase I and II Environmental Assessment field work and report preparation. His field experience includes subsurface gold-copper porphyry deposit mapping using induced polarization and resistivity geophysics, mapping of shallow faults throughout Southern California using refraction seismology equipment, soil logging and collection, soil vapor collection, and surface and groundwater collection with basic flow measurements and parameter stabilization. He is skilled in using ArcGIS 10, Adobe Suite, and the Microsoft Office Suite. Joshua's environmental consulting experience includes performing Phase I Environmental Site Assessments in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-13, and the collection, and interpretation of Phase II Environmental Assessment data. Joshua also has experience in preparing Phase II Environmental Assessment reports based from this compiled data.

PROJECT EXPERIENCE

Health and Safety Management
Health and Safety Subcontractor Oversight Services
(Geological Staff)

Joshua has provided subcontractor oversight for field activities including soil, soil vapor, and groundwater sampling. Other field activities include well destruction and on-site remediation.

Technical Writing

Various Technical Writing Projects (Geological Staff)
Joshua prepares Health and Safety plans, written permit applications, Phase I and Phase II Environmental Site Assessments reports, Work Plans dealing with soil, soil vapor, and groundwater sampling, and groundwater monitoring reports.

Environmental Site Assessments

Phase I Site Assessment, Redlands, California (Phase I and Phase II Environmental Site Assessment, Author)

Joshua performed an on-site reconnaissance survey, historical records investigation, and formulated the report deliverable. The report provided a thorough review of the property history and defined present environmental concerns for the client.

Soil Sampling

Dust and Pesticide Monitoring, Soil Sampling, Monterey Park, California (Oversight, Dust and Pesticide Monitoring, Soil Sampling)

Joshua performed field oversight during contaminated soil removal at a future residential community. Dust and toxaphene were monitored simultaneously to generate a site-specific threshold for dust concentration. Routine dust monitoring was performed once the threshold was determined. Property gridding and soil sampling were performed to determine contamination.

Joshua Sargent

Geologic Staff

Soil Vapor Intrusion Assessment

Soil Vapor Monitoring Well Installation, Various Locations, California (Field Oversight, Soil Description)

Joshua performed field oversight during the installation of multiple soil vapor monitoring wells. He assisted with health and safety oversight, described the soil during drilling, activities, assisted with the well installation, and conducted the subsequent soil vapor sampling.

Environmental Site Remediation

Soil Vapor Remediation, Orange County, California (Geological Staff)

Joshua has provided monthly operation and maintenance on a soil vapor extraction system operating at a historical landfill. Components of the operation and maintenance included measurements of the recovered vapor for methane and volatile organic compounds, and collecting flow measurements from the extraction wells. Joshua prepared month operation and maintenance reports.

Subcontractor Oversight Services and Confirmation Soil Sampling (Geological Staff)

Joshua has provided subcontractor oversight for remedial excavation of pesticide- and petroleum-impacted soil, and later conducted confirmation sampling to ensure all impacted material had been removed from the Site.

Kyle has more than 35 years of professional experience—25 of those years with Stantec—providing geotechnical and environmental consulting. During the course of his experience, he has been involved with a wide variety of geological and engineering projects. He has been in direct charge of quality control/quality assurance (QA/QC) work for Stantec and previous firms for geological, engineering geological, and environmental services primarily in California. Additionally, Kyle has been a primary contact for Stantec with many different clients (including multi-party actions) and regulatory bodies involving contracting, workplan approvals, site assessments and closures, permitting, remedial action, and litigation support. With regard to litigation services, Kyle has extensive experience providing expert witness testimony, second-party review, and litigation support and analysis.

Kyle's extensive experience includes assessment and remediation of property-specific and regional issues involving soil and groundwater contaminated with petroleum hydrocarbons, chlorinated solvents, heavy metals, pesticides, and PCBs.

He currently serves as the managing principal geologist in Stantec's Redlands, California office.

EDUCATION

Engineering Geology/Hydrogeology, California State University, Los Angeles, California, 1984

AS, General Science, Crafton Hills College, Yucaipa, California, 1975

BS, Geological Sciences, California State University, Long Beach, California, 1982

REGISTRATIONS

Certified Engineering Geologist #1271, State of California

Professional Geologist #4066, State of California

PROJECT EXPERIENCE

Bioremediation

Excavation and Treatment of Petroleum-Contaminated Soil

Kyle designed the excavation and treatment of 45,000 cubic yards of petroleum-contaminated soil. Soil treatment included utilizing vapor extraction, combined with bioremediation.

Chemicals & Polymers

Two Former Chemical Plants, Environmental Site Assessments and Remediation, Vernon, California
Mr. Emerson was part of the team for conducting Phase I and Phase II Environmental Site Assessments (ESA) and developing remedial action plans for two former chemical plant sites with 80-year industrial histories. Phase I ESAs used historical files, maps, aerial photographs, available documents, and data from public agencies and historical directories for identifying recognized environmental concerns. Extensive Phase II ESA survey activities aided in identifying below-grade structures such as vaults/USTs, as well as assessing the extent of influence and nature of the contamination. These investigations confirmed the presence of heavy metals, petroleum hydrocarbons, volatile organic compounds, polychlorinated biphenyls, radioactive materials, semi-volatile organic compounds, and polycyclic aromatic compounds in the soils for these sites. Specific areas of concern included former settling ponds, a bone yard, maintenance areas, transformer and substations, wastewater treatment facilities, and above-ground storage tank farms. A conceptual mode was developed for use in a health risk assessment and developed risk-based corrective actions to address potential health and environmental concerns. He assisted with the development and implementation of a remedial action plan, combined administrative controls, engineering controls, and active remediation; this resulted in the cost-effective return of one site to active use, and is reducing health risks to occupants and the public at the second site.

Kyle D. Emerson PG, CEG

Managing Principal Geologist

CONFIDENTIAL: Aerospace Adhesives and Coatings Plant, Glendale, California

Mr. Emerson was part of the team that conducted feasibility studies to evaluate remedial alternatives for remediation of chlorinated VOCs, 1,4 dioxane, and hexavalent chromium (CrVI) in soil, soil vapor, and groundwater. Feasibility studies included groundwater pump testing, benchscale column testing to evaluate in situ alternatives for reducing CrVI to the less mobile CrIII valence state, soil vapor extraction, capping, and excavation. Field pilot studies were performed to evaluate the efficiency of various CrVI reductants including the use of ferrous sulfate, calcium polysulfide, emulsified oil, and fructose. Extensive multi-depth soil vapor testing was conducted to evaluate the distribution of VOCs in the subsurface and to support vapor intrusion risk assessment. Feasibility studies were completed in 2008. Remedial actions are expected to be completed in 2011.

Condition Assessments

Assessment and Mitigation of Manufacturing Facility

Kyle managed the assessment and mitigation of an ammunition manufacturing facility covering 1,100 acres in a complex geologic environment. The contaminants involved red and white phosphorous, TNT, chlorinated solvents, solid wastes, and live ordinance.

Soil Contamination Assessment Supervision and Management

Kyle managed and supervised soil contamination assessment and in-situ remediation of heavy metals involving chromium, cadmium, nickel and zinc by chemical fixation to depths in excess of 40 feet below ground surface beneath existing structures within several manufacturing facilities.

Litigation Support and Expert Testimony

Kyle provided litigation support and expert testimony on more than 20 separate projects involving service stations, chlorinated solvent cases, heavy metal, and semi-volatile releases.

Corporate / Office

CT Realty Environmental Remediation of Former Dry Cleaners, El Centro, California

Mr. Emerson was responsible for assessments and remediation at this former dry cleaners which released the dry cleaning chemical tetrachloroethene (PCE) to the ground and underlying groundwater. The work included initial site assessment, agency interaction and negotiations with the California Regional Water Quality Control Board (CRWQCB), and Colorado Basin Region human health risk assessment (HHRA), design and implementation of remedial investigations, feasibility studies, remedial action plans, and implementation of remediation in mitigating chlorinated solvent contamination in vadose and saturated zones at concentrations indicative of DNAPL. The results of the completed remediation, as well as continued confirmation sampling and monitoring, allowed the CRWQCB to issue site closure in 2008. The site has since been redeveloped into a new commercial development.

Environmental Assessments

Siting Studies

Kyle performed initial siting studies for potential Class I, II, and III landfills. The project included detailed geologic mapping, hydrogeological studies, and permeability studies of caps and liners.

Environmental Site Remediation

Assessment and Remedial Design, California (Project Supervisor)

Kyle supervised the assessment and remedial design of a system to eliminate salt brine contamination in shallow perched water horizons in the Yucaipa, San Bernardino, and Riverside areas of southern California.

Design and Installation of Recovery Systems*

Kyle designed and installed numerous free-product recovery systems that successfully recovered product. One of the sites contained product up to 11-feet thick covering more than three city blocks. The dissolved phase had affected a multi-aquifer system and a public drinking water system.

Geophysical Characterizations*

Kyle performed and supervised numerous geophysical characterizations to determine the extent of old landfills. He provided classification studies, landfill gas monitoring, removal verification during grading, methane collection and mitigation plans, permitting, and closure plans.

* denotes projects completed with other firms

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Domestic Landfill Development*

Kyle designed and supervised the dynamic consolidation of a domestic landfill for development. He used this process to minimize expected settlement to overlying structures. Kyle designed commercial developments on closed landfills that involved complex methane collection and monitoring systems and building settlement controls.

Clay Borrow Site Studies

Kyle performed more than 10 separate clay borrow site studies for determining sources of material to cap landfills; ranged from a 20-acre dry lakebed to a 450-acre parcel in complex folded marine sediments.

Assessment, Clean Up, and Regulatory Support Management, Santa, Monica (Project Manager)

Kyle managed the assessment, clean up, and complex regulatory support of a PRP site in an MTBE case (Charnock subbasin). His work involved more than 20 environmental professionals working full time for two years to complete the assessment and clean up mandated by the regulatory agencies.

Hazardous Waste

San Gabriel Valley Superfund Site, Remediation & Closure of Multiple Source Areas, Industry, California

Mr. Emerson performed feasibility studies to evaluate appropriate and relevant remedial alternatives to mitigate constituents of concern in five AOCs contaminated with chlorinated hydrocarbons, heavy metals, petroleum fuel, and cutting oils. Ultimately, a combination of remedial alternatives was implemented that included large-diameter auger excavation to 45 feet to minimize impacts on facility operations, vapor extraction, vapor intrusion risk assessment, deed restriction, and monitored natural attenuation. At the completion of remedial actions, confirmation soil, soil vapor, and groundwater sampling were conducted and followed with risk assessment to demonstrate that remedial objectives had been achieved. No further action was recently granted by the US EPA and Los Angeles Regional Water Quality Control Board.

Mixed-Use

Port of San Diego Rohr Facility, Chula Vista, California

Mr. Emerson assisted in a detailed subsurface assessment of the Rohr facility. The intent of the assessment was to evaluate the 40-acre former aircraft part manufacturing facility for acquisition by the Port of San Diego for redevelopment into a business park and entertainment complex. The assessment identified the presence of soil, soil vapor, and groundwater impacts by petroleum hydrocarbons, VOCs, heavy metals, PCBs, and semi-volatile organic compounds. He utilized many sampling techniques to assess the limits and concentrations of contaminants in the subsurface. Ultimately, the team was able to develop a cost estimate for potential remedial action cost associated to corrective action to allow redevelopment.

Master Planned Commercial/Residential Redevelopment Project, Whittier, California (Project Manager)

Kyle oversaw the assessment of 26 contiguous properties that are part of a 21-acre master planned commercial/residential redevelopment project. The properties included industrial facilities, platting lines, fuel USTs, and metal processing plants, among others. The estimated cleanup costs are approximately \$2 million.

Multi-Unit / Family Residential

Residential Development Assessment, Ventura, California (Project Director)

Kyle directed an assessment of a 40-acre former agricultural property proposed for residential development. Pesticides were identified above hazardous waste levels and preliminary remediation goals established by the U.S. Environmental Protection Agency. Through corrective grading methods and onsite placement of the pesticide impacted soils, all material were re-used on site without offsite disposal. The over all cost savings for the client was more than \$1 million. Total cost was less than \$250,000 for all necessary activities.

Oil & Gas

Oil Field Site Assessments*

Kyle performed site assessments at oil field leases involving refineries, bulk storage areas, piping systems and wellhead, and drilling mud pit contamination.

* denotes projects completed with other firms

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Environmental Protection Agency Superfund Action, Culver City, California (Project Manager)

Kyle served as the project manager representing a major oil company in the assessment, remedial action, and litigation support in a multi-party contamination case affecting a City water supply. The assessment involved more than 250 continuous core borings up to 100 feet, as well as extensive remedial actions. The total cost for all related activities was \$22 million. The case is settled and the closure of the site is pending.

Project Management

Liability and Property Management Consulting Services

Kyle is providing liability and property management consulting services to more than 10 medium to large property development firms in the US. His work involves property transaction assessments, contract review, acquisition guideline development, liability management evaluation, insurance acquisition, and strategic planning.

Residential Development

Environmental Development Management and Review (Project Manager)

Kyle manages and reviews environmental development issues for a large residential developer specializing in development of contaminated industrial properties by providing innovative solutions in developing contaminated properties for residential use through risk assessment, engineering, and administrative and property development controls.

Site Management and Remediation

Design and Implementation of Biodegradation Programs*, California

Kyle designed and implemented one of the first in-situ biodegradation programs in California; it involved 50,000 cubic yards of diesel-contaminated soils, and groundwater to depths of 70 feet below ground surface.

Soil and Groundwater Remediation Systems

Soil and Groundwater Contamination Assessments and Mitigation*, California (Project Manger)

Kyle managed numerous chlorinated solvent soil and groundwater contamination assessments and mitigation programs in southern California. The projects involved releases that impacted soil and groundwater to depth of groundwater more than 700 feet in multi-aquifer systems. One case involved with plume dimensions more than 1 mile from the source affecting residential properties.

Soil and Groundwater Assessment and Remediation Programs*

Implemented hundreds of soil and groundwater assessment and remediation programs at various service station facilities in Southern and Northern California, and Nevada. Work involved assessment, remedial design, installation, maintenance and monitoring. Closure has been received on a majority of these sites.

Assessment and Remediation Management*

Kyle managed the assessment and remediation of soil and groundwater manufacturing at dry cleaning facilities contaminated with chlorinated solvents.

Warehouse / Light Industrial

Glendale Redevelopment Project, Glendale, California (Project Manager)

Kyle managed the assessment and remedial actions during the redevelopment of an industrial property. The project involved the demolition of a historic manufacturing facility and a commercial dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. Remedial actions involved excavation by pattern drilling and off site disposal along with removal of former USTs. The total cost of remediation and assessment was \$450,000.00.

* denotes projects completed with other firms

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Compton Redevelopment Project, Compton, California (Project Manager)

Kyle is serving as project manager for the assessment and remedial actions for a large redevelopment project. The project involves the redevelopment of a historic manufacturing facility and a former dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. The industrial facility was also associated with significant volumes of buried waste that required removal and disposal. These wastes also included the chemical referenced above, as well as PCBs and heavy metals. Remediation has included excavation, vapor extraction, and chemical fixation. The total cost of this project has been \$2.8 million to date.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Appendix C User Provided Records

Appendix C USER PROVIDED RECORDS

PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner*, *bona fide prospective purchaser*, or *contiguous property owner*, ASTM standard practice E2247-16 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Please answer the following questions as completely as possible. Attach additional pages as needed. Return the completed questionnaire to Stantec along with the executed Authorization For services form.

1. Property Information

Property Name: "Darden" _____

Property Address(es): 9k acres in and around W Elkhorn Avnue and S El Dorado Ave

City: Fresno State CA Zip _____

Property Owner Name: Westlands Water District _____

Property Owner Phone #: 559-241-6241

2. Contact For Site Access

Name: Russ Freeman _____

Company/Organization/Title: Westlands, rep _____

Phone # 559-241-6241 E-Mail Address: rfreeman@westlandswater.org

3. Environmental Cleanup Liens. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

_____ Yes X No

If yes, describe or attach details of the lien _____

4. Activity and Land Use Limitations. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?

_____ Yes X No

If yes, describe or attach details of the limitations _____

5. Specialized Knowledge or Experience. As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?
_____ Yes X No

If yes, describe or attach details of your specialized knowledge or experience _____

6. Relationship of Purchase Price to Fair Market Value of Property. Does the purchase price being paid for the property reasonably reflect the fair market value?

X Yes _____ No

_____ Not applicable. User is not involved in a purchase of the property.

If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

_____ Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

X _____ No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

7. Commonly Known or Reasonably Ascertainable Information. Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

Do you know the past uses of the property?

X _____ Yes (describe) _____ agriculture production _____

_____ No

Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?

_____ Yes (describe) _____

X _____ No

Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?

Yes (describe) _____

No

Do you know of any environmental cleanups that have taken place at the property?

Yes (describe) _____

No

8. The Degree of Obviousness of Contamination. E1527-13 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indicators that point to the presence or likely presence of contamination at the property?

Yes (describe) _____

No

9. Availability of Previous Environmental Reports. Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?

Yes (describe) _____

No

PRELIMINARY REPORT

Order No. : 22000330303
Title Unit No. : 48
Your File No. :
Buyer/Borrower Name : Darden
Seller Name : Westlands Water District

Property Address: xxx 40 parcels, Unincorporated Fresno, CA 93703

In response to the above referenced application for a Policy of Title Insurance, Stewart Title Guaranty Company Commercial Services (San Diego) hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Stewart Title Guaranty Company Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referenced to as an Exception on Schedule B or not excluded from coverage pursuant to the printed Schedules, Conditions, and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on covered Risks of said policy or policies are set forth in Exhibit A attached. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limits of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters, which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report, (and any supplements or amendments thereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance a binder or commitment should be requested.

NOTES AND REQUIREMENTS

- A. If you have knowledge of any other transfers or conveyances, please contact your title officer immediately for further research and review. The only transfers or conveyances shown in the public records within 24 months of the date of this report are: None
- B. There are no items in this Preliminary Report that will cause Stewart Title Guaranty Company to decline to attach the CLTA Endorsement Form 116.01-06 (or similar ALTA 22-06 equivalent), indicating that there is Agricultural Land; known as xxx 40 parcels, Unincorporated Fresno, CA 93703.
- C. All Transactions - Seller(s) and Buyer(s) or Borrowers are provided, as attachments, the document entitled "Acknowledgement of Receipt, Understanding and Approval of STG Privacy Notice for Stewart Title Companies and Stewart's Affiliated Business Arrangement Disclosure Statement" and the individually named documents, for review and acknowledgment prior to closing.
- D. All Transactions - Buyer(s)/Seller(s)/Borrower(s) are provided the Preliminary Report for review and acknowledgment prior to closing. Buyer(s) approval shall include the Preliminary Report items that are to remain as exceptions to the title policy.
- E. Purchase Transactions Only - Seller(s)/Owner(s) are provided Stewart Title Guaranty Company's Owner's Affidavit and Indemnity for completion and submission prior to closing.
- F. There are no items in this Preliminary Report that will cause Stewart Title Guaranty Company to decline to attach the CLTA Endorsement Form 100.2-06 (or a similar ALTA 9 equivalent), or, if applicable, the CLTA Endorsement Form 115.1-06 (or a similar ALTA 4 equivalent) or CLTA Endorsement Form 115.2-06 (or a similar ALTA 5 equivalent) to an ALTA Loan Policy, when issued.
- G. A Preliminary Change of Ownership Report must be completed by the transferee (buyer) prior to the transfer of property in accordance with the provisions of Section 480.3 of the Revenue and Taxation Code. The Preliminary Change of Ownership Report should be submitted to the recorder concurrent with the recordation of any document effecting a change of ownership. If a document evidencing a change of ownership (i.e. Deed, Affidavit-Death Joint Tenant) is presented to the recorder for recording without a preliminary change of ownership report, the recorder may charge an additional \$20.00.
- H. Some counties, including San Francisco, require that a Transfer Tax Affidavit be completed and signed by the Grantor for each deed submitted for recording. This is in addition to a Preliminary Change of Ownership Report.
- I. In addition to County Transfer Tax (which is most typically \$1.10 per thousand), any conveyance may be subject to a City Transfer and/or Conveyance Tax, as follows.

CALIFORNIA "GOOD FUNDS" LAW

California Insurance Code Section 12413.1 regulates the disbursement of escrow and sub-escrow funds by title companies. The law requires that funds be deposited in the title company escrow account and available for withdrawal prior to disbursement. Funds received by Stewart Title Guaranty Company Commercial Services (San Diego) via wire transfer may be disbursed upon receipt. Funds received via cashier's checks or teller checks drawn on a California Bank may be disbursed on the next business day after the day of deposit. If funds are received by any other means, recording and/or disbursement may be delayed, and you should contact your title or escrow officer. All escrow and sub-escrow funds received will be deposited with other escrow funds in one or more non-interest bearing escrow accounts in a financial institution selected by Stewart Title Guaranty Company Commercial Services (San Diego). Stewart Title Guaranty Company Commercial Services (San Diego) may receive certain direct or indirect benefits from the financial institution by reason of the deposit of such funds or the maintenance of such accounts with the financial institution, and Stewart Title Guaranty Company Commercial Services (San Diego) shall have no obligation to account to the depositing party in any manner for the value of, or to pay to such party, any benefit received by Stewart Title Guaranty Company Commercial Services (San Diego). Such benefits shall be deemed additional compensation to Stewart Title Guaranty Company Commercial Services (San Diego) for its services in connection with the escrow or sub-escrow.

If any check submitted is dishonored upon presentation for payment, you are authorized to notify all principals and/or their respective agents of such nonpayment.

CALIFORNIA LAND TITLE ASSOCIATION

**STANDARD COVERAGE POLICY – 1990
EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
(b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
(a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
(b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
(c) resulting in no loss or damage to the insured claimant;
(d) attaching or created subsequent to Date of Policy; or
(e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13) EXCLUSIONS

**PROCEDURES TO ACCOMPANY THE
RESTRICTIVE COVENANT MODIFICATION FORM**

The law prohibits unlawfully restrictive covenants based upon:

“...age, race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, disability, veteran or military status, genetic information, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry... Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.”

As the individual holding or acquiring an interest in the property, you may elect to have any unlawfully restrictive covenants “removed”, which means “redacted.”

To have the unlawfully restrictive covenant removed, you may prepare and submit to the county recorder’s office, a “Restrictive Covenant Modification” form (RCM) together with a copy of the attached document with the unlawfully restrictive covenant redacted. This request must be submitted to the county recorder’s office and must include your return address so the county recorder can notify you of the action taken by the county counsel.

NOTE: The RCM provided with your title product MAY NOT be the same form required by your county recorder’s office; please double check your county recorder’s office before completing this form.

The process at the county recorder’s office is as follows:

- The county recorder takes the RCM with the redacted document and the original document attached and submits it to the county counsel for review to determine if, from a legal standpoint, the language was an unlawfully restrictive covenant and thus the redacted version should be indexed and recorded.
- The county counsel shall inform the county recorder of his/her determination within a reasonable amount of time, not to exceed three months from the date of your request.
- If county counsel determined that the redacted language was unlawful then, once recorded, the redacted document is the only one that effects the property and this modified document has the same effective date as the original document.
- If county counsel determined that the redacted language was not unlawful then county counsel will return the RCM package to the county recorder and the county recorder will advise the requestor that same the request has been denied and the redacted document has not been recorded.
- The modification document shall be indexed in the same manner as the original document and shall contain a recording reference to the original document.

- Directly and indirectly from customers, their designees or their agents (For example, realtors, lenders, attorneys, etc.)
- Directly and indirectly from activity on Stewart's website or other applications.
- From third-parties that interact with Stewart in connection with the services we provide.

Use of Personal Information

Stewart may use or disclose the personal information we collect for one or more of the following purposes:

- To fulfill or meet the reason for which the information is provided.
- To provide, support, personalize, and develop our website, products, and services.
- To create, maintain, customize, and secure your account with Stewart.
- To process your requests, purchases, transactions, and payments and prevent transactional fraud.
- To prevent and/or process claims.
- To assist third party vendors/service providers who complete transactions or perform services on Stewart's behalf.
- As necessary or appropriate to protect the rights, property or safety of Stewart, our customers or others.
- To provide you with support and to respond to your inquiries, including to investigate and address your concerns and monitor and improve our responses.
- To personalize your website experience and to deliver content and product and service offerings relevant to your interests, including targeted offers and ads through our website, third-party sites, and via email or text message (with your consent, where required by law).
- To help maintain the safety, security, and integrity of our website, products and services, databases and other technology assets, and business.
- To respond to law enforcement or regulator requests as required by applicable law, court order, or governmental regulations.
- Auditing for compliance with federal and state laws, rules and regulations.
- Performing services including maintaining or servicing accounts, providing customer service, processing or fulfilling orders and transactions, verifying customer information, processing payments, providing advertising or marketing services or other similar services.
- To evaluate or conduct a merger, divestiture, restructuring, reorganization, dissolution, or other sale or transfer of some or all of our assets, whether as a going concern or as part of bankruptcy, liquidation, or similar proceeding, in which personal information held by us is among the assets transferred.

Stewart will not collect additional categories of personal information or use the personal information we collected for materially different, unrelated, or incompatible purposes without providing you notice.

Disclosure of Personal Information to Affiliated Companies and Nonaffiliated Third Parties

Stewart does not sell your personal information to nonaffiliated third parties. Stewart may share your information with those you have designated as your agent in the course of your transaction (for example, a realtor or a lender). Stewart may disclose your personal information to a third party for a business purpose. Typically, when we disclose personal information for a business purpose, we enter a contract that describes the purpose and requires the recipient to both keep that personal information confidential and not use it for any purpose except performing the contract.

We share your personal information with the following categories of third parties:

- Service providers and vendors (For example, search companies, mobile notaries, and companies providing credit/debit card processing, billing, shipping, repair, customer service, auditing, marketing, etc.)
- Affiliated Companies
- Litigation parties and attorneys, as required by law.
- Financial rating organizations, rating bureaus and trade associations.

Consumer Rights and Choices

The CCPA provides consumers (California residents) with specific rights regarding their personal information. This section describes your CCPA rights and explains how to exercise those rights.

Access to Specific Information and Data Portability Rights

You have the right to request that Stewart disclose certain information to you about our collection and use of your personal information over the past 12 months. Once we receive and confirm your verifiable consumer request, Stewart will disclose to you:

- The categories of personal information Stewart collected about you.
- The categories of sources for the personal information Stewart collected about you.
- Stewart's business or commercial purpose for collecting that personal information.
- The categories of third parties with whom Stewart shares that personal information.
- The specific pieces of personal information Stewart collected about you (also called a data portability request).
- If Stewart disclosed your personal data for a business purpose, a listing identifying the personal information categories that each category of recipient obtained.

Deletion Request Rights

You have the right to request that Stewart delete any of your personal information we collected from you and retained, subject to certain exceptions. Once we receive and confirm your verifiable consumer request, Stewart will delete (and direct our service providers to delete) your personal information from our records, unless an exception applies.

Stewart may deny your deletion request if retaining the information is necessary for us or our service providers to:

1. Complete the transaction for which we collected the personal information, provide a good or service that you requested, take actions reasonably anticipated within the context of our ongoing business relationship with you, or otherwise perform our contract with you
2. Detect security incidents, protect against malicious, deceptive, fraudulent, or illegal activity, or prosecute those responsible for such activities.
3. Debug products to identify and repair errors that impair existing intended functionality.
4. Exercise free speech, ensure the right of another consumer to exercise their free speech rights, or exercise another right provided for by law.
5. Comply with the California Electronic Communications Privacy Act (Cal. Penal Code § 1546 *seq.*).
6. Engage in public or peer-reviewed scientific, historical, or statistical research in the public interest that adheres to all other applicable ethics and privacy laws, when the information's deletion may likely render impossible or seriously impair the research's achievement, if you previously provided informed consent.
7. Enable solely internal uses that are reasonably aligned with consumer expectations based on your relationship with us.
8. Comply with a legal obligation.
9. Make other internal and lawful uses of that information that are compatible with the context in which you provided it.

Exercising Access, Data Portability, and Deletion Rights

To exercise the access, data portability, and deletion rights described above, please submit a verifiable consumer request to us either:

- Calling us Toll Free at 1-866-571-9270
- Emailing us at Privacyrequest@stewart.com
- Visiting <http://stewart.com/ccpa>

Only you, or someone legally authorized to act on your behalf, may make a verifiable consumer request related to your personal information. You may also make a verifiable consumer request on behalf of your minor child.

To designate an authorized agent, please contact Stewart through one of the methods mentioned above.

You may only make a verifiable consumer request for access or data portability twice within a 12-month period. The verifiable consumer request must:

- Provide sufficient information that allows us to reasonably verify you are the person about whom we collected personal information or an authorized representative.
- Describe your request with sufficient detail that allows us to properly understand, evaluate, and respond to it.

Stewart cannot respond to your request or provide you with personal information if we cannot verify your identity or authority to make the request and confirm the personal information relates to you.

Making a verifiable consumer request does not require you to create an account with Stewart.

Response Timing and Format

We endeavor to respond to a verifiable consumer request within forty-five (45) days of its receipt. If we require more time (up to an additional 45 days), we will inform you of the reason and extension period in writing.

A written response will be delivered by mail or electronically, at your option.

Any disclosures we provide will only cover the 12-month period preceding the verifiable consumer request's receipt. The response we provide will also explain the reasons we cannot comply with a request, if applicable. For data portability requests, we will select a format to provide your personal information that is readily useable and should allow you to transmit the information from one entity to another entity without hindrance.

Stewart does not charge a fee to process or respond to your verifiable consumer request unless it is excessive, repetitive, or manifestly unfounded. If we determine that the request warrants a fee, we will tell you why we made that decision and provide you with a cost estimate before completing your request.

Non-Discrimination

Stewart will not discriminate against you for exercising any of your CCPA rights. Unless permitted by the CCPA, we will not:

- Deny you goods or services.
- Charge you a different prices or rates for goods or services, including through granting discounts or other benefits, or imposing penalties.
- Provide you a different level or quality of goods or services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

MEMORANDUM

Mr. H. C. Woodruff, Engineer, furnished the following information relative to geological contacts in the above well by telephone today. The data should be added to and made a part of the well record.

Santa Margarita Oyster Beds - 5600' (Ditch samples)
Top of McClure Shale - 6235' (Schlumberger)
Top of Kettleman Sand - 6433' (Cored and Schlumberger)
Top of Upper Variegated - 6583' (Cored)
Top of Tumbler Sandstone - 7115' (Cored) - This is equivalent to the sand whose top is immediately below the 600' shale in Kettleman North Dome field.
Top of Kroyenhagen - 8336' (Schlumberger)
Top of Upper Eocene Sand (probably Domingine) - 8903' (Schlumberger)
Base of Upper Eocene Sand - 9105' (Cored and Schlumberger)
The sand has probably changed from Domingine to Arroya Honda between 8916' and 9105'.
Base of Arroya Honda Siltstone - 9535' (Cored)
Top of Cretaceous - 9578' (Cored)

Report on Proposed Operations

No. P 5-5032

Coalinga, Calif. May 4, 1939

Mr. W. H. Harshbarger

Box 228, Coalinga, Calif.

Agent for THE TEXAS COMPANY

DEAR SIR:

Your proposal to drill Well No. "Leacher" 1

Section 12, T. 17 S., R. 16 E., M. D. B. & M., Field, Fresno County,

date April 27, 1939, received April 29, 1939, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

THE NOTICE STATES:

"This well is 990 feet S. and 2310 feet E. from N. W. Cor. Sec. 12-17-16
The elevation of the derrick floor above sea level is 220.5 feet. Ground
ground

We estimate that the first productive oil or gas sand should be encountered at
depth of about _____ feet."

PROPOSAL:

"We propose to use the following strings of casing, either cementing or landing
them as herein indicated:

| Size of Casing, Inches | Weight, Lb. Per Foot | Grade and Type | Depth | Landed or Cemented |
|---------------------------|-------------------------|----------------|-------|-----------------------|
| 13-3/8" | 48 | New | 1100' | Cemented |

Casing program will be progressively determined.

Well is to be drilled with rotary tools.

It is understood that if changes in this plan become necessary we are to notify
you before cementing or landing casing."

CONCLUSION:

This Division has no information as to the depth at which oil or gas bearing
formations should be encountered at this location.

The 1100' of 13-3/8" surface casing proposed in the notice is not sufficient
to afford adequate protection to fresh water supplies suitable for irrigation
known to exist in the district. The surface casing should be cemented in a
yellow clay that underlies the water suitable for irrigation. This yellow clay
was logged at 1835'-1850' in Western Gulf Oil Company well No. 4 "S. P. Land
Company", Sec. 3, T. 17 S., R. 16 E., M. D. B. & M., and surface casing was ce-
mented at 1855'. The yellow clay was logged at 1690'-1755' in Shell Oil Company,
Inc. well No. "Port Costa" 48-30, Sec. 30, T. 17 S., R. 16 E., M. D. B. & M.,
and surface casing was cemented at 1755'. A shallower yellow clay is usually
encountered several hundred feet above the yellow clay in which surface casing
should be cemented. In the Shell Oil Company, Inc. well this upper yellow clay
was logged at 1575'-1620' and a course, white sand, probably containing water,
was found between the two clay strata. This well also differed from the others
in that these clay strata were largely blue strata with streaks of yellow clay

which were distinctive because they were stinky. For that reason it is our understanding that they may be located by means of ditch samples if reasonable diligence is used.

We anticipate that conditions in your well should be somewhat similar to those in the Shell Oil Company, Inc. well referred to.

YOUR PROPOSAL IS APPROVED PROVIDED THAT:

1. The well shall not be located within 100' of any property line.
2. Water suitable for irrigation shall be protected from contamination. For this purpose surface casing shall be cemented in the lower yellow clay referred to above, which we estimate should be at a depth of about 1750'.
3. Adequate blow-out prevention equipment shall be provided and ready for operation at all times.
4. Mud fluid of not less than 70 lb. per cubic foot shall be used in the drilling of the well, and the column of mud fluid shall be maintained to the surface at all times, particularly while pulling the drill pipe.
5. THIS DIVISION SHALL BE NOTIFIED:
 - (a) When a showing of oil and gas is encountered.
 - (b) Before landing and cementing each string of casing.
 - (c) To witness a bailing test of each water shut-off.

Dear Mr. Corwin:

This is to advise that Norris-Thermador Corporation does not own any oil wells in the State of California at this time. It is undoubtedly possible that sometime in 1946 our predecessor, Norris Stamping and Manufacturing Co., did own well No. "Cross" 1, Sec. 36, T. 16 S., R. 16 E. Inasmuch as we do not now own this well, or any other oil wells in the State of California, we have no objection to the inspection or copying by interested parties of the information appearing on the record of the well drilled by Norris Stamping and Manufacturing Co.

Gentlemen

Several requests have been received by this Division for the release of information on well No. "Cross" 1, Sec. 36, T. 16 S., R. 16 E., M. D. B. & M., Fresno County, which was drilled and abandoned in 1946 by Norris Stamping and Manufacturing Co., 5215 South Boyle Avenue, Los Angeles, California.

In response to my inquiry to the Secretary of State, I was informed that Norris Stamping and Manufacturing Co. is a California corporation in good standing, and that the name of the company was changed to Norris-Thermador Corporation.

The original notice to drill, filed in this office, was signed by N. W. Hagelberg, Secretary & Treasurer, while subsequent records were signed by Jay P. Goulds. The well was drilled to a total depth of 8,729 feet without encountering any showings of oil or gas.

Inasmuch as all material filed with this Division is confidential, please advise me if you have any objection to the inspection or copying, by interested parties, of the information appearing on the record of the well drilled by your company.

Dear Mr. Corwin:

As directed in your letter of November 1, 1963, we contacted the Norris-Thermador Corporation and a copy of our letter to them is herewith attached for your files.

We have received a letter from the Norris-Thermador Corporation stating that they do not have any wells in Fresno County, California. Herewith we enclose their letter for your files.

Inasmuch as we are still desirous of obtaining the well information associated with the NORRIS STAMPING No. 1 "Cross" Well, Section 36-16S-16E, would you be kind enough to advise us as to the next procedure for obtaining this requested data, which would be all the well information on file?

Gentlemen:

In gathering well information in Fresno County we are unable to obtain any data such as well history, electric log, core descriptions, etc., on your well NORRIS STAMPING "Cross" Well No. 1 in Section 36-16S-16E, through the usual well distribution services.

We have written to the Division of Oil and Gas in Coalinga requesting this information and have been advised by them to write directly to you and request the release of the data.

The material, such as we are requesting, becomes part of our confidential file.

We shall appreciate your earliest reply as to how we may obtain this information. We, of course, expect to pay for all reproduction costs associated with our request. If you should elect to have the reproduction work performed by a local concern, we suggest you request the reproduction firm send the bill in triplicate to us for immediate payment. If, however, it is more convenient for the Division of Oil and Gas office at Coalinga to release this information to us, would you be kind enough to either advise them or us at your earliest convenience?

Thank you in advance for your courtesies extended.

Attention: Mr. E. J. Kaplow, Deputy

Dear Mr. Kaplow:

When we filed our Form No. 103 (History of Oil and Gas), we listed under March 30, 1946, "Ran 50 sack plug at 2400' and 50 sack plug at 1200'. Filled hole with heavy mud and welded 1/2" plate over casing at surface".

We neglected to state in there, and after checking my notes we found top of 2400' plug at 2385' and we found the top of the 1200' plug at 1190'. Both plugs stood the full weight of the drill pipe.

We are sorry that this was omitted, it was purely unintentional on our part.

Trusting that this will clear up the matter and assuring you of our desire to cooperate in every matter possible, we beg to remain

Very truly yours,

NORRIS STAMPING AND MANUFACTURING CO.

The operations were performed for the purpose of inspecting blow-out prevention equipment.

The Inspector arrived at the well at 2:15 P.M. and Mr. Fillmore reported:

1. The well was being drilled at a depth of 5100'.
2. All pipe and fitting used in connection with the blow-out prevention equipment are of high pressure type.
3. The rotary hose is of a high pressure type.
4. The installed blow-out prevention equipment was tested on February 22 under a pressure of 1000 lb. for 10 minutes and was found to be in satisfactory operating condition. It will be inspected and operated about twice a week until deeper formations are reached.
5. The following changes will be made:
 - a. When running casing, the rams in the Shaffer gate will be changed.
 - b. After cementing casing, the rams in the Shaffer gate will be changed.

THE ENGINEER NOTED:

1. The following blow-out prevention equipment was installed at the well:
 - a. Shaffer valve for complete shut-off with remote control.
 - b. Shaffer valve equipped with drill pipe rams with remote control.
 - c. High pressure valve and fittings on fill-up line.
 - d. Stopcock on stand pipe.
 - e. One high pressure rotary hose.

THOROUGH INSPECTION SHOWED THE EQUIPMENT INSTALLED ON THIS DATE TO BE SATISFACTORY.

Agent for UNION OIL COMPANY OF CALIFORNIA

Coalinga Calif.
July 14 1965

DEAR SIR:

Your proposal to drill Well No. "S.F." 1
Section 27, T. 16S, R. 16E, MD B. & M., Fresno County,
dated July 13 1965, received July 14 1965, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

THE NOTICE STATES:

"Legal description of mineral-right lease, consisting in part, of 640 acres, is as follows: All of Sec. 27. Please see attached plat
Do mineral and surface leases coincide? Yes
Location of Well: 440 feet North along section line and 440 feet East at right angles to said line from the Southwest corner of section 27
Elevation of ground above sea level 230'[±]
All depth measurements taken from top of K.B. which is 12'[±] above ground."

PROPOSAL:

Intended zone of completion: Exploratory to Gatchell & Loescher sands
Estimated total depth 3300'

It is understood that if changes in this plan become necessary we are to notify you immediately."

DECISION:

THE PROPOSAL IS APPROVED PROVIDED THAT:

1. The 9-5/8" surface casing shall be cemented with sufficient cement to fill back of this casing from the shoe to the ground surface.
2. Mud fluid of sufficient weight and proper consistency to prevent blow-outs shall be used in drilling, and the column of mud fluid shall be maintained to the surface at all times, particularly while pulling the drill pipe.
3. Adequate blow-out prevention equipment shall be provided and kept ready for operation at all times.
4. Water suitable for irrigation shall be protected from contamination.
5. This Division shall be notified:
 - a. Before landing or cementing any casing below the 9-5/8" surface casing, and additional requirements will be outlined at that time, consisting in part of an adequate cement program for protection of fresh water deposits.
 - b. To inspect blow-out prevention equipment prior to drilling below a depth of 1500'.
 - c. To witness a test of each possible water shut-off.

NOTE: Information on file in this office indicates that the base of the usable fresh water deposits should be encountered at a depth of approximately 1400' at this location.

- June 19 Spudded well at 6:30 P.M. with 15-1/2" rock bit, drilled from surface to 520'. Conditioned hole to run casing.
- June 20 Ran 13 joints (525.0' on hook) of new 11-3/4" casing (42#, J-55). Cemented casing at 520' with equivalent of 500 sacks of "Sealite Mix" cement, last 100 sacks treated with 2% calcium chloride. Displaced with mud and bumped plug at 12:30 P.M. at 600# F.P. Used Halliburton Cementing Company equipment, had good cement "returns" to surface.
- June 21 Landed casing and installed blow-out prevention equipment, tested at 1000# for 15 minutes, showed no pressure loss. Drilled out casing shoe at 520' with 10-5/8" bit, drilled ahead to 2800'. Taylor mud logging truck installed and operating from surface casing shoe.
- June 22 Reduced hole size to 9-7/8" at 2800', drilled ahead to 4080'.
- June 23 Drilled 9-7/8" hole from 4080' to 5085'. (Bit #6 dull)

Drilled ahead in 9-7/8" hole to 6414'.
- June 26 thru July 5 Drilled 9-7/8" hole from 6414' to 8783'. (Bit #26 dull at 8657')
- July 6 Reduced hole size to 8-3/4" at 8783'. Drilled ahead to 8895'. (Bit #28 dull at 8859')
- July 7 Drilled 8-3/4" hole from 8895' to 9007'. (TOTAL DEPTH)
Ran Schlumberger electric log. (Final Run)
Decision to abandon, started laying down drill pipe.
- July 8 Hung open end drill pipe at 2500', pumped in 100 sacks Permanente "Type O" cement treated with 2% calcium chloride, calculated to plug to approximately 2350'. Plug in place at 2:30 A.M. by Halliburton Cementing Company.

July 11 19 56

DEAR SIR:

Operations at your well No. "Mahoney" 72-18 Sec. 18, T. 17S, R. 17E, M.D. B. & M.,
Field, in Fresno County, were witnessed
on July 8, 1956. Mr. K. D. Loken, representative of the supervisor was present
from 6:30 am to 8:00 am. There were also present Jack Spurgin, Drilling Foreman, and
M. Mayfield, Driller.

Present condition of well: 11 3/4" cem. 520', T.D. 9007', plugged with cement 2502'-2341'.

The operations were performed for the purpose of witnessing the location and hardness of a
cement plug placed from 2502'-2341' in the process of abandonment.

Mr. Spurgin reported:

1. A 10 5/8" hole was drilled to 2800', a 9 7/8" hole to 8773' and an 8 3/4" hole to a total depth of 9007'.
2. On July 8, 1956, 100 sacks of cement was pumped into the hole and equalized through 4 1/2" drill pipe hanging at 2502', filling to 2341'.

THE INSPECTOR NOTES:

1. The cement plug at the reported depth of 2341' supported 5 tons of the weight of the drill pipe.

THE LOCATION AND HARDNESS OF THE CEMENT PLUG AT 2341' ARE APPROVED.

*Surface inspection 8-3-56 OK
Sump & cellar open, rig on location (laid down)

DECISION:

THE PROPOSAL IS APPROVED PROVIDED THAT:

1. The 11 3/4" surface casing shall be cemented with sufficient cement to fill back of this casing from the shoe to the ground surface.
2. Mud fluid of sufficient weight and proper consistency to prevent blow-outs shall be used in drilling, and the column of mud fluid shall be maintained to the surface at all times, particularly while pulling the drill pipe.
3. Adequate blow-out prevention equipment shall be provided and kept ready for operation at all times.
4. In the event that additional casing is landed or cemented in the well, one of the following operations shall be performed for the protection of fresh water:
 - (a) Sufficient cement shall be used at the shoe of the casing to fill back of this casing to above the base of the fresh water sands, or
 - (b) The casing shall be cemented through perforations at the base of the fresh water sands.
5. This Division shall be notified before landing or cementing any casing below the 11 3/4" surface casing, and additional requirements will be outlined at that time.

This well was drilled by the R. B. Montgomery Drilling Company using portable National #75 drilling rig #8. All measurements were taken from the top of the kelly bushing 12' above ground elevations.

12-22

Moved in rotary equipment and rigged up. Spudded 13-3/4" hole at 2:00 A.M. , using gel/water mud and drilled to 507'.

Ran 12 joints of 9-5/8" O.D. 32.30 lb., H-40 casing (512' on hook), Cemented through Baker guide shoe at 507' using 85 sacks class "G" cement and 85 sacks Pozmix-D, mixed with 4% gel, treated 2% calcium chloride. Followed by 75 sacks class "G" cement, treated 3% calcium chloride. Had good cement returns to the surface. C.I.P. 10:30 A.M. by Halliburton Company. After 4 hours landed casing, welded on casing head and tested to 2000 psi., OK. Installed blow-out prevention equipment and tested to 1500 psi., OK. Installed Exploration logging Inc. drill returns logging unit at the shoe of the surface pipe and logged to total depth.

12-23

Drilled out shoe and cement to 507', and drilled ahead in 8-3/4" hole to 3520'. Mud weight 70 lbs./cu.ft., viscosity 40-45 seconds.

12-24

Drilled 8-3/4" hole to 5082'. Mud weight 72 lbs./cu.ft., viscosity 41-48 seconds.

12-25

Drilled 8-3/4" hole to 5954'. Mud weight 72 lbs./cu.ft., viscosity 47-52 seconds.

DEAR SIR:

(019-20148)

Operations at well No. "McDonald Estate" 1, Sec. 34, T. 16S, R. 16E, MD B & M.
Francia Field, in Francia County, were witnessed
 on January 1, 1968 Mr. F. L. Hill, representative of the supervisor was present
 from 11:00 a.m. to 1:00 p.m. There were also present C. M. Coker, Drilling Foreman.

Present condition of well: 8-3/4" com. 507', T.D. 9000'. Plugged with cement 1265'-
864' and 553'-340'+.

The operations were performed for the purpose of plugging the hole in the process of abandonment.

Mr. Coker reported:

1. An 8-3/4" hole was drilled from 507' to 9000'.
2. No oil or gas shows were encountered.
3. On January 1, 1968, 80 sacks of cement was pumped into the hole through 5" drill pipe hanging at 1265', filling to 864'.

THE INSPECTOR NOTED:

1. The cement plug at 864' supported the entire weight of the drill pipe.
2. On January 1, 1968, 75 sacks of cement was pumped into the hole through 5" drill pipe hanging at 553', calculated to fill to 340'.

THE CEMENTING OPERATIONS ARE APPROVED.

DECISION:

THE PROPOSAL IS APPROVED PROVIDED THAT:

1. The 9-5/8" surface casing shall be cemented with sufficient cement to fill back of this casing from the shoe to the ground surface.
2. Mud fluid of sufficient weight and proper consistency to prevent blow-outs shall be used in drilling, and the column of mud fluid shall be maintained to the surface at all times, particularly while pulling the drill pipe.
3. Adequate blow-out prevention equipment shall be provided and kept ready for operation at all times.
4. Water suitable for irrigation shall be protected from contamination.
5. A supplementary notice shall be filed before landing or cementing any casing below the 9-5/8" surface casing and additional requirements, including an adequate cement program for protection of fresh water deposits, will be outlined at that time.
6. This Division shall be notified:
 - a. To inspect blow-out prevention equipment prior to drilling below a depth of 1500'.
 - b. To witness a test of each possible water shut-off.

Note: Information on file in this office indicates that the base of the usable fresh water deposits should be encountered at a depth of approximately 1250'.

CRITICAL WELL

As defined in the California Administrative Code, Title 14, Section 1720(a), "Critical well" means a well within:

- (1) 300 feet of the following:
 - (A) Any building intended for human occupancy that is not necessary to the operation of the well; or
 - (B) Any airport runway.
- (2) 100 feet of the following:
 - (A) Any dedicated public street, highway, or nearest rail of an operating railway that is in general use;
 - (B) Any navigable body of water or watercourse perennially covered by water;
 - (C) Any public recreational facility such as a golf course, amusement park, picnic ground, campground, or any other area of periodic high-density population; or
 - (D) Any officially recognized wildlife preserve.

Appendix G field notes

Appendix G FIELD NOTES

Darden Field Notes

APN 050-060-45ST

- There is a soil stockpile area located at the lower southwest corner.
- There are overhead electrical lines along south end of APN along Mt Whitney Ave.
- There is overhead electrical along the east side of APN.

APN 050-060-48ST

- There are overhead electrical lines along the west and south sides of APN.
- There is a monitoring well located at the southwest corner of APN.

APN 050-060-47ST

- There are overhead electrical lines along the west side of APN.

APN 050-060-46ST

- There are overhead electrical lines along the west side of APN.

APN 050-070-43ST

- There is a pole mounted transformer on adjacent property to the west, and a metal AST, control panel, Ag turbine pump, turbine oil AST and poly AST located near the southwest corner of APN. Soil staining observed below turbine oil AST and Ag pump. (see photolog 5 – 9)

APN 050-070-64ST

- The adjacent property located near the northwest corner of the APN contains numerous poly and metal ASTs both stationary and mobile. The property contains 3 residence and workshop related to Ag activities.

APN 050-030-49ST

- There are overhead electrical lines along the east and south sides of APN.
- The adjacent property located near the southwest corner of the APN contains a residence and Ag equipment.

APN 050-030-29ST

- There is a tree lined shallow canal located along the east side of the APN. Minor miscellaneous household debris was observed in the area.
- The adjacent property near the northwest corner of the APN contains a ponding basin.

APN 050-030-27ST

- There are overhead electrical lines along the south side of APN.

APN 050-030-26ST

- Nothing observed.

APN 050-070-02T

- Nothing observed.

APN 050-070-41ST

- Nothing observed.

APN 050-070-42ST

- There is a tree lined shallow canal located along the east side of the APN. Minor miscellaneous household debris was observed in the area.

APN 050-020-47ST

- There are overhead electrical lines along the west side and northwest corner of the APN.
- There are 3 residences along the west side of APN that are not included.
- There is an Ag chemical pumping station and AST along the west side of APN that is not included.
- There is a large Ag equipment laydown area at the northwest corner of the APN that is not included. The site contains numerous poly/metal ASTs that are both mobile and stationary.
- There is a pole mounted transformer located near the northwest corner of APN.

APN 050-030-21ST

- Nothing observed.

APN 050-030-33ST

- Nothing observed.

APN 050-030-31ST

APN 050-030-32ST

- Nothing observed.

APN 050-030-04ST

- Nothing observed.

APN 050-030-05ST

- There is a ponding basin located at the northeast corner of APN.
- There is a monitoring well located at the southwest corner of APN.

APN 050-030-07ST

- Nothing observed.

APN 050-030-08ST

- There is a monitoring well located at the southeast corner of APN.

APN 050-030-24ST

- There is a large ponding basin located at the northwest corner of APN.
- There is a canal located along the north side of APN.
- There are overhead electrical lines along the west side of APN.
- There is a pole mounted transformer located near the northwest corner of the APN.
- There is a large concrete foundation containing a 4' deep recessed area at its center which contains a metal stick up that has been filled with concrete. The west side of pad contains a 10" to 12" diameter former Ag well. (See photolog 46-48)

APN 050-030-25ST

- Nothing observed.

APN 050-030-10ST

- There is a canal located along the north side of APN.

APN 050-080-01ST

- There is a canal located along the east side of APN.

APN 040-110-16ST

- There is a pole mounted transformer, Ag chemical pumping station, Ag chemical AST, Ag turbine pump, turbine oil AST, control panel and poly fuel AST. (See photolog 15-18)
- Staining observed around the base of the AG turbine pump and the concrete pad located immediately west of the pump. Soil staining was also observed at the base of the poly tank which then extends out in a narrow swath from the poly tank to the southwest approximately 10 feet. (See photolog 17-18)
- A large Westlands Water District vault was observed containing valves and piping.
- There are overhead electrical lines located at the west and north sides of APN.
- There is a pole mounted transformer located at the middle of the west side of APN.

APN 040-110-28ST

- There is a pole mounted transformer located at the southwest corner of APN.
- There are four nested pole mounted transformers just north of the southwest corner of APN.
- There are overhead electrical lines located at the south and west sides of APN.

APN 040-110-30ST

- There are pole mounted transformers located at the northwest and southwest corners of the APN.
- There is a monitoring well located at the northwest corner of APN.

- There is an active ponding basin on the adjacent property to the west.

APN 040-070-32ST

- Nothing observed.

APN 040-070-31ST

- There is a damaged monitoring well located at the center of the east side of APN. (See photolog 25-27)
- There is a concrete pad located near the southeast corner of APN. (See photolog 28)

APN 040-110-27ST

- There is a concrete pad containing a former Ag well located near the southeast corner of APN. (See photolog 29)

APN 040-110-29ST

- Nothing observed.

APN 040-110-31ST

- There is a canal along the north side of APN.

APN 040-110-25ST

- There is a concrete foundation of a former residence located near the center of the west side of APN.
- There is a burned out vehicle located just north of the residence foundation. No staining observed around vehicle.
- There is a concrete foundation located on the near the southwest corner of APN.
- There is a pole mounted transformer at the southwest corner of APN.

APN 040-110-32ST

- There is a canal along the north side of APN.

APN 040-110-23ST

- There is a canal along the north side of APN.

APN 040-110-21ST

- Nothing observed.

APN 040-110-34ST

- There is monitoring well located at the northwest corner of APN.
- There is a concrete pad with former Ag well.
- There is a pole mounted transformer.

APN 040-110-15ST

- There is a canal along the north side of APN.
- There is a well monitoring field with 9 monitoring wells located in the southeast quadrant of APN.

APN 040-110-20ST

- There are overhead electrical lines located at the east and south sides of APN.
- There is a monitoring well located at the center of the east side of APN.
- There is a monitoring well located at the center of the south side of APN.
- There is a concrete pad with former Ag well located near the southwest corner of APN.
- There is a capped steel 4" well located near the southwest corner of APN.

Notes and Definitions

| | |
|-----|---|
| S4 | Surrogate was diluted out. |
| S12 | Surrogate recovery outside in-house established limit but within method default criteria. |
| S10 | Surrogate recovery was outside of laboratory acceptance limit due to possible matrix interference. |
| R | RPD value outside acceptance criteria. Calculation is based on raw values. |
| M6 | Matrix spike analyte was diluted out. |
| M2 | Matrix spike recovery outside of acceptance limit due to possible matrix interference. The analytical batch was validated by the laboratory control sample. |
| M10 | Matrix spike recovery outside in-house established limits but within method criteria. |
| M1 | Matrix spike recovery outside of acceptance limit. The analytical batch was validated by the laboratory control sample. |
| L5 | Laboratory Control Sample high biased. Sample result/s was non-detect (ND) for the target analyte; therefore reanalysis was not necessary. |
| L3 | Laboratory control sample outside in-house established limits but within method criteria. |
| D10 | Sample required dilution due to dark sample |
| B3 | Analyte is detected in the associated method blank, but the analyte is at least 10x greater in the sample. Therefore, reanalysis is not necessary. |
| ND | Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL) |
| PQL | Practical Quantitation Limit |
| MDL | Method Detection Limit |
| NR | Not Reported |
| RPD | Relative Percent Difference |
| CA2 | CA-ELAP (CDPH) |
| OR1 | OR-NELAP (OSPHL) |

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of Title 40 of the Code of Federal Regulations, Part 312, (40 CFR 312). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 EXECUTIVE SUMMARY

Stantec Consulting Services Inc. (Stantec) has completed a Phase I Environmental Site Assessment (ESA) report of the property proposed for development with solar infrastructure that will support the IP Darden I, LLC photovoltaic facility proposed near the census designated place known as Cantua Creek in Fresno County, California (the “Subject Property”), on behalf of IP Darden I, LLC (the “Client”). The work was performed according to Stantec’s proposal dated March 2, 2023, and the statement of work (SOW) issued by IP Darden I, LLC on March 29, 2023 in accordance with the Master Services Agreement (MSA) dated April 12, 2022. IP Darden I, LLC (the “User”) have been designated as the User of this report. The intended use of this Phase I ESA is for due diligence in support of the developing the parcels with renewable energy infrastructure.

The Phase I ESA was conducted in conformance with the requirements of ASTM International (ASTM) Designation E2247-16 Phase I Environmental Site Assessment Process for Forestland or Rural Property, and All Appropriate Inquiry (AAI) as defined by the US-EPA in Title 40 of the Code of Federal Regulations, Part 312, except as may have been modified by the scope of work, and terms and conditions, requested by the Client. Any exceptions to, or deletions from, the ASTM or AAI practice are described in Section 2.3.

The Subject Property is in a rural farming community and large portions of the Subject Property are inaccessible by vehicle due to an overgrowth of vegetation, and soft muddy soils. Therefore, certain areas with no vehicular access had to be traversed by foot. As a result, Stantec made a concerted effort to traverse specific areas (i.e. areas with signs of surface disturbance, or illustrations marked on topographic maps) by foot to obtain a general understanding of Subject Property conditions. However, it should be noted that not all areas were traversed due to the Subject Property size, time, and project constraints. Additionally, the proposed high voltage generation tie (“gen-tie”) line and medium voltage (“MV”) collector line alignments will be easements. Therefore, only the areas within the easements and adjacent to the easements were evaluated since the entire parcels they are within are not proposed for acquisition.

The Subject Property is proposed for development with supporting solar infrastructure that includes an alternate battery energy storage system (BESS) site, a switchyard substation, high voltage generation tie (“gen-tie”) line easement, and medium voltage (“MV”) collector line easement. The alternate BESS site and switchyard substation consists of five contiguous parcels comprising approximately 313-acres. The proposed gen-tie and medium voltage collector line easements are approximately 14 miles and 4.5 miles, respectively, and range from approximately 300 to 800 feet wide, as shown on **Figure 2**. The Subject Property is located north and west of Mount Whitney Avenue from approximately 4.25 miles northwest of State Route-145 (SR-145) and extending approximately 1.25 miles west of Interstate-5 (I-5), near Cantua Creek in Fresno County, California (**Figure 1**). At present, the Subject Property parcels and proposed easements are primarily undeveloped land that were formerly used for agricultural purposes (row crops and almond trees). A list of assessor parcel numbers (APNs) for the BESS and substation switchyard

Executive Summary

parcels, and parcels where easements will need to be procured for the proposed gen-tie and MV collector line is attached in **Appendix F**.

Structures onsite are limited to small slabs where water well pumps, fertilizer mixing tanks, sediment tanks, and other irrigation equipment is located. Dirt roadways generally trend east-west or north-south along the parcel boundaries. Shallow (~3 foot deep) irrigation canals are located along parcel boundaries at various locations throughout the Subject Property. Overhead electrical lines were also observed along the north side of Harlan Avenue.

The surrounding parcels in all directions are current or former agricultural land (row crops). Residences, agricultural storage yards, miscellaneous agricultural and irrigation equipment was also observed on these surrounding agricultural properties. The Subject Property boundary is shown on **Figure 1**. Subject Property detail is depicted on **Figure 2**.

Subject Property and Regional History

Stantec's review of historical aerial photographs found that the Subject Property has been used for agricultural purposes (row crop and grain) since at least 1940. Oil exploration (well drilling) occurred in the vicinity of the Subject Property from the late 1930s through the 1980s. However, no active, inactive, or abandoned oil or gas wells were identified as being within the Subject Property boundaries.

Given the historical agricultural use on the Subject Property, Stantec performed shallow soil sampling from 0.5 to 1.0-foot bgs at thirty (30) locations across the Subject Property on April 10, 2023. Sample locations HA1 through HA30 were distributed throughout the proposed gen-tie corridor, MV collector corridor, and proposed BESS and switchyard parcels. Soil samples were collected from a depth of 0.5 to 1.0 feet below ground surface (bgs). All soil samples were collected in glass jars and delivered to Jones Environmental, Inc (JEI) for analysis of organochlorine pesticides (OCPs) by EPA Method 8081A, and total arsenic and lead by EPA Method 6010B. In addition, approximately 25% of the collected samples were analyzed for selenium by EPA Method 6010B due to concerns related to selenium build up in soils from poor drainage in the region.

Analysis of the samples reported detectable concentrations of the OCPs 4,4'- DDE and 4,4'-DDT ranging from 0.0123 to 0.464 mg/kg and 0.0152 and 0.0618 mg/kg, respectively. Lead ranged from 2.3 to 9.3 mg/kg. Selenium was not detected above the laboratory reporting limit (i.e. the results were "non-detect") in any of the samples analyzed. Therefore, no OCP, lead, or selenium concentrations exceeded commercial use screening levels or California hazardous waste levels.

Arsenic was detected above human health screening levels and slightly above background levels at concentrations that ranged from 5.3 to 9.0 mg/kg (see Table 2). The detected arsenic concentrations are within the range considered to be naturally occurring in California, typically between 0.6 and 12.0 mg/kg (DTSC, 2020). No further investigation is recommended with regarding to agricultural use of the Subject Property.

The following items of note were identified during this ESA:

PHASE I ENVIRONMENTAL SITE ASSESSMENT AND LIMITED SOIL SAMPLING

Executive Summary

- **Irrigation/Water Wells:** Water wells were observed at the Subject Property during the field reconnaissance. Stantec recommends that the wells be abandoned under permit from Fresno County Department of Public Health (FCDPH) in accordance with the California Well Standards Ordinance as stated in Bulletin 74-81, unless the wells will be used by the proposed development. It is recommended that information/documentation on the location, status, and depth of the wells be obtained so that a plan can be developed with regard to use or destruction of the wells.
- **Oil-Stained Soil:** Small aboveground storage tanks (ASTs) containing oil were observed through the Subject Property and that are related to the irrigation well pumps. Minor soil staining that appeared to be from parked vehicles was observed in a few areas near the irrigation well sites but was limited to topsoil and were roughly 5 feet by 5 feet or less. This soil is considered de minimis given the minimal amount of staining.

However, significant oil staining was observed on two irrigation well pads. The first location was located along the MV collector line easement, located approximately ½ mile west of the intersection of Harlan Avenue and Colusa Avenue (see Appendix A, Photograph 5). The first location was located along the MV collector line easement, located approximately ½ mile west of the intersection of Harlan Avenue and Colusa Avenue (see Appendix A, Photograph 5). The second location was located along the gen-tie line easement, located at the northeast corner of the intersection of Harlan Avenue and Calaveras Avenue (see Appendix A, Photograph 14). If any of the proposed gen-tie structures/towers, or belowground collector lines are specifically planned to be constructed within these areas (i.e. where stained soil was located around well pumps) and the lines cannot be rerouted to avoid these areas, Stantec would recommend that soil samples be collected and evaluated for potential contaminants of concern above commercial use screening levels.

- **Adjacent Property Use:** Vista Verde Farms is located at the corner of Harlan Avenue and Stanislaus Avenue. This facility is listed in the hazardous waste tracking system (HWTS) database from 1998 through 2002. There are no reported releases associated with this property. However, during the field reconnaissance a large poly AST and numerous used 50-gallon poly drums are located in a pile at this facility that are located within the proposed gen-tie easement provided to Stantec. Since the proposed gen-tie lines are aboveground, no further investigation is recommended. However, in the event that the gen-tie line plans call for an underground component in this area, soil sampling would be recommended on APN 045-080-49S to evaluate whether contaminants of concern are present in soil above commercial use screening levels. Likewise, if procurement of this parcel is required, or if development plans call for any structures or towers within this parcel, soil sampling would be recommended.
- **Declaration of Restrictive Covenant (Non-irrigation Covenant):** Preliminary title reports were provided to Stantec by the User. A review of the preliminary title reports identified no environmental liens or activity use limitations related to contamination at the Subject Property. However, the preliminary title reports identified Instrument Nos. 2003-0189565 and 2004-0256340 that are a "Declaration of Restrictive Covenant (Non-irrigation Covenant)" recorded on August 15, 2003 and November 16, 2004 for the parcels owned by Westlands Water District (see

PHASE I ENVIRONMENTAL SITE ASSESSMENT AND LIMITED SOIL SAMPLING

Executive Summary

Appendix C, Preliminary Title Report). The covenant prohibits irrigation of the land and applies to the current owner and all subsequent owners.

The non-irrigation covenant is not considered a REC. However, additional evaluation to confirm which parcels are included in the covenant should be conducted if it is determined that the non-irrigation covenant will adversely affect the proposed developed of the Subject Property as a solar facility. Stantec also recommends that it be clarified as to whether application of water for dust control during development would be considered irrigating.

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E2247-16 of the Subject Property located in Cantua Creek, California, as shown on the attached figure set. Any exceptions to, or deletions from, this practice are described Section 2.3 of this report. This assessment has revealed no recognized environmental conditions (RECs), Controlled RECs (CRECs), and/or significant data gaps in connection with the Subject Property.

The preceding summary is intended for informational purposes only. Reading of the full body of this report is recommended.

Introduction

2.0 INTRODUCTION

The objective of this Phase I ESA was to perform All Appropriate Inquiry (AAI) into the past ownership and uses of the Subject Property consistent with good commercial or customary practice as outlined by ASTM International (ASTM) in “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”, Designation E2247-16. “All Appropriate Inquiry” (AAI) is the process for evaluating a property’s environmental conditions for the purpose of qualifying for landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), following final rule of Part 312 of Title 40, Code of Federal Regulations (40 CFR Part 312). The purpose of this Phase I ESA was to identify, to the extent feasible, adverse environmental conditions including recognized environmental conditions (“RECs”) of the Subject Property.

The ASTM E2247-16 standard indicates that the goal of the Phase I ESA is to identify RECs, including historical recognized environmental conditions (“HRECs”), and controlled recognized environmental conditions (“CRECs”) that may exist at a property. The term “recognized environmental conditions” means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property:

- 1) the presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* due to a *release* to the *environment*;
- 2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* due to a *release* or *likely release* to the *environment*; or
- 3) the presence of *hazardous substances* or *petroleum products* in, on, or at the *Subject Property* under conditions that pose a *material threat* of a future *release* to the *environment*.

ASTM defines a “HREC” as a REC that has occurred in connection with the Subject Property but has been addressed to the satisfaction of the applicable regulatory authority and meets current unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls). A HREC is not considered a REC.

ASTM defines a “CREC” as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls).

As defined by ASTM, RECs can include hazardous substances or petroleum products present under conditions in compliance with laws if that presence represents a material threat of future release. The release of hazardous substances or petroleum products is, however, not a REC if that presence is a *de minimis* condition. *De minimis* conditions are minor releases that generally do not present a material risk to human health and would not likely be subject to enforcement action if brought to the attention of governmental agencies. ASTM also considers the potential for a business environmental risk (BER),

PHASE I ENVIRONMENTAL SITE ASSESSMENT AND LIMITED SOIL SAMPLING

Introduction

defined as a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of the Subject Property, not necessarily limited to those environmental issues required to be investigated by the ASTM standard. Consideration of BERs may involve addressing one or more ASTM non-scope considerations.

This Phase I ESA was conducted in accordance with our proposal to IP Darden I, LLC dated March 2, 2023 and Client's authorization on March 29, 2023. The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Subject Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Subject Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform an independent evaluation of the purchase or lease price of the Subject Property and its relationship to current fair market value. The conclusions presented in this Phase I ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E2247-16 notes that the availability of record information varies from source to source. The User or Environmental Professional (EP) is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

1. Information that is publicly available;
2. Information that is obtainable from its source within reasonable time and cost constraints; and
3. Information that is practicably reviewable.

2.1 SUBJECT PROPERTY DESCRIPTION

The Subject Property is proposed for development with supporting solar infrastructure that includes an alternate battery energy storage system (BESS) site, a switchyard substation, high voltage generation tie ("gen-tie") line easement, and medium voltage ("MV") collector line easement. The alternate BESS site and switchyard substation consists of five contiguous parcels comprising approximately 313-acres. The proposed gen-tie and medium voltage collector line easements are approximately 14 miles and 4.5 miles, respectively, and range from approximately 300 to 800 feet wide, as shown on **Figure 2**. The Subject Property is located north and west of Mount Whitney Avenue from approximately 4.25 miles northwest of State Route-145 (SR-145) and extending approximately 1.25 miles west of Interstate-5 (I-5), near Cantua Creek in Fresno County, California (**Figure 1**). At present, the Subject Property parcels and proposed easements are primarily undeveloped land that were formerly used for agricultural purposes (row crops and almond trees). A list of BESS and substation switchyard parcels, and parcels where easements will need to be procured for the proposed gen-tie and MV collector line is attached in **Appendix F**.

PHASE I ENVIRONMENTAL SITE ASSESSMENT AND LIMITED SOIL SAMPLING

Introduction

Due to the lack of unpaved roads to all areas of the Subject Property, vehicular access was limited to the main graded dirt roads. As a result, portions of the Subject Property had to be traversed by foot. Stantec traversed transects across the Subject Property to obtain a general understanding of Subject Property conditions and also specifically visited locations where developed features or land disturbance was discernable on aerial photographs. It should be noted that not all areas were traversed due to the Subject Property size, time, and project constraints (limited roadways). The surrounding parcels in all directions are current or former agricultural land (row crops). Residences, agricultural storage yards, miscellaneous agricultural and irrigation equipment was also observed on these surrounding agricultural properties. The Subject Property boundary is shown on **Figure 1**. Subject Property detail is depicted on **Figure 2**. Photographs taken during the site reconnaissance visit are provided in **Appendix A**.

2.2 SPECIAL TERMS, CONDITIONS, AND ADDITIONAL ASSUMPTIONS

There were no special terms, conditions, or additional assumptions associated with this Phase I ESA.

2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided and given the schedule and budget constraints established by the client. No other representations, warranties, or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential and actual liabilities and conditions associated with the Subject Property.

This report provides an evaluation of selected environmental conditions associated with the Subject Property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information received from others.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report and are based solely on the scope of work described in the report, the limited data available, and the results of the work. They are not a certification of the Subject Property's environmental condition.

The client did not provide or contract Stantec to provide recorded title records or search results for environmental liens or activity and use limitations encumbering the property or in connection with the Subject Property. Stantec was unable to obtain historical records that document the property history in 5-year intervals, and this resulted in data gaps. Although this represents data gaps, these data gaps are not considered to impact the EPs ability to identify RECs unless stated as such. Based on the information obtained during the course of this ESA, history records obtained at least once per decade beginning in the 1940s, and general knowledge of development at and near the Subject Property, the absence of this information did not affect the ability of the EPs to identify RECs, HRECs, CRECs, or *de minimis* conditions.

PHASE I ENVIRONMENTAL SITE ASSESSMENT AND LIMITED SOIL SAMPLING

Introduction

This report has been prepared for the exclusive use of the client identified herein and any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities, or claims, howsoever arising, from third party use of this report.

Project Specific limiting conditions are provided in Section 2.2.

The conclusions are based on the conditions encountered at the Subject Property by Stantec at the time the work was conducted.

As the purpose of this report is to identify Subject Property conditions which may pose an environmental risk; the identification of non-environmental risks to structures or people on the Subject Property is beyond the scope of this assessment.

The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the Subject Property which is the subject of this report with any Federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations, or policies of Federal, state, provincial or local governmental agencies. It is recommended that issues raised by the report should be reviewed for the client by its legal counsel.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change.

2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an EP. The credentials of the EP and other key Stantec personnel involved in conducting this Phase I ESA are provided in Appendix B.

User-Provided Information

3.0 USER-PROVIDED INFORMATION

ASTM E2247-16 describe responsibilities of the User to complete certain tasks in connection with the performance of “All Appropriate Inquiries” into the Subject Property. The ASTM standard requires that the EP request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Subject Property. Towards that end, Stantec requested that the User provide the following documents and information:

| Description of Information | Description and/or Key Findings |
|--|--|
| User Questionnaire and/or Interview | The questionnaire was completed by Mr. Seth Israel, Vice President of Land Acquisition with Intersect Power. |
| Environmental Liens or Activity and Use Limitations (AUL) | The User responded that he knows of no environmental liens or activity use limitations for the Subject Property. |
| Previous Environmental Permits or Reports Provided by User | There are no environmental reports for the Subject Property. |
| Purpose of the Phase I ESA | Due diligence for property transaction |

Stantec forwarded the ASTM recommended User Questionnaires to Mr. Seth Israel, Vice President of Land Acquisition with Intersect Power. In the complete questionnaire, Mr. Israel reported that he did not have any knowledge regarding the environmental condition of the Subject Property. He indicated that the purchase price being paid for the property reasonably reflects the fair market value and does not include any reductions in the purchase price due to any potential contamination. The completed User Questionnaires were returned to us, signed by Mr. Israel, and dated May 3, 2023 is included in Appendix C.

Records Review

4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Subject Property and surrounding area and evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Subject Property. During the review of historical records, Stantec attempted to identify uses of the Subject Property from the present to the first developed use of the Subject Property. Stantec’s research included the reasonably ascertainable and useful records described in this section.

4.1 PHYSICAL SETTING

A summary of the physical setting of the Subject Property is provided in the table below with additional details in the following subsections

| | |
|---|--|
| <p>Topography:</p> | <p>The Subject Property is generally flat, and the surface topography slopes gently to the northeast. The surface elevations ranges from a high of approximately 635 feet above mean sea level in the southwest portion (APN: 045-160-24) to a low of approximately 205 feet in the northeast portion of the MV collector line easement.</p> |
| <p>Soil/Bedrock Data:</p> | <p>The Subject Property is located within the Great Valley Geomorphic Province. The stratigraphy underlying the Subject Property and the vicinity consists of recent-age alluvium consisting of fan and basin deposits (California Department of Mines and Geology [CDMG], 1958).</p> |
| <p>Estimated Depth to Groundwater/ Estimated Direction of Gradient:</p> | <p>Groundwater monitoring data for the Subject Property was not reasonably ascertainable. However, based on information provided in a 2021 Biennial Groundwater Monitoring Report for a property located 4.5 miles to the northeast, groundwater historically ranged between 110 and 130 feet below ground surface (bgs) but wells installed within this zone have recently been found to be dry. Groundwater depths in deeper screening wells indicate that groundwater water levels, as of March 2021, were measured between 170 and 189 feet bgs (Simplot, 2021). Based on the California Department of Water Resources (DWR) Lines of Equal Elevation of Water in Wells, San Joaquin Valley, (Spring 2010) the groundwater flow direction is to the north-northeast but may vary based on local groundwater pumping.</p> |
| <p>NOTE: Site-specific groundwater flow direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.</p> | |

PHASE I ENVIRONMENTAL SITE ASSESSMENT AND LIMITED SOIL SAMPLING

Records Review

4.1.1 Subject Property Topography and Surface Water Flow

Based on United States Geological Survey (USGS) 7.5-minute topographic maps, the Subject Property gradually slopes east/northeast; surface water on the Subject Property is expected to infiltrate into the ground surface or flows overland following the surface topography which slopes gently to the northeast. The surface elevations ranges from a high of approximately 635 feet above mean sea level in the southwest portion (APN: 045-160-24) to a low of approximately 205 feet in the northeast portion of the MV collector line easement. Surface water drainage appears to occur as sheet flow across the Subject Property to canals and stormwater retention basins that were observed. No evidence of improper discharge from the Subject Property was observed during Stantec's field reconnaissance.

The nearest water body is the California Aqueduct which crosses the central portion of the gen-tie easement, approximately 3 miles west of Sonoma Avenue.

4.1.2 Regional and Subject Property Geology

The area is located within the Great Valley Geomorphic Province, which is a large alluvial plain between the highlands of the Sierra Nevada mountain range and Coast Ranges into which sediments have been deposited since the Jurassic (California Geological Survey [CGS], 2002). The stratigraphy underlying the Subject Property and the vicinity consists of recent-age alluvium consisting of fan and basin deposits (CDMG, 1958).

The Subject Property, as is most of California, is located in a seismically active area. The nearest active fault is the Nunez Fault, located approximately 23 miles south of the Site (CDMG, 1994). The Nunez Fault is part of an Alquist Priolo Special Studies Zone (CDMG, 2002b). The San Andreas Fault is located approximately 34 miles southwest of the Site (CGS, 2011). The Site is not located within an Alquist Priolo Special Studies Zone (CDMG, 2002b).

4.1.3 Regional and Subject Property Hydrogeology

The Subject Property is located within the Westside subbasin (5-22.09) of the San Joaquin Valley Groundwater Basin (CDWR, 2013). The Westside subbasin comprises approximately 1,000 square miles underlying portions of Fresno and Kings Counties. Groundwater monitoring data for the Subject Property was not reasonably ascertainable. Depth to groundwater information for the "Helm Facility" 12688 South Colorado Avenue in Helm, California approximately 4.5 miles to the northeast was provided in a groundwater monitoring report prepared by Simplot. Based on information provided in Simplot's 2021 Biennial Groundwater Monitoring Report, groundwater historically ranged between 110 and 130 feet below ground surface (bgs) but wells installed within this zone have recently been found to be dry. Groundwater depths in deeper screening wells indicate that groundwater water levels, as of March 2021, were measured between 170 and 189 feet bgs.

Based on the California Department of Water Resources (DWR) Lines of Equal Elevation of Water in Wells, San Joaquin Valley, (Spring 2010) the groundwater flow direction is to the north-northeast but may vary based on local groundwater pumping.

Records Review

4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from Environmental Data Resources Inc. (EDR), a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in Appendix D.

Stantec evaluated the information listed within the database relative to potential impact to the Subject Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Subject Property. As described in 4.1.3, the inferred shallow groundwater flow direction is likely to be in the north-northeast. Observations about the Subject Property and adjoining properties made during the Subject Property reconnaissance are provided in more detail in Section 5.

4.2.1 Listings for Subject Property

The Subject Property was not identified in the environmental database report.

4.2.2 Listings for Adjoining and Nearby Sites with Potential to Impact Subject Property

| Listed Facility Name/Address | Database Listing | Distance/Direction from Subject Property | REC? (YES / NO) |
|--|--|--|-----------------|
| J Clausen Farms Inc 24465 W Cerini Cantua Creek, CA | SWEEPS UST, HIST UST, HAZNET, HWTS | 1 mile north of gen-tie | No |
| The EDR database incorrectly lists this facility as being on the Subject Property. However, the listed facility is actually one mile north of the proposed gen-tie corridor. The facility is reported as having historically had a 550-gallon unleaded gasoline UST. There are no releases associated with this facility and the Subject property is 1,500 feet from the nearest developed features where the UST would have most likely been located. As a result, this facility is considered unlikely to have environmentally impacted the Subject Property and no further assessment is recommended. | | | |
| Silver Creek Farming 24471 W Cerini Cantua Creek, CA | RCRA NonGen/NLR, FINDS, ECHO | 3/4 mile north of proposed MV collector line | No |
| The EDR database incorrectly lists this facility as being on the Subject Property and is actually ¾ mile to the north of the proposed MV collector line easement. The referenced databases do not indicate any releases or the potential for contamination. As a result, this facility is considered unlikely to have environmentally impacted the Subject Property and no further assessment is recommended. | | | |

| Vista Verde Farms Corner of Harlan Avenue and Stanislaus Avenue, Five Points, CA | HWTS | Proposed gen-tie easement overlaps the northwest corner of this property | No |
| This facility is listed in the hazardous waste tracking system (HWTS) database from 1998 through 2002. There are no reported releases associated with this property. However, as discussed in Section 5.0, during the field reconnaissance a large poly AST and numerous used 50-gallon poly drums are located in a pile at this facility that are located within the proposed gen-tie easement provided to Stantec. Since the proposed gen-tie lines are aboveground, no further investigation is recommended. However, in the event that the gen-tie line plans call for an underground component in this area, soil sampling would be recommended on APN 045-080-49S to evaluate whether contaminants of concern are present in soil above commercial use screening levels. Likewise, if procurement of this parcel is required, or if development plans call for any structures or towers within this parcel, soil sampling would be recommended. | | | |

4.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Subject Property use and/or indications of RECs in connection with the Subject Property:

4.3.1 State Departments

| Regional Water Quality Control Board (RWQCB), Central Valley Region 1685 "E" Street Fresno, CA 93706-2007 Phone: (559) 445-5116 | There are no known addresses in connection with the Subject Property that could be submitted in a public records request. However, Stantec searched available documentation through the State Water Resources Control Board's Geotracker website (http://geotracker.swrcb.ca.gov) for the Subject Property and surrounding areas. No environmental cases or land disposal sites were identified for the Subject Property or adjacent properties. |

| Department of Toxic Substances Control 8800 Cal Center Drive Sacramento, CA 95826 Phone: (916) 255-6679 Website: http://www.envirostor.dtsc.ca.gov/public | Stantec searched the DTSC Envirostor website for the Subject Property and the surrounding area within one mile of the Subject Property boundaries. No environmental cases or were identified for the Subject Property or adjacent properties. |
| California Geologic Energy Management Division (CalGEM) Well Finder Database Website: http://www.conservation.ca.gov | Stantec reviewed the Well Finder provided on the Geologic Energy Management Division (CalGEM) website in an effort to evaluate if there are any known oil, gas, or geothermal wells in the Subject Property vicinity. The gen-tie easement passes through the administrative boundaries of the Cantua Creek and Turk Anticline oil fields. However, according to the Well Finder and documents obtained for nearby wells, there are no oil wells within the Subject Property boundary. The nearest oil well is a plugged and abandoned dry hole known as Giffen, Inc "67". This well is located approximate 300 feet north of the gen-tie easement, approximately 2,000 feet west of the California aqueduct. Based on these result, oil wells are not considered an environmental concern to the Subject Property. |

| Fresno County Citizen's Portal Environmental Health and Public Works https://www.co.fresno.ca.us/departments/public-works-and-planning/citizens-portal | Public records were research by APN on the Fresno County website which files permits by agency (i.e. building, public work, etc). The parcels researched included the five parcels where the substation switchyard and BESS are proposed. The research performed by Stantec found the following permit was issued for the Subject Property parcels: <ul style="list-style-type: none"> • Water well permit issued on October 16, 2000 at APN: 045-160-24S) No other records were found for the Subject Property parcels. |

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

Land title records, deeds, environmental liens, and activity and use limitation documentation was not provided by the User. However, the Subject Property was not listed in the LIENS, LIENS 2, or DEED databases in EDR database report dated September 5, 2022.

Additionally, preliminary title reports were provided to Stantec by the User. A review of the preliminary title reports identified no environmental liens or activity use limitations related to contamination at the Subject Property. However, the preliminary title reports identified Instrument Nos. 2003-0189565, 2004-0256340, and 2006-0266516 that are a “Declaration of Restrictive Covenant (Non-irrigation Covenant)” recorded on August 15, 2003, November 16, 2004, and December 21, 2006 for the parcels owned by Westlands Water District (see Appendix C, Preliminary Title Report). The covenant prohibits irrigation of the land and applies to the current owner and all subsequent owners.

The non-irrigation covenant is not considered a REC. However, additional evaluation to confirm which parcels are included in the covenant should be conducted if it is determined that the non-irrigation covenant will adversely affect the proposed developed of the Subject Property as a solar facility. Stantec also recommends that it be clarified as to whether application of water for dust control during development would be considered irrigating.

Other information listed in the preliminary title reports were related to legal description of the parcels, utility or roadway easements, land conservation contracts, and mineral/oil rights.

The preliminary title reports are provided in **Appendix C**.

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by Environmental Data Resources, Inc. (EDR). The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs.

| Year | Observations, Subject Property, and Adjoining Properties |
|------|--|
| 1940 | The Subject Property is a mix of parcels used for agricultural crops (various row crops and grain) and undeveloped fields. A small circular feature is observable in a field adjacent to the MV collector line that is at the northwest corner of Yuba Avenue and Harlan Avenue. A cleared area of land with several small, undiscernible features (potential buildings or vehicles) are located at the northwest and northeast corners of Harlan Avenue and Sonoma Avenue where the gen-tie line easement is proposed. Irrigation canals are also observable along Harlan Avenue and in the fields adjacent to the Subject Property. Cantua Creek crosses the proposed gen-tie easement east of San Mateo Avenue. |

PHASE I ENVIRONMENTAL SITE ASSESSMENT AND LIMITED SOIL SAMPLING

Records Review

| Year | Observations, Subject Property, and Adjoining Properties |
|------------------|--|
| | Surrounding properties appear to also be used for agricultural operations (row crops and grain) or undeveloped fields. |
| 1955 | Additional parcels throughout the Subject Property appear to be used for cultivation of row crops. The circular feature at the northwest corner of Yuba Avenue and Harlan Avenue and cleared area of land at the northwest and northeast corners of Harlan Avenue and Sonoma Avenue are no longer present. However, there are two new areas of cleared land adjacent to the north side of Harlan Avenue, one to the east of El Dorado Ave and the other to the east of Stanislaus Avenue. The location near Stanislaus Avenue corresponds with the location of a present-day water pump station and ponding basin. |
| 1960 | The Subject Property and surrounding properties appear similar to the previous photographs except that a power line easement has been constructed that crosses over the west end of the proposed gen-tie easement. |
| 1971 | A cleared area of land with indiscernible features (potential buildings or vehicles) are located at the northeast corners of Harlan Avenue and Colusa Avenue where the MV Collector Line easement is proposed. The California Aqueduct appears to be under construction at its current location crossing the central portion of the Subject Property. The water pump station immediately to the east of the aqueduct is visible within the proposed gen-tie easement. Interstate-5 has been developed and crosses through the west portion of the proposed gen-tie easement. Surrounding properties appear similar to the previous photographs. |
| 1978 | Approximately 95% of the Subject Property is used for agriculture (row crops and grain). The California Aqueduct has been completed and is in use. The remainder of the Subject Property and surrounding properties appear similar to the previous photographs. |
| 1981 | The ponding basin and pump station at the northeast corner of Harlan Avenue and Stanislaus Avenue appears similar to its present-day configuration. Surrounding properties appear similar to the previous photographs except that a power line easement crosses through the southwest portion of the Subject Property. |
| 1994 | The irrigation well site and yard that is along the MV Collector line easement where staining was observed has been constructed. Vista Verde Farms has also been developed adjacent to, and partially overlapping with the Subject Property. The remainder of the Subject Property and surrounding properties appear similar to the previous photographs. |
| 2005 | The irrigation well site and yard that is along the proposed gen-tie easement at Harlan Avenue and Calaveras Avenue, where staining was observed, has been constructed. Nunes Cooling has been developed adjacent to the proposed gen-tie an I-5. The remainder of the Subject Property and surrounding properties appear similar to the previous photographs. |
| 2009, 2012, 2016 | Additional irrigation well sites are visible within the proposed gen-tie easement along the north side of Harlan Avenue that were not visible in previous photographs. The remainder of the Subject Property and surrounding properties appear similar to the previous photographs. |

4.4.3 City Directories

There are no addresses for the subject Property parcels, but historical city directories were requested for properties along Harlan Avenue and Derrick Avenue. Directories were available between 1975 and 2020 and included various farms, residences, a store, and a café. No RECs, CRECs, or HRECs were identified as a result of S review of historical city directories.

4.4.4 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Subject Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Subject Property uses.

Due to the Subject Property and surrounding areas being vacant, historical fire insurance maps are not available.

4.4.5 Historical Topographic Maps

Stantec reviewed historical topographic maps of the area to help identify past Subject Property usage and areas of potential environmental concern.

No RECs were noted during our review of the topographic maps. Copies of the historical maps are provided in Appendix E. The following table summarizes the maps reviewed and our observations.

| Year | Scale | Observations, Property, and Adjoining Properties |
|------|-----------|---|
| 1912 | 1:125,000 | The Subject Property and surrounding properties are shown but there are no specific uses illustrated other than dirt roads in the vicinity. Cantua Creek is also labeled in the western portion of the map. |
| 1943 | 1:31,680 | The Subject Property and surrounding properties to the west of Sonoma Avenue are shown but there are no specific uses illustrated. |
| 1950 | 1:24,000 | The Subject Property and surrounding properties to the east of Sonoma Avenue are shown but there are no specific uses illustrated. |
| 1956 | 1:24,000 | The 1956 map shows the Subject Property as undeveloped but illustrations of water wells, oil and gas wells, a water reservoir are depicted along Harlan Avenue. None of the oil and gas wells appear to be within the Subject Property boundaries. A power line easement crosses the western portion of the Subject Property. |

Site Reconnaissance

5.0 SITE RECONNAISSANCE

A visit to the Subject Property and its vicinity was conducted by Mr. Michael Myers, Senior Scientist with Stantec, on April 11, 2023. Access to the Subject Property coordinated through Intersect Power. Stantec was unaccompanied during the field reconnaissance. **Figure 2** provides information about the Subject Property and adjoining sites and the location of potential areas of environmental concern. Detailed Subject Property features are provided on **Figure 2**. Photographs collected during the site reconnaissance are included in **Appendix A**.

5.1 SUBJECT PROPERTY RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Subject Property that may indicate the presence of RECs. The reconnaissance of the Subject Property was conducted entirely on foot following ASTM Practice E2247 for large tracts of undeveloped land and/or rural properties. Stantec utilized the following methodology to observe the Subject Property:

- Traverse portion of the outer Subject Property boundary
- Traverse transects across the Subject Property

Weather conditions during the visit to the Subject Property were clear and sunny. There were no weather-related Subject Property access restrictions encountered during the reconnaissance visit. Field notes taken during the Subject Property reconnaissance are included in Appendix G.

5.2 GENERAL DESCRIPTION

| | |
|--|--|
| <p>Subject Property and Area Description:</p> | <p>The Subject Property is proposed for development with supporting solar infrastructure that includes an alternate battery energy storage system (BESS) site, a switchyard substation, high voltage generation tie (“gen-tie”) line easement, and medium voltage (“MV”) collector line easement. The alternate BESS site and switchyard substation consists of five contiguous parcels comprising approximately 313-acres. The proposed gen-tie and medium voltage collector line easements are approximately 14 miles and 4.5 miles, respectively, and range from approximately 300 to 800 feet wide, as shown on Figure 2.</p> <p>The surrounding parcels in all directions are current or former agricultural land (row crops). Residences, agricultural storage yards, miscellaneous agricultural and irrigation equipment was also observed on these surrounding agricultural properties. Photographs taken during the site reconnaissance visit are provided in Appendix A.</p> |
|--|--|

PHASE I ENVIRONMENTAL SITE ASSESSMENT AND LIMITED SOIL SAMPLING

Site Reconnaissance

| | |
|--|---|
| Subject Property Operations: | The Subject Property parcels and easement areas are agricultural land consisting of fallow fields, or actively cultivated for various crops such as almonds, cotton, leaks, wheat, onion, garlic, tomato, and alfalfa. The Subject Property parcels currently has various owners, as listed in the table provided as Appendix F . |
| Structures, Roads, Other Improvements: | Structures onsite are limited to small slabs where water well pumps, fertilizer mixing tanks, sediment tanks, and other irrigation equipment is located. Dirt roadways generally trend east-west or north-south along the parcel boundaries. Shallow (~3 foot deep) irrigation canals are located along parcel boundaries at various locations throughout the Subject Property. Overhead electrical lines were also observed along the north side of Harlan Avenue. |
| Subject Property Size (acres): | Approximately 313-acres plus proposed gen-tie and medium voltage collector line easements that are approximately 14 miles and 4.5 miles long, respectively, and range from approximately 300 to 800 feet wide. |
| Estimated % of Subject Property Covered by Buildings and/or Pavement: | Less than 1% |
| Observed Current Subject Property Use/Operations: | Primarily vacant land with no use with the exception of the aforementioned agricultural operations. |
| Observed Evidence of Past Subject Property Use(s): | Agriculture – fallow fields, or actively cultivated for various crops such as almonds, cotton, leaks, wheat, onion, garlic, tomato, and alfalfa |
| Sewage Disposal Method (and age): | There is no indication of sewage disposal methods at the Subject Property. |
| Potable Water Source: | Onsite irrigation/water wells |
| Electric and Natural Gas Utilities: | Pacific Gas and Electric (PG&E) |

5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the Subject Property reconnaissance.

| Observations | Description/Location |
|--|--|
| Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14) with identified uses: | Petroleum products were observed associated with onsite irrigation well systems and included diesel fuel contained in small aboveground storage tanks (ASTs) mounted to mobile trailers, and oil contained in turbine well pumps. |
| Drums/Totes/Intermediate Bulk Containers (≥ 5 gallons): | A portion of the proposed gen-tie easement crosses through the corner of a commercial property near the southwest corner of Harlan Avenue and Stanislaus Avenue (APN 045-080-49S). The area of the commercial business that the easement crosses through is used as a storage yard. A large poly AST and numerous used 50-gallon poly drums are located in a pile within the proposed gen-tie easement. Since the proposed gen-tie lines are aboveground, no further |

| | <p>investigation is recommended. However, in the event that the gen-tie line plans call for an underground component in this area, soil sampling would be recommended on APN 045-080-49S to evaluate whether contaminants of concern are present in soil above commercial use screening levels. Likewise, if procurement of this parcel is required, or if development plans call for any structures or towers within this parcel, soil sampling would be recommended.</p> <p>Additionally, a 55-gallon steel drum was observed in the southern portion of proposed BESS, substation, and switchyard (see Figure 3). The drum was labeled as containing "fuel" and was in good with no evidence of a release/staining on the surrounding soil. The presence of the drum is considered de minimis.</p> |
| Strong, Pungent, or Noxious Odors: | None observed |
| Pools of Liquid: | None observed |
| Unidentified Substance Containers: | <p>Multiple large unlabeled poly ASTs were associated with onsite irrigation well systems. No staining or evidence of a spills/releases to the surrounding soils were observed and these ASTs are located in areas where the proposed gen-ties will be overhead. If any of the proposed gen-tie structures or towers are located specifically within these areas (i.e. areas where irrigation wells are located along the proposed gen-tie easement), Stantec would recommend that soil samples be collected and evaluated for potential contaminants of concern above commercial use screening levels.</p> |
| Polychlorinated biphenyl (PCB)-Containing Equipment: | Pole mounted transformers were observed adjacent to the gen-tie and collector line easements along Harlan Avenue. |
| Other Observed Evidence of Hazardous Substances or Petroleum Products: | A petroleum pipeline crosses the proposed gen-tie easement, west of Monterey Avenue. There are no known releases associated with the pipeline and the proposed gen-tie line is aboveground in this area. As a result, the petroleum pipeline is not considered a REC. |

5.4 INTERIOR OBSERVATIONS

There are no structures at the Subject Property and therefore no interior observations could be made.

5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the site reconnaissance of exterior areas of the Subject Property and/or identified the following information during the interview or records review portions of the assessment:

PHASE I ENVIRONMENTAL SITE ASSESSMENT AND LIMITED SOIL SAMPLING

Site Reconnaissance

| Observations | Description |
|--|--|
| On-site Pits, Ponds, or Lagoons: | Ponding basins in connection with irrigation wells were observed along gen-tie / collector line easements. |
| Stained Soil or Pavement: | <p>Minor soil staining that appeared to be from parked vehicles was observed in a few areas near the irrigation well sites but was limited to topsoil and were roughly 5 feet by 5 feet or less. This soil is considered de minimis given the minimal amount of staining.</p> <p>Significant staining was observed on two irrigation well pads. The first location was located along the MV collector line easement, located approximately ½ mile west of the intersection of Harlan Avenue and Colusa Avenue (see Appendix A, Photograph 5). The first location was located along the MV collector line easement, located approximately ½ mile west of the intersection of Harlan Avenue and Colusa Avenue (see Appendix A, Photograph 5). The second location was located along the gen-tie line easement, located at the northeast corner of the intersection of Harlan Avenue and Calaveras Avenue (see Appendix A, Photograph 14). If any of the proposed gen-tie structures/towers, or belowground collector lines are specifically planned to be constructed within these areas (i.e. where stained soil was located around well pumps) and the lines cannot be rerouted, Stantec would recommend that soil samples be collected and evaluated for potential contaminants of concern above commercial use screening levels.</p> |
| Stressed Vegetation: | None observed. |
| Waste Streams and Waste Collection Areas: | None observed. |
| Solid Waste Disposal: | None observed. |
| Potential Areas of Fill Placement: | None observed |
| Wastewater: | None observed |
| Stormwater: | None observed |
| Wells: | Numerous irrigation/water wells were observed on the Subject Property within the MV collector line and gen-tie line easements. Two irrigational wells were also observed in the proposed BESS and switchyard parcels – one in the southwest corner of APN 045-160-21S, and one in the southwest portion of APN 045-160-24S. |
| Septic Systems: | There was no evidence of septic systems at the Subject Property. |
| Other Exterior Observations: | None observed |

5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

| | |
|--------------------------------------|--|
| Existing USTs: | No visible evidence (fill pipes, vent pipes, dispensers, surface patches), reports, or other evidence of USTs was discovered during this Phase I ESA. |
| Former USTs: | No visible evidence (fill pipes, vent pipes, dispensers, surface patches), reports, or other evidence of the former presence of USTs was discovered during this Phase I ESA. |
| Other Underground Structures: | None observed |

5.7 ABOVEGROUND STORAGE TANKS

| | |
|-----------------------|---|
| Existing ASTs: | Multiple large unlabeled poly ASTs and water filtration ASTs were associated with onsite irrigation well systems. No staining or evidence of a spills/releases to the surrounding soils were observed and these ASTs are located in easement areas where the proposed gen-ties will be overhead. If any of the proposed gen-tie structures or towers are located specifically planned to be constructed within these areas (i.e. areas where irrigation wells are located along the proposed gen-tie easement), Stantec would recommend that soil samples be collected and evaluated for potential contaminants of concern above commercial use screening levels. |
| Former ASTs: | No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA. |

Interviews

6.0 INTERVIEWS

Stantec conducted interviews with the following individuals:

| Name, Contact Information, and Date of Interview | Relationship to Subject Property | Key findings: |
|--|---|--|
| Russ Freeman (559) 241-6241 rfreeman@westlandswater.org September 27, 2022 | General Manager of Resources for Westlands Water District (WWD) | <ul style="list-style-type: none"> • Familiar with the Subject Property since late 1990s/early 2000s • No known storage, spills, or releases of hazardous materials or petroleum hydrocarbons • Perched water occasionally at 15 to 25 feet bgs • Shallow aquifer levels depend on pumping in the region but generally vary between 120 and 150 feet bgs • Non-irrigation covenant restricts irrigation on WWD parcels. Irrigation does not include use of water for dust suppression during earthwork • No RECs |

6.1 FINDINGS FROM INTERVIEWS WITH SUBJECT PROPERTY OWNER

Stantec previously interviewed Mr. Russ Freeman of Westlands Water District (WWD) on September 27, 2022. Mr. Freeman has been familiar with the Subject Property since WWD acquired the parcels at various times between the late 1990s and early 2000s. Mr. Freeman was not aware of any storage, spills, or releases of hazardous materials or petroleum hydrocarbons at the Subject Property or surrounding properties. He indicated that there are several monitoring wells in the vicinity of the Subject Property that are installed at different depths. Some of the wells are to 25 feet bgs and were installed to monitor perched water levels which is sometimes present at depths between 15 and 25 feet bgs. Mr. Freeman indicated that deeper wells are installed in two aquifers and that the shallow aquifer fluctuates between approximately 120 and 150 feet bgs based on regional pumping.

Mr. Freeman also reported that there is a non-irrigation covenant recorded for several of the parcels that restricts irrigation (see Section 4.4.1). He mentioned that any new owner will have to record the same covenant after purchasing any parcels where a non-irrigation covenant is not already in place. According to Mr. Freeman, irrigation does not include use of water for dust suppression during earthwork activities for construction purposes.

PHASE I ENVIRONMENTAL SITE ASSESSMENT AND LIMITED SOIL SAMPLING

Interviews

With regard to current uses, Mr. Freeman indicated that occasional attempts are made to dry farm wheat on certain parcels but that the majority of the parcels are not being cultivated. He mentioned that no pesticides or herbicides are being used or stored onsite.

No RECs were identified as a result of Stantec' interview with Mr. Freeman.

No other parties were available for interview which represents a minor data gap. However, sufficient information has been obtained from other sources (historical records, field reconnaissance, ect) to the extent that this data gap is considered insignificant and unlikely to change the conclusions of this report.

limited phase ii soil sampling

7.0 LIMITED PHASE II SOIL SAMPLING

On April 10, 2023, Stantec collected soil samples from thirty (30) locations at the Subject Property. Sample locations HA1 through HA30 were distributed across the parcels and were collected from a depth of 0.5 to 1.0 feet below ground surface (bgs). All soil samples were collected in glass jars and delivered to Jones Environmental, Inc (JEI) for analysis of organochlorine pesticides (OCPs) by EPA Method 8081A, and total arsenic and lead by EPA Method 6010B. In addition, approximately 25% of the collected samples were analyzed for selenium by EPA Method 6010B due to concerns related to selenium build up in soils from poor drainage in the region. The analytical results for OCPs, total lead, and total selenium were compared to the more conservative commercial use screening level established by San Francisco Regional Water Quality Control Board (SFRWQCB) Environmental Screening Levels (ESLs) for direct exposure, and the United States Environmental Protection Agency (USEPA) Regional Screening Levels (RSLs). Arsenic concentrations were compared to those considered to be naturally occurring in California, typically between 0.6 and 12.0 mg/kg (DTSC, 2020).

Analysis of the samples reported detectable concentrations of the OCPs 4,4'-Dichlorodiphenyldichloroethylene (DDE) and 4,4'-Dichlorodiphenyltrichloroethane (DDT) ranging from 0.0123 to 0.464 mg/kg and 0.0152 and 0.0618 mg/kg, respectively. Lead ranged from 2.3 to 9.3 mg/kg. Selenium was not detected above the laboratory reporting limit (i.e. the results were "non-detect") in any of the samples analyzed. Therefore, no OCP, lead, or selenium concentrations exceeded commercial use screening levels or California hazardous waste levels.

Arsenic was detected above human health screening levels and slightly above background levels at concentrations that ranged from 5.3 to 9.0 mg/kg (see Table 2). The detected arsenic concentrations are within the range considered to be naturally occurring in California, typically between 0.6 and 12.0 mg/kg (DTSC, 2020). No further investigation is recommended with regarding to agricultural use of the Subject Property.

Evaluation

8.0 EVALUATION

This section provides a summary overview of or Findings, Opinions, and Conclusions.

8.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data, and an inspection was evaluated to determine if RECs are present in connection with the Subject Property. Based on this information, Stantec made the following findings and developed the following opinions.

- **Former agricultural use.** Stantec's review of historical aerial photographs found that the Subject Property has been used for agricultural purposes (row crop and grain) since at least 1940. Given the historical agricultural use on the Subject Property, Stantec performed shallow soil sampling from 0.5 to 1.0-foot bgs at thirty (30) locations across the Subject Property on April 10, 2023. Sample locations HA1 through HA30 were distributed throughout the proposed gen-tie corridor, MV collector corridor, and proposed BESS and switchyard parcels. Soil samples were collected from a depth of 0.5 to 1.0 feet below ground surface (bgs). All soil samples were collected in glass jars and delivered to Jones Environmental, Inc (JEI) for analysis of organochlorine pesticides (OCPs) by EPA Method 8081A, and total arsenic and lead by EPA Method 6010B. In addition, approximately 25% of the collected samples were analyzed for selenium by EPA Method 6010B due to concerns related to selenium build up in soils from poor drainage in the region.

Analysis of the samples reported detectable concentrations of the OCPs 4,4'-DDE and 4,4'-DDT ranging from 0.0123 to 0.464 mg/kg and 0.0152 and 0.0618 mg/kg, respectively. Lead ranged from 2.3 to 9.3 mg/kg. Selenium was not detected above the laboratory reporting limit (i.e. the results were "non-detect") in any of the samples analyzed. Therefore, no OCP, lead, or selenium concentrations exceeded commercial use screening levels or California hazardous waste levels.

Arsenic was detected above human health screening levels and slightly above background levels at concentrations that ranged from 5.3 to 9.0 mg/kg (see Table 2). The detected arsenic concentrations are within the range considered to be naturally occurring in California, typically between 0.6 and 12.0 mg/kg (DTSC, 2020). No further investigation is recommended with regarding to agricultural use of the Subject Property.

- **Irrigation/Water Wells:** Water wells were observed at the Subject Property during the field reconnaissance. Stantec recommends that the wells be abandoned under permit from Fresno County Department of Public Health (FCDPH) in accordance with the California Well Standards Ordinance as stated in Bulletin 74-81, unless the wells will be used by the proposed development. It is recommended that information/documentation on the location, status, and

PHASE I ENVIRONMENTAL SITE ASSESSMENT AND LIMITED SOIL SAMPLING

Evaluation

depth of the wells be obtained so that a plan can be developed with regard to use or destruction of the wells.

- **Oil-Stained Soil:** Small aboveground storage tanks (ASTs) containing oil were observed through the Subject Property and that are related to the irrigation well pumps. Minor soil staining that appeared to be from parked vehicles was observed in a few areas near the irrigation well sites but was limited to topsoil and were roughly 5 feet by 5 feet or less. This soil is considered de minimis given the minimal amount of staining.

However, significant oil staining was observed on two irrigation well pads. The first location was located along the MV collector line easement, located approximately ½ mile west of the intersection of Harlan Avenue and Colusa Avenue (see Appendix A, Photograph 5). The first location was located along the MV collector line easement, located approximately ½ mile west of the intersection of Harlan Avenue and Colusa Avenue (see Appendix A, Photograph 5). The second location was located along the gen-tie line easement, located at the northeast corner of the intersection of Harlan Avenue and Calaveras Avenue (see Appendix A, Photograph 14). If any of the proposed gen-tie structures/towers, or belowground collector lines are specifically planned to be constructed within these areas (i.e. where stained soil was located around well pumps) and the lines cannot be rerouted to avoid these areas, Stantec would recommend that soil samples be collected and evaluated for potential contaminants of concern above commercial use screening levels.

- **Adjacent Property Use:** Vista Verde Farms is located at the corner of Harlan Avenue and Stanislaus Avenue. This facility is listed in the hazardous waste tracking system (HWTS) database from 1998 through 2002. There are no reported releases associated with this property. However, during the field reconnaissance a large poly AST and numerous used 50-gallon poly drums are located in a pile at this facility that are located within the proposed gen-tie easement provided to Stantec. Since the proposed gen-tie lines are aboveground, no further investigation is recommended. However, in the event that the gen-tie line plans call for an underground component in this area, soil sampling would be recommended on APN 045-080-49S to evaluate whether contaminants of concern are present in soil above commercial use screening levels. Likewise, if procurement of this parcel is required, or if development plans call for any structures or towers within this parcel, soil sampling would be recommended.
- **Declaration of Restrictive Covenant (Non-irrigation Covenant):** Preliminary title reports were provided to Stantec by the User. A review of the preliminary title reports identified no environmental liens or activity use limitations related to contamination at the Subject Property. However, the preliminary title reports identified Instrument Nos. 2003-0189565 and 2004-0256340 that are a "Declaration of Restrictive Covenant (Non-irrigation Covenant)" recorded on August 15, 2003 and November 16, 2004 for the parcels owned by Westlands Water District (see Appendix C, Preliminary Title Report). The covenant prohibits irrigation of the land and applies to the current owner and all subsequent owners.

The non-irrigation covenant is not considered a REC. However, additional evaluation to confirm which parcels are included in the covenant should be conducted if it is determined that the non-irrigation covenant will adversely affect the proposed developed of the Subject Property as a solar

facility. Stantec also recommends that it be clarified as to whether application of water for dust control during development would be considered irrigating.

8.2 DATA GAPS

The federal AAI final rule [40 CFR 312.10(a)] and ASTM E1527-21 identify a “data gap” as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the EP or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

| Gap | Discussion |
|--|---|
| Deletions or Exceptions from Scope of Work Referenced in Section 1.4: | None |
| Weather-Related Restrictions to Site Reconnaissance: | None |
| Facility Access Restrictions to Site Reconnaissance: | None |
| Other Site Reconnaissance Restrictions: | Due to the lack of roads to all areas of the Subject Property, vehicular access was limited to the main graded dirt roads. As a result, portions of the Subject Property had to be traversed by foot. Stantec traversed transects across the Subject Property to obtain a general understanding of Subject Property conditions and also specifically visited locations where developed features or land disturbance was discernable on aerial photographs. It should be noted that not all areas were traversed due to the Subject Property size, time, and project constraints (limited roadways). Additionally, the proposed high voltage generation tie (“gen-tie”) line and medium voltage (“MV”) collector line alignments will be easements. Therefore, only the areas within the easements and adjacent to the easements were evaluated since the entire parcels they are within are not proposed for acquisition. |
| Data Gaps from Environmental Records Review: | None |
| Data Gaps from Historical Records Review: | Certain historic aerial photographs were in poor resolution. However, the Subject Property was still generally visible and appeared as agricultural land. |
| Data Gaps from Interviews: | An interview was performed in 2022 with Mr. Russ Freeman of Westlands Water District (WWD) related to WWD owned parcels. No other parties were available for interview which represents a minor data gap. However, sufficient information has been obtained from other sources (historical records, field reconnaissance, ect) to the extent that this data gap is considered insignificant and unlikely to change the conclusions of this report. |
| Other Data Gaps: | None |

8.3 CONCLUSIONS

The Subject Property is proposed for development with supporting solar infrastructure that includes an alternate battery energy storage system (BESS) site, a switchyard substation, high voltage generation tie (“gen-tie”) line easement, and medium voltage (“MV”) collector line easement. The alternate BESS site and switchyard substation consists of five contiguous parcels comprising approximately 313-acres. The proposed gen-tie and medium voltage collector line easements are approximately 14 miles and 4.5 miles, respectively, and range from approximately 300 to 800 feet wide, as shown on **Figure 2**. The Subject Property is located north and west of Mount Whitney Avenue from approximately 4.25 miles northwest of State Route-145 (SR-145) and extending approximately 1.25 miles west of Interstate-5 (I-5), near Cantua Creek in Fresno County, California (**Figure 1**). At present, the Subject Property parcels and proposed easements are primarily undeveloped land that were formerly used for agricultural purposes (row crops and almond trees). A list of assessor parcel numbers (APNs) for the BESS and substation switchyard parcels, and parcels where easements will need to be procured for the proposed gen-tie and MV collector line is attached in **Appendix F**.

Structures onsite are limited to small slabs where water well pumps, fertilizer mixing tanks, sediment tanks, and other irrigation equipment is located. Dirt roadways generally trend east-west or north-south along the parcel boundaries. Shallow (~3 foot deep) irrigation canals are located along parcel boundaries at various locations throughout the Subject Property. Overhead electrical lines were also observed along the north side of Harlan Avenue.

The surrounding parcels in all directions are current or former agricultural land (row crops). Residences, agricultural storage yards, miscellaneous agricultural and irrigation equipment was also observed on these surrounding agricultural properties. The Subject Property boundary is shown on **Figure 1**. Subject Property detail is depicted on **Figure 2**.

Subject Property and Regional History

Stantec’s review of historical aerial photographs found that the Subject Property has been used for agricultural purposes (row crop and grain) since at least 1940. Oil exploration (well drilling) occurred in the vicinity of the Subject Property from the late 1930s through the 1980s. However, no active, inactive, or abandoned oil or gas wells were identified as being within the Subject Property boundaries.

Given the historical agricultural use on the Subject Property, Stantec performed shallow soil sampling from 0.5 to 1.0-foot bgs at thirty (30) locations across the Subject Property on April 10, 2023. Sample locations HA1 through HA30 were distributed throughout the proposed gen-tie corridor, MV collector corridor, and proposed BESS and switchyard parcels. Soil samples were collected from a depth of 0.5 to 1.0 feet below ground surface (bgs). All soil samples were collected in glass jars and delivered to Jones Environmental, Inc (JEI) for analysis of organochlorine pesticides (OCPs) by EPA Method 8081A, and total arsenic and lead by EPA Method 6010B. In addition, approximately 25% of the collected samples were analyzed for selenium by EPA Method 6010B due to concerns related to selenium build up in soils from poor drainage in the region.

PHASE I ENVIRONMENTAL SITE ASSESSMENT AND LIMITED SOIL SAMPLING

Evaluation

Analysis of the samples reported detectable concentrations of the OCPs 4,4'-DDE and 4,4'-DDT ranging from 0.0123 to 0.464 mg/kg and 0.0152 and 0.0618 mg/kg, respectively. Lead ranged from 2.3 to 9.3 mg/kg. Selenium was not detected above the laboratory reporting limit (i.e. the results were "non-detect") in any of the samples analyzed. Therefore, no OCP, lead, or selenium concentrations exceeded commercial use screening levels or California hazardous waste levels.

Arsenic was detected above human health screening levels and slightly above background levels at concentrations that ranged from 5.3 to 9.0 mg/kg (see Table 2). The detected arsenic concentrations are within the range considered to be naturally occurring in California, typically between 0.6 and 12.0 mg/kg (DTSC, 2020). No further investigation is recommended with regarding to agricultural use of the Subject Property.

The following items of note were identified during this ESA:

- **Irrigation/Water Wells:** Water wells were observed at the Subject Property during the field reconnaissance. Stantec recommends that the wells be abandoned under permit from Fresno County Department of Public Health (FCDPH) in accordance with the California Well Standards Ordinance as stated in Bulletin 74-81, unless the wells will be used by the proposed development. It is recommended that information/documentation on the location, status, and depth of the wells be obtained so that a plan can be developed with regard to use or destruction of the wells.
- **Oil-Stained Soil:** Small aboveground storage tanks (ASTs) containing oil were observed through the Subject Property and that are related to the irrigation well pumps. Minor soil staining that appeared to be from parked vehicles was observed in a few areas near the irrigation well sites but was limited to topsoil and were roughly 5 feet by 5 feet or less. This soil is considered de minimis given the minimal amount of staining.

However, significant oil staining was observed on two irrigation well pads. The first location was located along the MV collector line easement, located approximately ½ mile west of the intersection of Harlan Avenue and Colusa Avenue (see Appendix A, Photograph 5). The first location was located along the MV collector line easement, located approximately ½ mile west of the intersection of Harlan Avenue and Colusa Avenue (see Appendix A, Photograph 5). The second location was located along the gen-tie line easement, located at the northeast corner of the intersection of Harlan Avenue and Calaveras Avenue (see Appendix A, Photograph 14). If any of the proposed gen-tie structures/towers, or belowground collector lines are specifically planned to be constructed within these areas (i.e. where stained soil was located around well pumps) and the lines cannot be rerouted to avoid these areas, Stantec would recommend that soil samples be collected and evaluated for potential contaminants of concern above commercial use screening levels.

- **Adjacent Property Use:** Vista Verde Farms is located at the corner of Harlan Avenue and Stanislaus Avenue. This facility is listed in the hazardous waste tracking system (HWTS) database from 1998 through 2002. There are no reported releases associated with this property. However, during the field reconnaissance a large poly AST and numerous used 50-gallon poly drums are located in a pile at this facility that are located within the proposed gen-tie easement

provided to Stantec. Since the proposed gen-tie lines are aboveground, no further investigation is recommended. However, in the event that the gen-tie line plans call for an underground component in this area, soil sampling would be recommended on APN 045-080-49S to evaluate whether contaminants of concern are present in soil above commercial use screening levels. Likewise, if procurement of this parcel is required, or if development plans call for any structures or towers within this parcel, soil sampling would be recommended.

- **Declaration of Restrictive Covenant (Non-irrigation Covenant):** Preliminary title reports were provided to Stantec by the User. A review of the preliminary title reports identified no environmental liens or activity use limitations related to contamination at the Subject Property. However, the preliminary title reports identified Instrument Nos. 2003-0189565 and 2004-0256340 that are a “Declaration of Restrictive Covenant (Non-irrigation Covenant)” recorded on August 15, 2003 and November 16, 2004 for the parcels owned by Westlands Water District (see Appendix C, Preliminary Title Report). The covenant prohibits irrigation of the land and applies to the current owner and all subsequent owners.

The non-irrigation covenant is not considered a REC. However, additional evaluation to confirm which parcels are included in the covenant should be conducted if it is determined that the non-irrigation covenant will adversely affect the proposed developed of the Subject Property as a solar facility. Stantec also recommends that it be clarified as to whether application of water for dust control during development would be considered irrigating.

Non-Scope Considerations

9.0 NON-SCOPE CONSIDERATIONS

The following ASTM E1527-21 Non-Scope Considerations were performed as part of this Phase I ESA:

9.1 LEAD-BASED PAINT

Concern for lead-based paint (LBP) is primarily related to residential structures. The EPA's Final Rule on Disclosure of Lead-Based Paint in Housing (40 CFR Part 745) defines LBP as paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram per square centimeter or 0.5 percent by weight.

The risk of lead toxicity in LBP varies based upon the condition of the paint and the year of its application. The U.S. Department of Housing and Urban Development (HUD) has identified the following risk factors:

- The age of the dwelling as follows: maximum risk is from paint applied before 1950.
- There is severe risk from paint applied before 1960.
- There is moderate risk from deteriorated paint applied before 1970.
- There is slight risk from the paint that is intact but applied before 1977.
- The condition of the painted surfaces.
- The presence of children and certain types of households in the building.
- Previously reported cases of lead poisoning in the building or area.

There are no painted structures at the Subject Property.

9.2 ASBESTOS

Asbestos can be found in many applications, including sprayed-on or blanket-type insulation, pipe wraps, mastics, floor and ceiling tiles, wallboard, mortar, roofing materials, and a variety of other materials commonly used in construction. The greatest asbestos-related human health risks are associated with friable asbestos, which is ACM that can be reduced to powder by hand pressure. Friable asbestos can become airborne and inhaled, which has been associated with specific types of respiratory disease. The manufacturing and use of asbestos in most building products was curtailed during the late 1970s.

Demolition or partial demolition of any structure, or disposal of construction debris, requires compliance with the National Emission Standards for Hazardous Air Pollutants (NESHAP) in accordance with the South Coast Air Quality Management District (SCAQMD) Rule 1403 (Asbestos Demolition and Removal). Therefore, Stantec recommends that a pre-demolition survey be performed for any building structures containing suspect ACM. Additionally, irrigation line at the Subject Property may consist of transite pipe. Any suspect transite pipe encountered at the Subject Property should be left in place and sampled to evaluate for the presence of asbestos.

9.3 RADON

Radon is a colorless, tasteless radioactive gas with an EPA-specified action level of 4.0 PicoCuries per liter of air (pCi/L) for residential properties. Radon gas has a very short half-life of 3.8 days. The health risk potential of radon is primarily associated with its rate of accumulation within confined areas near or in the ground, such as basements, where vapors can readily transfer to indoor air from the ground through foundation cracks or other pathways. Large, adequately ventilated rooms generally present limited risk for radon exposure. The radon concentrations in buildings and homes depend on many factors, including soil types, temperature, barometric pressure, and building construction (EPA, 1993).

Stantec reviewed regional data published by the EPA (<http://www.epa.gov/radon/zonemap.html>) on average indoor radon concentrations in the vicinity of the Subject Property.

| | |
|---|--|
| Zip Code 93608 | Fresno County |
| EPA Radon Zones (w/Average Measured Indoor Radon concentrations) | |
| 98% below 4 pCi/L | Zone 2 – moderate (>=2 pCi/L and <=4 pCi/L); average first floor concentration 1.251 pCi/L |
| Normally-occupied sub grade areas (i.e. basement apartments, offices, stores, etc.). | |
| No subgrade areas are present or proposed at the Subject Property. | |

The property is located in Zone 2 and is considered to have only a moderate potential for radon. Stantec concludes that radon is unlikely to represent an environmental concern to the Subject Property and recommends no further investigation regarding this issue.

9.4 FLOOD ZONES

Stantec searched the FEMA flood plain map service at www.msc.fema.gov and the are of the proposed gen-tie easement west of the California aqueduct is within a 100-year flood zone.

Appendix B STANTEC RESUMES

Joshua is a project geologist with a master's degree in geological sciences. He has extensive field experience in geophysical exploration techniques and Phase I and II Environmental Assessment field work and report preparation. His field experience includes subsurface gold-copper porphyry deposit mapping using induced polarization and resistivity geophysics, mapping of shallow faults throughout Southern California using refraction seismology equipment, soil logging and collection, soil vapor collection, and surface and groundwater collection with basic flow measurements and parameter stabilization. He is skilled in using ArcGIS 10, Adobe Suite, and the Microsoft Office Suite. Joshua's environmental consulting experience includes performing Phase I Environmental Site Assessments in accordance with the practices identified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Designation E 1527-13, and the collection, and interpretation of Phase II Environmental Assessment data. Joshua also has experience in preparing Phase II Environmental Assessment reports based from this compiled data.

PROJECT EXPERIENCE

Health and Safety Management

Health and Safety Subcontractor Oversight Services (Geological Staff)

Joshua has provided subcontractor oversight for field activities including soil, soil vapor, and groundwater sampling. Other field activities include well destruction and on-site remediation.

Technical Writing

Various Technical Writing Projects (Geological Staff)

Joshua prepares Health and Safety plans, written permit applications, Phase I and Phase II Environmental Site Assessments reports, Work Plans dealing with soil, soil vapor, and groundwater sampling, and groundwater monitoring reports.

Geologic Staff

Environmental Site Assessments

Phase I Site Assessment, Redlands, California
(Phase I and Phase II Environmental Site
Assessment, Author)

Joshua performed an on-site reconnaissance survey, historical records investigation, and formulated the report deliverable. The report provided a thorough review of the property history and defined present environmental concerns for the client.

Soil Sampling

Dust and Pesticide Monitoring, Soil Sampling,
Monterey Park, California (Oversight, Dust and
Pesticide Monitoring, Soil Sampling)

Joshua performed field oversight during contaminated soil removal at a future residential community. Dust and toxaphene were monitored simultaneously to generate a site-specific threshold for dust concentration. Routine dust monitoring was performed once the threshold was determined. Property gridding and soil sampling were performed to determine contamination.

Soil Vapor Intrusion Assessment

Soil Vapor Monitoring Well Installation, Various
Locations, California (Field Oversight, Soil
Description)

Joshua performed field oversight during the installation of multiple soil vapor monitoring wells. He assisted with health and safety oversight, described the soil during drilling, activities, assisted with the well installation, and conducted the subsequent soil vapor sampling.

Environmental Site Remediation

Subcontractor Oversight Services and
Confirmation Soil Sampling (Geological Staff)

Joshua has provided subcontractor oversight for remedial excavation of pesticide- and petroleum-impacted soil, and later conducted confirmation sampling to ensure all impacted material had been removed from the Site.

Soil Vapor Remediation, Orange County,
California (Geological Staff)

Joshua has provided monthly operation and maintenance on a soil vapor extraction system operating at a historical landfill. Components of the operation and maintenance included measurements of the recovered vapor for methane and volatile organic compounds, and collecting flow measurements from the extraction wells. Joshua prepared month operation and maintenance reports.

Kyle has more than 28 years of professional experience—17 of those years with Stantec—providing geotechnical and environmental consulting. During the course of his experience, he has been involved with a wide variety of geological and engineering projects. He has been in direct charge of quality control/quality assurance (QA/QC) work for Stantec and previous firms for geological, engineering geological, and environmental services primarily in California. Additionally, Kyle has been a primary contact for Stantec with many different clients (including multi-party actions) and regulatory bodies involving contracting, workplan approvals, site assessments and closures, permitting, remedial action, and litigation support. With regard to litigation services, Kyle has extensive experience providing expert witness testimony, second-party review, and litigation support and analysis.

Kyle's extensive experience includes assessment and remediation of property-specific and regional issues involving soil and groundwater contaminated with petroleum hydrocarbons, chlorinated solvents, heavy metals, pesticides, and PCBs.

He currently serves as the managing principal geologist in Stantec's Redlands, California office.

PROJECT EXPERIENCE

Bioremediation

Excavation and Treatment of Petroleum-Contaminated Soil

Kyle designed the excavation and treatment of 45,000 cubic yards of petroleum-contaminated soil. Soil treatment included utilizing vapor extraction, combined with bioremediation.

Chemicals & Polymers

Two Former Chemical Plants, Environmental Site Assessments and Remediation, Vernon, California

Mr. Emerson was part of the team for conducting Phase I and Phase II Environmental Site Assessments (ESA) and developing remedial action plans for two former chemical plant sites with 80-year industrial histories. Phase I ESAs used historical files, maps, aerial photographs, available documents, and data from public agencies and historical directories for identifying recognized environmental concerns. Extensive Phase II ESA survey activities aided in identifying below-grade structures such as vaults/USTs, as well as assessing the extent of influence and nature of the contamination. These investigations confirmed the presence of heavy metals, petroleum hydrocarbons, volatile organic compounds, polychlorinated biphenyls, radioactive materials, semi-volatile organic compounds, and polycyclic aromatic compounds in the soils for these sites. Specific areas of concern included former settling ponds, a bone yard, maintenance areas, transformer and substations, wastewater treatment facilities, and above-ground storage tank farms. A conceptual mode was developed for use in a health risk assessment and developed risk-based corrective actions to address potential health and environmental concerns. He assisted with the development and implementation of a remedial action plan, combined administrative controls, engineering controls, and active remediation; this resulted in the cost-effective return of one site to active use, and is reducing health risks to occupants and the public at the second site.

CONFIDENTIAL: Aerospace Adhesives and Coatings Plant, Glendale, California

Mr. Emerson was part of the team that conducted feasibility studies to evaluate remedial alternatives for remediation of chlorinated VOCs, 1,4 dioxane, and hexavalent chromium (CrVI) in soil, soil vapor, and groundwater. Feasibility studies included groundwater pump testing, benchscale column testing to evaluate in situ alternatives for reducing CrVI to the less mobile CrIII valence state, soil vapor extraction, capping, and excavation. Field pilot studies were performed to evaluate the efficiency of various CrVI reductants including the use of ferrous sulfate, calcium polysulfide, emulsified oil, and fructose. Extensive multi-depth soil vapor testing was conducted to evaluate the distribution of VOCs in the subsurface and to support vapor intrusion risk assessment. Feasibility studies were completed in 2008. Remedial actions are expected to be completed in 2011.

Condition Assessments

Assessment and Mitigation of Manufacturing Facility

Kyle managed the assessment and mitigation of an ammunition manufacturing facility covering 1,100 acres in a complex geologic environment. The contaminants involved red and white phosphorous, TNT, chlorinated solvents, solid wastes, and live ordinance.

Soil Contamination Assessment Supervision and Management

Kyle managed and supervised soil contamination assessment and in-situ remediation of heavy metals involving chromium, cadmium, nickel and zinc by chemical fixation to depths in excess of 40 feet below ground surface beneath existing structures within several manufacturing facilities.

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Litigation Support and Expert Testimony

Kyle provided litigation support and expert testimony on more than 20 separate projects involving service stations, chlorinated solvent cases, heavy metal, and semi-volatile releases.

Corporate / Office

Commercial Developer - Environmental Remediation of Former Dry Cleaners, El Centro, California

Mr. Emerson was responsible for assessments and remediation at this former dry cleaners which released the dry cleaning chemical tetrachloroethene (PCE) to the ground and underlying groundwater. The work included initial site assessment, agency interaction and negotiations with the California Regional Water Quality Control Board (CRWQCB), and Colorado Basin Region human health risk assessment (HHRA), design and implementation of remedial investigations, feasibility studies, remedial action plans, and implementation of remediation in mitigating chlorinated solvent contamination in vadose and saturated zones at concentrations indicative of DNAPL. The results of the completed remediation, as well as continued confirmation sampling and monitoring, allowed the CRWQCB to issue site closure in 2008. The site has since been redeveloped into a new commercial development.

Environmental Assessments

Siting Studies

Kyle performed initial siting studies for potential Class I, II, and III landfills. The project included detailed geologic mapping, hydrogeological studies, and permeability studies of caps and liners.

Environmental Site Remediation

Assessment and Remedial Design, California (Project Supervisor)

Kyle supervised the assessment and remedial design of a system to eliminate salt brine contamination in shallow perched water horizons in the Yucaipa, San Bernardino, and Riverside areas of southern California.

Design and Installation of Recovery Systems*

Kyle designed and installed numerous free-product recovery systems that successfully recovered product. One of the sites contained product up to 11-feet thick covering more than three city blocks. The dissolved phase had affected a multi-aquifer system and a public drinking water system.

Geophysical Characterizations*

Kyle performed and supervised numerous geophysical characterizations to determine the extent of old landfills. He provided classification studies, landfill gas monitoring, removal verification during grading, methane collection and mitigation plans, permitting, and closure plans.

Domestic Landfill Development*

Kyle designed and supervised the dynamic consolidation of a domestic landfill for development. He used this process to minimize expected settlement to overlying structures. Kyle designed commercial developments on closed landfills that involved complex methane collection and monitoring systems and building settlement controls.

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Clay Borrow Site Studies

Kyle performed more than 10 separate clay borrow site studies for determining sources of material to cap landfills; ranged from a 20-acre dry lakebed to a 450-acre parcel in complex folded marine sediments.

Assessment, Clean Up, and Regulatory Support Management, Santa, Monica (Project Manager)

Kyle managed the assessment, clean up, and complex regulatory support of a PRP site in an MTBE case (Charnock subbasin). His work involved more than 20 environmental professionals working full time for two years to complete the assessment and clean up mandated by the regulatory agencies.

Hazardous Waste

San Gabriel Valley Superfund Site, Remediation & Closure of Multiple Source Areas, Industry, California

Mr. Emerson performed feasibility studies to evaluate appropriate and relevant remedial alternatives to mitigate constituents of concern in five AOCs contaminated with chlorinated hydrocarbons, heavy metals, petroleum fuel, and cutting oils. Ultimately, a combination of remedial alternatives was implemented that included large-diameter auger excavation to 45 feet to minimize impacts on facility operations, vapor extraction, vapor intrusion risk assessment, deed restriction, and monitored natural attenuation. At the completion of remedial actions, confirmation soil, soil vapor, and groundwater sampling were conducted and followed with risk assessment to demonstrate that remedial objectives had been achieved. No further action was recently granted by the US EPA and Los Angeles Regional Water Quality Control Board.

Mixed-Use

Port of San Diego Rohr Facility, Chula Vista, California

Mr. Emerson assisted in a detailed subsurface assessment of the Rohr facility. The intent of the assessment was to evaluate the 40-acre former aircraft part manufacturing facility for acquisition by the Port of San Diego for redevelopment into a business park and entertainment complex. The assessment identified the presence of soil, soil vapor, and groundwater impacts by petroleum hydrocarbons, VOCs, heavy metals, PCBs, and semi-volatile organic compounds. He utilized many sampling techniques to assess the limits and concentrations of contaminants in the subsurface. Ultimately, the team was able to develop a cost estimate for potential remedial action cost associated to corrective action to allow redevelopment.

Master Planned Commercial/Residential Redevelopment Project, Whittier, California (Project Manager)

Kyle oversaw the assessment of 26 contiguous properties that are part of a 21-acre master planned commercial/residential redevelopment project. The properties included industrial facilities, platting lines, fuel USTs, and metal processing plants, among others. The estimated cleanup costs are approximately \$2 million.

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Multi-Unit / Family Residential

Residential Development Assessment, Ventura, California (Project Director)

Kyle directed an assessment of a 40-acre former agricultural property proposed for residential development. Pesticides were identified above hazardous waste levels and preliminary remediation goals established by the U.S. Environmental Protection Agency. Through corrective grading methods and onsite placement of the pesticide impacted soils, all material were re-used on site without offsite disposal. The overall cost savings for the client was more than \$1 million. Total cost was less than \$250,000 for all necessary activities.

Oil & Gas

Oil Field Site Assessments*

Kyle performed site assessments at oil field leases involving refineries, bulk storage areas, piping systems and wellhead, and drilling mud pit contamination.

Environmental Protection Agency Superfund Action, Culver City, California (Project Manager)

Kyle served as the project manager representing a major oil company in the assessment, remedial action, and litigation support in a multi-party contamination case affecting a City water supply. The assessment involved more than 250 continuous core borings up to 100 feet, as well as extensive remedial actions. The total cost for all related activities was \$22 million. The case is settled and the closure of the site is pending.

Project Management

Liability and Property Management Consulting Services

Kyle is providing liability and property management consulting services to more than 10 medium to large property development firms in the US. His work involves property transaction assessments, contract review, acquisition guideline development, liability management evaluation, insurance acquisition, and strategic planning.

Residential Development

Environmental Development Management and Review (Project Manager)

Kyle manages and reviews environmental development issues for a large residential developer specializing in development of contaminated industrial properties by providing innovative solutions in developing contaminated properties for residential use through risk assessment, engineering, and administrative and property development controls.

Site Management and Remediation

Design and Implementation of Biodegradation Programs*, California

Kyle designed and implemented one of the first in-situ biodegradation programs in California; it involved 50,000 cubic yards of diesel-contaminated soils, and groundwater to depths of 70 feet below ground surface.

* denotes projects completed with other firms

Soil and Groundwater Remediation Systems

Soil and Groundwater Contamination Assessments and Mitigation*, California (Project Manager)

Kyle managed numerous chlorinated solvent soil and groundwater contamination assessments and mitigation programs in southern California. The projects involved releases that impacted soil and groundwater to depth of groundwater more than 700 feet in multi-aquifer systems. One case involved with plume dimensions more than 1 mile from the source affecting residential properties.

Soil and Groundwater Assessment and Remediation Programs*

Implemented hundreds of soil and groundwater assessment and remediation programs at various service station facilities in Southern and Northern California, and Nevada. Work involved assessment, remedial design, installation, maintenance and monitoring. Closure has been received on a majority of these sites.

Assessment and Remediation Management*

Kyle managed the assessment and remediation of soil and groundwater manufacturing at dry cleaning facilities contaminated with chlorinated solvents.

Warehouse / Light Industrial

Glendale Redevelopment Project, Glendale, California (Project Manager)

Kyle managed the assessment and remedial actions during the redevelopment of an industrial property. The project involved the demolition of a historic manufacturing facility and a commercial dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. Remedial actions involved excavation by pattern drilling and off site disposal along with removal of former USTs. The total cost of remediation and assessment was \$450,000.00.

Compton Redevelopment Project, Compton, California (Project Manager)

Kyle is serving as project manager for the assessment and remedial actions for a large redevelopment project. The project involves the redevelopment of a historic manufacturing facility and a former dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. The industrial facility was also associated with significant volumes of buried waste that required removal and disposal. These wastes also included the chemical referenced above, as well as PCBs and heavy metals. Remediation has included excavation, vapor extraction, and chemical fixation. The total cost of this project has been \$2.8 million to date.

PUBLICATIONS

In-Situ Bioremediation of an Underground Diesel Fuel Spill: A Case Study. Environmental Management, 1989.

Dion has extensive knowledge of underground storage tank investigations, Phase I and II environmental site assessment, groundwater monitoring and reporting, soil, soil vapor, and groundwater quality assessments, and testing for asbestos and lead based paint. His project experience is extensive and wide ranging and includes many types of soil, soil vapor, and groundwater assessment and monitoring for planned, existing, and former sites. Dion also has experience in testing fill soils placed on grading sites.

He has experience on redevelopment of former oil field sites that include submittal of construction site review plans, oil well mitigation (venting and casing alterations), abandonment of oil wells, and remedial investigations and remediation involving soil contamination.

Dion also has experience working with 1166 AQMD air monitoring on projects ranging from limited access dry cleaner excavations, solvent excavations, and petroleum excavations related to underground storage tank releases. Included in this type of monitoring is the assessment of a safe work environment for the contractors involved with this type of work.

He has considerable knowledge in asbestos and lead based paint sampling as a building inspector and lead sampling technician. Asbestos and lead based paint surveys have ranged from large office buildings to sampling highway bridges.

EDUCATION

BS, Soil Science, California Polytechnic University, Pomona, Pomona, California, 2004

Health & Safety Certification (29 CFR 1910.120), 40-Hour OSHA Health & Safety Certification, Redlands, California, 2005

Health & Safety Annual Update Certification, 8-Hour OSHA, Redlands, California, 2009

Certified Building Inspector, AHERA 8-Hour Refresher, Redlands, California, 2009

PROJECT EXPERIENCE

Asbestos, Lead Based Paint, and Hazardous Material Management

Haller Wash Bridge No. 54-0891R&L, San Bernardino County, California (Asbestos and Lead-Based Paint Sampling Assistant)

Dion conducted asbestos and lead based paint survey on highway bridge. He assisted with planning field operations, measuring bridge dimensions, and collecting samples. Tasks included sample collection, bridge measurements, and documentation.

Project Management Oversight

Magnolia Plaza, Fountain Valley, California

Dion is providing project management of soil, soil vapor, and quarterly groundwater sampling related to a solvent release at a former dry cleaning facility. Tasks include preparation of work plans for approval by the Regional Water Quality Control Board and oversight of field sampling, including lithologic logging, for soil and soil vapor investigations performed within a multi-tenant strip center. Additional tasks include preparation of investigative reports and quarterly groundwater monitoring reports. The site remains an open case and preparation of a work plan to use electrical resistive heating ("ERH") will be prepared in the coming weeks.

Dion Monge

Project Scientist

Former Superb Dry Cleaners, Anaheim, California

Dion performed field oversight, direction, and confirmation soil sampling of a limited access excavation within a former dry cleaner unit. Post excavation field activities included application of a barrier type floor sealant along with post excavation indoor air sampling. Remedial work led to regulatory closure being granted from the local agency.

Site Assessment

Proposed Friends Christian High School, Yorba Linda, California

Dion prepared preliminary site assessment (PSA) report for future private school site to identify recognized environmental conditions ("RECs") related to past property usage as an oil field with 21 oil wells abandoned prior to 1990. Completion of the PSA led to his management of the project through site closure. Field investigations and reporting by Dion included Phase II investigations, methane survey, oil well leak testing and venting, backfill and compaction (including soils testing), DOGGR Construction Site Review, and excavation and onsite management of more than 5,000 cubic yards of petroleum impacted soils.

SR-58 Widening, San Bernardino County, California

Dion performed Initial Site Assessment (ISA) for Caltrans at Kramer Junction for the proposed widening of State Route 58. The ISA was performed in accordance with guidelines promulgated by the American Society for Testing and Materials (ASTM) and included historical research and coordination of permit/file reviews with local building/planning departments and environmental agencies. Dion's role included the field visit, observation documentation, agency reviews, and reporting.

Soil Sampling

Caltrans I-15, Task Order 28, Hesperia, California

Dion conducted a soil investigation for metals analysis alongside I-15 for disposal recommendations during construction of mortar-lined channels at several locations. He assisted with planning field operations and collected soil samples. Tasks included sample collection, preservation, and documentation.

PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner*, *bona fide prospective purchaser*, or *contiguous property owner*, ASTM standard practice E2247-16 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Please answer the following questions as completely as possible. Attach additional pages as needed. Return the completed questionnaire to Stantec along with the executed Authorization For services form.

3. Environmental Cleanup Liens. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

Yes No

If yes, describe or attach details of the lien _____

4. Activity and Land Use Limitations. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?

Yes No

If yes, describe or attach details of the limitations _____

5. Specialized Knowledge or Experience. As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?

Yes No

If yes, describe or attach details of your specialized knowledge or experience _____

6. Relationship of Purchase Price to Fair Market Value of Property. Does the purchase price being paid for the property reasonably reflect the fair market value?

Yes No

Not applicable. User is not involved in a purchase of the property.

If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

~~_____ Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.~~

~~_____ No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.~~

7. Commonly Known or Reasonably Ascertainable Information. Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

Do you know the past uses of the property?

_____ Yes (describe) _____

No

Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?

_____ Yes (describe) _____

No

Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?

_____ Yes (describe) _____

No

Do you know of any environmental cleanups that have taken place at the property?

_____ Yes (describe) _____

No

8. The Degree of Obviousness of Contamination. E1527-13 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indicators that point to the presence or likely presence of contamination at the property?

_____ Yes (describe) _____

No

9. Availability of Previous Environmental Reports. Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?

_____ Yes (describe) _____

No

NOTES AND REQUIREMENTS

- A. In order to insure, you must provide full copies of any unrecorded leases, together with all supplements, assignments and amendments. Additional requirements or items may be requested upon review of the required documents.
- B. Please be advised that the search did not disclose any open deeds of trust. If you have knowledge of any outstanding obligations, please contact your title officer immediately for further review.
- C. In order to insure the Land owned by a municipality or a governmental or quasi-governmental entity, a resolution will be required. Additionally, other requirements will be determined upon review of the transaction and Stewart Title Guaranty Company underwriting approval will be required prior to close. To avoid delays in closing, please contact your title officer as soon as possible.
- D. There are no transfers or conveyances shown in the Public Records within 24 months of the date of this Preliminary Report/Title Commitment. If you have knowledge of any transfers or conveyances, please contact your title officer immediately for further requirements.
- E. If an Owner's Policy of Title Insurance is requested, a CLTA Standard Coverage Owner's Policy will be issued unless instructed otherwise. If a different form of policy is desired, please contact your Title Officer.
- F. All Transactions - Seller(s) and Buyer(s) or Borrowers are provided, as attachments, the document entitled "Acknowledgement of Receipt, Understanding and Approval of STG Privacy Notice for Stewart Title Companies and Stewart's Affiliated Business Arrangement Disclosure Statement" and the individually or similar named documents, for review and acknowledgment prior to closing.
- G. All Transactions - Buyer(s)/Seller(s)/Borrower(s) are provided the Preliminary Report for review and acknowledgment prior to closing. Buyer(s) approval shall include the Preliminary Report items that are to remain as exceptions to the title policy.
- H. All Transactions - Seller(s)/Owner(s) shall submit for review, prior to closing, a completed Stewart Title Guaranty Company's Owner's Affidavit and Indemnity.
- I. A Preliminary Change of Ownership Report must be completed by the transferee (buyer) prior to the transfer of property in accordance with the provisions of Section 480.3 of the Revenue and Taxation Code. The Preliminary Change of Ownership Report should be submitted to the recorder concurrent with the recordation of any document effecting a change of ownership. If a document evidencing a change of ownership (i.e. Deed, Affidavit-Death Joint Tenant) is presented to the recorder for recording without a preliminary change of ownership report, the recorder may charge an additional \$20.00.
- J. Some counties, including San Francisco, require that a Transfer Tax Affidavit be completed and signed by the Grantor for each deed submitted for recording. This is in addition to a Preliminary Change of Ownership Report.

In addition to County Transfer Tax (which is most typically \$1.10 per thousand), any conveyance may be subject to a City Transfer and/or Conveyance Tax, as follows.

Alameda \$12.00 per thousand;

Albany \$15.00 per thousand;

CALIFORNIA "GOOD FUNDS" LAW

California Insurance Code Section 12413.1 regulates the disbursement of escrow and sub-escrow funds by title companies. The law requires that funds be deposited in the title company escrow account and available for withdrawal prior to disbursement. Funds received by Stewart Title Guaranty Company Commercial Services (San Diego) via wire transfer may be disbursed upon receipt. Funds received via cashier's checks or teller checks drawn on a California Bank may be disbursed on the next business day after the day of deposit. If funds are received by any other means, recording and/or disbursement may be delayed, and you should contact your title or escrow officer. All escrow and sub-escrow funds received will be deposited with other escrow funds in one or more non-interest bearing escrow accounts in a financial institution selected by Stewart Title Guaranty Company Commercial Services (San Diego). Stewart Title Guaranty Company Commercial Services (San Diego) may receive certain direct or indirect benefits from the financial institution by reason of the deposit of such funds or the maintenance of such accounts with the financial institution, and Stewart Title Guaranty Company Commercial Services (San Diego) shall have no obligation to account to the depositing party in any manner for the value of, or to pay to such party, any benefit received by Stewart Title Guaranty Company Commercial Services (San Diego). Such benefits shall be deemed additional compensation to Stewart Title Guaranty Company Commercial Services (San Diego) for its services in connection with the escrow or sub-escrow.

If any check submitted is dishonored upon presentation for payment, you are authorized to notify all principals and/or their respective agents of such nonpayment.

In connection with the request of the Undersigned ("Affiant") for the preparation and issuance of insurance, Affiant makes the following statements and representations for the benefit of, and reliance by, title insurer STEWART TITLE GUARANTY COMPANY (hereafter referred to as "TITLE"):

1. Affiant owns and holds title to the land described in Schedule A of the Preliminary Report or Commitment issued in connection with the above referenced Order Number (the "Land").
2. The Affiant's ownership and/or possession of the Land has been peaceful and undisturbed, and title thereto has never been disputed, questioned or rejected, nor has the issuance of title insurance ever been refused, except as follows: **(If none, please state "none")**

3. Other than the Affiant, there are no parties entitled to possession of the Land other than the following: **(If none, please state "none")**

4. There are no leases, licenses, options, rights of first refusal, or contracts to sell, affecting the Land, or any parties currently in possession, of the Land, except the following: **(If none, please state "none")**

5. All assessments by a management company or owners' association, or for common area or building maintenance, if any, are paid current or are not yet due and payable except for the following **(If none, please state "none")**

6. There are no pending contemplated repairs/improvements to the Land, except the following: **(If none, please state "none")**

7. There has been no construction, building materials, repairs, improvements or remodeling performed, provided, furnished or delivered within the last 12 months, except as follows: **(If none, please state "none")**

This work performed, as detailed above, was completed on _____ (date of completion).

8. Affiant is not aware of the existence of any of the following:
 - a. Improvements, including fences, encroaching into any easements on the Land, or over any boundary lines of the Land.
 - b. Adjoining property improvements encroaching onto the Land.
 - c. Liens against the Land and/or judgments or tax liens against Affiant or any other property owner currently in title, except those described in the Preliminary Report or Commitment issued in connection with the above referenced Order Number.
 - d. Outstanding claims or persons entitled to claims for mechanics' or materialman liens against the Land.
 - e. Pending repairs/improvements to any adjacent street(s) or any assessments related to road maintenance.
 - f. Any pending litigation involving the Land, the Affiant or any other property owner currently in title.
 - g. Recent improvements completed or being made to any common area(s) located within the subdivision in which the Land is located.
 - h. Violations of building permits, zoning laws or recorded covenants, conditions and/or restrictions imposed on the Land.
 - i. Any pending assessments for Community Facility Districts.
 - j. Any new, pending or existing obligation or loan including any home improvements on the Land pursuant to the PACE or HERO program, or any other similar type program.

- k. Any unrecorded or recorded easements, covenants, conditions, or restrictions affecting the Land, other than those listed in the Preliminary Report or Title Commitment.
- l. Any use of the property for the production, sale, warehousing or transporting of fresh fruits, vegetables, livestock or poultry (e.g., supermarkets, restaurants, wineries, breweries and meat packing plants).

With regard to 8a.-8l, except as follows: (If none, please state "none")

-
- 9. No proceedings in bankruptcy or receivership have been instituted or filed by, or against, the Affiant or any other property owner currently in title.
 - 10. There are no unpaid taxes, assessments or utility type bills including but not limited to bills for water, sewer, hazardous waste, recycling, storm drain and/or rubbish and there are no liens related to such utilities from or on the Land, with the exception of the following: **(If none, please state "none")**

-
- 11. There are no financial obligations secured by trust deeds, mortgages, financing statements, vendor's liens, security agreements or otherwise, against the Land, except as set forth in the Preliminary Report, proforma and/or Commitment, and as set forth below: **(If none, please state "none")**

| <u>Creditor</u> | <u>Approximate Balance</u> |
|-----------------|----------------------------|
| | |
| | |

- 12. There has been no harvesting or production of any oil, gas, geothermal materials or other minerals from or on the Land and there are no oil, gas, geothermal and/or mineral leases, licenses, options, rights of first refusal, and/or contracts to sell, affecting the mineral rights associated with the Land, or other parties currently in possession, of the mineral rights on the Land, except the following: **(If none, please state "none")**

-
- 13. Other than the Affiant, there are no other parties currently in possession of the Land, including but not limited to, any possessory interest associated with the harvesting of any oil, gas, geothermal materials or other minerals, except the following: **(If none, please state "none")**

-
- 14. Affiant has not executed and will not execute any documents or instruments related to the title to, or interest in, the Land prior to the recordation of the documents in this transaction.

- 15. By signing below, Affiant agrees to cooperate with TITLE and, upon request from TITLE, to promptly provide and/or execute, any corrective or curative information or documentation requested.

This is a sworn affidavit and is made for the purpose of inducing TITLE to provide certain insurance coverage to a purchaser and/or lender, and the representations contained herein are material to such insurance coverage. The undersigned hereby indemnifies and holds TITLE harmless from any loss or damage, liability, costs, expenses and attorneys' fees which it may sustain under its policies of title insurance or commitments to the extent any representation contained herein is incorrect. The undersigned understands that TITLE may decide not to provide the requested title insurance despite the information and affirmations contained herein.

PLEASE READ, COMPLETE AND RESPOND TO ALL STATEMENTS CONTAINED IN THIS OWNER'S AFFIDAVIT AND INDEMNITY BEFORE SIGNING IN THE PRESENCE OF A NOTARY PUBLIC. THE NOTARY PUBLIC WILL EXECUTE THE ACKNOWLEDGMENT ON THE FOLLOWING PAGE. HOWEVER, IF YOU DO NOT UNDERSTAND OR HAVE ANY QUESTIONS ABOUT THIS AFFIDAVIT, YOU SHOULD SEEK THE ASSISTANCE OF YOUR INDEPENDENT FINANCIAL AND/OR LEGAL ADVISOR BEFORE SIGNING.

**STANDARD COVERAGE POLICY – 1990
EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
(b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
(a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
(b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
(c) resulting in no loss or damage to the insured claimant;
(d) attaching or created subsequent to Date of Policy; or
(e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13) EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
 - a. building;
 - b. zoning;
 - c. land use;
 - d. improvements on the Land;
 - e. land division;
 - f. environmental protection.

This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
 - a. that are created, allowed, or agreed to by You, whether or not they appear in the Public Records;
 - b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
 - c. that result in no loss to You; or
 - d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.

5. Failure to pay value for Your Title.

6. Lack of a right:
 - a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
 - b. in streets, alleys, or waterways that touch the Land.

This Exclusion does not limit the coverage described in Covered Risk 11 or 21.

7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

* For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A. The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

2006 ALTA LOAN POLICY (06-17-06) EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - (i) the occupancy, use, or enjoyment of the Land;
 - (ii) the character, dimensions, or location of any improvement erected on the Land;
 - (iii) the subdivision of land; or
 - (iv) environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
 - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - (c) resulting in no loss or damage to the Insured Claimant;
 - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
 - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - (a) a fraudulent conveyance or fraudulent transfer, or
 - (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

Except as provided in Schedule B - Part II, this policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

PART I

1. (a) taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
(b) proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, which are not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:

 - (c) resulting in no loss or damage to the Insured Claimant;
 - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
 - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
 - (a) a fraudulent conveyance or fraudulent transfer; or
 - (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or by making inquiry of persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and that are not shown by the Public Records.
5. (a) unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy..

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY - ASSESSMENTS PRIORITY (04-02-15) EXCLUSIONS FROM COVERAGE

1. a. Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to
 - (i) the occupancy, use, or enjoyment of the Land;
 - (ii) the character, dimensions or location of any improvement now or hereafter erected on the Land;
 - (iii) the subdivision of land; or
 - (iv) environmental protectionor the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
- b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims or other matters:
 - (a) created, suffered, assumed or agreed to by the Insured Claimant;
 - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - (c) resulting in no loss or damage to the Insured Claimant;
 - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
 - (e) resulting in loss or damage which would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - (a) a fraudulent conveyance or fraudulent transfer, or
 - (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

**PROCEDURES TO ACCOMPANY THE
RESTRICTIVE COVENANT MODIFICATION FORM**

The law prohibits unlawfully restrictive covenants based upon:

“...age, race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, disability, veteran or military status, genetic information, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry... Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.”

As the individual holding or acquiring an interest in the property, you may elect to have any unlawfully restrictive covenants “removed”, which means “redacted.”

To have the unlawfully restrictive covenant removed, you may prepare and submit to the county recorder’s office, a “Restrictive Covenant Modification” form (RCM) together with a copy of the attached document with the unlawfully restrictive covenant redacted. This request must be submitted to the county recorder’s office and must include your return address so the county recorder can notify you of the action taken by the county counsel.

NOTE: The RCM provided with your title product MAY NOT be the same form required by your county recorder’s office; please double check your county recorder’s office before completing this form.

The process at the county recorder’s office is as follows:

- The county recorder takes the RCM with the redacted document and the original document attached and submits it to the county counsel for review to determine if, from a legal standpoint, the language was an unlawfully restrictive covenant and thus the redacted version should be indexed and recorded.
- The county counsel shall inform the county recorder of his/her determination within a reasonable amount of time, not to exceed three months from the date of your request.
- If county counsel determined that the redacted language was unlawful then, once recorded, the redacted document is the only one that effects the property and this modified document has the same effective date as the original document.
- If county counsel determined that the redacted language was not unlawful then county counsel will return the RCM package to the county recorder and the county recorder will advise the requestor that same the request has been denied and the redacted document has not been recorded.
- The modification document shall be indexed in the same manner as the original document and shall contain a recording reference to the original document.

STEWART TITLE GUARANTY COMPANY PRIVACY NOTICE

This Stewart Title Guaranty Company Privacy Notice (“Notice”) explains how Stewart Title Guaranty Company and its subsidiary title insurance companies (collectively, “Stewart”) collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of your information. Pursuant to Title V of the Gramm-Leach Bliley Act (“GLBA”) and other Federal and state laws and regulations applicable to financial institutions, consumers have the right to limit some, but not all sharing of their personal information. Please read this Notice carefully to understand how Stewart uses your personal information.

The types of personal information Stewart collects, and shares depends on the product or service you have requested.

Stewart may collect the following categories of personal and financial information from you throughout your transaction:

1. Identifiers: Real name, alias, online IP address if accessing company websites, email address, account name, unique online identifier, social security number, driver’s license number, passport number, or other similar identifiers;
2. Demographic Information: Marital status, gender, date of birth.
3. Personal Information and Personal Financial Information: Name, signature, social security number, physical characteristics or description, address, telephone number, insurance policy number, education, employment, employment history, bank account number, credit card number, debit card number, credit reports, or any other information necessary to complete the transaction.

Stewart may collect personal information about you from:

1. Publicly available information from government records.
2. Information we receive directly from you or your agent(s), such as your lender or real estate broker;
3. Information about your transactions with Stewart, our affiliates, or others; and
4. Information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

Stewart may use your personal information for the following purposes:

1. To provide products and services to you or in connection with a transaction.
2. To improve our products and services.
3. To communicate with you about our, our affiliates’, and others’ products and services, jointly or independently.

Stewart may use or disclose the personal information we collect for one or more of the following purposes:

- a. To fulfill or meet the reason for which the information is provided.
- b. To provide, support, personalize, and develop our website, products, and services.
- c. To create, maintain, customize, and secure your account with Stewart.
- d. To process your requests, purchases, transactions, and payments and prevent transactional fraud.
- e. To prevent and/or process claims.
- f. To assist third party vendors/service providers who complete transactions or perform services on Stewart’s behalf pursuant to valid service provider agreements.
- g. As necessary or appropriate to protect the rights, property or safety of Stewart, our customers or others.
- h. To provide you with support and to respond to your inquiries, including to investigate and address your concerns and monitor and improve our responses.
- i. To help maintain the safety, security, and integrity of our website, products and services, databases and other technology-based assets, and business.
- j. To respond to law enforcement or regulator requests as required by applicable law, court order, or governmental regulations.
- k. Auditing for compliance with federal and state laws, rules and regulations.
- l. Performing services including maintaining or servicing accounts, providing customer service, processing or fulfilling orders and transactions, verifying customer information, processing payments.
- m. To evaluate or conduct a merger, divestiture, restructuring, reorganization, dissolution, or other sale or transfer of some or all of our assets, whether as a going concern or as part of bankruptcy, liquidation, or similar proceeding, in which personal information held by us is among the assets transferred.

Stewart will not collect additional categories of personal information or use the personal information we collected for materially different, unrelated, or incompatible purposes without providing you notice.

Disclosure of Personal Information to Affiliated Companies and Nonaffiliated Third Parties

Stewart does not sell your personal information to nonaffiliated third parties. Stewart may share your information with those you have designated as your agent throughout the course of your transaction (for example, a realtor, broker, or a lender). Stewart may disclose your personal information to a non-affiliated third party for a business purpose. Typically, when we disclose personal information for a business purpose, we enter in a contract that describes the purpose and requires the recipient to both keep that personal information confidential and not use it for any purpose except performing the contract.

We share your personal information with the following categories of third parties:

- a. Non-affiliated service providers and vendors we contract with to render specific services (For example, search companies, mobile notaries, and companies providing credit/debit card processing, billing, shipping, repair, customer service, auditing, marketing, etc.)
- b. To enable Stewart to prevent criminal activity, fraud, material misrepresentation, or nondisclosure.
- c. Stewart's affiliated and subsidiary companies.
- d. Non-affiliated third-party service providers with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you.
- e. Parties involved in litigation and attorneys, as required by law.
- f. Financial rating organizations, rating bureaus and trade associations.
- g. Federal and State Regulators, law enforcement and other government entities to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order.

The law does not require your prior authorization or consent and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with non-affiliated third parties, except as required or permitted by law.

Right to Limit Use of Your Personal Information

You have the right to opt-out of sharing of your personal information among our affiliates to directly market to you. To opt-out of sharing to our affiliates for direct marketing, you may send an "opt out" request to Privacyrequest@stewart.com, or contact us through other available methods provided under "Contact Information" in this Notice. We do not share your Personal Information with nonaffiliates for their use to direct market to you without your consent.

How Stewart Protects Your Personal Information

Stewart maintains physical, technical and administrative safeguards and policies to protect your personal information.

Your Consumer Rights and Choices Under CPPA and CPRA

Your Rights Under CCPA

The CCPA provides consumers (California residents as defined in the CCPA) with specific rights regarding their personal information. This section describes your CCPA rights and explains how to exercise those rights.

Access to Specific Information and Data Portability Rights

You have the right to request that Stewart disclose certain information to you about our collection and use of your personal information over the past 12 months. Once we receive and confirm your verifiable consumer request, Stewart will disclose to you:

- The categories of personal information Stewart collected about you.
- The categories of sources for the personal information Stewart collected about you.
- Stewart's business or commercial purpose for collecting that personal information.
- The categories of third parties with whom Stewart shares that personal information.
- The specific pieces of personal information Stewart collected about you (also called a data portability request).
- If Stewart disclosed your personal data for a business purpose, a listing identifying the personal information categories that each category of recipient obtained.

Deletion Request Rights

You have the right to request that Stewart delete any of your personal information we collected from you and retained, subject to certain exceptions. Once we receive and confirm your verifiable consumer request, Stewart will delete (and direct our service providers to delete) your personal information from our records, unless an exception applies.

Stewart may deny your deletion request if retaining the information is necessary for us or our service providers to:

1. Complete the transaction for which we collected the personal information, provide a good or service that you requested, take actions reasonably anticipated within the context of our ongoing business relationship with you, or otherwise perform our contract with you.
2. Detect security incidents, protect against malicious, deceptive, fraudulent, or illegal activity, or prosecute those responsible for such activities.
3. Debug products to identify and repair errors that impair existing intended functionality.

4. Exercise free speech, ensure the right of another consumer to exercise their free speech rights, or exercise another right provided for by law.
5. Comply with the California Electronic Communications Privacy Act (Cal. Penal Code § 1546 seq.)
6. Engage in public or peer-reviewed scientific, historical, or statistical research in the public interest that adheres to all other applicable ethics and privacy laws, when the information's deletion may likely render impossible or seriously impair the research's achievement, if you previously provided informed consent.
7. Enable solely internal uses that are reasonably aligned with consumer expectations based on your relationship with us.
8. Comply with a legal obligation.
9. Make other internal and lawful uses of that information that are compatible with the context in which you provided it.

Your Rights Under CPRA

CPRA expands upon your consumer rights and protections offered by the CCPA. This section describes your CPRA rights and explains how to exercise those rights.

Opt-Out of Information Sharing and Selling

Stewart does not share or sell information to third parties, as the terms are defined under the CCPA and CPRA. Stewart only shares your personal information as commercially necessary and in accordance with this CCPA & CPRA Notice.

Correction of Inaccurate Information

You have the right to request that Stewart correct any inaccurate information maintained about.

Limit the Use of Sensitive Personal Information

You have the right to limit how your sensitive personal information, as defined in the CCPA and CPRA is disclosed or shared with third parties.

Exercising Your Rights Under CCPA and CPRA

To exercise the access, data portability, deletion, opt-out, correction, or limitation rights described above, please submit a verifiable consumer request to us by the available means provided below:

1. Calling us Toll Free at 1-866-571-9270
2. Emailing us at Privacyrequest@stewart.com; or
3. Visiting <http://stewart.com/ccpa>.

Only you, or someone legally authorized to act on your behalf, may make a verifiable consumer request related to your personal information. You may also make a verifiable consumer request on behalf of your minor child, if applicable.

To designate an authorized agent, please contact Stewart through one of the methods mentioned above.

You may only make a verifiable consumer request for access or data portability twice within a 12-month period. The verifiable consumer request must:

- Provide sufficient information that allows us to reasonably verify you are the person about whom we collected personal information or an authorized representative.
- Describe your request with sufficient detail that allows us to properly understand, evaluate, and respond to it.

Stewart cannot respond to your request or provide you with personal information if we cannot verify your identity or authority to make the request and confirm the personal information relates to you.

Making a verifiable consumer request does not require you to create an account with Stewart.

Response Timing and Format

We endeavor to respond to a verifiable consumer request within forty-five (45) days of its receipt. If we require more time (up to an additional 45 days), we will inform you of the reason and extension period in writing.

A written response will be delivered by mail or electronically, at your option.

Any disclosures we provide will only cover the 12-month period preceding the verifiable consumer request's receipt. The response we provide will also explain the reasons we cannot comply with a request, if applicable. For data portability requests, we will select a format to provide your personal information that is readily useable and should allow you to transmit the information from one entity to another entity without hindrance.

Stewart does not charge a fee to process or respond to your verifiable consumer request unless it is excessive, repetitive, or manifestly unfounded. If we determine that the request warrants a fee, we will tell you why we made that decision and provide you with a cost estimate before completing your request.

Non-Discrimination

Stewart will not discriminate against you for exercising any of your CCPA and CPRA rights. Unless permitted by the CCPA or CPRA, we will not:

- Deny you goods or services.
- Charge you a different prices or rates for goods or services, including through granting discounts or other benefits, or imposing penalties.
- Provide you a different level or quality of goods or services.
- Suggest that you may receive a different price or rate for goods or services or a different level or quality of goods or services.

Record Retention

Your personal information will not be kept for longer than is necessary for the business purpose for which it is collected and processed. We will retain your personal information and records based on established record retention policies pursuant to California law and in compliance with all federal and state retention obligations. Additionally, we will retain your personal information to comply with applicable laws, regulations, and legal processes (such as responding to subpoenas or court orders), and to respond to legal claims, resolve disputes, and comply with legal or regulatory recordkeeping requirements

Changes to This CCPRA & CPRA Notice

Stewart reserves the right to amend this CCPA & CPRA Notice at our discretion and at any time. When we make changes to this CCPA & CPRA Notice, we will post the updated Notice on Stewart's website and update the Notice's effective date.

CALIFORNIA "GOOD FUNDS" LAW

California Insurance Code Section 12413.1 regulates the disbursement of escrow and sub-escrow funds by title companies. The law requires that funds be deposited in the title company escrow account and available for withdrawal prior to disbursement. Funds received by Stewart Title Guaranty Company Commercial Services (San Diego) via wire transfer may be disbursed upon receipt. Funds received via cashier's checks or teller checks drawn on a California Bank may be disbursed on the next business day after the day of deposit. If funds are received by any other means, recording and/or disbursement may be delayed, and you should contact your title or escrow officer. All escrow and sub-escrow funds received will be deposited with other escrow funds in one or more non-interest bearing escrow accounts in a financial institution selected by Stewart Title Guaranty Company Commercial Services (San Diego). Stewart Title Guaranty Company Commercial Services (San Diego) may receive certain direct or indirect benefits from the financial institution by reason of the deposit of such funds or the maintenance of such accounts with the financial institution, and Stewart Title Guaranty Company Commercial Services (San Diego) shall have no obligation to account to the depositing party in any manner for the value of, or to pay to such party, any benefit received by Stewart Title Guaranty Company Commercial Services (San Diego). Such benefits shall be deemed additional compensation to Stewart Title Guaranty Company Commercial Services (San Diego) for its services in connection with the escrow or sub-escrow.

If any check submitted is dishonored upon presentation for payment, you are authorized to notify all principals and/or their respective agents of such nonpayment.

-
- 12. There has been no harvesting or production of any oil, gas, geothermal materials or other minerals from or on the Land and there are no oil, gas, geothermal and/or mineral leases, licenses, options, rights of first refusal, and/or contracts to sell, affecting the mineral rights associated with the Land, or other parties currently in possession, of the mineral rights on the Land, except the following: **(If none, please state "none")**

-
- 13. Other than the Affiant, there are no other parties currently in possession of the Land, including but not limited to, any possessory interest associated with the harvesting of any oil, gas, geothermal materials or other minerals, except the following: **(If none, please state "none")**

-
- 14. Affiant has not executed and will not execute any documents or instruments related to the title to, or interest in, the Land prior to the recordation of the documents in this transaction.

-
- 15. By signing below, Affiant agrees to cooperate with TITLE and, upon request from TITLE, to promptly provide and/or execute, any corrective or curative information or documentation requested.

This is a sworn affidavit and is made for the purpose of inducing TITLE to provide certain insurance coverage to a purchaser and/or lender, and the representations contained herein are material to such insurance coverage. The undersigned hereby indemnifies and holds TITLE harmless from any loss or damage, liability, costs, expenses and attorneys' fees which it may sustain under its policies of title insurance or commitments to the extent any representation contained herein is incorrect. The undersigned understands that TITLE may decide not to provide the requested title insurance despite the information and affirmations contained herein.

PLEASE READ, COMPLETE AND RESPOND TO ALL STATEMENTS CONTAINED IN THIS OWNER'S AFFIDAVIT AND INDEMNITY BEFORE SIGNING IN THE PRESENCE OF A NOTARY PUBLIC. THE NOTARY PUBLIC WILL EXECUTE THE ACKNOWLEDGMENT ON THE FOLLOWING PAGE. HOWEVER, IF YOU DO NOT UNDERSTAND OR HAVE ANY QUESTIONS ABOUT THIS AFFIDAVIT, YOU SHOULD SEEK THE ASSISTANCE OF YOUR INDEPENDENT FINANCIAL AND/OR LEGAL ADVISOR BEFORE SIGNING.

CALIFORNIA LAND TITLE ASSOCIATION

**STANDARD COVERAGE POLICY – 1990
EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
(b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
(a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
(b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
(c) resulting in no loss or damage to the insured claimant;
(d) attaching or created subsequent to Date of Policy; or
(e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy

**PROCEDURES TO ACCOMPANY THE
RESTRICTIVE COVENANT MODIFICATION FORM**

The law prohibits unlawfully restrictive covenants based upon:

“...age, race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, disability, veteran or military status, genetic information, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry... Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.”

As the individual holding or acquiring an interest in the property, you may elect to have any unlawfully restrictive covenants “removed”, which means “redacted.”

To have the unlawfully restrictive covenant removed, you may prepare and submit to the county recorder’s office, a “Restrictive Covenant Modification” form (RCM) together with a copy of the attached document with the unlawfully restrictive covenant redacted. This request must be submitted to the county recorder’s office and must include your return address so the county recorder can notify you of the action taken by the county counsel.

NOTE: The RCM provided with your title product MAY NOT be the same form required by your county recorder’s office; please double check your county recorder’s office before completing this form.

The process at the county recorder’s office is as follows:

- The county recorder takes the RCM with the redacted document and the original document attached and submits it to the county counsel for review to determine if, from a legal standpoint, the language was an unlawfully restrictive covenant and thus the redacted version should be indexed and recorded.
- The county counsel shall inform the county recorder of his/her determination within a reasonable amount of time, not to exceed three months from the date of your request.
- If county counsel determined that the redacted language was unlawful then, once recorded, the redacted document is the only one that effects the property and this modified document has the same effective date as the original document.
- If county counsel determined that the redacted language was not unlawful then county counsel will return the RCM package to the county recorder and the county recorder will advise the requestor that same the request has been denied and the redacted document has not been recorded.
- The modification document shall be indexed in the same manner as the original document and shall contain a recording reference to the original document.

UNLAWFULLY RESTRICTIVE COVENANTS ACKNOWLEDGMENT AND INDEMNIFICATION

STEWART TITLE GUARANTY COMPANY
IS LICENSED BY THE STATE OF CALIFORNIA UNDER THE DEPARTMENT OF INSURANCE LICENSE NO. 1892

The undersigned hereby acknowledge receipt of (1) the statutory required language describing unlawfully restrictive covenants in the title product from Stewart Title Guaranty Company ("Stewart Title"); (2) a copy of the Restrictive Covenant Modification (RCM) form; (3) the procedures describing how to have, when applicable, an unlawfully restrictive covenant of record updated; and (4) when applicable, notice of actual knowledge of a potential unlawfully restrictive covenant.

The undersigned further acknowledge that he/she/they have received, read, understand and accept these documents in connection with the above-described transaction and have received a copy of this acknowledgment as evidenced by the signature below.

If the undersigned requested of Stewart Title assistance with preparation of the RCM form, the undersigned attests that Stewart Title is directly involved in the pending transaction and that the request to Stewart Title was made prior to close of escrow. The undersigned agrees and understands that Stewart Title will provide guidance in my/our preparation of the RCM and required attachments and/or may submit such RCM package to the county recorder on my/our behalf. The undersigned agrees that Stewart Title shall have no liability associated with the creation or preparation of and/or recordation of a RCM and its attachments.

The undersigned acknowledge and understand that Stewart Title will rely upon this acknowledgment as evidence that Stewart Title has fulfilled its duties and obligations under the law with respect to unlawfully restrictive covenants. The undersigned jointly and severally agree to hold harmless Stewart Title Guaranty Company, its officers, employees, agents, parent, affiliated and subsidiary companies, and successors and assigns from and against any and all damages or liability and agree to reimburse Stewart Title for all losses, costs, charges, attorneys' fees or other expenses which shall or may at any time be suffered, sustained or incurred by reason of, or in consequence of or related to these unlawfully restrictive covenants and the RCM submission and form.

Privacy Notice for California Residents

Pursuant to the California Consumer Privacy Act of 2018 ("CCPA"), Stewart Information Services Corporation and its subsidiary companies (collectively, "Stewart") are providing this **Privacy Notice for California Residents** ("CCPA Notice"). This CCPA Notice supplements the information contained in Stewart's existing privacy notice and applies solely to all visitors, users and others who reside in the State of California or are considered California Residents ("consumers" or "you"). Terms used but not defined shall have the meaning ascribed to them in the CCPA.

Information Stewart Collects

Stewart collects information that identifies, relates to, describes, references, is capable of being associated with, or could reasonably be linked, directly or indirectly, with a particular consumer, household, or device. Most of the information that Stewart collects in the course of its regular business is already protected pursuant to the Gramm-Leach-Bliley Act (GLBA). Additionally, much of this information comes from government records or other information already in the public domain. Personal information under the CCPA does not include:

- Publicly available information from government records.
- Deidentified or aggregated consumer information.
- Certain personal information protected by other sector-specific federal or California laws, including but not limited to the Fair Credit Reporting Act (FCRA), GLBA and California Financial Information Privacy Act (FIPA).

Specifically, Stewart has collected the following categories of personal information from consumers within the last twelve (12) months:

Some personal information included in this category may overlap with other categories. | YES |
| C. Protected classification characteristics under California or federal law. | Age (40 years or older), race, color, ancestry, national origin, citizenship, religion or creed, marital status, medical condition, physical or mental disability, sex (including gender, gender identity, gender expression, pregnancy or childbirth and related medical conditions), sexual orientation, veteran or military status, genetic information (including familial genetic information). | YES |
| D. Commercial information. | Records of personal property, products or services purchased, obtained, or considered, or other purchasing or consuming histories or tendencies. | YES |
| E. Biometric information. | Genetic, physiological, behavioral, and biological characteristics, or activity patterns used to extract a template or other identifier or identifying information, such as, fingerprints, faceprints, and voiceprints, iris or retina scans, keystroke, gait, or other physical patterns, and sleep, health, or exercise data. | YES |
| F. Internet or other similar network activity. | Browsing history, search history, information on a consumer's interaction with a website, application, or advertisement. | YES |
| G. Geolocation data. | Physical location or movements. | YES |
| H. Sensory data. | Audio, electronic, visual, thermal, olfactory, or similar information. | YES |
| I. Professional or employment-related information. | Current or past job history or performance evaluations. | YES |
| J. Non-public education information (per the Family Educational Rights and Privacy Act (20 U.S.C. Section 1232g, 34 C.F.R. Part 99)). | Education records directly related to a student maintained by an educational institution or party acting on its behalf, such as grades, transcripts, class lists, student schedules, student identification codes, student financial information, or student disciplinary records. | YES |
| K. Inferences drawn from other personal information. | Profile reflecting a person's preferences, characteristics, psychological trends, predispositions, behavior, attitudes, intelligence, abilities, and aptitudes. | YES |

Stewart obtains the categories of personal information listed above from the following categories of sources:

- Directly and indirectly from customers, their designees or their agents (For example, realtors, lenders, attorneys, etc.)
- Directly and indirectly from activity on Stewart's website or other applications.
- From third-parties that interact with Stewart in connection with the services we provide.

Use of Personal Information

Stewart may use or disclose the personal information we collect for one or more of the following purposes:

- To fulfill or meet the reason for which the information is provided.
- To provide, support, personalize, and develop our website, products, and services.
- To create, maintain, customize, and secure your account with Stewart.
- To process your requests, purchases, transactions, and payments and prevent transactional fraud.
- To prevent and/or process claims.
- To assist third party vendors/service providers who complete transactions or perform services on Stewart's behalf.
- As necessary or appropriate to protect the rights, property or safety of Stewart, our customers or others.
- To provide you with support and to respond to your inquiries, including to investigate and address your concerns and monitor and improve our responses.
- To personalize your website experience and to deliver content and product and service offerings relevant to your interests, including targeted offers and ads through our website, third-party sites, and via email or text message (with your consent, where required by law).
- To help maintain the safety, security, and integrity of our website, products and services, databases and other technology assets, and business.
- To respond to law enforcement or regulator requests as required by applicable law, court order, or governmental regulations.
- Auditing for compliance with federal and state laws, rules and regulations.
- Performing services including maintaining or servicing accounts, providing customer service, processing or fulfilling orders and transactions, verifying customer information, processing payments, providing advertising or marketing services or other similar services.
- To evaluate or conduct a merger, divestiture, restructuring, reorganization, dissolution, or other sale or transfer of some or all of our assets, whether as a going concern or as part of bankruptcy, liquidation, or similar proceeding, in which personal information held by us is among the assets transferred.

Stewart will not collect additional categories of personal information or use the personal information we collected for materially different, unrelated, or incompatible purposes without providing you notice.

Disclosure of Personal Information to Affiliated Companies and Nonaffiliated Third Parties

Stewart does not sell your personal information to nonaffiliated third parties. Stewart may share your information with those you have designated as your agent in the course of your transaction (for example, a realtor or a lender). Stewart may disclose your personal information to a third party for a business purpose. Typically, when we disclose personal information for a business purpose, we enter a contract that describes the purpose and requires the recipient to both keep that personal information confidential and not use it for any purpose except performing the contract.

We share your personal information with the following categories of third parties:

- Service providers and vendors (For example, search companies, mobile notaries, and companies providing credit/debit card processing, billing, shipping, repair, customer service, auditing, marketing, etc.)
- Affiliated Companies
- Litigation parties and attorneys, as required by law.
- Financial rating organizations, rating bureaus and trade associations.
- Federal and State Regulators, law enforcement and other government entities

In the preceding twelve (12) months, Stewart has disclosed the following categories of personal information for a business purpose:

- Category A: Identifiers
- Category B: California Customer Records personal information categories
- Category C: Protected classification characteristics under California or federal law
- Category D: Commercial Information
- Category E: Biometric Information
- Category F: Internet or other similar network activity
- Category G: Geolocation data
- Category H: Sensory data
- Category I: Professional or employment-related information
- Category J: Non-public education information
- Category K: Inferences

Consumer Rights and Choices

The CCPA provides consumers (California residents) with specific rights regarding their personal information. This section describes your CCPA rights and explains how to exercise those rights.

Access to Specific Information and Data Portability Rights

You have the right to request that Stewart disclose certain information to you about our collection and use of your personal information over the past 12 months. Once we receive and confirm your verifiable consumer request, Stewart will disclose to you:

- The categories of personal information Stewart collected about you.
- The categories of sources for the personal information Stewart collected about you.
- Stewart's business or commercial purpose for collecting that personal information.
- The categories of third parties with whom Stewart shares that personal information.
- The specific pieces of personal information Stewart collected about you (also called a data portability request).
- If Stewart disclosed your personal data for a business purpose, a listing identifying the personal information categories that each category of recipient obtained.

Deletion Request Rights

You have the right to request that Stewart delete any of your personal information we collected from you and retained, subject to certain exceptions. Once we receive and confirm your verifiable consumer request, Stewart will delete (and direct our service providers to delete) your personal information from our records, unless an exception applies.

Stewart may deny your deletion request if retaining the information is necessary for us or our service providers to:

1. Complete the transaction for which we collected the personal information, provide a good or service that you requested, take actions reasonably anticipated within the context of our ongoing business relationship with you, or otherwise perform our contract with you
2. Detect security incidents, protect against malicious, deceptive, fraudulent, or illegal activity, or prosecute those responsible for such activities.
3. Debug products to identify and repair errors that impair existing intended functionality.
4. Exercise free speech, ensure the right of another consumer to exercise their free speech rights, or exercise another right provided for by law.
5. Comply with the California Electronic Communications Privacy Act (Cal. Penal Code § 1546 *seq.*).
6. Engage in public or peer-reviewed scientific, historical, or statistical research in the public interest that adheres to all other applicable ethics and privacy laws, when the information's deletion may likely render impossible or seriously impair the research's achievement, if you previously provided informed consent.
7. Enable solely internal uses that are reasonably aligned with consumer expectations based on your relationship with us.
8. Comply with a legal obligation.
9. Make other internal and lawful uses of that information that are compatible with the context in which you provided it.

Exercising Access, Data Portability, and Deletion Rights

To exercise the access, data portability, and deletion rights described above, please submit a verifiable consumer request to us either:

- Calling us Toll Free at 1-866-571-9270
- Emailing us at Privacyrequest@stewart.com
- Visiting <http://stewart.com/ccpa>

Only you, or someone legally authorized to act on your behalf, may make a verifiable consumer request related to your personal information. You may also make a verifiable consumer request on behalf of your minor child.

To designate an authorized agent, please contact Stewart through one of the methods mentioned above.

You may only make a verifiable consumer request for access or data portability twice within a 12-month period. The verifiable consumer request must:

- Provide sufficient information that allows us to reasonably verify you are the person about whom we collected personal information or an authorized representative.
- Describe your request with sufficient detail that allows us to properly understand, evaluate, and respond to it.

Stewart cannot respond to your request or provide you with personal information if we cannot verify your identity or authority to make the request and confirm the personal information relates to you.

Making a verifiable consumer request does not require you to create an account with Stewart.

Response Timing and Format

We endeavor to respond to a verifiable consumer request within forty-five (45) days of its receipt. If we require more time (up to an additional 45 days), we will inform you of the reason and extension period in writing.

A written response will be delivered by mail or electronically, at your option.

Any disclosures we provide will only cover the 12-month period preceding the verifiable consumer request's receipt. The response we provide will also explain the reasons we cannot comply with a request, if applicable. For data portability requests, we will select a format to provide your personal information that is readily useable and should allow you to transmit the information from one entity to another entity without hindrance.

Stewart does not charge a fee to process or respond to your verifiable consumer request unless it is excessive, repetitive, or manifestly unfounded. If we determine that the request warrants a fee, we will tell you why we made that decision and provide you with a cost estimate before completing your request.

Non-Discrimination

Stewart will not discriminate against you for exercising any of your CCPA rights. Unless permitted by the CCPA, we will not:

- Deny you goods or services.
- Charge you a different prices or rates for goods or services, including through granting discounts or other benefits, or imposing penalties.
- Provide you a different level or quality of goods or services.
- Suggest that you may receive a different price or rate for goods or services or a different level or quality of goods or services.

Changes to Our Privacy Notice

Stewart reserves the right to amend this privacy notice at our discretion and at any time. When we make changes to this privacy notice, we will post the updated notice on Stewart's website and update the notice's effective date. **Your continued use of Stewart's website following the posting of changes constitutes your acceptance of such changes.**

NOTES AND REQUIREMENTS

- A. If you have knowledge of any other transfers or conveyances, please contact your title officer immediately for further research and review. The only transfers or conveyances shown in the public records within 24 months of the date of this report are: None
- B. There are no items in this Preliminary Report that will cause Stewart Title Guaranty Company to decline to attach the CLTA Endorsement Form 116.01-06 (or similar ALTA 22-06 equivalent), indicating that there is Agricultural Land; known as xxx 40 parcels, Unincorporated Fresno, CA 93703.
- C. All Transactions - Seller(s) and Buyer(s) or Borrowers are provided, as attachments, the document entitled "Acknowledgement of Receipt, Understanding and Approval of STG Privacy Notice for Stewart Title Companies and Stewart's Affiliated Business Arrangement Disclosure Statement" and the individually named documents, for review and acknowledgment prior to closing.
- D. All Transactions - Buyer(s)/Seller(s)/Borrower(s) are provided the Preliminary Report for review and acknowledgment prior to closing. Buyer(s) approval shall include the Preliminary Report items that are to remain as exceptions to the title policy.
- E. Purchase Transactions Only - Seller(s)/Owner(s) are provided Stewart Title Guaranty Company's Owner's Affidavit and Indemnity for completion and submission prior to closing.
- F. There are no items in this Preliminary Report that will cause Stewart Title Guaranty Company to decline to attach the CLTA Endorsement Form 100.2-06 (or a similar ALTA 9 equivalent), or, if applicable, the CLTA Endorsement Form 115.1-06 (or a similar ALTA 4 equivalent) or CLTA Endorsement Form 115.2-06 (or a similar ALTA 5 equivalent) to an ALTA Loan Policy, when issued.
- G. A Preliminary Change of Ownership Report must be completed by the transferee (buyer) prior to the transfer of property in accordance with the provisions of Section 480.3 of the Revenue and Taxation Code. The Preliminary Change of Ownership Report should be submitted to the recorder concurrent with the recordation of any document effecting a change of ownership. If a document evidencing a change of ownership (i.e. Deed, Affidavit-Death Joint Tenant) is presented to the recorder for recording without a preliminary change of ownership report, the recorder may charge an additional \$20.00.
- H. Some counties, including San Francisco, require that a Transfer Tax Affidavit be completed and signed by the Grantor for each deed submitted for recording. This is in addition to a Preliminary Change of Ownership Report.
- I. In addition to County Transfer Tax (which is most typically \$1.10 per thousand), any conveyance may be subject to a City Transfer and/or Conveyance Tax, as follows.

CALIFORNIA "GOOD FUNDS" LAW

California Insurance Code Section 12413.1 regulates the disbursement of escrow and sub-escrow funds by title companies. The law requires that funds be deposited in the title company escrow account and available for withdrawal prior to disbursement. Funds received by Stewart Title Guaranty Company Commercial Services (San Diego) via wire transfer may be disbursed upon receipt. Funds received via cashier's checks or teller checks drawn on a California Bank may be disbursed on the next business day after the day of deposit. If funds are received by any other means, recording and/or disbursement may be delayed, and you should contact your title or escrow officer. All escrow and sub-escrow funds received will be deposited with other escrow funds in one or more non-interest bearing escrow accounts in a financial institution selected by Stewart Title Guaranty Company Commercial Services (San Diego). Stewart Title Guaranty Company Commercial Services (San Diego) may receive certain direct or indirect benefits from the financial institution by reason of the deposit of such funds or the maintenance of such accounts with the financial institution, and Stewart Title Guaranty Company Commercial Services (San Diego) shall have no obligation to account to the depositing party in any manner for the value of, or to pay to such party, any benefit received by Stewart Title Guaranty Company Commercial Services (San Diego). Such benefits shall be deemed additional compensation to Stewart Title Guaranty Company Commercial Services (San Diego) for its services in connection with the escrow or sub-escrow.

If any check submitted is dishonored upon presentation for payment, you are authorized to notify all principals and/or their respective agents of such nonpayment.

3. Other than the Affiant, there are no parties entitled to possession of the Land other than the following: **(If none, please state "none")**

4. There are no leases, licenses, options, rights of first refusal, or contracts to sell, affecting the Land, or any parties currently in possession, of the Land, except the following: **(If none, please state "none")**

5. All assessments by a management company or owners' association, or for common area or building maintenance, if any, are paid current or are not yet due and payable except for the following **(If none, please state "none")**

6. There are no pending contemplated repairs/improvements to the Land, except the following: **(If none, please state "none")**

7. There has been no construction, building materials, repairs, improvements or remodeling performed, provided, furnished or delivered within the last 12 months, except as follows: **(If none, please state "none")**

This work performed, as detailed above, was completed on _____ (date of completion).

8. Affiant is not aware of the existence of any of the following:
 - a. Improvements, including fences, encroaching into any easements on the Land, or over any boundary lines of the Land.
 - b. Adjoining property improvements encroaching onto the Land.
 - c. Liens against the Land and/or judgments or tax liens against Affiant or any other property owner currently in title, except those described in the Preliminary Report or Commitment issued in connection with the above referenced Order Number.
 - d. Outstanding claims or persons entitled to claims for mechanics' or materialman liens against the Land.
 - e. Pending repairs/improvements to any adjacent street(s) or any assessments related to road maintenance.
 - f. Any pending litigation involving the Land, the Affiant or any other property owner currently in title.
 - g. Recent improvements completed or being made to any common area(s) located within the subdivision in which the Land is located.

- h. Violations of building permits, zoning laws or recorded covenants, conditions and/or restrictions imposed on the Land.
- i. Any pending assessments for Community Facility Districts.
- j. Any new, pending or existing obligation or loan including any home improvements on the Land pursuant to the PACE or HERO program, or any other similar type program.
- k. Any unrecorded or recorded easements, covenants, conditions, or restrictions affecting the Land, other than those listed in the Preliminary Report or Title Commitment.
- l. Any use of the property for the production, sale, warehousing or transporting of fresh fruits, vegetables, livestock or poultry (e.g., supermarkets, restaurants, wineries, breweries and meat packing plants).

With regard to 8a.-8l, except as follows: (If none, please state "none")

-
- 9. No proceedings in bankruptcy or receivership have been instituted or filed by, or against, the Affiant or any other property owner currently in title.
 - 10. There are no unpaid taxes, assessments or utility type bills including but not limited to bills for water, sewer, hazardous waste, recycling, storm drain and/or rubbish and there are no liens related to such utilities from or on the Land, with the exception of the following: **(If none, please state "none")**

-
- 11. There are no financial obligations secured by trust deeds, mortgages, financing statements, vendor's liens, security agreements or otherwise, against the Land, except as set forth in the Preliminary Report, proforma and/or Commitment, and as set forth below: **(If none, please state "none")**

CALIFORNIA LAND TITLE ASSOCIATION

**STANDARD COVERAGE POLICY – 1990
EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
(b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
(a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
(b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
(c) resulting in no loss or damage to the insured claimant;
(d) attaching or created subsequent to Date of Policy; or
(e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy

**PROCEDURES TO ACCOMPANY THE
RESTRICTIVE COVENANT MODIFICATION FORM**

The law prohibits unlawfully restrictive covenants based upon:

“...age, race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, disability, veteran or military status, genetic information, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry... Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.”

As the individual holding or acquiring an interest in the property, you may elect to have any unlawfully restrictive covenants “removed”, which means “redacted.”

To have the unlawfully restrictive covenant removed, you may prepare and submit to the county recorder’s office, a “Restrictive Covenant Modification” form (RCM) together with a copy of the attached document with the unlawfully restrictive covenant redacted. This request must be submitted to the county recorder’s office and must include your return address so the county recorder can notify you of the action taken by the county counsel.

NOTE: The RCM provided with your title product MAY NOT be the same form required by your county recorder’s office; please double check your county recorder’s office before completing this form.

The process at the county recorder’s office is as follows:

- The county recorder takes the RCM with the redacted document and the original document attached and submits it to the county counsel for review to determine if, from a legal standpoint, the language was an unlawfully restrictive covenant and thus the redacted version should be indexed and recorded.
- The county counsel shall inform the county recorder of his/her determination within a reasonable amount of time, not to exceed three months from the date of your request.
- If county counsel determined that the redacted language was unlawful then, once recorded, the redacted document is the only one that effects the property and this modified document has the same effective date as the original document.
- If county counsel determined that the redacted language was not unlawful then county counsel will return the RCM package to the county recorder and the county recorder will advise the requestor that same the request has been denied and the redacted document has not been recorded.
- The modification document shall be indexed in the same manner as the original document and shall contain a recording reference to the original document.

Privacy Notice for California Residents

Pursuant to the California Consumer Privacy Act of 2018 (“CCPA”), Stewart Information Services Corporation and its subsidiary companies (collectively, “Stewart”) are providing this **Privacy Notice for California Residents** (“CCPA Notice”). This CCPA Notice supplements the information contained in Stewart’s existing privacy notice and applies solely to all visitors, users and others who reside in the State of California or are considered California Residents (“consumers” or “you”). Terms used but not defined shall have the meaning ascribed to them in the CCPA.

Information Stewart Collects

Stewart collects information that identifies, relates to, describes, references, is capable of being associated with, or could reasonably be linked, directly or indirectly, with a particular consumer, household, or device. Most of the information that Stewart collects in the course of its regular business is already protected pursuant to the Gramm-Leach-Bliley Act (GLBA). Additionally, much of this information comes from government records or other information already in the public domain. Personal information under the CCPA does not include:

- Publicly available information from government records.
- Deidentified or aggregated consumer information.
- Certain personal information protected by other sector-specific federal or California laws, including but not limited to the Fair Credit Reporting Act (FCRA), GLBA and California Financial Information Privacy Act (FIPA).

Specifically, Stewart has collected the following categories of personal information from consumers within the last twelve (12) months:

Stewart obtains the categories of personal information listed above from the following categories of sources:

- Directly and indirectly from customers, their designees or their agents (For example, realtors, lenders, attorneys, etc.)
- Directly and indirectly from activity on Stewart's website or other applications.
- From third-parties that interact with Stewart in connection with the services we provide.

Use of Personal Information

Stewart may use or disclose the personal information we collect for one or more of the following purposes:

- To fulfill or meet the reason for which the information is provided.
- To provide, support, personalize, and develop our website, products, and services.
- To create, maintain, customize, and secure your account with Stewart.
- To process your requests, purchases, transactions, and payments and prevent transactional fraud.
- To prevent and/or process claims.
- To assist third party vendors/service providers who complete transactions or perform services on Stewart's behalf.
- As necessary or appropriate to protect the rights, property or safety of Stewart, our customers or others.
- To provide you with support and to respond to your inquiries, including to investigate and address your concerns and monitor and improve our responses.
- To personalize your website experience and to deliver content and product and service offerings relevant to your interests, including targeted offers and ads through our website, third-party sites, and via email or text message (with your consent, where required by law).
- To help maintain the safety, security, and integrity of our website, products and services, databases and other technology assets, and business.
- To respond to law enforcement or regulator requests as required by applicable law, court order, or governmental regulations.
- Auditing for compliance with federal and state laws, rules and regulations.
- Performing services including maintaining or servicing accounts, providing customer service, processing or fulfilling orders and transactions, verifying customer information, processing payments, providing advertising or marketing services or other similar services.
- To evaluate or conduct a merger, divestiture, restructuring, reorganization, dissolution, or other sale or transfer of some or all of our assets, whether as a going concern or as part of bankruptcy, liquidation, or similar proceeding, in which personal information held by us is among the assets transferred.

Stewart will not collect additional categories of personal information or use the personal information we collected for materially different, unrelated, or incompatible purposes without providing you notice.

Disclosure of Personal Information to Affiliated Companies and Nonaffiliated Third Parties

Stewart does not sell your personal information to nonaffiliated third parties. Stewart may share your information with those you have designated as your agent in the course of your transaction (for example, a realtor or a lender). Stewart may disclose your personal information to a third party for a business purpose. Typically, when we disclose personal information for a business purpose, we enter a contract that describes the purpose and requires the recipient to both keep that personal information confidential and not use it for any purpose except performing the contract.

We share your personal information with the following categories of third parties:

- Service providers and vendors (For example, search companies, mobile notaries, and companies providing credit/debit card processing, billing, shipping, repair, customer service, auditing, marketing, etc.)
- Affiliated Companies
- Litigation parties and attorneys, as required by law.
- Financial rating organizations, rating bureaus and trade associations.
- Federal and State Regulators, law enforcement and other government entities

In the preceding twelve (12) months, Stewart has disclosed the following categories of personal information for a business purpose:

- Category A: Identifiers
- Category B: California Customer Records personal information categories
- Category C: Protected classification characteristics under California or federal law
- Category D: Commercial Information
- Category E: Biometric Information
- Category F: Internet or other similar network activity

- Category J: Non-public education information
- Category K: Inferences

Consumer Rights and Choices

The CCPA provides consumers (California residents) with specific rights regarding their personal information. This section describes your CCPA rights and explains how to exercise those rights.

Access to Specific Information and Data Portability Rights

You have the right to request that Stewart disclose certain information to you about our collection and use of your personal information over the past 12 months. Once we receive and confirm your verifiable consumer request, Stewart will disclose to you:

- The categories of personal information Stewart collected about you.
- The categories of sources for the personal information Stewart collected about you.
- Stewart's business or commercial purpose for collecting that personal information.
- The categories of third parties with whom Stewart shares that personal information.
- The specific pieces of personal information Stewart collected about you (also called a data portability request).
- If Stewart disclosed your personal data for a business purpose, a listing identifying the personal information categories that each category of recipient obtained.

Deletion Request Rights

You have the right to request that Stewart delete any of your personal information we collected from you and retained, subject to certain exceptions. Once we receive and confirm your verifiable consumer request, Stewart will delete (and direct our service providers to delete) your personal information from our records, unless an exception applies.

Stewart may deny your deletion request if retaining the information is necessary for us or our service providers to:

1. Complete the transaction for which we collected the personal information, provide a good or service that you requested, take actions reasonably anticipated within the context of our ongoing business relationship with you, or otherwise perform our contract with you
2. Detect security incidents, protect against malicious, deceptive, fraudulent, or illegal activity, or prosecute those responsible for such activities.
3. Debug products to identify and repair errors that impair existing intended functionality.
4. Exercise free speech, ensure the right of another consumer to exercise their free speech rights, or exercise another right provided for by law.
5. Comply with the California Electronic Communications Privacy Act (Cal. Penal Code § 1546 *seq.*).
6. Engage in public or peer-reviewed scientific, historical, or statistical research in the public interest that adheres to all other applicable ethics and privacy laws, when the information's deletion may likely render impossible or seriously impair the research's achievement, if you previously provided informed consent.
7. Enable solely internal uses that are reasonably aligned with consumer expectations based on your relationship with us.
8. Comply with a legal obligation.
9. Make other internal and lawful uses of that information that are compatible with the context in which you provided it.

Exercising Access, Data Portability, and Deletion Rights

To exercise the access, data portability, and deletion rights described above, please submit a verifiable consumer request to us either:

- Calling us Toll Free at 1-866-571-9270
- Emailing us at Privacyrequest@stewart.com
- Visiting <http://stewart.com/ccpa>

Only you, or someone legally authorized to act on your behalf, may make a verifiable consumer request related to your personal information. You may also make a verifiable consumer request on behalf of your minor child.

To designate an authorized agent, please contact Stewart through one of the methods mentioned above.

You may only make a verifiable consumer request for access or data portability twice within a 12-month period. The verifiable consumer request must:

- Provide sufficient information that allows us to reasonably verify you are the person about whom we collected personal information or an authorized representative.
- Describe your request with sufficient detail that allows us to properly understand, evaluate, and respond to it.

Stewart cannot respond to your request or provide you with personal information if we cannot verify your identity or authority to make the request and confirm the personal information relates to you.

Making a verifiable consumer request does not require you to create an account with Stewart.

Response Timing and Format

We endeavor to respond to a verifiable consumer request within forty-five (45) days of its receipt. If we require more time (up to an additional 45 days), we will inform you of the reason and extension period in writing.

A written response will be delivered by mail or electronically, at your option.

Any disclosures we provide will only cover the 12-month period preceding the verifiable consumer request's receipt. The response we provide will also explain the reasons we cannot comply with a request, if applicable. For data portability requests, we will select a format to provide your personal information that is readily useable and should allow you to transmit the information from one entity to another entity without hindrance.

Stewart does not charge a fee to process or respond to your verifiable consumer request unless it is excessive, repetitive, or manifestly unfounded. If we determine that the request warrants a fee, we will tell you why we made that decision and provide you with a cost estimate before completing your request.

Non-Discrimination

Stewart will not discriminate against you for exercising any of your CCPA rights. Unless permitted by the CCPA, we will not:

- Deny you goods or services.
- Charge you a different prices or rates for goods or services, including through granting discounts or other benefits, or imposing penalties.
- Provide you a different level or quality of goods or services.
- Suggest that you may receive a different price or rate for goods or services or a different level or quality of goods or services.

Changes to Our Privacy Notice

Stewart reserves the right to amend this privacy notice at our discretion and at any time. When we make changes to this privacy notice, we will post the updated notice on Stewart's website and update the notice's effective date. **Your continued use of Stewart's website following the posting of changes constitutes your acceptance of such changes.**

NOTES AND REQUIREMENTS

A. None

CALIFORNIA "GOOD FUNDS" LAW

California Insurance Code Section 12413.1 regulates the disbursement of escrow and sub-escrow funds by title companies. The law requires that funds be deposited in the title company escrow account and available for withdrawal prior to disbursement. Funds received by Stewart Title Guaranty Company Commercial Services (San Diego) via wire transfer may be disbursed upon receipt. Funds received via cashier's checks or teller checks drawn on a California Bank may be disbursed on the next business day after the day of deposit. If funds are received by any other means, recording and/or disbursement may be delayed, and you should contact your title or escrow officer. All escrow and sub-escrow funds received will be deposited with other escrow funds in one or more non-interest bearing escrow accounts in a financial institution selected by Stewart Title Guaranty Company Commercial Services (San Diego). Stewart Title Guaranty Company Commercial Services (San Diego) may receive certain direct or indirect benefits from the financial institution by reason of the deposit of such funds or the maintenance of such accounts with the financial institution, and Stewart Title Guaranty Company Commercial Services (San Diego) shall have no obligation to account to the depositing party in any manner for the value of, or to pay to such party, any benefit received by Stewart Title Guaranty Company Commercial Services (San Diego). Such benefits shall be deemed additional compensation to Stewart Title Guaranty Company Commercial Services (San Diego) for its services in connection with the escrow or sub-escrow.

If any check submitted is dishonored upon presentation for payment, you are authorized to notify all principals and/or their respective agents of such nonpayment.
